> With respect to the funds not yet apportioned and the items "apportioned but undergoing review," I am sure you appreciate that not all service programs are ready to go forward at the time the bill is enacted into law. For many reasons—technical difficulties, changes in concepts, lack of definitive plans—additional time is frequently required in order to assure the development of valid programs. As a matter of good business practice, we must assure that the requirement is still valid in the light of present circumstances, and that all significant aspects of the program have been properly worked out before the funds are released.

In addition, as President Eisenhower announced in his special message to Congress of August 8, numerous practical actions had already been ordered toward improving the readiness and posture of our military commands. These included the deployment of additional aircraft carriers to the 6th and 7th Fleets, the retention of a number of B–47 medium bombers and tankers, and an increase in the number and scope of ground forces' strategic and airborne exercises.

In considering the question of whether additional preparedness funds are needed at the present time, it is important to look at the defense appropriations bill to see what opportunities it provides the Secretary of Defense to enable him—as the chief administrator directly in charge of our ultracomplex Defense Establishment—to continuously assure maximum security according to the changing priorities of our political-military environment. I think this is a most important item.

In order to assure that no weapons program could suffer from lack of funds while Congress was not in session, an emergency fund of $150 million is provided in the legislation for application to any research and development or procurement account of the Army, Navy, Air Force, or Defense Department whenever the Secretary of Defense deems it necessary to speed up that particular program. Congress also provided transfer authority of $150 million through the emergency fund which can be used to accelerate any needy program. Furthermore, the Congress made available in section 535 an additional $150 million transfer authority for the acceleration of missile or satellite programs that the Secretary of Defense deems advantageous to the national defense.

In addition, each year the Department carries forward to the next budget some billions of dollars of unobligated balances. These balances are earmarked for specific projects, but, for various reasons, may not be obligated. In the current budget, it is expected there will be approximately 6.3 billion of balances unobligated during fiscal year 1961. Within certain procurement limitations, these funds can, if it is wise and necessary, be reprogramed with the consent of the Appropriations Committees of the Congress. For instance, if more money is needed for a Polaris submarine and there is an unobligated balance in Navy ship construction accounts, these funds could be transferred for this purpose. Or, if it was considered wise to proceed with more procurement of the Minuteman missile, funds could be reprogramed from other Air Force missile programs. The use of these unobligated balances thus provides a certain amount of additional flexibility to our Defense Establishment for procurement purposes.

Through these allowances permitting transfer of funds for research, for procurement, and for acceleration of programs, Congress has given the Defense Secretary broad authority. Furthermore, Congress has approved section 512A, a provision authorizing the President to permit the Defense Department to obligate appropriated funds at a faster rate than now planned whenever he deems such action to be necessary in the interest of national defense. Section 512B permits the President to provide for all the costs of an airborne alert on an actual deficiency basis if necessary. Although section B is little known and has not yet been used, it is highly important for it is another step that Congress has taken to assure that our defenses will not suffer for lack of funds in those areas where high priorities exist and emergencies can develop.

Aside from programs specifically provided for by congressional appropriations and the further authority of the President and the Secretary of Defense to administer their activities with freedom and flexibility, our Defense Establishment cannot meet the revolutionary challenges of the future unless it can and will move quickly for new funds with which to implement new policies at the time they are needed. I believe the record is clear that the present administration will come to Congress for more funds if and when they are necessary.

As President Eisenhower said in his August 8 message:

> Total resources are adequate, although a modest increase * * * may prove to be necessary to carry out the readiness measures. If such an increase should be required, I shall promptly request the necessary funds.
>
> Once again I assure the Congress that this Nation's military power is second to none and will be kept that way.

Secretary Gates wrote to Majority Leader JOHNSON on August 9:

> All of our programs, force levels and deployments are kept under constant review. Where technological breakthroughs occur, emphasis will be added; where programs are overtaken by events, terminations will be effected. This is in accord with the long-established policy of the executive branch; no change has been made in this policy.

And in his letter of August 12:

> But, this I can assure you—should we conclude that additional programs are required for the Nation's defense, the necessary funds will be requested regardless of the amounts involved.

In conclusion, I believe that Congress has provided sufficient funds in the fiscal year 1961 appropriations bill to provide the proficiency mix of defenses which will keep us secure. The foregoing review of military items which these funds make available impressively documents this conviction, in my opinion.

I feel that the Defense Department has demonstrated its competence to utilize these funds in the most effective manner according to changing conditions and priorities. There will always be minor differences of opinion on financial administration, but the strong, continuing cooperation of the executive branch with the legislative branch to the end of highest security seems clear. Moreover, Congress provides the money with such flexibility that the President, the Secretary of Defense, and their deputies are able to make use of it wisely, prudently, and efficiently.

For all these reasons, Congress can have confidence in the multidimensional character of the U.S. defense posture, its emphasis on the long haul, and the long-range validity of these basic concepts—and can be satisfied that adequate funds have now been appropriated to guard the Nation's security.

Our prime responsibility, however, is to be vigilant for needed additions and revisions and quick to bring them about with necessary action. We must avoid any aspect of complacency or lethargy, but sustain a critical, imaginative, and vigorous attitude which alone can produce that unmistakable margin of military supremacy upon which our national security rests.

FOREIGN TAX CREDIT—CONFERENCE REPORT

Mr. BYRD of Virginia. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10087) to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today, pp. 18410–18413, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. SALTONSTALL. Mr. President, will the Senator from Virginia state whether this is a unanimous report?

Mr. BYRD of Virginia. It is a unanimous report.

Mr. President, the bill deals with the limitations on the foreign tax credit with respect to taxes paid to foreign countries. There were 20 Senate amendments.

The main dispute with the House conferees was in connection with Senate amendment No. 10. Under this Senate amendment, where an affiliated group of corporations filed a consolidated return, income credits attributable to the income of a Western Hemisphere trade corporation which is taxed at 38 percent could not be used to offset the tax at 52 percent on the income from other corporations operating abroad, whether within or without the Western Hemisphere. The House conferees objected to this amendment. The conferees finally reached a compromise whereby the Senate rule would be applied in all cases except in the case of regulated public utility corporations. I believe this compromise was justified because of the fact that a regulated public utility corporation operating in the Western Hemisphere is not competing with other business corporations operating in this country. Accordingly, the Senate conferees agreed to this change in order to reach a conference settlement.

The other Senate amendments with slight modifications were agreed to by the House conferees.

Amendment No. 17, which was offered in the committee by the Senator from New Mexico [Mr. ANDERSON], was adopted with certain modifications suggested by the Treasury and accepted by Senator ANDERSON.

Amendment No. 18, which was offered by the Senator from Tennessee [Mr. GORE], which provides for the reporting of information by corporations with respect to foreign subsidiaries and new foreign corporations was rewritten at the suggestion of the Treasury to spell out in greater detail the type of information to be supplied and the penalty was modified so that it would not result in the entire loss of the foreign tax credit but one-tenth of such credit.

Mr. President, I move the adoption of the conference report.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. BYRD of Virginia. I yield.

Mr. LAUSCHE. Is this the bill to which the Senator from Tennessee [Mr. GORE] interposed objections on the floor of the Senate?

Mr. BYRD of Virginia. No. He suggested some amendments.

Mr. LAUSCHE. What is the position of the Treasury?

Mr. BYRD of Virginia. The Treasury approves the bill.

Mr. CARLSON. Mr. President, will the Senator from Virginia yield?

Mr. BYRD of Virginia. I yield.

Mr. CARLSON. There was unanimous agreement on the report. The bill was rewritten in conference to the satisfaction of the Treasury, I am certain, and of the chairman of the conferees. I trust the report will be unanimously approved by the Senate.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

SALARY INCREASES FOR MEMBERS OF POLICE, FIRE DEPARTMENT, OF THE DISTRICT OF COLUMBIA, THE PARK POLICE AND THE WHITE HOUSE POLICE—BILL INDEFINITELY POSTPONED

Mr. FREAR. Mr. President, on last evening the Senate passed with amendments the bill (S. 3713) to increase the salaries of officers and members of the Metropolitan Police force, and the Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes, and laid on the table a motion to reconsider the vote on its passage. Subsequently, the Senate, on motion, proceeded to consider the bill H.R. 13053 of an identical title, and passed it with a substitute amendment embracing the language of Senate bill S. 3713 as passed by the Senate.

In view of the action on the passage of the House bill, and notwithstanding the action of the Senate in laying on the table a motion to reconsider the passage of the Senate bill, I ask unanimous consent that the vote on its passage be reconsidered and the bill be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

GEORGE WASHINGTON UNIVERSITY TROUBADOURS

Mr. MOSS. Mr. President, it is a point of very special and personal pride with me to call attention to the activities of a group of young Washingtonians who now are representing a great university and this city in a most pleasing and entertaining manner. I speak, of course, of the George Washington University Troubadours, who began an extended engagement in New York's famed Radio City Music Hall on Thursday, August 11.

Perhaps the term "personal pride" is more understandable when I acknowledge the fact that I am a graduate of the university's law school and for many years have been an enthusiastic supporter of this great university, so uniquely located at the seat of government. The term "special pride" has still a different meaning to one who looks back over the nearly 10 years of unselfish service on the part of the unusual group of talented young men and women called the Troubadours. Since 1950, the Troubadours have traveled more than 175,000 miles to entertain American servicemen in remote bases and citizens in many foreign lands. They have distinguished themselves as good-will ambassadors everywhere they have visited, from the Aleutians to Tripoli.

While most Americans are enjoying the holiday season in the comfort of their homes, the Troubadours and their director, Dr. Robert H. Harmon, have voluntarily taken to the airways, to reach the out-of-way places on America's defense perimeter. Women members of the troup were the first white women to visit as far north as Thule, Greenland. They were the first entertainment group to venture into Narsarssuak, a narrow fiord in Greenland. In Iceland, they were greeted with enthusiasm by soldiers and citizens—so much so that their picture now hangs in the National Institute of Music in Reykjavik.

For the last 10 years they have made trips out of the country—14 trips in all—during Christmas, Easter, and summer vacations. In December 1960, they will journey to Newfoundland, Labrador, Baffin Island, Greenland, and Iceland, to sing at the special invitation of the Armed Services Entertainment Department and the State Department.

A special word should be said here about Dr. Harmon, whose talent and imagination created the singing tradition at the George Washington University. As a student at the university in 1921, Dr. Harmon was a member of the glee club. In 1924, he was named direc-

tor, and he has been so since that time. A practicing obstetrician in this city for all those years, he prides himself on never having missed "a delivery or a concert." Mrs. Harmon is associate director of the glee club, and has been the accompanist for many years. Their unselfish devotion and love of music have been an inspiring guide to many generations of university students.

This tribute to the Troubadours and the university is particularly fitting at this time, because the university has only recently announced the appointment of its 13th president, Dr. Thomas H. Carroll, a vice president of the Ford Foundation, and an outstanding educator, will take up his duties as president of the George Washington University in February 1961.

When asked about his appointment, Dr. Carroll commented, "The challenge of the George Washington University comes from its unique location in the very heart of the Nation's Capital.

"The role of government is obviously changing," he continued, "and the opportunities for greater mutual understanding among business, the professions, and government should be developed through education, particularly at an outstanding university located in the Nation's Capital."

For almost a century and a half this great university, founded in the spirit of the first President, has served this community and Nation. Through the years, thousands have come and gone from its campus; and, through its graduates, the university's name has become known around the world.

CIVIL DEFENSE AN UTTERLY USELESS BOONDOGGLE

Mr. YOUNG of Ohio. Mr. President, civil defense as now conducted in the United States is an utterly useless boondoggle.

Since 1951 over $1 billion of taxpayers' money has been thrown down the drain on what is theoretically known as our civil defense program. Over half a billion dollars of this was Federal money. The rest was wasted by State and local governments. At the same time they declare that revenue for vitally needed projects, such as housing, sewage treatment, streets, and many others, cannot be found.

In addition, well over $82 million worth of surplus Federal property has been turned over to State and local civil defense officials. On previous occasions I have reported in detail on the misuse of this property in my State of Ohio. The distinguished senior Senator from Illinois [Mr. DOUGLAS] has done likewise regarding waste of taxpayers' money in his State and in the Nation, notably in the case involving the community of Carpenterville, Ill.

Mr. President, I am sure that Ohio and Illinois are not unique in respect to this inexcusable waste and misuse of Government property by civil defense officials.

Other Federal agencies also spend money and devote staff time to civil defense projects. The appropriation for next year includes over $6 million for this purpose.

Federal money is being squandered on this outmoded agency at the rate of over $5,000 an hour around the clock. State and local tax funds are being spent at approximately the same rate. If we would allow the appropriation requested by administration officials, Federal spending would be hiked to $10,000 an hour, with higher boosts for years to come.

To date, this agency has requested appropriations totaling over $2 billion. Wisely, the Congress has refused to grant this exorbitant sum. Only this year, we appropriated $16 million less than requested, and I personally feel that the meat ax should have cut thicker and deeper.

Each year, millions of dollars are appropriated for the use of the civil defense bureaucrats. In doing so, we fool ourselves and the American people into believing that something is being accomplished. It is true that in comparison to the total annual budget, this appropriation is not very significant. However, in terms of taxpayer's dollars spent in the long run, the waste will be fantastic. How many better ways there are to spend these billions of hard earned tax dollars

Mr. President, Americans are entitled to know what they are receiving for this billion-dollar throwaway.

Last week, the distinguished senior Senator from Nebraska [Mr. HRUSKA] placed in the RECORD a review of the accomplishments of the Republican administration regarding civil defense activities. To read it, one would think that nothing whatever is wrong with this program. If ever there were an instance for the old truism, "All that glitters is not gold," this is it.

Mr. President, the truth is that we have less civil defense today than when we started almost 10 years ago. At that time there was no such thing as the intercontinental ballistic missile armed with a hydrogen warhead. It was possible in those years to plan for a war in which 75 to 95 percent of the population would be alive at the end. As the capabilities of modern warfare have increased, this concept is as outmoded as tallow dips, mustache cups, and flintlock muskets.

Mr. President, I was going to say that this conception of civil defense is as outmoded as women's bustles, but perhaps it is much more outmoded than that, as women's bustles may again come into fashion, one of these days.

In spite of this, boondoggling Civil Defense officials still advocate a policy of evacuation and of primitive, useless basement shelters. Citizens generally, in the event of a nuclear attack, would not know whether to run or to hide. Civil Defense boondogglers advocate both.

In my home city of Cleveland, Ohio, on every Monday, at 12:15 p.m., the Civil Defense sirens have screeched for years. The citizens of Cleveland do not know what to do about it—whether to run or to pray or to hide, or whether to go to the nearest cocktail bar.

Despite this, the boondoggling practice continues, and of course this feeding at the public trough by high-salaried Civil Defense officials who direct these activities continues.

The truth is that we have spent over a billion dollars for millions of contradictory pamphlets that have only confused Americans, who would not know what to do in the face of enemy attack. We have paid out money for stockpiles of strategic materials which have been handled with unbelievable mismanagement and waste, such as occurred in my own State of Ohio, where thousands of dollars were spent for penicillin which Civil Defense officials later had to destroy as utterly useless.

This huge sum of money has gone largely to provide jobs for political hacks in county courthouses and city halls across the land, for shrieking sirens, for silly schemes such as useless synchronized traffic lights, in the city of Columbus, Ohio. Mr. President, there should have been indictments by the grand jury for the expenditure of nearly $700,000 of the taxpayers' money to synchronize the traffic lights, so that in the event of nuclear attack on the city of Columbus, all the lights would turn green one way—east-west or north-south—so that the citizens could flee. Those of us who sometimes drive home at 4:30 or 5 o'clock at night can imagine the traffic jam which would result. Just think of the additional loss of life that would occur, as a result of this scheme, if the Soviet Union were to drop a nuclear bomb on the city of Columbus, Ohio.

I do not know why they would drop it there. They might want to drop it while the General Assembly of Ohio was in session. If they did, and if, unfortunately, the legislators of my State assembled in Columbus, Ohio, were to be killed by the effects of a nuclear bomb, I have faith and confidence that a divine providence would come to the rescue of my beloved State and fill the vacant chairs at Columbus.

I seriously doubt that today there is one American in 10,000 who has any idea of what he or she has to do in the event of an enemy attack. The ridiculous shelter program advocated by these boondogglers in civil defense is plain nonsense in this nuclear age. Evidently the American people agree with that assertion, because during the months of April and May of this year a total of 18 people in the United States—a total of 18 in the entire Nation—sought home improvement loans for bomb shelters from the Federal Housing Administration.

Incidentally, one person, who may have wanted to waste a few thousand dollars of his own money, attempted to build one in Washington, D.C. He immediately found himself in trouble with the authorities, because he discovered that local building regulations required that he put windows in his shelter.

Mr. President, the volunteer civil defense workers are the only ones who have made any sacrifice whatsoever. Some of the money now spent for salaries of subaverage civil defense planners would be put to better use to finance a national disaster corps whose base would be formed by these dedicated volunteer workers.

They have rendered needful services, while the paid civil defense officials sit smugly behind their desks, direct matters, and do not make any sacrifices. I do not think they even make a sacrifice when they draw their pay each month. I imagine their checks are delivered to them.

These volunteer workers could accomplish just as much were they to be deputized as auxiliary policemen or special duty sheriffs.

In the history of our Nation, whenever there have been floods, fires, catastrophes, and calamities, people have come forward and have helped their neighbors. They will always do so whether they wear civil defense armbands or not.

Mr. President, you, and others in this Chamber, have served in the Armed Forces of our country in time of war. Can you, Mr. President, imagine what a hard-boiled Army sergeant would say to some civilian with an armband who tried to interfere with the movement of troops or civilians at a moment of nuclear attack, at a time when the President of the United States had declared an emergency and has placed the military in charge?

We should be hopeful, however, that next January there will be a new administration and a new President, a President who has had congressional and senatorial experience, a President who will review this entire program realistically, a President who knows the utter folly of civil defense as now conducted.

Senator JOHN F. KENNEDY and Vice President RICHARD NIXON are both well aware of the ridiculous and foolhardy situation that now exists with respect to our civil defense preparedness. It is my fervent hope that one of the first acts of the new President, following January 20, will be to abolish the superannuated Civil Defense Agency and to turn this vital function over to the leaders of our Armed Forces, where it rightfully belongs.

Mr. President, every American has reason to be proud of the Armed Forces of this country. What more important factor is there in the defense of this Nation than to defend the lives of our civilians? Of course, that duty should be entrusted, and it will be, I am confident, by the new administration, to the hands of those in whom it rightfully belongs—the Armed Forces of our country.

The Office of Civil and Defense Mobilization has been operated under Director Leo A. Hoegh, ex-Governor of Iowa. By the way, Mr. President, second terms are quite customary for Governors. In my State of Ohio, my distinguished colleague, the senior Senator from Ohio, was elected for five terms. It is customary, when a man has performed a good job as Governor of his State, that he is given a second term. However, Leo A. Hoegh, Director of the Civil Defense Agency and an ex-Governor of Iowa, was denied a second term by the citizens of his State, who knew him best. But we do not need to be concerned about him, because when he lost his $12,000 per year job as Governor of the sovereign State of Iowa, he was appointed to a $22,500 a year job as head of this huge boondoggle, the Office of Civil and Defense Mobilization—and it has been a boondoggle, and nothing more, throughout the last 10 years.

Because the defense and safety of our citizens is a major part of the defense of the United States of America, were this Nation to be attacked by the Soviet Union, every Senator here knows that before the time the first enemy missile struck, the President of the United States, as Commander in Chief of the Armed Forces of our country, would declare a state of emergency, and the military would take over.

Mr. President, you, as a student of the history of the United States, recall that the War Between the States, the war we northerners call the Civil War, was a brutal war in those days, and a prolonged war. Yet today it would be considered a limited or brush-fire war when one considers what would occur were the Soviet Union or Red China to attack this country without warning.

In the Civil War, or the War Between the States, President Abraham Lincoln at the outset, shortly after the first shot was fired at Fort Sumter, declared martial law. The President suspended the writ of habeas corpus. The military forces of the Union took charge in the North, as the armed forces of the South did likewise there. That was done in what now would be called a limited war.

In an all-out war, when this Nation is threatened with annihilation, civilians in armbands will not be of any help. Some of them are pompous paid civil defense officials such as those sitting around in my State of Ohio, some of whom draw more than $1,000 a month in salaries, doing nothing but waiting for the bomb to fall.

Mr. President, instant retaliation is our only defense against nuclear attack. Civil defense as it has been conducted throughout the last 10 years has served only to give patronage jobs to some "has been" politicians—usually to defeated politicians or hangers-on who have lost their jobs. These people seek out and secure the civil defense jobs, exactly as the defeated ex-Governor of Iowa was appointed to be head of this huge boondoggling, expensive agency, while the taxpayers sweat on and sweat on.

Mr. President, these political appointees are rendering no needful public service. They announce evacuation plans at one time and a shelter program at another time. They plan alerts and inconvenience citizens generally with their screaming sirens, the distribution of pamphlets, and so on. They have schools purchase identification bracelets, so that teenage boys and girls can exchange them with each other.

Mr. President, while a person may speak lightly on this subject, it is a serious matter. We must put a stop to this boondoggle which has in the last 10 years used up $1 billion of the taxpayers' money. Let us look forward with hope that the next President of the United States, an experienced legislator, whether it be the Republican nominee or the Democratic nominee, will direct that an end be put to this boondoggling outfit. It does nothing whatever for the defense of our country. In fact, it is weakening the Nation by causing a huge expenditure of money, and showing no results whatsoever.

I yield the floor.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12326) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes; that the House receded from its disagreement to the amendments of the Senate numbered 4 and 10 to the bill, and concurred therein, and that the House receded from its disagreement to the amendment of the Senate numbered 20 to the bill, and concurred therein with an amendment, in which it requested the concurrence of the Senate.

PUBLIC WORKS APPROPRIATION BILL, 1961—CONFERENCE REPORT

Mr. ELLENDER. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12326) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of August 30, 1960, p. 18367, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. ELLENDER. Mr. President, the conference report was signed by all the conferees. It was a unanimous report.

I believe that the Senate conferees did good work in maintaining or sustaining most of the projects which the Senate provided for during the consideration of the bill.

All legislation must be the result of adjusting the differences in a bill as passed by the two Houses of Congress. The conference bill does not provide all that I personally feel we should be providing to develop the water resources of this country. I would have liked to see the House agree to the Senate amendments; on the other hand, the House felt that it sent us a good bill and that we should have accepted the bill. I must agree that the House did send us a pretty good bill. Last year and this year the House did provide for some new starts. The new starts were good projects, and I believe the Senate committee would have recommended most of them if the House committee had not included them.

The Senate added 34 new starts under "Construction, general." The conferees agreed on 26 of the 34 new starts recommended by the Senate.

The conference report provides for direct appropriations of $3,938,819,305, which is $34,158,695 below the budget and $25,869,425 below the amount approved by the Senate. Of that reduction, $12,590,000 is a reduction in the item for savings and slippages. The conference report is $55,183,500 above the amount approved by the House.

I have a summary of the bill showing how the money is to be distributed among titles I, II, and III. Title I covers "Civil functions, Department of the Army." Title II covers certain agencies of the Department of the Interior. Title III covers the Atomic Energy Commission, the Tennessee Valley Authority, and certain river basin study commissions.

Mr. President, I ask unanimous consent that the summary table be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Summary table

	Estimates, 1961	House allowance	Senate allowance	Conference allowance
TITLE I				
CIVIL FUNCTIONS, DEPARTMENT OF THE ARMY				
Quartermaster Corps cemeterial expenses	$9,400,000	$9,400,000	$9,400,000	$9,400,000
Corps of Engineers:				
General investigations	9,700,000	10,895,800	13,062,800	12,023,000
Construction	710,819,000	662,622,300	737,884,600	706,491,600
Operation and maintenance	126,325,000	126,420,000	126,420,000	126,420,000
General expenses	12,120,000	12,120,000	12,120,000	12,120,000
Mississippi River and tributaries	69,500,000	69,560,000	74,896,000	71,896,000
St. Lawrence Joint Board of Engineers	30,000	30,000	30,000	30,000
International Navigation Congresses	180,000	150,000	150,000	150,000
Total, Corps of Engineers	928,674,000	881,798,100	964,563,400	929,130,600
Total, title I	938,074,000	891,198,100	973,963,400	938,530,600
TITLE II				
DEPARTMENT OF THE INTERIOR				
Bureau of Reclamation:				
General investigations	4,650,000	4,575,000	5,376,000	4,893,000
General investigations (special foreign currency program)	4,957,000		4,522,000	
Construction and rehabilitation	173,950,000	166,444,880	173,855,200	166,444,880
Operation and maintenance	31,900,000	31,000,000	31,443,000	31,443,000
Loan program	18,437,000	9,742,825	11,642,825	11,642,825
General administrative expenses	4,320,000	4,200,000	4,320,000	4,290,000
Boulder City municipal fund	(150,000)	(150,000)	(150,000)	(150,000)
Disposal of Coulee Dam community	(15,000)	(15,000)	(15,000)	(15,000)
Upper Colorado River Basin fund	64,900,000	61,400,000	61,400,000	61,400,000

Mr. ELLENDER. Mr. President, the conferees had to take a substantial cut on "General investigations." It will be recalled that the Senate provided $13,062,800 for that purpose. The House had provided $10,895,800. The conferees agreed on $12,023,000. I ask unanimous consent that the table on "General investigations" be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD.

Amendment No. 1—General investigations

Item	Approved budget estimate for fiscal year 1961	House allowance	Senate allowance	Conference allowance
(1)	(3)	(4)	(5)	(6)
GENERAL INVESTIGATIONS				
1. Examinations and surveys:				
(a) Navigation studies	$880,000	$1,084,200	$1,556,700	$1,320,000
(b) Flood control studies	2,720,000	3,561,600	4,496,100	4,000,000
(c) Beach erosion cooperative studies	150,000	150,000	150,000	150,000
(d) Special studies:				
(1) San Francisco Bay survey	400,000	400,000	600,000	500,000
(2) Ohio River Basin review	400,000	400,000	400,000	400,000
(3) Great Lakes Harbor survey	107,000	107,000	264,000	264,000
(4) Coordination studies with other agencies	150,000	150,000	150,000	150,000
(5) Delaware River comprehensive survey				
(6) Rampart Canyon, Alaska	100,000	100,000	350,000	225,000
(7) Hurricane studies	850,000	850,000	850,000	850,000
(8) Hudson River (siltation) studies	90,000	90,000	90,000	90,000
(9) Potomac River review	400,000	400,000	400,000	400,000
(10) Colorado River, Tex	118,000	118,000	200,000	118,000
(11) Trinity River	250,000	250,000	321,000	321,000
Subtotal, examinations and surveys	6,615,000	7,660,800	9,827,800	8,788,000
2. Collection and study of basic data:				
(a) Stream gaging (U.S. Geological Survey)	235,000	235,000	235,000	235,000
(b) Precipitation studies (U.S. Weather Bureau)	340,000	340,000	340,000	340,000
(c) Fish and wildlife studies (U.S. Fish and Wildlife Service)	50,000	50,000	50,000	50,000
(d) International water studies	60,000	60,000	60,000	60,000
Subtotal, collection and study of basic data	685,000	685,000	685,000	685,000
3. Research and development:				
(a) Beach erosion development studies	200,000	200,000	200,000	200,000
(b) Hydrologic studies	150,000	150,000	150,000	150,000
(c) Civil works investigations	1,200,000	1,200,000	1,200,000	1,200,000
(d) Mississippi Basin model:				
(1) Construction	700,000	700,000	700,000	700,000
(2) Mississippi River comprehensive study	150,000	150,000	150,000	150,000
Subtotal, research and development	2,400,000	2,400,000	2,400,000	2,400,000
4. Arkansas-Red River pollution survey		150,000	150,000	150,000
Total, general investigations	9,700,000	10,895,800	13,062,800	12,023,000

Mr. ELLENDER. Mr. President, on "Construction, general," the conferees provided for 26 of the 34 new starts recommended by the Senate. I ask unanimous consent that the table showing the details of the conference agreement be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Construction, general, fiscal year 1961

	Construction, general, State and project	Budget estimate for fiscal year 1961		House allowance		Senate allowance		Conference allowance	
		Construction	Planning	Construction	Planning	Construction	Planning	Construction	Planning
	Alabama:								
	Aquatic plant control. (See Louisiana.)								
(N)	Columbia lock and dam, Alabama and Georgia	$3,325,000		$3,325,000		$3,325,000		$3,325,000	
(N)	Holt lock and dam		$378,000		$549,000	149,000	$400,000		$549,000

Mr. ELLENDER. Mr. President, with respect to title II, the conference bill provides $313,008,705, which is $12,495,320 below the amount allowed by the Senate and $2,851,000 above the amount allowed by the House.

With respect to title III, the conferees allowed $2,687,280,000, which is $5 million more than the amount allowed by the House and $12,100,000 below the amount approved by the Senate.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. DIRKSEN. Mr. President, I should like to make inquiry about the report. The Senator from Idaho [Mr. DWORSHAK] was one of the conferees. I should like to ascertain whether he has any comment to make.

Mr. DWORSHAK. Mr. President, all the Republican members of the conference committee signed the conference report. So far as I know, there was no controversy.

Mr. DIRKSEN. The conference report is agreeable to all of our conferees.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its action on certain amendments of the Senate to House bill 12326, which was read as follows:

IN THE HOUSE OF REPRESENTATIVES, U.S.,
August 30, 1960.

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 4 and 10 to the bill (H.R. 12326) entitled "An act making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes," and concur therein;

That the House recede from its disagreement to the amendment of the Senate numbered 20, and concur therein with an amendment, as follows:

In lieu of the matter proposed by said amendment, insert: *Provided further*, That not to exceed $3,500,000 of this appropriation shall be transferred to the appropriation "Other Procurement, Navy," solely for construction of power reactor plants for the Antarctic.

Mr. ELLENDER. Mr. President, I move that the Senate concur in the amendment of the House to the amendment of the Senate numbered 20.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Louisiana.

The motion was agreed to.

Mr. BARTLETT. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. BARTLETT. I rise to express my appreciation to the Senator from Louisiana and the members of his subcommittee for what they accomplished in respect to the essential projects in Alaska in their consideration of the report. I do not know how many years it has been since I started to give my thanks to the Senator in this field. It has been a good many, because consistently he has added money for needed projects which have benefited the economy of Alaska.

I am especially grateful to him and to the members of his subcommittee for having made it possible to start work on small-boat harbors at Homer and at Douglas, Alaska, and for having increased funds for studies looking forward to the construction of the greatest hydroelectric project in the United States at Rampart, Alaska. I know that the Senator persisted, insofar as he was able, in seeking to preserve the funds for the Juneau small-boat harbor, and it was not his fault or the fault of his colleagues that those funds were deleted.

Mr. ELLENDER. I was delighted to be of assistance to Alaska. Of course, as the Senator knows, it is almost impossible to retain all the projects that were placed in the bill. I believe Alaska received the majority of those that were included in the bill. I appreciate the kind remarks of my friend from Alaska.

THE NATION'S ECONOMIC WELFARE UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

Mr. BUSH. Mr. President, at the Republican Convention in Chicago, President Eisenhower commented on the fact that there are more Americans employed at higher wages and with more take-home pay than at any time in the Nation's history.

Statistics compiled by my distinguished colleague, the senior Senator from New Hampshire, bears out the President's assertion.

Mr. President, because of the importance of these statistics in revealing the economic progress made during the last 7½ years, I ask unanimous consent to have inserted in the RECORD at this point this report from the senior Senator from New Hampshire entitled "The Nation's Economic Welfare Under the Republican Administration, 1953–60."

There being no objection, the report was ordered to be printed in the RECORD, as follows:

THE NATION'S ECONOMIC WELFARE UNDER THE REPUBLICAN ADMINISTRATION, 1953–60

(A report by U.S. Senator STYLES BRIDGES, of New Hampshire)

The Republican administration has brought the Nation to the highest prosperity in history. More people are earning more and saving more and spending more; they are living better, eating better, getting a better education and receiving better health protection, enjoying more leisure and more culture—enjoying, in short, a higher and happier standard of living than ever before.

Cold statistics tell the tale.

National wealth is up:

	1952	1960
Gross national product	$347,000,000,000	$505,000,000,000
Personal income	301,000,000,000	406,000,000,000
Average personal income (all families and unattached individuals)	5,630	6,600
Financial assets of individuals	373,000,000,000	956,000,000,000
Total investment in plant and equipment (nonfarm residential structures, mining (underground) structures, producers' durable equipment, private nonfarm inventories)	$345,000,000,000	$562,000,000,000

Ten million more families have moved into income brackets of more than $4,000.

Labor is better off

	1952	1960
Total employment	61,000,000	68,700,000
Compensation of employees	$195,000,000,000	$295,000,000,000
Man-days idle through strikes	59,100,000	2,750,000
Average weekly wage	$67.97	$91.20

People are better prepared for a rainy day:

	1952	1960
Savings deposits in banks, credit unions, postal savings, building and loan associations (yearend)	$85,000,000,000	[1] $157,600,000,000
Life insurance, average per family (yearend)	$5,300	[1] $9,500
Number of persons with hospital insurance	92,000,000	128,000,000

[1] 1959.

Number of persons covered under social security has gone up nearly 12 million.

People are living better:

	1952	1960
Per capita consumer spending	$1,400	$1,760
	Percent	*Percent*
Percent owner-occupied homes	56.8	64.0
Percent of homes that are substandard (either dilapidated or lacking inside hot and cold running water, flush toilet and bath for unit's exclusive use)	32.5	14.9

People have more leisure and travel more:

	1952	1960
Average weekly hours of work in manufacturing industries.	41 hours	40 hours.
Average length of vacation in private, nonagricultural sector.	2 weeks	2.5 weeks.
Number of vacations away from home.	145,000,000	185,000,000.
Attendance at national parks.	42,300,000	71,045,000.
Motor-vehicle registration.	53,000,000	73,000,000.
New mileage of highways (in dollars) at all levels of government.	$4,871,000,000	$9,977,000,000.
Dollars spent in travel abroad.	$1,188,000,000	$2,550,000,000.

Education has moved forward:

	1952	1960
Number of elementary and secondary schoolrooms constructed (Total: 1949–53 178,000 1955–59 272,300)	48,000	69,600
Expenditure for equipment, per pupil enrolled	$6.04	$9.15
Expenditures for public elementary and secondary schools in 48 States and the District of Columbia as percent of GNP	*Percent* 2.23	*Percent* 3.28

	1952	1960
Percent of population 15 years and up who completed high school.	35 percent....	41.7 percent.
Percent of population 20 years and up who completed college.	6 percent.....	7.3 percent.
Enrollment in adult education.	2,564,870.....	3,428,000 (1959).

Expenditures on church construction in the last 7 years have averaged close to $800 million a year; average in 6 previous years was $330 million. Even in constant dollars, up 60–70 percent.

All this has been achieved at the same time that inflation has been slowed down—from 48 percent in the Truman years to 11 percent in the last 7½. As the President said in Chicago, "There are more Americans employed at higher wages and with more take-home pay than ever before in our history. And today they have more confidence in the stability of their money than they have enjoyed in three decades."

VISIT TO THE SENATE BY VISCOUNT KILMUIR, LORD HIGH CHANCELLOR OF GREAT BRITAIN

Mr. SCOTT. Mr. President, it is a great privilege and pleasure for me at this time to introduce from our sister nation the British Commonwealth the Lord High Chancellor of Great Britain, Viscount Kilmuir.

I respectfully present to the Senate Viscount Kilmuir.

[Applause, Senators rising.]

AMENDMENT OF DISTRICT OF COLUMBIA TEACHERS SALARY ACT OF 1955, AS AMENDED

The Senate resumed the consideration of the bill (H.R. 12993) to amend the District of Columbia Teachers Salary Act of 1955, as amended.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. MORSE. Mr. President, what is the bill?

The PRESIDING OFFICER. The District of Columbia teachers' pay bill.

Mr. MORSE. Without amendment?

The PRESIDING OFFICER. Without amendment.

Mr. DIRKSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIRKSEN. What is the pending business?

The PRESIDING OFFICER. The pending bill is the District of Columbia teachers pay bill.

Mr. DIRKSEN. What is its present status? Are there any amendments at the desk?

The PRESIDING OFFICER. There are no amendments.

ERIC AND IDA MAE HJERPE

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside and that the Senate proceed to the consideration of Calendar No. 1939, H.R. 2074.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 2074) for the relief of Eric and Ida Mae Hjerpe.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MANSFIELD. The purpose of the bill is to pay to Eric Hjerpe and Ida Mae Hjerpe, of Sunnyvale, Calif., the sum of $1,096.48 in full settlement of their claims against the United States based on erroneous payment they made in connection with their income tax liability for 1952.

I ask unanimous consent that the statement of the committee accompanying the proposal be incorporated in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The Department of the Treasury in reporting to the Congress on the bill has commented as follows:

"The records of the Internal Revenue Service disclose that on January 28, 1957, the taxpayers filed a claim for refund of 1952 income tax in the amount of $1,096.48. This claim was supported by a declaration by the taxpayers that Eric Hjerpe was sick and absent from work through 1952 and that the amount of '$5,200 received from wages (52 weeks, $100 per week under the wage continuation plan of the First National Bank of Chicago, Ill.,' should have been excluded from income. This claim for refund was rejected because the claim was not filed within the 3-year period of limitations prescribed by law.

"The taxpayers' claim is based upon section 22(b)(5) of the Internal Revenue Code of 1939 which provided an exclusion from gross income of amounts received 'through accident or health insurance.' The issue whether section 22(b)(5) of the 1939 code applied to amounts received as sick pay from uninsured wage continuation plans was not settled until 1957. In 1952 the court of appeals, in the case of *Epmeier* v. *United States* (199 F. 2d 508 (7th Cir. 1952)) held that such payments were excludable from gross income as amounts received through 'health insurance.'

"For some period of time, the Internal Revenue Service did not believe that the Epmeier case correctly interpreted the law and rejected claims for refund filed on the basis of the Epmeier case. However, in December 1954 the field offices of the Internal Revenue Service were advised by the national office that there would be no objection to having claims for refund with respect to disability payments, similar to those involved in the Epmeier case, held in suspense rather than disallowing such claims as had been the prior practice. This 'suspense' procedure was established in order that taxpayers who filed such claims would not have their claims automatically disallowed and thereby be compelled to litigate the issue within the 2-year period prescribed by law for appealing from the disallowance of refund claims. At the time this suspense procedure was adopted, the taxpayers had more than 1 year in which to file a timely claim for refund. However, their claim for refund was not filed until January 28, 1957, which date was almost 1 year after the expiration of the 3-year period of limitations prescribed by law.

"In 1957 the Supreme Court of the United States in the case of *Gordon P. Haynes, et ux.* v. *United States* (353 U.S. 81) followed the decision in the Epmeier case and held that amounts received through an uninsured employees sickness benefit plan were excludable from income as 'health insurance.'

"Because of the large number of taxpayers whose timely claims for refund filed on the basis of the Epmeier case had been rejected by the Internal Revenue Service prior to the decision of the U.S. Supreme Court in the Haynes case, Congress enacted a provision granting general relief on a nondiscriminatory basis to such taxpayers. This relief provision is contained in section 98 of the Technical Amendments Act of 1958 (Public Law 85–866) which was approved by the President on September 2, 1958. However, this provision grants relief only to those taxpayers who initially filed timely claims for refund but who failed to protect their rights by filing a suit in court within 2 years after disallowance of the claims. This provision does not grant relief to taxpayers such as Eric and Ida Mae Hjerpe who did not file timely claims for refund.

"The instant bill is similar to H.R. 6335 (86th Cong., 1st sess.) for the relief of Mrs. Lourene O. Estes, from which the President withheld his approval on September 22, 1959. In his memorandum of disapproval, the President stated:

" 'During the last Congress, I approved legislation designed to grant general relief, on a nondiscriminatory basis, to taxpayers who had received disability pay which was excludable from gross income under the Supreme Court decision. This general legislation does not provide relief for taxpayers, such as Mrs. Estes, who did not attempt to protect their rights by filing timely claims for refund.

" 'The statutory period of limitations, which the Congress has included in the revenue system as a matter of sound policy, is essential in order to achieve finality in tax administration. A substantial number of taxpayers paid income tax on disability payments received by them and failed to file timely claims for refund. Accordingly, to grant special relief in this case, where a refund was not claimed in the time and manner prescribed by law, would be to discriminate against such other similarly situated taxpayers and to create an undesirable precedent.'

"In view of the foregoing, the Department is opposed to the enactment of H.R. 2074."

In favorably reporting the bill the Committee on the Judiciary of the House of Representatives commented in House Report No. 1985 as follows:

"The claimant, Eric Hjerpe, was sick and absent from work through 1952 and the amount he received from his employer, the First National Bank of Chicago, Ill., was $5,200 computed at the rate of $100 per week for 52 weeks. Said amount was paid to him under a wage continuation plan and should have been excluded from income. However, the claimant declared such receipt as income and paid the aforesaid amount as a tax.

"A subcommittee of the House Judiciary Committee received evidence on the merits of this bill and was informed by affidavit submitted to it that Mr. Hjerpe underwent a sympathectomy in 1947, a rare nerve-cutting operation to relieve very high blood pressure. In December 1951 he developed hypertensive cardiovascular disease with left ventricular failure and tachycardia which prevented him

from returning to work. On January 1, 1953, medical authorities for the employer, the aforesaid First National Bank of Chicago, Ill., and the Equitable Life Assurance Society found him to be totally and permanently disabled. He was only 45 years of age when he had to retire and for years he "was just too sick to care about anything" (quotation is taken from claimant's personal sworn statement submitted to the subcommittee), and his illness caused him to file his claim 10½ months late.

"The committee is of the opinion that the claimant has a meritorious claim. The Secretary of the Treasury opposes the enactment of this legislation and cites the veto message of the President under date of September 22, 1959, relative to the bill H.R. 6335 (86th Cong., 1st sess.) for the relief of Mrs. Lourene O. Estes, which particularly stated, among other things, the running of the statute of limitations and the failure of the claimant to timely file her claim for refund.

"The committee wishes to indicate that opposition was also raised by the Treasury Department on the basis of failure to make a timely claim for refund and the running of the statute of limitations relative to the bill H.R. 7745 (86th Cong., 1st sess.) for the relief of Mrs. Willie Soher, which also concerned an overpayment in her income tax. This bill was approved by the President on September 22, 1959 (Private Law 86–234).

"There appears to be no question that the payment made by the claimants to the Government as a purported tax was in essence and in fact not due to the Government. The money does not constitute tax money; it was paid in error and received without right. The committee is of the opinion and concludes that the claimants are entitled to the relief sought and accordingly recommends that the bill be considered favorably."

Mr. LAUSCHE. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. LAUSCHE. What is the position of the Treasury Department on this bill?

Mr. MANSFIELD. It is my understanding that the Treasury Department is opposed to this particular proposal because the statute of limitatons has run, but I understand that the committee unanimously is of the opinion that the claimants have a meritorious claim. The Secretary of the Treasury opposes the enactment of the legislation and cites the veto message of the President under date of September 22, 1959, relative to H.R. 6335, for the relief of Mrs. Lourene O. Estes, and so forth.

The committee indicates also that opposition was raised by the Treasury Department on the basis of failure to make a timely claim for refund and the running of the statute of limitations relative to H.R. 7745, 86th Congress, 1st session, for the relief of Mrs. Willie Soher, and so forth.

There appears to be no question that the payment made by the claimants to the Government as a purported tax was in essence and in fact not due the Government. The money did not constitute tax money; it was paid in error and received without right. The committee was of the opinion and concludes that the claimants were entitled to the relief sought, and accordingly recommended that the bill be considered favorably.

Mr. LAUSCHE. The statute of limitations for the presentation of the claims bars that presentation. Is that correct?

Mr. MANSFIELD. That is the position of the Treasury Department.

Mr. LAUSCHE. How will the committee or the Senate be able to deny other pleas which are made asking that the bar contained in the statute be removed?

Mr. DIRKSEN. If I may respond to the distinguished Senator from Ohio, first of all, every one of these claims is carefully surveyed by responsible professional staff members of the committee. Ofttimes we discover extraordinary and unusual circumstances, where, through no fault particularly of the claimant, the statute of limitations has run. It is indeed difficult to draw a line and say that all is black or all is white. Some of these borderline cases have been vetoed and others have been approved.

Always we must take all the facts into account. While I do not have all the facts in mind with respect to the pending claim, I do know that all of the claims are carefully presented and all the detailed facts are carefully evaluated by the committee before determination is made on them.

Mr. LAUSCHE. Is the Senator from Illinois a member of the committee?

Mr. DIRKSEN. I am on the committee.

Mr. LAUSCHE. Are other bills of this nature pending now?

Mr. DIRKSEN. Of this particular nature?

Mr. LAUSCHE. Are they on the calendar?

Mr. DIRKSEN. It would not be surprising if that were the case, although offhand, since so many claims come to the Judiciary Committee, I could not give the Senator a responsive answer.

Mr. MANSFIELD. To the best of my knowledge there are no like bills pending at this time, based on the statute of limitations.

Mr. LAUSCHE. I have a distaste for removing the operation of the statute of limitations in this manner, because I believe the statute ought to operate unless there are extraordinary circumstances justifying our ignoring the statute of limitations.

Mr. DIRKSEN. I can concur with the sentiment expressed by the Senator from Ohio. However, we must take into account all equitable considerations. As a general rule, when the Department passes judgment, and either objects or approves of a claim, it is normally done on a wholly legal basis, and equitable considerations are ignored.

It is the responsibility of the committee to take that into account, examine into all the facts, and see whether or not justice can be done by some action of Congress; and we did take it into account.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. LAUSCHE. What is the uniform principle which is applied; or does the committee decide each case on the basis of the committee's disposition? Does the committee have a uniform rule which is applicable to each case, those which fall within the rule to receive the benefits, and those which do not to be excluded? What is the measure of justice?

Mr. DIRKSEN. There is no uniform rule. We take every case which is presented. Once the staff has explored the facts and secured the opinions of the various agencies of the government involved, an explanation is made to the committee. The whole matter is discussed. Every factor is evaluated. Then the full committee makes a judgment on the claim.

Sometimes—many times—claims are cast aside. In other cases, notwithstanding the disapproval of the department, the committee itself believes an inequity is involved which can be righted only by Congress itself.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. MORSE. I direct the attention of the Senator from Ohio to the historic purpose of the statute of limitations. The Senator from Ohio has not said anything in the colloquy with which I find myself in disagreement, because I interpret his remarks to mean that in extraordinary circumstances, and when clear justice dictates that there should be an exception to the rule, then there is residual legislative power in Congress to do justice.

The statute of limitations, historically, was developed in order to protect private citizens in litigation brought by other private citizens because the lapse of time itself causes evidence to be lost and witnesses to die, disappear, or move away. It is true that it is a general statute and is applicable for use by the Government, too.

However, I should like to have the Senator from Ohio know that in cases such as the one with which we are dealing all the evidence is in the possession of the Government. There can be no loss of evidence in tax cases. The Internal Revenue Service today has the same evidence it had in 1952, when this case first arose. There is not the slightest chance of the Government being placed at a disadvantage because of the lapse of time. It is a matter of mathematics, and the mathematics are all on file. The returns are in the possession of the Government. It is very easy to determine—and it has been determined—whether this particular citizen paid the Federal Government money in 1952 by mistake.

Therefore, it seems to me that it would be most unfair for us simply to say that because the statute of limitations is on the books, it will be automatically applied, when all the evidence we have shows that to apply the statute will mean that Uncle Sam will be getting money which was mistakenly paid by an American citizen to Uncle Sam under a misapprehension.

It seems to me that we ought to recognize that in a situation such as that, Congress, under its legislative power, should say to the Federal Government, "We do not care now what caused the mistake to be made. Perhaps it was made through ignorance. Nevertheless,

a mistake was made. Uncle Sam is the beneficiary of money which does not belong to him, and never should have been taken by him in the first place. So we will return it to its true owner."

That is justice. If we make it perfectly clear, as the Senator from Illinois has, I believe, made it clear, that we will do justice in this way only in those exceptional cases where the facts are perfectly clear, where the evidence shows that the citizen ought to be relieved of a mistake which he has made, then we shall be living up to our responsibilities, and not falling behind the statute of limitations as an estoppel in such a case.

Mr. LAUSCHE. Mr. President, I am very grateful for the learned exposition of the doctrine of laches or the statute of limitations which the Senator from Oregon has given. The Senator from Ohio, likewise, is familiar with those doctrines. However, I point out to the Senator from Oregon that if his position is correct, that since the Government has all the evidence in its possession in that instance there is no need of the statute of limitations, then it follows, as a matter of logic, that we ought to abolish the statute of limitations so far as it applies to the making of claims which have been barred by the running of time.

The Senator from Oregon states that this issue must be decided on the basis of the conclusions reached by the members of the committee. I asked the Senator from Illinois, "Does the committee have a rule?" He said there is no rule. I know of the strict adherence to the rules of law which the Senator from Oregon has always advocated. Ours is a government of laws; it is not a government of men. I am not disposed to depend upon the changing judgments and whims of men in determining, one day, one way how a claim shall be decided, and on another day, another way.

It may be that justice in this case is in favor of the applicant. However, I respectfully submit that ours is a government of laws; it is not a government of men; and that if claims are to be decided on the basis of the friendliness of the members of the committee—which can happen—then law does not operate in our country.

This claim is unconsequential. Probably it does not warrant the discussion which we have had about it. However, I wish to see the justice done which the Senator from Oregon has always expounded concerning the Morse formula about what shall be paid to the government for property which people want as a gift.

I have not raised objection to the bill. However, I shall constantly want to know what these claims are, with the view of learning whether there is merit or no merit to the claims made.

Mr. MORSE. Mr. President, I should like to comment concerning the observation made by the distinguished Senator from Ohio. I do not suggest that we adopt rule by men rather than rule by law. Quite to the contrary. The Senator from Ohio is concerned about the principle which is followed in these cases. I think it is a very clear, uniform principle, namely, that when allegations such as these are made that the Federal Government is the beneficiary of unjust enrichment as the result of a mistake which was made in the payment of taxes; when the Government has all the facts; when there is no doubt in the Treasury Department about the facts, and what the Treasury Department is seeking to do is hide behind the statute of limitations or to use the statute of limitations as a sort of estoppel, then Congress has a uniform principle to follow. We must decide whether we shall pass a law which will correct the gross injustice which the facts show has arisen in regard to a specific case. I do not know of a clearer example of the following of the rule of law than that.

I point out that it is the clear duty of Congress, when such injustices occur, and the facts show there is injustice and show that the Government is the beneficiary of unjust enrichment, the money should be returned, irrespective of the fact that there has been a lapse of years to comply with the statute of limitations.

I certainly join with the Senator from Ohio in insisting on government by law. That is exactly what we are doing in this case. We are proposing to pass a law which will do justice to a citizen who mistakenly overpaid the Federal Government his taxes.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill, H.R. 2074, was ordered to a third reading, read the third time, and passed.

H. P. LAMBERT CO., INC., AND SOUTHEASTERN DRILLING CORP.

Mr. MANSFIELD. Mr. President, I move that the Senate turn to the consideration of Calendar No. 1943, H.R. 7618.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 7618) for the relief of H. P. Lambert Co., Inc., and Southeastern Drilling Corp.

The PRESIDING OFFICER. Does the Senator from Montana wish to move or ask unanimous consent for the consideration of the bill?

Mr. MANSFIELD. I ask unanimous consent that the Senate proceed to the consideration of the bill.

There being no objection, the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, the purpose of the bill is to provide that the claimants, notwithstanding final liquidation of entry or the limitations of time, may file within 90 days from the date of the enactment of the legislation, such claim or protest with the collector of customs of New Orleans, or do such other acts as will enable them to submit evidence of entitlement to refund of duties collected from them upon certain articles covered by consumption entry No. 2892, dated November 10, 1955, at New Orleans, La.

I will say to the Senator from Ohio that the Treasury Department is opposed to the bill as introduced. The House Committee on the Judiciary amended the bill so as to enable the claimants to submit evidence to establish their claim. So the purpose of the bill really is to allow the claimants to submit evidence. I understand that the bill was unanimously reported by the committee.

I ask unanimous consent to have printed at this point in the RECORD a statement in explanation of the bill.

There being no objection, the excerpt from the report (No. 1872) was ordered to be printed in the RECORD, as follows:

The bill as introduced in the House provided for the payment of $3,690.46 as the sum collected by the Government from the claimants as duty on articles not subject to duty.

The Treasury Department opposed the bill as introduced.

The Committee on the Judiciary of the House of Representatives amended the bill to enable the claimants to submit evidence to establish the claim.

The Treasury Department in its report to the Congress on the bill as introduced commented as follows:

"The goods were entered as duty free under Tariff Act paragraph 1615(a), and a bond was filed for the production of necessary documents. 'Customs Form 4467: Certificate of Exportation' was not produced despite extensions of the bonded period and the entry was liquidated dutiable on February 11, 1958.

"Although the importer did finally produce proof satisfactory to the collector that the goods were American goods returned, such proof was not produced until after the liquidation became final under the provisions of section 514, Tariff Act of 1930. Furthermore, the situation did not permit the granting of administrative relief under the provisions of section 520(c)(1), Tariff Act of 1930, as amended.

"The enactment of this legislation for the benefit of these corporations, authorizing a refund of duties legally assessed, would establish an undesirable precedent and create dissatisfaction among other importers who were obliged to pay duty on similar goods imported under like circumstances. Therefore, the Department cannot recommend the enactment of the proposed legislation."

A subcommittee of the Committee on the Judiciary of the House of Representatives considered the matter at a hearing.

In its favorable report on the bill, as amended, the Committee on the Judiciary of the House of Representatives commented as follows:

"The evidence presented at a hearing before a subcommittee disclosed that on November 10, 1955, 118 pieces of oil well equipment were entered duty free through the port of New Orleans and a bond was filed by H. P. Lambert Co., Inc., customhouse brokers for Southeastern Drilling Corp., to guarantee the payment of duties in the event of failure to produce the necessary documents to establish that the articles were goods of American origin being returned from British West Indies to the United States.

"The evidence that the goods were of American origin was not produced until after liquidation became final and on or about April 10, 1958, the sum of $3,690.46 duty was collected by the Government on the bond.

"The Southeastern Drilling Corp. was finally able to produce the necessary documents to prove the American origin and manufacture of the articles. Appeal was then made to the Commissioner of Customs for relief on the ground that there had been a technical error in the service of the notice of duty due on February 11, 1958, which would allow reliquidation of the entry. The appeal was denied on the basis that there was no technical error and not on the basis that the goods were dutiable.

"The administrative remedies had been exhausted and under applicable law there are no grounds for reconsideration of the

assessment of duties. Inasmuch as the Commissioner ruled against the claimants on the question raised by them as to the technical error in the service of the notice and did not favorably rule that the goods were in fact not dutiable, the committee recommends favorable consideration of this legislation as amended so that a ruling can be formally made and entered as to the question of duty and if found not dutiable to allow refund of the amount of duty collected. The failure of the claimants to timely produce the necessary documents was due to a forgivable misunderstanding by the parties as to whom the notice of duty due should have been directed for action."

Mr. LAUSCHE. Does the report show how much is involved?

Mr. MANSFIELD. The sum mentioned is $3,690.46 as the sum collected by the Government from the claimants as duty on articles not subject to duty. The House Committee on the Judiciary amended the bill so as to enable the claimants to submit evidence to establish their claim. The bill does not provide for any payment.

Mr. LAUSCHE. Otherwise, the statute has run; and this bill gives the claimants the right to file?

Mr. MANSFIELD. Yes.

Mr. LAUSCHE. Very well; I have no amendment to submit.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 7618) was ordered to a third reading, read the third time, and passed.

OPPOSITION TO HOUSE BILL TO PERMIT SERVING OF ALCOHOLIC BEVERAGES IN THE DISTRICT OF COLUMBIA ON NEW YEAR'S DAY, WHEN IT FALLS ON SUNDAY

Mr. WILLIAMS of Delaware. Mr. President, I wish to call attention to the fact that yesterday the House passed H.R. 11535, the purpose of which is to provide that licensees shall not be prohibited from serving alcoholic beverages in their establishments on New Year's Day in the District of Columbia when New Year's Day falls on Sunday.

The bill has come to the Senate.

I wish to serve notice that if the bill is reported by the committee and is brought before the Senate, the bill will be opposed.

I hope the leadership will make note of this, and will see that we are properly notified.

I think we have reached a sad state if we are to suspend the proper observance of the Sabbath in the Nation's Capital and I, for one, will certainly oppose the bill.

Mr. SCHOEPPEL. Mr. President, I certainly join the Senator from Delaware in objecting to the passage of that bill, which in my judgment would do violence to the proper observance of the Sabbath in the Capital City.

Mr. MORSE. Mr. President, I wish the Senator from Delaware were as correct in his position on other measures as he is in his position on this one. But I wish to state that I shall completely support his position on this bill.

Mr. MANSFIELD. Mr. President, I wish to state that the Senator from Delaware, the Senator from Oregon, and the Senator from Kansas will be notified in plenty of time when the bill is called up.

Mr. CARLSON. Mr. President, I wish to associate myself with the remarks made by the Senator from Delaware and other Senators in regard to this particular measure. I think the Senator from Delaware is to be complimented for calling the attention of the Senate to this matter.

Mr. WILLIAMS of Delaware. Certainly it would be a reflection on all of us if we were to allow any such measure to be passed. I am confident we can defeat the bill should it be called up for consideration.

VLADISLAV FOTICH

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar 1945, House bill 7877, for the relief of Vladislav Fotich.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, the purpose of the proposed legislation is to waive section 33 of the Trading With the Enemy Act so as to permit Vladislav Fotich, a Yugoslavian citizen, who was precluded by illness and absence from the United States from making timely assertions of claim or institute suit for the return, under section 32 of that act, of his 12 shares of securities of the International Nickel Co. of Canada, Ltd., which were vested in the Alien Property Custodian in 1951, or the proceeds thereof, and any revenue received from the securities.

I ask unanimous consent that an excerpt from the report on the bill be printed at this point in the RECORD.

There being no objection, the excerpt from the report (No. 1874) was ordered to be printed in the RECORD, as follows:

The Department of Justice in its report states that it is unable to recommend enactment of the bill.

The Foreign Claims Settlement Commission, although opposing enactment of the bill, states that it is informed that the subject bill involves only a relatively small amount of money and that its enactment would have little effect on the total amounts potentially available to compensate American citizens for certain war losses.

The facts and conclusions in connection with this matter are contained in House Report 1705 on H.R. 7877, and are as follows:

"In 1939, just before the outbreak of World War II, Mr. Vladislav Fotich was in Rotterdam with the former Yugoslav General Consulate. At that time Mr. Fotich, with his savings, purchased 12 shares of International Nickel Co. of Canada. This stock was purchased through the Dutch bank Nederlandtsche Handel-Maatschappij, in Rotterdam, with whom he left the securities for safekeeping.

"Mr. Fotich was in Rotterdam when it was occupied by the Germans. He was taken by force to Belgrade whence he escaped to southern France in 1942 where he hid from the Germans. He was taken seriously ill and was discovered and arrested in 1944. He was taken to the Drancy camp, but later in 1944 when he was released from that camp for return to Yugoslavia he escaped and lived in hiding in Paris until that city was liberated. After the war he returned to Yugoslavia where he was pensioned in 1949 due to serious illness.

When Mr. Fotich returned to Yugoslavia in 1946, he contacted the Dutch bank concerning his securities and was advised that they were blocked in the United States, and that it was not necessary for him to do anything under the circumstances unless he wanted to sell them.

"In 1955, Mr. Fotich was in need of funds and contacted the Dutch bank, at which time he learned that his securities had been vested in 1951 under vesting order No. 17940. It was at that time that he was advised that he was barred by the provisions of section 33 of the Trading With the Enemy Act from filing a claim for the return of his property.

"The committee has concluded on the basis of the unusual circumstances of this case, Mr. Fotich should be extended the opportunity of filing his claim and having it considered under the applicable provisions of the Trading With the Enemy Act. Therefore, it is recommended thta the bill be considered favorably."

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 7877) was ordered to a third reading, read the third time, and passed.

LEGAL GUARDIAN OF JOHN DAVID ALMEIDA, A MINOR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside, and that the Senate proceed to the consideration of Calendar 1965, House bill 4428, for the relief of the legal guardian of John David Almeida, a minor.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, the purpose of the bill is to pay to the legal guardian of John David Almeida, a minor, the sum of $15,000 in full settlement of the claims of the child against the United States for the loss of his left eye as the result of its being struck by a splinter of glass when a window in the Government quarters in which the child lived was shattered on May 13, 1957.

I ask unanimous consent that an excerpt from the report be printed at this point in the RECORD.

There being no objection, the excerpt from the report (No. 1895) was ordered to be printed in the RECORD, as follows:

The facts in the case as summarized by the Department of the Air Force in a letter, dated March 26, 1959, to the Committee on the Judiciary of the House of Representatives, are as follows:

"The events upon which this claim is based occurred on May 13, 1957 at Sergeant Almeida's assigned Government quarters at Otis Air Force Base. At the time of the accident, Sergeant Almeida and a neighbor, Staff Sgt. Robert E. Richards, were off duty and in the backyard of the Almeida quarters. The Almeida child was in the house, looking out of a window. Sergeant Richards tapped on the window either in response to the child or to engage the child's attention, and the window broke. Sergeant Richards avers, however, that the actual breakage of the

window was caused by the child's striking the window with a toy held in his hand. A splinter of glass entered the child's left eye necessitating eventual removal of the eye.

"Inspection of the window revealed that the windowpane had been properly installed and maintained in all respects, and further revealed no connection between any act of the United States and the child's injury.

"Sergeant Almeida was then advised that there was no apparent legal liability on the part of the United States, but that he was free to file any kind of a claim that he might choose. However, no claim has been filed as of March 6, 1959.

"Sergeant Almeida subsequently filed a civil suit in the courts of Massachusetts against Sergeant Richards in the amount of $250,000. The court awarded him a $500 judgment.

"On August 4, 1958, the Almeidas brought suit against the United States in the U.S. District Court for Massachusetts, civil case No. 58-803-W, for $210,000. This suit was brought under the Federal Tort Claims Act (28 U.S.C. 1346(b)). In January 1959, the court directed a verdict for the United States on the grounds that the relationship between the United States and Almeida was that of landlord and tenant, and that under Massachusetts law (which, for the purposes of this case, is controlling under the Tort Claims Act), no basis for liability existed.

"Accordingly, the Department of the Air Force recommends against enactment of H.R. 4428. The legislation would create an undesirable precedent and would be discriminatory against other claimants who have suffered similarly."

The sponsor of the legislation in the House of Representatives appeared before the Committee on the Judiciary of the House and that committee went into the circumstances of the case in some detail. The facts and conclusions in the case as set forth in the report on the bill by the Committee on the Judiciary of the House of Representatives are as follows:

On May 13, 1957, John David Almeida, then 17 months of age, was sitting in a high chair in the kitchen of family quarters assigned to his father, Air Force S. Sgt. John E. Almeida, when another serviceman, S. Sgt. Robert Richards, appeared outside of the window near the child and tapped on the window. The window broke and a splinter of glass lodged in the child's eye. As is noted in the Air Force report, there is some conflict as to whether the child also struck the window with a toy; however, the child's parents state that the baby could not have hit the window with a toy train since they didn't own one. This committee feels that the basic point involved in this matter is the condition of the window itself. The Air Force report merely states that "Inspection of the window revealed that the windowpane had been properly installed and maintained in all respects" and further avers that the inspection revealed no connection between any act of the United States and the child's injury. This committee feels that the facts presented in support of the claim present a different picture, and establish a definite basis for legislative relief in this instance. The child's mother, Mrs. Caroline Almeida, stated concerning the condition of the window prior to the accident:

"I reported to the Air Installations Office at Otis on many occasions that the windows were in bad condition and that they were dangerous. Furthermore the windows had no putty on them. The Air Force representatives who were notified agreed that the matter needed repairing and agreed to repair it, but never got around to it."

Pictures of the windows in question were submitted to the committee in connection with this matter. These pictures tend to bear out the statement of the child's mother in her affidavit filed with the committee. The pictures disclose the general rundown condition of the windows. The information supplied to the committee shows that the windows were loose due to missing putty, and that in addition they were cracked in places. The committee has, therefore, concluded that the unsafe condition of the window was the principal factor in this unfortunate train of events. It is obvious from the facts of this case that the quarters were intended for the use of the families of servicemen, and it must have been anticipated that children would be in the area. Regardless of the minor question referred to in the Air Force report concerning just how the window was struck, it is clear that it was tapped or at the most hit an insubstantial blow of a sort which should not have caused the result described above. However, a loose and poorly maintained window would be expected to break under such conditions. To allow such conditions to exist is to almost invite occurrences such as this one. Accordingly, this committee has concluded that it is only just to recognize a responsibility on the part of the Government to this child.

After the window shattered, the child was given emergency treatment and was eventually taken to the Chelsea Naval Hospital. Efforts were made to save the eye, but it ultimately was necessary to remove the eye.

The Air Force report notes that the parents were unsuccessful in their attempt to recover under the Federal Tort Claims Act. The court in that action ruled that under Massachusetts law they were required, as tenants, to accept the premises as they found them. The committee has carefully considered this circumstance along with the small amount recovered against the other serviceman, and has concluded that there is a moral responsibility on the part of the United States to compensate this small child for his lifelong disability. The committee felt that the bill should be amended so as to provide for a $15,000 payment to the legal guardian of the child in lieu of the original provision of a payment of $100,000 to the parents. The committee, therefore, recommends that the bill be amended to provide for such a $15,000 payment to the legal guardian of the child, and that the amended bill be considered favorably.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 4428) was ordered to a third reading, read the third time, and passed.

STATEMENT BY SENATOR LAUSCHE ON RESOLUTION IN OPPOSITION TO RECESS APPOINTMENTS TO THE SUPREME COURT

Mr. LAUSCHE. Mr. President, yesterday when the Hart resolution was voted on, I cast my vote against the resolution. At that time I did not have an opportunity to speak on the measure, because the available time had expired.

Today I should like to state my reasons for voting against the resolution. I voted against it because I was convinced that the Senate would thus be exercising a right which did not legitimately belong to it. It was my opinion that the Senate was thus guilty of usurpation of a right which was not its, and that the Senate had no justification for attempting to state what the President should do in regard to a matter which the Constitution clearly and unequivocally states is one of the powers of the President.

I now read paragraph 3 of section 2 of article II of the Constitution.

> The President shall have power to fill up all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session.

That language is clear, and does not require any interpretation. It specifically declares that the President shall have the unconditional power to fill vacancies during a Senate recess. What I have read is contained within the Constitution of the United States.

On September 17, Members of the Senate will be speaking throughout the Nation, urging the people to adhere to the provisions of the Constitution of the United States. When our Constitution was adopted its writers contemplated giving limited and clearly defined powers to the Chief Executive, the Congress, and the courts. Based upon experience prior to 1787, the men who sat in the Constitutional Convention knew that it was dangerous to give unlimited power to government. The writers of the Constitution contemplated that the supreme powers shall remain with the people.

The sovereignty shall be with the people. The Congress and the courts and the Chief Executive shall have only those powers which are specifically granted to them.

There were men of great learning who spoke in that convention; and subsequently to the assembly of those men, statements were made about the Constitution. Those statements are worthy of being considered again, and I should like to read for the moment what was said by various men with respect to the Constitution. Here is what Jefferson said:

> It would be a dangerous delusion were a confidence in the men of our choice to silence our fears for the safety of our rights: that confidence in men is everywhere the parent of depotism—free government is founded in jealousy, and not in confidence; it is jealousy and not confidence which prescribes limited constitutions, to bind down those whom we are obliged to trust with power: that our Constitution has accordingly fixed the limits to which, and no further, our confidence may go.

Jefferson finally concludes with this sentence:

> In questions of power, then, let no more be heard of confidence in man, but bind him down from mischief by the chains of the Constitution.

That is what they intended to do, and that is what they did.

Now returning again to the resolution of yesterday, as I pointed out, the Constitution gives the President the clear power to fill all vacancies. There is nothing said to the effect that the Congress shall advise him. But what did the Senate do yesterday? It adopted a resolution in which it said that:

> It is the sense of the Senate that the making of recess appointments to the Supreme Court of the United States may not be wholly consistent with the best interests of the Supreme Court, the nominee who may be involved, the litigants before the Court, nor indeed the people of the United States.

I ask my colleagues: By what justification do we proceed to say that the clear and unequivocal declarations in the Constitution are to be interpreted in the manner set forth in that resolution?

Mr. President, the Constitution gives to the President power which was given to him by the people. The language is clear. But the Senate, contrary to what the Constitution provides, went on to declare that if the President acted in accordance with the authority granted him in the basic law of the land, he, in effect, would be taking action that was inimical to the best operation of the Supreme Court, action that would become disadvantageous to litigants, action that would impair the rights of the citizens of the United States.

I simply cannot understand it. The Constitution is clear in its provisions. The President has the right to make appointments during recess. I assume that when the Constitution was written, consideration was given to the fact that the Senate would not be in session when certain recess appointments were made. But in spite of that fact, the Senate on yesterday, in effect, as I have said a moment ago, declared that the making of appointments to the Supreme Court in time of recess may not be wholly consistent with the best interests of the Supreme Court, and may not be wholly consistent with the rights of the nominee and the litigants before the court.

Where did we get the authority to exercise that right on yesterday? We took it upon ourselves without any justification in the Constitution of the United States.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield to the Senator from Tennessee.

Mr. GORE. As the able Senator knows, he and I voted together against the adoption of that resolution on yesterday. I do not question the right of the Senate to adopt such a resolution. I respectfully question the advisability and good judgment of doing so.

Mr. LAUSCHE. I think there is great substance in what the Senator has stated. We have the power to adopt the resolution. I question our right to adopt it. There is a difference between the two. Right means that such action is in conformity with the letter of the Constitution.

We urge people to obey the Constitution. We proclaim its glory throughout the world. We condemn the Supreme Court when we believe it has exercised rights not granted to it by the Constitution.

Despite this, this great deliberative body repudiates the clear implication of the Constitution that the President is within his right, when the Congress is in recess, to make appointments. What do we say. We say, "Mr. President, if you wish to make an appointment during the recess, even though the Constitution grants you the right, you will be guilty of conduct inconsistent with the best interests of the Supreme Court; you will be guilty of conduct which is not helpful to the nominee who has been appointed; you will create a condition inimical to the rights of litigants who appear before the court."

Mr. CLARK. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield to the Senator from Pennsylvania.

Mr. CLARK. I did not speak on the resolution yesterday, although I voted for it. I respect the strong and well-presented views of my friend from Ohio and my friend from Tennessee. I disagree completely with them.

I think the Senate was well within its rights. I think we did a very wise thing in passing the resolution we passed. I hope that future Executives will stick to the point which the sense-of-the-Senate resolution indicates. I make this comment not to engage my friends in argument, but merely to make my own record clear. I thank my friend for yielding.

Mr. LAUSCHE. The Senator from Pennsylvania is of the opinion that the President should not make appointments during recesses?

Mr. CLARK. I am of the opinion that the President of the United States might perhaps make an appointment during the recess, but that the appointee should not take his seat and participate in the business of the Court until after his nomination has been confirmed by the Senate.

Mr. LAUSCHE. Let us assume that the Senator from Pennsylvania is correct. Would not the proper course be to propose an amendment to the Constitution, rather than to take a step which to me, at least, is clearly inconsistent with the spirit of the Constitution?

Mr. CLARK. The Senator asked me a question. I can only reply in the negative. The sense-of-the-Senate resolution is not binding on anybody. It is a matter of guidance for the President. The President can ignore it, if he sees fit. The President has a constitutional right to ignore it, exactly as we have a constitutional right to pass it. I think we did the proper thing.

Mr. LAUSCHE. The weakness, in my opinion, in the position taken by the Senator from Pennsylvania is that, in effect, we say to the President, "Disregard the provisions of the Constitution. Unless you do, if your nominee comes before the Senate, we will not approve his nomination."

Mr. CLARK. In my view, the interpretation of my friend from Ohio is a strained one. I know we disagree on this. I do not mean to continue the argument.

Mr. LAUSCHE. Mr. President, yesterday I did not get the opportunity to discuss the resolution. I feel that this matter is of such significance that I should make my views clear on the RECORD. I do not wish to be a party, especially in the exalted Senate, to declarations which are, in my opinion, clearly in conflict with the letter and with the spirit of the Constitution.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield.

Mr. GORE. Does not the able Senator find it possible to draw a clear line of distinction between the exercise of a Presidential prerogative on the one hand, and the qualification and assumption of duties by an appointee on the other?

Mr. LAUSCHE. The Senator from Tennessee is repeating what the Senator from Pennsylvania said. The Constitution says nothing about the appointee delaying filling the office. The Constitution says the President shall have the power to fill vacancies. If the writers of the Constitution had intended that the appointee should not begin his services, they would have so stated in the Constitution. If we think they should have said it in that way and that it should be said now, then let some Senator introduce a joint resolution to amend the Constitution.

PROPOSED AMENDMENT TO SENATE RULES TO LIMIT SPEECHES TO 3 HOURS

Mr. CLARK. Mr. President, I submit a resolution to amend the Senate rules to permit any Senator to object when another Senator holds the floor for more than 3 hours during Senate debates, and I ask that the resolution be appropriately referred. I ask unanimous consent that the resolution lie on the desk until the close of business tomorrow for additional cosponsors.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania?

Mr. BUSH. Mr. President, will the Senator yield for a question?

Mr. CLARK. I am happy to yield.

Mr. BUSH. Would the resolution provide that if a Senator wishes to proceed after 3 hours of speaking, he would have to have unanimous consent?

Mr. CLARK. Yes.

Mr. LAUSCHE. Mr. President, what is the unanimous-consent request?

Mr. CLARK. I am submitting a resolution to change the rules of the Senate. I asked unanimous consent that it lie on the desk until the close of business tomorrow for additional cosponsors, of whom I hope the Senator from Ohio will be one.

Mr. LAUSCHE. I thank the Senator.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield.

Mr. STENNIS. The Senator is merely requesting that the resolution be referred, in the usual way, to a committee. Is that correct?

Mr. CLARK. That is correct.

Mr. STENNIS. I have no objection.

The PRESIDING OFFICER. The resolution will be received and appropriately referred; and, without objection, the resolution will lie on the desk, as requested by the Senator from Pennsylvania.

The resolution (S. Res. 384) to amend rule XIX so as to limit debate on the part of a Senator, was referred to the Committee on Rules and Administration, as follows:

Resolved, That paragraph numbered 1 of rule XIX of the Standing Rules of the Senate (relating to debate) is amended by adding at the end thereof the following new sentence: "Whenever any Senator has held the floor for more than 3 consecutive hours, an objection to his continued recognition shall be in order at any time, and, if such an

objection is made, the Senator shall yield the floor."

Mr. CLARK. Mr. President, in the 18th century when the Senate had 26 Members and the Legislative Calendar was brief and did not contain matters of urgent importance to many millions of people, there was time to permit individuals to engage in filibusters. There is no time for such tactics in the 1960's. Marathon speeches by any one Senator in a body which now numbers 100 Members should not be tolerated.

I submit that no Senator needs more than 3 hours to expound his views on any specific matter coming before the Senate for action. Senators will judge for themselves whether they can recall a single occasion on which any Member took more than 3 consecutive hours to state his views on any subject when his purpose was not purely one of delay. I recall no such occasion.

When a Senator is interrupted repeatedly by a colloquy the Senate can be relied upon to grant unanimous consent for the Senator to continue beyond the 3-hour period, unless the colloquy is obviously engaged in for the purpose of delay. If he cannot get such consent, he would still have the right under rule XIX to speak once more on the same subject during the same legislative day, if he can obtain recognition.

I am reminded of Oliver Wendell Holmes' apology when he delivered a particularly long opinion one day as a member of the Massachusetts Supreme Court:

I did not have time to write a short one.

A 3-hour speech is hardly a short one, but the Senate should take the time next January, when we determine the rules we will operate under during the 87th Congress, to make sure that no future speech is longer than that.

PROPOSED BILL OF RIGHTS FOR SENATE STANDING COMMITTEES

Mr. CLARK. Mr. President, I submit, for appropriate reference, another resolution to change the Senate rules so as to establish a bill of rights for Senate standing committees. This is the last of my nine proposals for changes in Senate procedures, which I hope will be given careful consideration by my colleagues next January.

This proposal would permit a majority of members of any standing committee of the Senate, first, to convene meetings of the committee; second, to consider any matter within the jurisdiction of the committee; and, third, to end committee debate on a given measure by moving the previous question.

The 16 Senate standing committees vary enormously in their recognition of democratic procedures. No one could ask for fairer treatment or more expeditious handling of committee business than occurs in some committees. In other committees, however, it is well known that the will of the majority can be, and often is, thwarted with impunity.

We should have more confidence in democratic procedures than to permit such practices to continue. The enormous backlog of public legislative business piled up because of the indifference of the Eisenhower administration should compel us to expedite committee action on important measures when a majority of the committee are ready to act.

My proposal would permit a majority of the members of any standing committee to convene committee meetings, to call up any matter within the jurisdiction of the committee for consideration at any meeting, and to move the previous question when any matter has been under consideration for a total of 5 hours of debate. If the motion were adopted, each member of the committee desiring to be heard on any of the issues on which the previous question had been ordered would be allowed to speak for a total of 30 minutes before the amendment or bill was brought to a final vote.

Mr. President, I ask unanimous consent that the resolution may be permitted to lie on the desk until the Senate concludes its business tomorrow, to permit other Senators to cosponsor it.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield.

Mr. STENNIS. The Senator's request is that the resolution be referred to the Committee on Rules and Administration, but that it lie on the table for the purpose of permitting other Senators, who may wish to sign with the Senator from Pennsylvania, to do so; is that correct?

Mr. CLARK. The Senator is correct.

The PRESIDING OFFICER. The resolution will be received and appropriately referred; and, without objection, the resolution will lie on the desk, as requested by the Senator from Pennsylvania.

The resolution (S. Res. 385) relating to proceedings in standing committees of the Senate, was referred to the Committee on Rules and Administration, as follows:

Resolved, That section 134 of the Legislative Reorganization Act of 1946 (2 U.S.C. 190(b)), enacted by the Congress in the exercise of the rulemaking power of the Senate and the House of Representatives, is amended with respect to the Senate by adding at the end thereof the following new subsections:

"(d) Each standing committee of the Senate shall meet at such time as it may prescribe by rule, upon the call of the chairman thereof, and at such other time as may be fixed by written request made to the chairman by a majority of the members thereof.

"(e) The business to be considered at any meeting of a standing committee of the Senate shall be determined in accordance with its rules, and any other measure, motion, or matter within the jurisdiction of the committee shall be considered at such meeting that a majority of the members of the committee indicate their desire to consider by votes or by presentation of written request to the chairman.

"(f) Whenever any measure, motion, or other matter pending before a standing committee of the Senate has received consideration in executive session or sessions of the committee for a total of not less than five hours, any Senator may move the previous question with respect thereto. When such a motion is made and seconded, or a petition signed by a majority of the committee is presented to the chairman, and a quorum is present, it shall be submitted immediately to the committee by the chairman, and shall be determined without debate by yea-and-nay vote. A previous question may be asked and ordered with respect to one or more pending measures, motions, or matters, and may embrace one or more pending amendments to any pending measure, motion, or matter described therein and final action by the committee on the pending bill or resolution. If the previous question is so ordered as to any measure, motion, or matter, that measure, motion, or matter shall be presented immediately to the committee for determination. Each member of the committee desiring to be heard on one or more of the measures, motions, or other matters on which the previous question has been ordered shall be allowed to speak thereon for a total of thirty minutes."

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the following bills and joint resolutions of the Senate:

S. 882. An act for the relief of the heirs of J. B. White;

S. 2353. An act for the relief of Col. John A. Ryan, Jr.;

S. 2761. An act to validate payments made for certain emergency conservation measures under the program authorized by the Third Supplemental Appropriation Act, 1957;

S. 2770. An act for the relief of Borinquen Home Corp.;

S. 2959. An act to clarify the right of States to select certain public lands subject to any outstanding mineral lease or permit;

S. 3146. An act to authorize the Commodity Credit Corporation to donate dairy products and other agricultural commodities for use in home economics courses;

S. 3439. An act authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet;

S. 3619. An act to make permanent law the provisions of section 408 of the National Housing Act regulating savings and loan holding companies;

S. 3665. An act to authorize the Secretary of Agriculture to grant an easement over certain lands to the trustees of the Cincinnati Southern Railway, their successors and assigns;

S. 3681. An act authorizing the Rhode Island Turnpike and Bridge Authority to combine for financing purposes the bridge across the West Passage of Narragansett Bay with the Newport Bridge and any other project acquired or constructed by said authority;

S. 3759. An act authorizing the Secretary of Agriculture to convey certain lands to Auburn University, Auburn, Ala.;

S. 3771. An act to amend certain provisions of the Trust Indenture Act of 1939, as amended;

S. 3773. An act to amend certain provisions of the Investment Advisers Act of 1940, as amended;

S.J. Res. 9. Joint resolution to provide for the removal of a reservation of timber rights from a patent issued to Ivan H. McCormack; and

S.J. Res. 209. Joint resolution providing for the establishment of an annual National Forest Products Week.

The message also announced that the House had agreed to the amendments of the Senate to the amendments of the House to the bill (S. 1898) to amend the Communications Act of 1934 with respect to the procedure in obtaining a license and for rehearings under such act.

The message further announced that the House had agreed to the amendments of the Senate to each of the following bills of the House:

H.R. 5396. An act to amend title 28 of the United States Code to provide for transfer of cases between the district courts and the Court of Claims; and

H.R. 11573. An act to provide for the free entry of an electron microscope for the use of William Marsh Rice University of Houston, Tex., and an electron microscope for the use of the University of Colorado Medical Center, Denver, Colo.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H.R. 11561) to authorize and direct the Secretary of the Army to convey part of lock and dam No. 10, Kentucky River, Madison County, Ky., to the Pioneer National Monument Association for use as part of a historic site.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10087) to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit.

TO BE FOREWARNED

Mr. KEFAUVER. In every national election the claim is made that the Nation is at a crossroads. This claim is not altogether untrue, because, when examined carefully, each of our national elections has taken place in the shadow of one or more important issues.

It is not the purpose of my remarks today to enumerate the many important issues facing the American people when they go to the polls in November 1960.

Nor is it my purpose to dwell on the fact that the rest of the world—both Communist and free—always watches our elections with much interest. It will watch more carefully than usual this time, because the hope for freedom on every continent hangs on the survival of a strong American democracy. We can no longer afford the luxury of indifference to the people who watch us. Our lives may well depend on their reactions.

If we allow this present contest to descend to the low level of some past elections, we cannot help but lower ourselves in the eyes of those upon whose help and friendship we depend and also give aid and comfort to those who boast that they will "bury" us.

But, more important in my view is the harm which a hatemongering election will do to us as a nation.

Hate begets hate; passion begets passion. Not only will a smear campaign damage the image of our country, it will also damage the soul and the conscience of our Nation.

Therefore, I would like to join those who have raised their voices to warn against the professional hatemongers and poison-pen pamphleteers who will come into this election as they have in others.

It is not enough to dissociate oneself from scurrilous propaganda put out on one's behalf, but a candidate has the responsibility to take active measures against it.

The purpose of a political campaign is to make clear the parties' stands on major problems and to demonstrate the candidates' abilities to deal on critical questions. The American people can make an intelligent decision this year only if the issues are presented to them honestly.

If the American people succeed, it will be despite the efforts of some strong forces to deflect them. There will be organizations and publications—like the Ku Klux Klan, the falsely named committee for constitutional government, and a magazine called Human Events, to mention just three—that will peddle messages of suspicion and falsehood, that will attempt to rally prejudice in place of reason.

The hatemongers are already using every smear technique in the book to invoke hatred in an effort to win elections by hiding the issues. They deal in guilt by association, innuendoes, distortions, half-truths, and wild fabrications. They use leaflets, crude and obscene cartoons, composite photographs, whispering campaigns, and a hundred other devices. Sometimes they peddle signed literature; more often, anonymous trash.

We cannot stop the circulation of all of this hate literature, but we can cut it down. We can also publicly disown it. And, more important, we can immunize ourselves against it—"to be forewarned is to be forearmed."

And, as the denial rarely ever catches up with the charge, we can do some denying in advance.

Before discussing methods we can use to inoculate ourselves against the hate injections, let me make clear that, although I am highly partisan—and shall do everything I can to help Senators KENNEDY and JOHNSON—I do not consider this problem of clean campaign tactics as even vaguely partisan. It is important for all Americans that, whichever slate of candidates we select, we select them for valid reasons.

Certainly there can be no doubt that the political conscience of America is nonpartisan. The National Committee on Fair Campaign Practices is led by a courageous Republican, Charles P. Taft, of Cincinnati, who has worked hard and effectively to secure the observance of fair campaign practices codes. My Democratic colleague from Tennessee [Mr. GORE] has labored long and hard in this field. A Republican and a Democrat, the senior Senator from Wisconsin [Mr. WILEY] and the senior Senator from Rhode Island [Mr. GREEN], made the presentations before the Internal Revenue Commission which led to a denial of tax exemptions for the political propaganda for Edward Rumely's committee for constitutional government.

I feel a particular responsibility for speaking out on this subject at this time because I recently witnessed a classical example of a campaign where appeals to false issues were rife.

I was the target of a number of these issues, such as "soft on communism." To support this charge, it was stated that I voted for the Kennedy bill to abolish student loyalty oaths. New charges were made when I pointed out that first, the bill did not abolish the loyalty oath for students getting Federal loans, but simply eliminated from it a fuzzy and unfair part about no disloyal acts; and second, the bill was agreed to in the Senate on June 15, 1960, without even a request for a rollcall and, virtually, without dissent.

As this loyalty oath bill is now being used against Senator KENNEDY to support the allegation that he is "soft on communism," I shall read the student oath as it now stands:

I do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic.

We cannot stop anybody from saying that all of us who voted for this oath are "soft on communism" but we can forewarn those who might hear the charge and do not know the facts.

Many of the doctors and druggists in Tennessee participated in a massive letterwriting campaign, charging me with being "socialistic" because of our drug investigations and my support of an adequate plan for medical care for the aged.

I was cursed for my support of the United Nations.

All in all, it was pretty rough. Yet, we did manage to keep the real issues before the people of Tennessee, and we did penetrate the fog so that they could see the role played by the special economic interests and by the professional hatemongers.

We were successful in Tennessee and I am hopeful that we will be successful in the Nation. Now with our national life challenged by attacks on both sides of the oceans, America faces a crucial test of its maturity. Can we choose a government rationally and intelligently? Or will we make our decision on the basis of blind, unreasoning passions and irrelevant "issues"?

We have faced this test before.

In 1860, Abraham Lincoln was subjected to the worst sort of vilification imaginable. Yet, he won. I believe his victory was partially due to the fact that he refused the support of hate groups.

In more recent times, in 1928, we went through an equally dirty campaign, and one in which the vilified candidate lost. There is certainly grave doubt that Al Smith would have won in 1928 even if there had been no scurrilous attack upon him because of his religion—it was probably not a Democratic year in any event. But this detracts not one whit from the fact that part of his defeat was directly due to a campaign calculated to stir up religious hatreds.

And this campaign was a blatant repudiation of both the spirit and letter of our Constitution that religion is not a test for political office. Article VI of that sacred document states specifically that "no religious test shall ever be required as a qualification to any office or public trust under the United States."

When America faced the test in 1928, she flunked.

The question now is whether the ghost of 1928 has been laid to rest.

All indications are that it has not—that it is riding high, at least in some places.

The country is being flooded once again with false and libelous anti-Catholic materials. Some of it is obscene. Most of it is unsigned.

There is every likelihood that this hate campaign will get worse before it gets better. There is no telling what type of disgusting trash may be shoved under the doors or put in the mailboxes of millions of decent Americans.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KEFAUVER. I am happy to yield to my distinguished colleague from Tennessee.

Mr. GORE. Does not the Senator believe that, regrettable though this type of activity is, it may be better for the electorate that it has started so soon? Starting so soon, the American people will have ample opportunity to measure it and reject it.

Mr. KEFAUVER. Yes; I agree with my colleague that it is regrettable that there must be distortion and smear literature and misrepresentations. I commend the many outstanding statesmen and public servants, both Democrats and Republicans, for denouncing it. I thank my colleague. He is right that, with the smear campaign having started early, and with the American people analyzing and weighing it over a period of time, its effect will certainly be diminished and, in many cases, completely demolished.

However, there is every present indication that we can expect an increasing flow of different types of smear literature and unsigned political documents. I believe that immediately before the election we may anticipate new types. Therefore, I think it is well that the American people be forewarned as to what to expect and what might happen, so that they can be on the lookout for it.

As a matter of fact, in some cases, when there is time and when the explanation catches up with the charge, the charge backfires against the people upon whose behalf it is intended to be circulated.

I thank my colleague. As chairman of the subcommittee investigating elections several years ago, he has had a great deal of experience with this kind of thing.

We may see the scurrilous "Awful Disclosures of Maria Monk," which purports to be the autobiography of a nun, but which, in fact, was written by a demented woman of ill repute in 1832. The people of Wisconsin saw a revival of this fraud in the primary election of 1960.

Or we may see the false charge that Abraham Lincoln was assassinated by Catholics after he had voiced a warning against Catholicism. The people of Wisconsin did.

Or we may see the bogus document which pretends to be a secret oath of the Knights of Columbus, a Catholic fraternal and patriotic group. According to this fraudulent document, members of the organization pledge that, when ordered, they will commit against heretics almost every horrible crime imaginable, including murder, torture, and arson.

Unfortunately, this false oath was an issue in the West Virginia primary this year. It is still being widely circulated in the country.

I have a copy of this false document here, and I shall not ask that it be inserted in the CONGRESSIONAL RECORD. This was done once before—in 1913—in an attempt by a congressional committee to demonstrate its absolutely false nature. Ever since then, hatemongers have cited its appearance in the CONGRESSIONAL RECORD as proof of its authenticity. The technique is typical of the hatemongers.

The Library of Congress prepared a short "Statement Concerning the Fraudulent Character of the Alleged Knights of Columbus Oath," and I desire that it be printed at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT CONCERNING THE FRAUDULENT CHARACTER OF THE ALLEGED KNIGHTS OF COLUMBUS OATH

The so-called oath of the Knights of Columbus formed the basis of one of the charges in the contested election of Eugene C. Bonniwell against Thomas S. Butler of the 7th Congressional District of Pennsylvania, in the 62d Congress, and was printed as an exhibit, not as being the oath of the order, in the CONGRESSIONAL RECORD, February 15, 1913 (p. 3216). The committee report on the case (H. Rept. 1523 of the House Committee on Elections No. 1, 62d Cong.) was also printed in the CONGRESSIONAL RECORD of February 15, 1913 (pp. 3215–3221).

Mr. Bonniwell's fourth charge (p. 3216) referred to the circulation of "a blasphemous and infamous libel, a copy of which is hereto attached, pretended to be an oath of the Knights of Columbus, of which body the contestant is a member." He added: "So revolting are the terms of this document and so nauseating its pledges that the injury it did not merely to the contestant but also to the Knights of Columbus and to Catholics in general can hardly be measured in terms."

Mr. Butler, the contestee, said (p. 3219): "I believe the circulation of this paper known as the Knights of Columbus oath, notwithstanding my sincere efforts to suppress it, and spurious as I believed it to be, was of disadvantage to me and lost rather than gained votes for me."

The committee, while seating Mr. Butler, concluded: "This committee cannot condemn too strongly the publication of the false and libelous article referred to in the paper of Mr. Bonniwell, and which was the spurious Knights of Columbus oath, a copy of which is appended to the paper."

The CONGRESSIONAL RECORD of January 29, 1915, contains (p. 2721) the findings submitted by Representative Kettner, of California, of a committee of Free Masons in California, who examined the ceremonials and pledges of the Order of Knights of Columbus. The committee said: "We find that neither the alleged oath nor any oath or pledge bearing the remotest resemblance thereto in matter, manner, spirit, or purpose is used or forms a part of the ceremonies of any degree of the Knights of Columbus. The alleged oath is scurrilous, wicked, and libelous, and must be the invention of an impious and venomous mind."

The CONGRESSIONAL RECORD of February 4, 1915 (pp. 3017–3020) in connection with remarks by Representative Gallivan, of Massachusetts, contains a report, presented by him, of the commission on religious prejudice of the Knights of Columbus, in which there is a review of the various prosecutions for criminal libel "in printing or publishing or defaming by means of the alleged oath." The same number of the CONGRESSIONAL RECORD (p. 3021) contains also the above-mentioned report of the committee of Free Masons.

Mr. KEFAUVER. Mr. President, for those who might wonder what the true oath is, I shall read that actually taken by members of the Knights of Columbus:

I swear to support the Constitution of the United States. I pledge myself, as a Catholic citizen and a Knight of Columbus, fully to enlighten myself upon my duties as a citizen and conscientiously perform them entirely in the interest of my country, regardless of personal consequences. I pledge myself to do all in my power to preserve the integrity and purity of the ballot and to promote respect for law and order. I promise to practice my religion consistently and faithfully, and to so conduct myself in public affairs and in the exercise of public virtue as to reflect nothing but credit upon our holy church, to the end that she may flourish and our country prosper to the greater honor and glory of God.

During the present campaign we may also suddenly discover that a candidate chooses to run against a labor leader rather than against his opponent.

For example, in the 1958 electioneering, Walter Reuther, whose total commitments to democracy and whose integrity in the American labor movement have been used to good effect in our struggle overseas against communism by our own State Department, was not a candidate. Yet, in 35 States of the Union, candidates for office chose to run against him and straw issues rather than against their actual opponent and on the real issues.

Let me suggest that a proper regard for the rights of people who are not candidates in the election campaign be observed.

Vilification and character assassination of innocent bystanders certainly should not be tolerated. Candidates themselves, of course, must expect to bear up under the blasts of campaign heat. But even at the climax of the campaign battle, candidates, too, are entitled to criticism that stops on the decent side of the line that separates libel and accusations of treason from a fair charge, strongly made.

In the present campaign, both the Republican and Democratic National Committees, as well as both candidates, have pledged their best efforts to see that prejudice and intolerance are kept out of the campaign.

This is certainly highly commendable. But, if past experience is any guide, these declarations will be only partially successful in spite of the statements of good intentions.

The American people themselves must be informed on the activities of hate peddlers.

They must be on the alert against plausible poisons.

They must be skeptical.

They must be inoculated against becoming infected with the germ of unreason.

They must become suspicious of all unsigned political literature, especially leaflets and pamphlets containing stories that are too pat or too inflammatory.

They must be able to recognize self-contradictions, such as accusations that a candidate is "ruled from Rome" and at the same time he is "soft on communism."

They should make no appeal and hear no appeal which cannot properly be made to every American.

They should be informed that there are both Federal and State laws against corrupt campaign practices and unsigned literature.

They should know that there is a national committee on fair campaign practices which is ready, willing, and able to help cut down on the evil effects of hate peddling.

They should demand that all candidates for political office agree to the committee's code of fair campaign practices, and I ask that this brief code be printed at this point in my remarks. And they should report violations of the code to the committee.

There being no objection, the code was ordered to be printed in the RECORD, as follows:

CODE OF FAIR CAMPAIGN PRACTICES

There are basic principles of decency, honesty, and fairplay which every candidate for public office in the United States has a moral obligation to observe and uphold, in order that, after vigorously contested but fairly conducted campaigns, our citizens may exercise their constitutional right to a free and untrammeled choice and the will of the people may be fully and clearly expressed on the issues before the country.

Therefore:

I shall conduct my campaign in the best American tradition, discussing the issues as I see them, presenting my record and policies with sincerity and frankness, and criticizing without fear or favor the record and policies of my opponent and his party which merit such criticism.

I shall defend and uphold the right of every qualified American voter to full and equal participation in the electoral process.

I shall condemn the use of personal vilification, character defamation, whispering campaigns, libel, slander, or scurrilous attacks on any candidate or his personal or family life.

I shall condemn the use of campaign material of any sort which misrepresents, distorts, or otherwise falsifies the facts regarding any candidate, as well as the use of malicious or unfounded accusations against any candidate which aim at creating or exploiting doubts, without justification, as to his loyalty and patriotism.

I shall condemn any appeal to prejudice based on race, creed, or national origin.

I shall condemn any dishonest or unethical practice which tends to corrupt or undermine our American system of free elections or which hampers or prevents the full and free expression of the will of the voters.

I shall immediately and publicly repudiate support deriving from any individual or group which resorts, on behalf of my candidacy or in opposition to that of my opponent, to the methods and tactics which I condemn.

I, the undersigned, candidate for election to public office in the United States of America, hereby endorse, subscribe to, and solemnly pledge myself to conduct my campaign in accordance with the above principles and practices, so help me God.

Mr. KEFAUVER. Mr. President, we Members of the Senate, of both parties, have a responsibility in this regard. We are leaders in our communities. We have the duty to raise our voices against prejudice when it raises its head.

Provided the people get the facts, I am confident that their good sense and the national conscience will not tolerate the substitution of poison peddling and scandal mongering for a presentation of the reality which must be faced in the election booth.

No party has a monopoly on patriotism. Both parties have an identical commitment to the welfare of our country and our people. The differences which exist between parties are based on different American views of how this welfare might best be furthered.

We do differ, and properly, on vital issues whose resolution will decide how we meet our national destiny—foreign policy, a national growth policy, the farm calamity, monopoly controls, how to insure justice for every American, national education policy, resources policy, medical assistance for the aged. On these issues, the debate should be hot and articulate, and every fact that has a bearing should be put before the people.

This is the responsibility of the candidates and the parties, but the American people have a responsibility too: They must search their conscience and vote accordingly.

In conclusion, I should like to quote a few short paragraphs from a booklet entitled, "Prejudice and Politics," by Charles P. Taft and Bruce L. Felknor.

The citizen can learn that the average voter can, in fact, exert absolute control over politics in his community, and over the use of prejudice in politics.

For prejudice and politics have one thing in common: Each can work only so far as people are willing to accept it. Prejudice operates where people are willing to let it hold sway over their minds and beliefs and actions. Politics can operate only so far as people accept it as the means by which governments are constituted and conducted. The citizen who calls politics beneath his consideration is depriving himself of his only opportunity to share in governing himself and his neighbors.

In the final analysis, the voter who is fooled and the citizen who is misgoverned have only themselves to blame for their plight. And the realization of that fact is our brightest hope for the future of the United States of America.

I, for one, have great faith in the American voter. Let us give him a fighting chance by keeping the campaign on the tracks, by discouraging false charges, and by ruling out blind intolerances.

Mr. BIBLE. Mr. President, will the Senator from Tennessee yield?

Mr. KEFAUVER. I yield.

Mr. BIBLE. I have followed with great interest the very fine talk which the distinguished Senator from Tennessee has just made. I commend him for it. I think he strikes the right tone. I had occasion to appear on a television program day before yesterday. I hope I spoke in the same vein, although I am certain I did not speak half so well. I think we ought to look with great alarm upon any campaign that moves in the direction against which the Senator from Tennessee has warned.

Mr. KEFAUVER. I am certain the Senator from Nevada spoke more forcefully and eloquently than I have.

Mr. BIBLE. I commend the Senator. His remarks are in good taste and are properly spoken. Certainly the people of the United States should take great strength from reading such an able talk as the one he has just delivered.

Mr. KEFAUVER. I thank the Senator from Nevada.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. MANSFIELD. I, too, wish to to commend the senior Senator from Tennessee for what he has just said. In his speech, he talked about the responsibilities of the people, using the term in its generic sense. He has exercised his responsibility as a U.S. Senator in a very statesmanlike and responsible way.

I hope that the remarks he made this afternoon will be read by all Americans, regardless of their political affiliation.

The Constitution of the United States makes no mention of race, religion, or region. I express the hope that when the people of the country go to the polls, they will judge the candidate of their choice on the basis of his record, his integrity, his ability, and his determination.

I compliment the Senator from Tennessee. Once again, as on so many public occasions, he has rendered a distinct public service. I commend him.

Mr. KEFAUVER. Mr. President, I deeply appreciate the compliment paid me by the distinguished Senator from Montana.

Mr. KEATING. Mr. President, will the distinguished Senator from Tennessee yield?

Mr. KEFAUVER. I yield.

Mr. KEATING. The distinguished Senator from Tennessee, in characteristic fashion, has made a forceful, vigorous plea for religious tolerance. Certainly we who know him and know his record are aware of the fact that the Senator from Tennessee has always stood for human tolerance and mutual understanding among peoples. The words which he has spoken cannot be too often stated. In the forthcoming presidential campaign—and in every election campaign—candidates should be judged on the record. The place where they attend church is a matter of their own choice. The place where they were born is irrelevant. Their economic status is irrelevant. The things that are relevant are their record, their qualifications, their character, and their ability to lead our great country.

All Americans can join in the hope expressed by the distinguished Senator from Tennessee that religion must in no way enter into the forthcoming campaign.

Mr. KEFAUVER. I thank the Senator from New York. I know his words represent the philosophy which he has demonstrated over many years. I thank him for his addition to this discussion this afternoon.

CONDEMNATION BY ORGANIZATION OF AMERICAN STATES OF INTERFERENCE BY SINO-SOVIET BLOC IN THE WESTERN HEMISPHERE

Mr. KEATING. Mr. President, the action of the foreign ministers of the Organization of American States in condemning interference by the Sino-Soviet bloc of nations in this hemisphere and in condemning any attempt to "make use of the political, economic, or social situation of any American state for their purposes" marks an important step in the development of effective Pan-American cooperation.

It was not easy for the Latin American States to come out with what amounted to a bold denunciation of Cuba's policies. But with this step comes a growing realization throughout the continent that the revolutionary propaganda and incitement from Cuba are aimed not only at the United States, but also at the rest of the Western Hemisphere.

We must not expect the Latin American States to move as rapidly against one of their own number as we might like to. And we must not expect them to be as fully aware of the dangerous threat of communism as we have come to be. But it is clear that in this matter, time is on our side.

The excesses and Communist infiltration of the Cuban regime and Castro's overweening ambition to spread this brutal "revolution" beyond the borders of Cuba can only strengthen the general suspicion of that country.

The OAS condemnation of outside intervention, as worded in the Declaration of San José, is a very good start, indeed. I hope that the six-nation committee that was set up to mediate the existing Caribbean problems will be active in seeking either a change of heart in Cuban leadership or an effective policy of quarantining the Cuban menace on the Island of Cuba until the Cubans see for themselves how they have been duped by their own leaders.

As Secretary of State Herter pointed out at the conclusion of the meetings:

> The U.S. delegation firmly associates itself with the feeling of so many of its colleagues in hoping that the people of the Dominican Republic and Cuba will have the opportunity quickly to return their governments to the principles of freedom and to democracy within the inter-American system.

Mr. President, I request unanimous consent that a penetrating editorial from the New York Times be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 30, 1960]

VICTORY AT SAN JOSÉ

The United States won a notable victory at the second Foreign Ministers meeting in San José, Costa Rica. The Ministers completed a historic pair of sessions yesterday. In the first the Trujillo regime of the Dominican Republic was condemned and sanctions were voted against it. In the second of the consultative meetings there were no sanctions and Cuba was not even mentioned in the final resolution, but Cuba was the loser in an extraordinary diplomatic battle with the United States.

By any standards of the historic and traditionally acceptable principles of the inter-American system, Cuba deserved to lose. She had welcomed a threat by Russia to intervene with nuclear missiles in a Western Hemispheric quarrel. Inter-American disputes should be handled by the Organization of American States. Premier Castro had indulged in a bitter attack on the OAS while the Foreign Ministers were in San José. Moreover, the Cubans were in the process of a fierce assault on the United States. When a flyweight takes on a heavyweight he must expect to be flattened out.

The Americans won a genuine moral victory. It was important to get the OAS on record against intervention by the Sino-Soviet powers and against their attempt to make use of the political, economic, or social situation of any American state for their purposes. This represents a real threat to hemispheric stability and unity. The outcome at San José preserved hemispheric solidarity to the maximum extent possible.

It is necessary, however, to go beyond the numerical victory for the United States and beyond the wording of the resolution which was so satisfactory to the North Americans. The length of time it took to win this victory—a whole week—was extraordinary. This was a tribute to the skill and tenacity with which Cuban Foreign Minister Raul Roa fought, but it was also due to the peculiar and delicate position of the United States in the inter-American system.

Any exercise of U.S. power against a Latin American nation is instinctively resented by all the other Latin American countries. The Latins, moreover, do not really feel and see and understand the issue of communism as we do, even when they go along with the wording of resolutions like the Declaration of San José and the Caracas Resolution of 1954. Another factor to keep in mind is that the Latin delegates would have a degree of sympathy and understanding for the Cuban social revolution that is largely missing in the United States. Besides, anti-Yankeeism is a Latin American, not just a Cuban, phenomenon and the Latin members would be far more willing than we to accept the fact that the Cubans are really frightened of us and of possible intervention.

For these and other reasons one must wait to make a final, historic judgment on the San José meeting. A battle was won by the United States, but the campaign goes on. Neither the conflict with Cuba nor the problem of Communist intervention in the Western Hemisphere has been settled.

AMENDMENT TO BILL FOR CONSTRUCTION OF MEMORIAL TO PRESIDENT THEODORE ROOSEVELT

Mr. KEATING. Mr. President, yesterday the distinguished junior Senator from South Dakota [Mr. CASE] presented an amendment to Senate bill 2561, to construct a Memorial to President Theodore Roosevelt in the Nation's Capital. The amendment was to the effect that the living children of the former President should be consulted in connection with the approval of a design. I am a cosponsor of that amendment, as is my distinguished senior colleague.

I wish to take this opportunity to commend and thank the distinguished Senator from South Dakota [Mr. CASE] for his interest in this problem. I am impressed by his wide knowledge of the life and the accomplishments of Theodore Roosevelt, who spent so much time in South Dakota. In fact, we have learned that our colleague, the Senator from South Dakota, is sometimes somewhat of a rough rider himself.

Mr. President, today I wish to call attention to the fact that Mr. Conrad Wirth, Director of the National Parks Service, has contacted me and has indicated his complete approval of our amendment and has expressed the hope that the Theodore Roosevelt Memorial bill, as amended, will be passed by the Congress before we adjourn.

Mr. President, I share these sentiments 100 percent. I appeal with the utmost fervor to our distinguished majority leader that he program this bill. I share fully the sentiments of Mr. Wirth that it should be done at this session.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. KEATING. I am very happy to yield to my colleague.

Mr. JAVITS. I merely want to join my colleague in commending the distinguished Senator from South Dakota, who I think gave us a formula to break the logjam which is very embarrassing to us, and I think is embarrassing to the majority. There is no reason why the Theodore Roosevelt memorial should not be approved, so long as we can find a way to satisfy the artistic merits of the proposal and the views of the Roosevelt family. I am very glad a resolution on the matter is in sight, and join with my colleague in the hope that the measure will be programed at the earliest possible time before we adjourn, the problems in connection with the matter having been settled.

Mr. KEATING. I thank my colleague. I feel, as we get along with legislation, and get enacted some of the legislation for which this session, it is said, was called, we may be able to take up some of these other measures.

ADMINISTRATION FAILS TO PROVIDE A REALLY HELPFUL PROGRAM OF AID FOR DEPRESSED AREAS

Mr. RANDOLPH. Mr. President, on August 19 our delightful and diligent colleague from New York [Mr. KEATING] made reference to the so-called 21 legislative points which the President of the United States had called to the attention of those of us who serve in this body and the other body as being important matters for attention during the short session in which we are now engaged.

I believe it is important for me, as one of the Senators from a State which has been suffering from chronic unemployment, to call attention to the reference made by my colleague, the junior Senator from New York [Mr. KEATING], to the sixth proposal, which was one of the important items the President believed could be acted upon during the few days that we would be in session.

The junior Senator from New York said this:

The fact of the matter is that Congress has repeatedly ignored the President's recommendations.

The Senator was speaking of the President's recommendations on the subject of area redevelopment legislation.

I would want the RECORD to show that the junior Senator from New York was one of the Members of this body who voted in the affirmative on the legislation for area redevelopment. He opposed, in 1959, the Senate bill calling for $389,500,000; but on May 6 of this year the junior Senator from New York voted in the Senate for the $251 million measure, the bill which had been passed in the House of Representatives. On that occasion, the vote was on a motion of the majority leader, the senior Senator from Texas [Mr. JOHNSON], to concur in the House amendments to Senate bill 722.

Then on May 24, the junior Senator from New York voted to override the veto of the President of the United States on the matter of area redevelopment.

Mr. President, I think it is important to repeat what the junior Senator from New York said on August 19:

The fact of the matter is that Congress has repeatedly ignored the President's recommendations.

PRESIDENT THWARTS MAJORITY ACTIONS

I would add that the President also has ignored the majority actions of the Congress of the United States When the junior Senator from New York speaks about a Presidential viewpoint in this matter., it should be pointed out that he disagreed with the President of the United States by voting, on May 6, for concurrence with the House, and then, on May 24, by voting to override the veto of the legislation by the President, who sent a message to Capitol Hill indicating his displeasure with the action of the Congress.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. RANDOLPH. I am happy to yield.

Mr. KEATING. I appreciate the remarks of the Senator from West Virginia. Very frankly, I did disagree with the President in his action on that legislation. I regretted that the more modest bill which has been referred to by my distinguished friend from West Virginia was vetoed. I did share the President's view that the first bill which we had before us did not deal with the problem adequately; but the second bill, involving 200-odd million dollars, I did support, and I did vote to override the veto, because it dealt reasonably with a great national problem, which still exists. I refer to the distressed areas problem. I know how serious it is in the State represented by my distinguished colleague. It is also a problem in areas of New York, and the second bill would have benefited some 20 communities in New York, many of which seriously need at this time Federal assistance. Strong representations were made to me by the mayors and other leaders of these communities, both in business life and in the field of labor. There was virtual unanimity that the Federal Government should do something in this area.

The President did not agree. He favored a more modest proposal.

LEGISLATIVE PROCESS ACCOMMODATIVE

Mr. President, what I was seeking to say, in the remarks to which my friend has referred, was that the legislative process is, and must be, to some degree an accommodative process. It is more important to have needed legislation enacted than it is to have political issues. My plea was that the Congress should take up the problem again and approve a bill which had a reasonable prospect of being signed into law by the President. I believe the recommendation which I made—or, very likely, that recommendation somewhat "beefed up"—would meet with the President's approval, would be enacted into law, and would benefit many communities, including communities in the State of the Senator from West Virginia, and, to a lesser degree, those in my own State. That was the purpose of including this in the 21 points which the President sent to us as being desirable and urgent for action at this session.

I thank my friend for yielding.

Mr. RANDOLPH. I am very grateful for the candor with which my colleague from New York speaks on this important matter. I feel he is a realistic legislator. I am sure he feels, as I do, that in the relatively few days we have been here it would have been nearly impossible to pass the legislation in which the Senator from New York and the Senator from West Virginia have a very intense interest.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. KEATING. On that question I must take issue with my friend from West Virginia. We spent 3 hours yesterday debating whether we should pass a resolution declaring it to be the sense of the Senate that the President should not make interim appointments to the Supreme Court. We might better have spent those 3 hours and the hours we have spent on other subjects trying to pass distressed areas legislation. I think we could have done so. I believe the committee could act in this area, could recommend legislation which we could pass. This, in my opinion, is more important than some of the other proposals we are now considering.

Up to now my friend and I have been in agreement, but now I must part company with him.

NEW HEARINGS ARE HELD

Mr. RANDOLPH. Mr. President, that allows me to develop this subject in a way I had intended to develop it, namely, to show that the Subcommittee on Stabilization of the Committee on Banking and Currency held a hearing on August 18 of this month. The principal witness was the Honorable Frederick H. Mueller, the Secretary of Commerce. He came before the subcommittee with a very adamant position, speaking, very frankly, for the administration with reference to a bill which was said to be a comprehensive measure to help solve this problem.

I must repeat that when the Senate originally passed a bill in 1959, in the amount of $389.5 million, the House this year passed a different version estimated to cost $251 million. The Senate, in an effort to accommodate itself to the thinking of the House and to pass a so-called moderate bill, agreed with the House. Upon the Johnson motion, the Senate agreed to the $251 million, rather than insist upon the $389.5 million as provided in the bill which passed the Senate. That measure was sent to the White House and received the veto.

We in the Senate were attempting to legislate and to be realistic. Very frankly, when we dropped from $389.5 million to $251 million it certainly meant we were in a mood to accommodate the thinking of both bodies and to send to the President—which we did—a bill which was modest in its approach to this very pressing problem.

Mr. President, I wish to refer to the testimony on August 18, 1960, of Secretary of Commerce Frederick H. Mueller before the Subcommittee on Stabilization of the Senate Committee on Banking and Currency. It was my privilege to testify during the afternoon session. after Secretary Mueller had presented the administration's position and his own views earlier in the day.

The Secretary had attempted to demonstrate by dollar comparisons that the administration bill, S. 3569, introduced by the minority leader [Mr. DIRKSEN], would be better for depressed area States like West Virginia and New York than S. 722, the bill vetoed by the President of the United States earlier this year. The Secretary admitted that he used a yardstick which was purely hypothetical.

COMMERCE SECRETARY'S HYPOTHETICAL YARDSTICK

Mr. President, in addition to using the hypothetical yardstick, the Secretary of Commerce, as I noted in my statement before the subcommittee, resorted to the device of picking out only one phase of the administration's proposal and comparing it with the measure which the President had vetoed. The Secretary compared only the hypothetical figures for the two bills under the provisions for loan funds for industrial areas. By so doing he was able to show that certain communities in West Virginia, Pennsylvania, and Illinois, which he specified, would have more industrial loan funds available to them under the administration version than under the bill which the President vetoed.

I said to the subcommittee then, and I repeat this afternoon, that perhaps the Secretary's method in this instance was valid, but it fell far short of proving that the Dirksen bill en toto would be as good for all the depressed areas of this country as the vetoed measure. I refer to the parts of our country which have chronic unemployment, and I allude also to the depressed rural areas. The Dirksen bill, with regard to those areas, would not provide the help afforded by the bill which the President of the United States vetoed.

The Secretary of Commerce conveniently failed to point out, in connection with the figures which were the product of the yardstick about which I have spoken, that the administration bill would require the communities or enterprises to furnish 65 percent financing before qualifying for industrial loans, whereas the bill the President vetoed would have required them to supply only 35 percent.

Mr. President, if a community or enterprise cannot furnish 65 percent of the cost of the project—as most communities in depressed areas cannot do—I ask my friend from New York of what value is a large Federal fund available for industrial loans? And that is the question I asked both the subcommittee and the Secretary of Commerce while the latter was still present in the hearing room.

Then I stated what I believe to be the position of the West Virginia delegation in the Congress—or most of us, at least:

We are far less interested in the short-term question of funds available in the first year of operation of a program of area redevelopment than we are in seeing that the basic principles of the program are inclusive of the elements needed to make that program comprehensive and adequate.

NO RURAL AID OR COMMUNITY GRANTS

A measure which provides nothing excepting technical assistance for rural areas is inadequate. The administration bill, therefore, is inadequate in this particular.

Legislation on this subject without grant provisions for community facility projects, in addition to loans for such activities, likewise is deficient, insofar as concerns depressed areas. The administration measure makes no provision for community facility grants and thus falls short in this particular, too.

And a bill which totally neglects provision for subsistence payments for those persons undergoing vocational retraining fails to face realities. An unemployed person cannot commute between home and training center and assume other expenses while undergoing training unless he has some subsistence moneys available to him. The administration version thus is unrealistic in this instance, as well as the others mentioned.

Notwithstanding these major deficiencies, Secretary Mueller claimed in his testimony before the subcommittee, while I was present in the hearing room, that the administration bill is more comprehensive than was the measure which the President vetoed. I respectfully disagree with the Secretary of Commerce, and I will point out—as I did in my testimony to the subcommittee—that in four important particulars both the original Senate-passed version of the Douglas-Cooper bill, which I cosponsored, and the measure as it ultimately passed Congress were superior to the legislation proposed by the administration following the Presidential veto.

I declare that the administration bill would fail to meet the real problems of the depressed areas most in need of redevelopment assistance.

First, and of vital importance for such a State as West Virginia, which is still predominantly rural in its population, is the provision in the last vetoed bill—S. 722—for a $100 million revolving loan fund to carry out a rural redevelopment program. This aspect of depressed area aid has been shunted aside in the administration version which calls for "technical assistance" only to rural areas. The President defended this position in his veto message when he stated:

> The rural development program and the Small Business Administration are already contributing greatly to the economic improvement of low-income rural areas.

This information will come, however, as a novel surprise to the hundreds of thousands of citizens who are literally scratching out their existence in the rural areas of our State—as in most of the Appalachian region—and in other parts of the country, too.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield to the learned Senator from Minnesota.

INTENTIONS BUT NO ACHIEVEMENTS

Mr. McCARTHY. I commend the Senator from West Virginia for this report to his own people and to the country on the failure of the administration to respond to the needs which are so very clear in his own State, and certainly are very pressing in other parts of the country. The reaction and the attitude of the administration which he has described with regard to this program is one which has been manifest in many areas. We Democrats propose something in the way of a practical program; those in the Republican Party respond with another program which they say is more comprehensive, but the comprehensive character of their program is always one which relates to intention and not to practical achievement. The Senator, I am sure, agrees that in all the months during which we held hearings on the problems of the unemployed and the distressed areas we could never propose a program which would be acceptable. It is like offering someone crackers. If one should give a cracker to a representative of the present administration, the receiver would say, "There is not quite enough salt on it. If the salt ratio were changed a little bit, it would be all right."

But we could never get the adjustment quite right; and likewise the administration has never come up with its own program. It is like a swimmer in distress 20 feet offshore who is thrown a 15-foot line. The administration says, "We have thrown out a 15-foot line. We have gone more than halfway." But they are always 5 feet short.

Mr. RANDOLPH. The Senator from Minnesota speaks with characteristic pointedness on this subject, and he is correct. I should like to refer to the Senator's able leadership as chairman of the Special Committee on Unemployment Problems. I think the Senator from Minnesota will remember that the committee was unanimous in the belief it is absolutely essential that assistance be provided for rural areas. Many of the coal mining communities are in that category. The three Republican members of the committee joined in making that statement.

I am amazed that the minority of the Banking and Currency Committee and the President leave the rural people and rural areas out of their considerations while, on the other hand, the three minority members of the Senate's Special Committee on Unemployment Problems unanimously stated on page 134 of that committee's report:

> It is absolutely essential that assistance be provided for rural areas. Many of the coal-mining areas are in this category.

In the State of West Virginia there are 37 counties listed among the 500 from throughout the United States with the highest percentage of commercial farms having sales of less than $2,500 per year. Furthermore, there are 17 counties of our State listed among the 500 in the country with the lowest level of farm income; and there are 17 of our counties which appear on both lists. Therefore, by either set of criteria, or by a combination of both, West Virginia is shown to be in serious need of the rural redevelopment provisions of the legislation (S. 722) which the President vetoed.

Without these rural assistance benefits, any bill would be but a cruel hoax to the thousands of citizens of the State which I am privileged to represent.

FEDERAL PARTICIPATION PERCENTAGES

The second major distinction between the vetoed S. 722 and the administration's proposal is that the so-called Dirksen administration bill proposes to limit Federal participation to a maximum of 35 percent, while the measure passed by Congress and vetoed by the President would have allowed a much higher maximum Federal participation, namely, 65 percent. So, what are we doing? We go to the communities which literally are flat upon their backs and say that whereas the bill passed by Congress and vetoed by the President would have given 65 percent participation by the Federal Government, the administration's "comprehensive" bill, as the Secretary of Commerce termed it, has cut the Federal participation down to 35 percent, and these communities cannot participate under such a formula.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. McCARTHY. In other words this is another example of that rope which is just 5 feet too short. Is that not correct?

Mr. RANDOLPH. Yes; it certainly is. It is also a frayed rope, because we are constantly hearing of the threat of a veto, or the implication of a veto. It is difficult for Congress, expressive of the viewpoint of the people of this country, which is constantly under the bludgeon—and I used the word advisedly—to act affirmatively. If we act contrary to the administration's viewpoint we can expect no approval from the White House. So, when we talk about the 65 percent share, we recall the President's statement in the veto message that

essential local, State, and private initiative would be materially inhibited by the degree of Federal participation under Senate bill 722. Where the administration finds any support for this doctrinaire assumption, I do not know, because, in fact, the entire experience of the Federal Government with matching fund programs would tend to controvert that statement in the President's veto message.

Furthermore, it is worth noting that despite the oratory concerning private enterprise, the administration bill would not require any participation by private capital, whereas S. 722, which was passed by Congress but which the President vetoed, would have required a minimum private participation of 5 percent.

I emphasize again that the administration proposal to hold Federal participation to a maximum of 35 percent, thus requiring local share assumption of 65 percent, would inhibit the ability of the most needy depressed areas to undertake a program of redevelopment.

This would be especially true in West Virginia under the difficult constitutional provisions and constitutional tax limitations which prevail.

ADMINISTRATION BILL TERMED DEFICIENT

On the vital question of Federal participation maximum, the administration bill is so deficient it would defeat the prime purpose of aiding chronic areas of unemployment in our Nation.

As a third consideration, the measure approved by Congress, but vetoed by the President, would have authorized appropriations of $35 million for grants to communities for public facilities, but the administration version provides only for loans, and absolutely nothing by way of grants.

As was pointed out in the discussion of Federal participation maximum, many of the communities which have suffered most severely from unemployment and related economic problems cannot gain any material help from the administration bill—in this instance because they cannot borrow needed redevelopment funds at the interest rates prescribed.

Then, as the fourth major difference, both the vetoed measure (S. 722) and the proposed Scott bill (S. 3658) acknowledge the realities of the problem of vocational retraining by authorizing subsistence payments for those citizens undergoing vocational retraining who are not eligible for unemployment compensation. This vital aspect of the problem—like the rural aspect—has been practically ignored by the administration version (S. 3569).

Mr. President, it seems to me that there must be some provision to alleviate the tragic human waste of workers whose skills have been declared surplus because of technological advances, and who have not acquired new skills. In this instance I speak, of course, of the thousands of coal miners who wait vainly for the mines to reopen or for the operating mines to again call for their skills or their brawn.

In West Virginia there are about 10,700 non-agricultural workers who are not employed now but who were employed 1 year ago. The figures in June showed a decrease in nonagricultural employment in our State of 6,800. In July it was increased to 10,700.

We think of thousands of men, for the most part mature men with families. Many of them had been on only a partial workweek for 1, 2, or even 3 years before becoming totally unemployed. Their material resources long since have been exhausted, and their psychological resources are being eroded by neglect. Many of them must have retraining and the subsistance fund necessary to enable them to participate in training courses.

APPELLATE REVIEW OF CRIMINAL SENTENCES

Mr. HRUSKA. Mr. President, ordinarily this late in a session it would be impractical to introduce legislation which proposes to extend our procedural law in Federal criminal matters. For a reason which will be made clear later in my remarks I send to the desk a bill on that subject and ask unanimous consent that its full text be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HRUSKA. Mr. President, briefly, this bill calls for an appellate review of criminal sentences on the ground of excessiveness. It may come as a surprise to many of my colleagues that the United States appears to be the only country in the free world in which there is no review of the punishment imposed by the trial court in its discretion. Nevertheless, this is the case.

Although our circuit courts of appeal may correct a sentence which is outside the bounds set by statute—in other words, an illegal sentence—such courts are powerless to review and modify a sentence which imposes punishment within the limits allowed by statute but is in their own judgment more severe than warranted by the circumstances of the case.

Parenthetically, although the State jurisdictions of Arkansas, Arizona, Hawaii, Idaho, Iowa, Nebraska, Ohio, Oklahoma and Pennsylvania will allow appellate modification of criminal sentences for abuse of discretion by the trial court, only in Connecticut, Massachusetts and New York will the reviewing authority replace the discretion of the trial court with its own discretion in the absence of a showing of abuse. This as far as the United States has progressed in this direction.

By such legislation as I introduce today we make further progress regarding a problem that has concerned Congress, bar associations and legal societies, students, and workers in the field of penology and, indeed, the executive branch of our Government and the courts for many years. This is the problem of disparity of sentences. Putting aside what may be the ultimate or most desirable goals of a rational and humane sentence, we have in modern times been receding from the practice of enacting statutes calling for a mandatory fixed sentence. A greater number of our criminal laws now call for wide-range, indeterminate sentences. The practical effect of this is obvious. As the final determining factor in the sentence to be imposed, the judge's discretionary power becomes increasingly important.

By and large the wisdom of this policy of delegating the function to the trial judge has been clearly demonstrated. Our district judges are exceedingly conscientious, knowledgeable, and experienced. They are best able, informed, and qualified to deal fairly with the convicted defendant.

However, they are the first to recognize the inadequacies in the present system. The exercise of judgment in this delicate area is not easy. The responsibility for determining the proper sentence is so great as to justify and warrant the means of review. There is little wonder that judges have openly commented on the incongruity of the situation that the power to impose a sentence is the only discretionary power vested in the Federal trial judge which is not subject to appeal, for the purposes set out in the proposed measure.

Yet a study of the Federal statutes and the interpretation given them by the courts establishes that no authority exists for an appellate review of the sentence imposed by the judge in a criminal case so as to determine whether the sentence is excessive. A sentence will be modified only when it is unauthorized by law as not being within the limits fixed by a valid statute.

How serious is this failing was the subject of comment in the case of *Shepard* v. *United States* (257 F. 2d 293, 294):

> It is an anomaly that a judicial system which has developed so scrupulous a concern for the protection of a criminal defendant throughout every other stage of the proceedings against him should have neglected this most important dimension of fundamental justice.

In the 85th Congress the concern about the problem of sentence disparities brought about pioneering legislation. With the enactment of Public Law 85–752, 28 U.S.C. 334, institutes and joint councils on sentencing were provided. Their value cannot be overestimated. Assistant Attorney General Doub recently described the institutes as giving "the Federal judges themselves an opportunity to assume the initiative in eliminating sentences which may appear biased, capricious, or the result of defective judgment."

However, in the 85th Congress this and related legislation did not entirely round out the relief which ought to be provided by Congress. A gap exists. Our courts of appeal should be empowered to modify a criminal sentence imposed in the discretion of the trial judge on the ground as well that it is excessive.

The legislation which has been prepared endeavors to accomplish that purpose. It permits the taking of an appeal of the sentence imposed upon conviction. As a control factor, the allowance of the appeal is made discretionary with the appellate court. Whenever leave to appeal is granted, however, the reviewing court may reduce the sentence if, to use the technical language of the bill,

"it determines that the conviction was proper but that the sentence imposed was more severe than warranted by the circumstances of the case."

The mechanics of the bill I leave for future discussion. My purpose here is mainly to outline the need for such a measure. No doubt as the bill is analyzed and evaluated, it will be necessary to go into the technical aspect of its operation as that relates to criminal procedural law generally. It is sufficient only to say here that the bill calls for a limitation of time in which such an appeal can be taken after sentence is imposed; that with an allowance of an appeal, the appellate court may have access to whatever reports or additional information is deemed necessary and not included in the record; and that determination of such an appeal may be had with or without a hearing.

The Senator from Nebraska recognizes that no bill of this nature could receive adequate consideration in the time remaining in this session. The purpose of introducing it now is mainly to allow interested groups and the various departments of Government affected to offer their comments during the intervening months prior to the opening of the 87th Congress, when I intend to reintroduce the measure with the hope that it will receive early consideration.

Mr. President, I ask unanimous consent that the following material and articles on the subject be printed after the text of the bill: "The Sentence of the Court: Should There Be Appellate Review?" by Simon E. Sobeloff, from the January 1955, issue of the American Bar Association Journal; and excerpts from "Recent Trends in the Criminal Law," by George C. Doub, from the February 1960 issue of the ABA Journal.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the ABA Journal, January 1960]

THE SENTENCE OF THE COURT—SHOULD THERE BE APPELLATE REVIEW?

(By Simon E. Sobeloff, Solicitor General of the United States)

(Addressing the section of criminal law during the 1954 annual meeting in Chicago, Solicitor General Sobeloff called attention to the fact that, while we have elaborate safeguards to protect an accused during trial, in most jurisdictions the problem of sentencing a convicted defendant is left almost entirely to the discretion of one man—the trial judge, although the problem of what to do with the convict is often greater than that of determining his guilt. He proposes that appellate courts be given the power to review sentences imposed.)

It is commonplace to say that often the real problem is not to establish the guilt or innocence of the accused but to decide on a proper sentence. An English jurist, Mr. Justice McCardle, is quoted as having revealed a not too obscure professional secret: "Anyone," he said, "can try a case. That is as easy as falling off a log. The difficulty comes in knowing what to do with a man once he has been found guilty."

It has been very impressive to me that the law is so solicitous of the defendant in safeguarding his rights at every stage of the trial before verdict, and yet leaves him almost completely without protection when he stands before the judge to be sentenced.

We go to great lengths to insure a fair trial. Courts are gravely concerned if the prosecutor or the police publicize their version of the facts in advance of trial, because it is feared that this may prejudice the cause of the accused. We recognize as fundamental his right to be represented by counsel and this right has been given added vitality in recent decisions of the Supreme Court. Further emphasis has been put on this constitutional right in the recommendation of Attorney General Herbert Brownell, Jr., that public defenders or special counsel be provided for indigent accused at government expense to assure a competent and vigorous defense in every case where the defendant stands trial.

We insist upon strict requirements as to the form of the indictment, so as to inform the accused of the nature of the accusation. Carefully we exclude hearsay and demand that the defendant be confronted with the witnesses against him. Every act or circumstance which is liable to embarrass the defendant in court is discountenanced. He may not be brought into the courtroom manacled or otherwise restrained and he may not be photographed there against his will. The person charged may not be called by the prosecution to testify, but he is allowed to take the stand on his own behalf if he elects to do so. If he prefers to remain mute, the prosecutor may not comment on the fact that the defendant has refrained from giving his version of transactions peculiarly within his knowledge.

Many are the convictions that have been reversed because the judge erred on some technical ruling on evidence or refused to instruct the jury sufficiently as to the rights of the accused, particularly in respect to the presumption of innocence and the State's burden of proof. Extreme precautions are taken to exclude from the jury room all extraneous influences. A verdict of guilty cannot be returned in a Federal court, and in most States, unless all 12 jurors are convinced of guilt beyond a reasonable doubt.

Contrast this strict insistence on the rights of the accused during trial, when the issue is often not too doubtful, with the total absence of safeguards when the ultimate problem is reached, namely, what final disposition to make of the case. The really difficult question usually is what to do with the defendant after conviction. Here the trial judge is given in most jurisdictions, including the Federal, the widest latitude of discretion. He may suspend the sentence; he may put the defendant on probation; he may impose a nominal fine or a jail sentence for a short period; or he may "throw the book" at the defendant.

Under our practice, which permits multiple counts for the same or related acts, with cumulative sentences, the aggregated penalties can be oppressive indeed without transcending legal limits. In some jurisdictions the effect of mounting one sentence upon another consecutively is to deny the prisoner opportunity for parole until he has served a minimum part of the last of the series of sentences.

There is, it is true, a constitutional guarantee against "cruel and unusual punishments" but this has been interpreted in my State of Maryland, and I think generally, to mean only that the judge may not impose a sentence greater than the maximum allowed by statute. This is mighty little protection to the convicted man. The range between a suspended sentence and one of 300 years, such as was imposed recently by one judge, permits considerable leeway for differences of opinion, to put it mildly. There are no definite guides for the judge. He follows his sense of justice which, like the proverbial chancellor's foot, varies from judge to judge. The sentence in the particular case lies practically uncontrolled in the understanding and the conscience of the judge, and the criteria are vague and almost nonexistent.

Writers have listed some of the factors which are customarily considered in imposing sentence. It is often said that the prime objective in administering the criminal law is to protect society, and that the idea of meting out punishment as retribution has generally been discarded. But if the prevention of crime is the goal, how is this to be achieved?

THE TENDENCY TO OVERWORK PET SIMPLIFICATIONS

A regrettable feature of much of the discussion in this field is the tendency to overwork pet simplifications. Some sweepingly insist that the nature of the crime is controlling, and they disregard the personality of the criminal. Others stress the character of the offender with almost no attention to the character of the offense.

There are those who would limit the inquiry to questions such as these: Is the defendant subject to rehabilitation? Would he be a menace if set at large? What period of imprisonment and what type of treatment are needed to make it safe to restore him to society? They say with truth that you cannot equate crimes or even all crimes within a single category. The endless variety of fact and circumstance which distinguishes cases must enter into judgment.

But these factors may be unduly weighted at the expense of another consideration. No one will argue that the community sense of justice is not a contributing, even sometimes a decisive ingredient in arrivng at the proper sentence. The public expectations—not to be confused with public passion and hysteria—are also entitled to consideration.

Furthermore, shall we stress the deterring effect of the public example in sentencing the convicted person? Some have argued that the deterring effect of a severe sentence is considerable, while others deny that a person contemplating a crime is often influenced by this. Yet we can be sure without demonstration that in the absence of sanctions in our criminal law, violations would be so general as to destroy public order.

Obviously each of these competing factors plays its part. Some validity is to be found in each, and all truth is to be found in no one of them. An alert and open-minded willingness to examine them all is necessary, and wisdom lies in knowing what weight to ascribe to each in the particular case. There are no pat answers anywhere, and certainly the search for a clue must not be restricted to the buckram-bound books. The world, as Alice in Wonderland was reminded, is full of a number of things. The necessary insights and experience for the delicate task of fixing criminal penalties must be sought in other fields as well as in the law.

As in other areas of public business, attitudes swing widely between extremes. People sway, sometimes with dramatic swiftness, from complete lethargy toward lax prosecution and sentimental softness in handling offenders, to shrill demands for extreme and excessive penalties. The same good people who express sincere abhorrence when they read sympathetic accounts of a disproportionately long or cruel sentence callously inflicted, are likely to shout for tough justice when a particularly revolting crime is not punished as promptly or as severely as they think it deserves. They favor the mitigations of our probation and parole systems, but when their indignation is aroused by some spectacular crime they abandon faith in these processes. They then demand Draconian laws, hard and inflexible, setting mandatory minimum sentences without the possibility of suspension or reduction by parole or pardon.

One of the most deplorable and self-defeating arrangements that then is likely to follow is the writing into law of a rigid formula under the illusion that it will automatically insure a good result in all cases. The desired ends cannot be achieved in that way. We indeed exalt a government of laws and not of men; but what is meant thereby is that men shall be limited by law and shall not be free to act arrogantly and arbitrarily. It does not mean that laws are or can be self-executing. It is quite beyond legislative ingenuity to invent a slot machine that will dispense automatic justice and make unnecessary the adjudicative function.

The very principle of the separation of powers—so basic in our form of government—is predicated on the concept that to declare a rule is one function and to apply it to specific cases is a distinct function; and that any attempt to combine the two is likely to prove unwise and dangerous. It is a tragic mistake to rule out thinking and feeling from the administration of justice. I do not go so far as to argue that a law which sets a fixed penalty for every violation is unconstitutional, but not everything that is constitutional is necessarily wise. There will always be a need for the application of discriminating judgment, the exercise of compassion, and the use of that lubricating common sense without which it is not possible to attain the satisfactory operation of any government machinery.

A depressing result of laws commanding the imposition of minimum penalties in disregard of the particular circumstances of the case is that they leave no scope to soften harshness and mitigate injustice. What Federal judge has not been torn in his heart by the inflexible minimum penalties prescribed in certain statutes? Recently I attended the judicial conference of the fifth circuit. Half of an entire session was devoted to the recital of instances of unconscionable penalties made mandatory by the Anti-Narcotic Act. One judge told of a case where a highly regarded pharmacist, with no prior criminal record, violated the law by giving someone a small quantity of a narcotic drug to relieve acute suffering. This he did for no personal gain, but for humanitarian reasons, expecting that a doctor's prescription would follow. The evidence of the violation, however, was entirely clear and the jury was about to bring in a verdict of guilty. The judge related how he sent the jurors back after explaining that if they convicted, he would have no choice but to impose a minimum 2-year penitentiary sentence. The jury further considered the matter and brought in a verdict of not guilty, to the immense relief of the judge.

JUDGES ARE IN DIFFICULT POSITION

No one can fail to sympathize with a judge put in such a difficult position by a rigid law passed by men of good motives who fail to foresee and understand the consequences of their legislation. For all their training and discipline, judges are not unlike other men in their reluctance to serve as instruments of unnecessary inclemency and injustice. The tendency then is for the trial judge or the appellate tribunal to deflect the force of the law in the instant case by strained and unnatural constructions that may work havoc to the legal system in future cases. It is a truism that hard cases make bad law, and many of the technical absurdities found in the law had their origin in the humane effort of judges to escape from the imposition of excessive sentences.

If there is anything that the long experience with our system of criminal law and punishment should teach, it is that mere severity in sentencing fails to prevent crime. In my law school days I recall reading in Stephen's "History of the English Criminal Law," about sentences imposed in former times by British courts. They seemed inordinately cruel—tearing out of the tongue; branding; transportation for a period of many years. Several hundred offenses were punishable by death. Larceny was one of them and hangings were conducted in public the better to impress the populace and in the hope, by the gruesome example to deter similar crimes. Nevertheless we are told that pickpockets were not deterred from plying their trade in the very crowd that stood witnessing the spectacle.

Until 1826, in fact, every felony in England was punishable by death. Now the English have reduced the number of crimes which are capital and they have standardized the method of punishment to terms in prison instead of the mayhems and physical tortures of ancient days. I daresay that Englishmen of our day are far more rational in their sentences than we are.

It is a striking fact that although the British and we have a common legal heritage there is a wide difference between them and us in the amount of crime and in the character of the penalties. We have two and a half times the number of prisoners they have per 100,000 population, and our sentences are longer. In all England in a recent year not more than 588 men received terms of 5 years or more and in the United States in the same year 18,000 offenders were committed for maximum terms of 5 years or more. The disparity is out of proportion to the size of the respective populations of the two countries; the difference is partly in the crime rate and partly in the unequal values the two countries ascribe to long sentences.

Likewise, to the north of us in the province of Alberta, Canada, is a population of a million with less than 500 in prison. In contrast the District of Columbia, with a population of slightly more than 800,000, has some 4,000 prisoners—more than 8 times as many.

There may be a lesson, too, in comparing the figures from different States in the Union. After making allowance for differences in statistical methods, it is still notable that many of the States that release their prisoners after shorter terms are the ones in which the crime rate is lower. Generally capital punishment is less in vogue than in the past, and there is nothing to warrant the belief that the crime rate is affected thereby. This was recently shown in a series of articles appearing in the New York Herald Tribune. The conclusion is strongly suggested that merely imposing heavy penalties does not diminish the incidence of crime.

THE OTHER SIDE OF THE COIN: INADEQUATE SENTENCES

There is another side to the coin. Misuse of the sentencing power is not always directed against the defendant. Sometimes judges impose grossly inadequate sentences, due to misunderstanding, defective judgment, caprice, or bias. In one case the cashier of a small national bank stole enough money to wipe out the bank's capital and surplus. By clever manipulation of a certain large inactive deposit account, the defalcations were concealed for many years, but at long last the crime was discovered. When the banker was indicted the judge was very critical of the form of the indictment and sustained a motion to quash, but on direct appeal to the U.S. Supreme Court he was reversed and the indictment upheld. The judge was chagrined but remained unconvinced. When the defendant, finding himself with no defense on the merits, pleaded guilty, the judge expressed his resentment by suspending sentence.

Yet in the same court a 16-year-old newsboy was given an 18-month term for selling song-sheets printed without permission of the copyright owners of the songs. One may be permitted to doubt that either of these sentences would have been passed if the judge had known that his action might have to meet scrutiny on appeal.

Such fantastic vagaries tear down the mightiest sanction of the law—respect for the courts. We have good and wise men on the bench, but not all are wise and good; and even the best and most prudent, being human are like Homer, sometimes likely to nod. The truth is that passing sentence is too delicate and too powerful a function to lodge in any man's hands entirely unsupervised.

We have in the Federal courts a system of definite sentences, except for the Federal Youth Correction Act, which allows commitment of young offenders to a special board without specifying a minimum period of confinement. Such offenders, after they have been studied, may be released at any time. In other jurisdictions, as in California, there are several kinds of indeterminate sentences where the courts merely set the maximum and leave it to some administrative board to determine the minimum. Some form of indefinite sentence is used in 9 States, and in 22 they are the predominant pattern. Actually definite sentences are being imposed now in upward of 40 percent of all felony convictions.

It is not unusual to expect the writer on a topic such as this to come up with some solutions, but I think it better not to be dogmatic. The wiser approach is not to offer solutions forthwith but to encourage inquiry. There is hope in the American Law Institute's formulation of a criminal code and its other undertakings, and in such projects as are now being planned by the Committee on the Administration of Criminal Justice, under the auspices of this association. The participation of the able head of our Criminal Division, Assistant Attorney General Warren Olney III, bespeaks the cooperation of the Department of Justice.

Whether more objective criteria for sentencing can ever be developed than we have today or if it is possible to harmonize the various elements that demand consideration in the disposition of a criminal case, I do not know. I should, however, like to propose something for the attention of the researchers and students. There is need for a more effective protection of the rights of the individual not inconsistent with the needs of the community; there is need, too, to protect society's interest where that has been lost sight of in meting out sentences. I suggest a study of the desirability of providing for appellate review of sentences. I do not claim for the idea that it would accomplish a miracle but its merits deserve investigation.

It is not a radical idea and is not altogether untried. In England, legislation authorizing appellate courts to review sentences was enacted in 1907. In order to discourage frivolous and unfounded appeals, the law empowers the higher courts not only to quash or reduce sentences they deem excessive but they may substitute such sentences as they think proper, whether they be more or less severe. The result is that sentencing judges exercise their power with moderation and restraint, and without going to unwarranted extremes of severity or leniency, for they know that the higher court will not tolerate abuses on their part. At the same time defendents do not lightheartedly seek review for they know that in appropriate cases the penalty may be increased.

For years the American Law Institute has recommended appellate examination of criminal sentences. New York and approximately a half dozen other States permit reduction of sentences on appeal in certain types of cases, and in the military system sentences as well as judgments of guilt are reviewable as a matter of course.

In a certain case an appellate court had before it the appeal of a man in his early

twenties who had raped his young sister-in-law. There was no real doubt that he had committed the crime, yet there was a long meticulous inquiry in the trial about a question that was hardly in dispute, namely, the man's guilt. However, when the verdict was pronounced the man was subject to the will of the one judge in the trial court. The defendant was sentenced to be hanged and the case was then appealed. The appellate tribunal came inevitably to the conclusion that the man had been proved guilty in accordance with all the rules and in accordance, as the judges thought, with the justice of the case. Some members of the court, however, felt grave misgivings about the appropriateness and justice of the death penalty under the circumstances. Nevertheless they were powerless to interfere.

In that case the Governor commuted the sentence to life imprisonment, thereby drawing upon himself considerable criticism for his so-called interfering with the courts. These unthinking critics did not realize that no court above the trial judge had ever examined the sentence. "The courts," spoken of with such unctuous veneration, was in this, as in other cases, only one man. Few people understand that on appeal the court is not permitted to pay any attention to the fitness of the penalty. Although in the case I have in mind the Governor courageously intervened, it must be recognized that the duty of reviewing sentences should not ordinarily rest on the Governor. The judicial process should have the internal means of overcoming its own mistakes.

It is no disrespect to trial judges to suggest that the provision of an appeal from the sentence, at least in the more serious cases, would have a sobering and moderating effect. Realization by the sentencing judge that extreme behavior on his part is subject to modification would prevent such an incident as the sentence of 140 years, imposed upon a 17-year-old boy—seven consecutive 20-year sentences for a series of robberies committed in 1 night. The possibility of review would make itself felt even in cases not actually appealed. The existence of the power would make its exercise unnecessary in all but a few cases.

If there is not to be a separation of the sentencing from the guilt-finding function, and if the bench is to retain the power to sentence with the vast discretion that the criminal law necessarily lodges in the trial judge, then it seems desirable to provide an appeal broad enough to prevent abuses and to lessen gross disparities. A proper measure of uniformity in sentences is to be achieved not by inexorable statutory commands of minimum penalties regardless of circumstances, but rather by the occasional review in an appellate court of sentences passed by the trial judges in its jurisdiction. Equally to be avoided are two extremes: On the one hand the undeviating rigidity of statutes and on the other unappealable and sometimes capricious and inflamed sentencing by a single man on the bench.

It is often said that the appellate court lacks advantages possessed by the trial judge who has seen the witnesses and the defendant. This is true. On the other hand the appellate court has some advantages that are denied the trial judge. On appeal there is less likelihood of emotional overtones from which even a conscientious trial judge may find it difficult to escape when he imposes sentence shortly after hearing of the defendant's outrageous conduct. The appellate court also has the advantage of a wider perspective of cases.

Of course the appellate court would have access to probation reports and similar data precisely to the same extent as the trial judge. I do not find it necessary to enter the controversy as to whether counsel should be shown "confidential reports." That is a separate question. Whatever is the prevailing practice in the sentencing court, the same practice may be followed on appeal.

It may not be amiss to suggest further that judges at all levels should be required to be more familiar than some judges are with relevant developments in the medical and social sciences and with procedures in the penal institutions to which they commit convicted persons.

The fact that sentences must be determined without the benefit of definite and reliable formulas is no reason for denying opportunity to test the judgment of the court on appeal. On the contrary, precisely because the trial judge is forced to operate with so little guidance in the legal rules a second glance at the product is all the more indicated.

If it is not unfair to the trial judge in an equity case or a law case on the civil side to test not only his conclusions of law but his findings of fact, I do not see why in a criminal case it should be considered an invasion of the trial judge's province for the higher court to review the sentence. Naturally, great weight should be given to the trial court's action, but it should not be considered sacrosanct.

To the sentencing judge in serious cases it should be a source of comfort to know that any error he may have committed in this most crucial step of the whole trial is subject to correction on appeal as rulings of less gravity may be tested and, if need be, corrected. Moreover, when affirmed on appeal, the trial judge would have the satisfying assurance that not only some technical rulings of his have been approved but that his judgment on the most momentous question in the case has been upheld. In exercising the pardoning power the chief executive too would be able to act with greater confidence if he knew that not only the judge at nisi prius thought the sentence proper, but that on appeal the higher courts had sustained that judgment.

If you hesitate at this extension of appellate authority, I remind you that the right to any kind of appeal in criminal cases is only a century old; yet no one today would dream of withdrawing this established feature of our law.

I conclude with the confident hope that this, like any proposal aimed to prevent the miscarriage of justice, may command at least the interest of lawyers, serious about their role as ministers of justice and devoted to the study and orderly reform of our system of criminal law.

[From the ABA Journal, February 1960]

EXCERPTS FROM "RECENT TRENDS IN THE CRIMINAL LAW"

(Mr. Doub devotes his attention to two aspects of criminal law: the problem of setting up standards to guide judges in imposing sentences and the need for some revisions in the work of the U.S. Commissioners. The article is taken from an address delivered before the section of criminal law at the association's 1959 annual meeting in Bal Harbour/Miami Beach last August.)

(By George Cochran Doub, Assistant Attorney General of the United States)

The most conspicuous trend in criminal law in recent years has been the new look at some of our established concepts accompanied by an eagerness to overhaul well-defined notions and principles. During the past 5 years, there has been more inquiry, study, and questioning of the method of our system of criminal justice than in any prior period in our history. Reevaluation has included the causes of crime, the criminal court process, sentence, probation, parole, and custodial care. It is difficult to avoid the conclusion that this ferment indicates an underlying dissatisfaction with our simplified treatment of crime and punishment in the modern society.

Commissions for the study and revision of criminal codes have been appointed in a number of States, and the State of Wisconsin has recently proceeded further and adopted a new, more direct and less ambiguous code. The painstaking work of the American Law Institute in the development of its Model Penal Code is attracting increasing attention and even proposed sections contained in its tentative drafts have achieved sufficient recognition to be cited in Supreme Court opinions. I have no doubt that the Model Penal Code proposals will make notable contributions to the complex problem of reconciling criminal justice with desirable theories of social justice to the advantage of both the individual and society.

* * * * *

CAPRICIOUS SENTENCES—A CAUSE OF DISSATISFACTION

Particular dissatisfaction has been manifested lately with respect to the vagaries involved in our present methods of sentencing. The sometimes grossly excessive or grossly inadequate punishment and the conflicting standards applied by the same, as well as different, trial judges have suggested to some that the power of sentence is too delicate and too powerful a function to be lodged in one man without supervision. After giving a number of examples of seemingly capricious sentences, Chief Judge Simon Sobeloff of the Fourth Circuit Court of Appeals has concluded:

"Such fantastic vagaries tear down the mightiest sanction of the law—respect for the courts. We have good and wise men on the bench, but not all are wise and good; and even the best and most prudent, being human are, like Homer, liable sometimes to nod. The truth is that passing sentence is too delicate and too powerful a function to lodge in any man's hands entirely unsupervised."

Under the civil law of Western Europe, sentences are imposed by multiple-judge trial courts. In no criminal court under the civil law system of Western Europe is one judge permitted to fix a punishment involving the loss of life or liberty of a citizen. In addition, statutes attempt to formulate and define the aggravating and mitigating circumstances which the trial judges are directed to consider.

The United States is the only country in the free world where a sentencing court need give no reasons for the imposition of a sentence. In every other country the decision of the court on matters of punishment must be supported by detailed explanation. As Professor George has said, with respect to foreign courts, "The decision of the court on matters of sentence, in contrast to the stark declaration of the sentence practiced in this country, must be supported by reasons at least as detailed as those which support the finding of guilt itself."

The United States appears to be the only country in the free world in which there is no appellate review of the punishment imposed by the trial court. Under the civil law, courts of appeal are authorized to make independent findings of fact with respect to sentences. Appeal may be brought by either the government, the accused or the injured party. In most civil law jurisdictions the appellate court is only permitted to reduce, not increase, the sentence, although in Italy the sentence may be either increased or reduced.

Under the civil law a sentence upon appeal is evaluated upon the basis of the degree of consistency between the sentence imposed and sentences imposed in other courts for similar offenses. Accordingly, the appellate courts tend to bring the sentences reviewed toward a common denominator or common standard. If a particular sentence

deviates conspicuously from the usual measure of punishment for similar crimes, it is modified.

The English system has completely departed from the common law tradition of limited appellate review in criminal cases.

Under the Criminal Appeals Act of 1907 a convicted person may, by leave of the Court of Criminal Appeals, appeal a sentence following conviction unless the sentence is one determined by law. If the court is of the opinion that a different sentence should have been imposed, it may pass any sentence warranted under the circumstances, whether more or less than that originally ordered. The possibility of an increased sentence upon appeal discourages frivolous appeals from the sanctions imposed. In the Commonwealth countries, the accused, the goernment or the injured party may appeal matters of sentence, and in these jurisdictions sentences have on occasion been substantially increased despite objections by the nonappealing defendant.

Under the British system appellate judges consistently refuse to interfere merely because they, sitting as a trial judge, might have fixed some other punishment. They only interfere when matters of principle are involved. The requirement that no one may appeal the sentence imposed except with permission of the appellate court and the comparatively few permissions granted have held the number of sentences reviewed to a minimum. In the period from June 1948 to August 1949 only 10 appeals against sentence were heard by the English Court of Criminal Appeals. In five the sentence was affirmed, in four the sentence was reduced, and in one the sentence was increased. In 1956 leave to appeal against a sentence was permitted in six cases, in two the sentence was affirmed, in three the sentence was reduced, and in one the sentence was increased. In the Commonwealth countries appeals from sentences have likewise not been numerous.

The value of this appeal right from sentence may not be determined by either the number of appeals or the percentage of affirmances or modifications. The existence of the appeal privilege inevitably results in lower courts conforming to a considerable degree in their sentencing standards to those defined in appellate decisions. The tendency is against extreme harshness of punishment or extreme leniency.

In the Federal system we insist upon strict and highly technical requirements for the protection of the rights of the accused during trial, although the issue of guilt may not even be doubtful. Yet we provide a total absence of safeguards when the ultimate and most difficult problem is reached as to the disposition to be made of the convicted person. Here the trial judge is given in the Federal system, and in most State jurisdictions, the widest latitude of discretion. He may impose the maximum prison sentence, he may suspend the sentence, he may prescribe probation, he may impose a nominal fine. There are no guides for the judge and he follows his sense of justice which, like the Chancellor's foot, varies from judge to judge. Justice Cardozo once wrote that "the present system, in the view of many is as irrational in its mercies as in its rigors, and in its rigors as in its mercies." So in a particular case the sentence lies practically uncontrolled in the understanding and the conscience of the judge, the criteria applied being vague, if not non-existent.

NO RECORD OF THE REASONS FOR THE SENTENCE

Although the character of the sanction to be imposed may be the most difficult problem in a criminal case, it is not the practice in the Federal system for the appellate record to contain any information as to the reasons why the district judge imposed the particular sentence. Indeed, there is no requirement in the Federal Rules of Criminal Procedure that the district court state its reasons for the imposition of the sentence made and, if the district court does state its reasons, the appellate record omits this significant information.

I believe that the Federal Rules of Criminal Procedure should be amended to require the district court to make a statement of record as to the reasons for his sentence and to require the appellate record to include that statement. Sentences which, without explanation, may seem whimsical or oppressive to an appellate court may have had in fact a reasonable basis. The requirement I suggest should result in fewer fallacious assumptions by the appellate court and should cause the district courts, in defining their reasons for the particular sentence on the record, to develop an even more careful and objective approach to their difficult problem.

* * * * *

The judges who have served on the appellate division are enthusiastic about its success and believe that this procedure has brought about much better sentencing. They also report that there has been no criticism of the system by prosecutors, the courts, the press, or the public. The principal objections of substance to appeals from a criminal court sentence appear to be avoided by the Massachusetts system of providing for informal appellate review by trial judges.

A reflex of the current dissatisfaction with existing sentencing methods has been the repeated efforts of the Congress and State legislatures to restrict the discretion of trial judges by making mandatory fixed prison sentences for particular crimes. Such statutes generally are adopted as an angry reaction to some publicized offenses, are designed to destroy any discretion of the trial court and implicitly manifest a lack of confidence in them. By statute the armed robbery of a post office carries a mandatory sentence of 25 years. The penalties provided for in the Narcotics Control Act make it impossible for a judge to distinguish between the drug racketeer on the one hand and a hapless victim of the racketeer on the other.

I believe that these Draconian laws, hard and inflexible, are basically unsound because they preclude discriminating judgment, the exercise of compassion and the use of any lubricating common sense. The artificial rigidity of such statutes, denying any consideration of mitigating circumstances, has resulted in trial judges, juries, and appellate courts deflecting the impact of the laws by strained and unnatural constructions.

Another constructive development during the past few months has been the decision of the Judicial Conference of the United States to make a comprehensive study of the U.S. commissioner system. You will recall that the commissioners, who act as committing magistrates, issue warrants for arrest and search, conduct preliminary examinations, commit prisoners for trial and set bail. When authorized by the district courts, commissioners try petty offenses originating in the Federal enclaves. In spite of their important work, the commissioners have been the "lost brethren" of the Federal judicial system. Few members of the bar have been acquainted with their functions and the lack of interest in their work is best indicated by the fact that, as far as I know, the law review article of Mr. Kestenbaum and myself, in the University of Pennsylvania Law Review for March 1959, is the only published article attempting to analyze their functions.

I am convinced that the important but little-known work of the U.S. commissioners needs a major overhaul. It is my hope that the study directed by the Judicial Conference will result in the abolition of the archaic fee system of compensation for U.S. commissioners, which requires them to look to their fees, fines, and bail forfeitures for their compensation, and the substitution of fixed salaries. It is a return to medievalism for the Federal system to compel magistrates to have a personal pecuniary stake in their judicial or quasi-judicial acts. I am also hopeful that, although the power of appointment of commissioners continue to remain in the chief judge of each district, who is particularly familiar with the qualifications of members of the bar, the Judicial Conference of the United States will establish minimum standards and qualifications which must be applied in the appointment of the commissioners.

And finally, the commissioners should be vested with authority to try all Federal petty offenses, not because such offenses are burdensome upon the district courts, but because it is oppressive and onerous for persons to be charged and tried upon minor offenses in the Federal district courts. Federal justices of the peace should handle such cases for the same good reasons that comparable offenses have been handled for more than a century by State justices of the peace throughout the United States.

In conclusion, may I suggest that the notable current interest in the reexamination and reevaluation of our system of criminal justice is a wholesome development. Any civilization must be judged to a considerable extent by its treatment of the historic problems of crime and punishment. In this area we deal with great problems and they require the very best thinking on the part of the bar, the bench, and the public.

EXHIBIT 1

S. 3914

A bill to amend chapter 235 of title 18, United States Code, to provide for the appellate review of sentences imposed in criminal cases arising in the district courts of the United States

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 235 of title 18, United States Code, is amended by inserting, immediately after section 3741 thereof, the following new section:

"§ 3742. APPEAL FROM SENTENCE.

"(a) In every case arising in a district court of the United States in which a defendant has been convicted of a criminal offense for which no mandatory sentence is fixed by law, the defendant may, with leave granted by the circuit court of the United States for the appropriate circuit upon application therefor made by the defendant within ten days after the date of entry of the judgment imposing sentence upon him, appeal from the sentence so imposed upon the ground that the sentence, although within lawful limits, is excessive. Upon the allowance of any such appeal by a circuit court, the clerk of the district court and the appropriate United States attorney shall certify to the court of appeals such transcripts of proceedings, records, and other information relating to the offense of the defendant and the sentence imposed upon him as the circuit court by rule or order may require.

"(b) Any such appeal may be determined by the circuit court with or without hearing thereon. On any such an appeal, the appellate court may reduce the sentence imposed by the district court to any lawful sentence which it deems appropriate, if it determines that the conviction was proper, but that the sentence imposed was more severe than warranted by the circumstances of the case. By taking an appeal from the sentence under this section, the defendant shall waive any right to plead that as a result of any revision of the sentence by the appellate court he has been twice put in jeopardy for the same offense."

(b) The analysis of chapter 235 of title 18, United State Code, is amended by adding at the end thereof the following new item:

"3742. Appeal from sentence."

WIRETAPPING

Mr. HRUSKA. Mr. President, pending on the Senate Calendar is S. 3340, a bill introduced by the Senator from New York [Mr. KEATING] to permit court-authorized wiretapping by State law-enforcement officers. It was reported by the Committee on the Judiciary on June 24, 1960.

Considering the great amount of space which has already been devoted to this topic in the CONGRESSIONAL RECORD in the past months, I ordinarily would be hesitant to offer another article. However, it is surprising that with all the efforts which have been taken to explain the purpose of the bill and the conditions which give rise to legislative action, considerable apprehension and outright fear is found whenever wiretapping controls are proposed.

For this reason, the well-written article by Mr. Anthony Lewis, published in the August 21, 1960, issue of the New York Times magazine deserves the widest circulation among those troubled and concerned about this and related legislation. Entitled "Tangled Issue of Wiretapping," it reviews the unsteady progress which has been made in coping with the problem thus far by the courts.

Mr. President, I recommend this balanced, though brief, essay on the issues for the thoughtful consideration of my colleagues, and I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TANGLED ISSUE OF WIRETAPPING

(By Anthony Lewis)

For three decades, since the Supreme Court first dealt with the problem, wiretapping has been the subject of recurrent controversy in this country. Waves of public outrage at notorious uses of the dismal art have alternated with campaigns by law-enforcement officials to eliminate restraints on tapping.

At the moment the cycle seems to be in its second phase. Police and prosecutors, who consider wiretapping an essential weapon against crime, are concerned about what they believe is a movement in the courts to clamp down on tapping. "You can't hunt lions with a beanshooter," Brooklyn's District Attorney Edward S. Silver explained to a group of Congressmen in urging them to support permissive wiretap legislation. Mr. Silver is president of the National District Attorneys Association, which shares his view.

Scientific developments have made wiretapping easy—and its detection extremely difficult. A cheap induction coil placed next to a telephone line will pick up a conversation without causing any telltale hum or interference. A device known as a pen register or dial recorder picks up the number dialed by the unsuspecting party and prints it in dots or dashes on ticker tape.

The legality of wiretapping is an intricate question that can be considered most simply if broken down into three parts—tapping by Federal agents, by State and local officers, and by private persons.

The Federal constitutionality of wiretapping was upheld by the Supreme Court in 1928. Over the dissent of Justices Brandeis, Butler, and Stone—and Holmes on non-constitutional grounds—the Court ruled that tapping was not an "unreasonable search and seizure" of the kind prohibited by the fourth amendment, and that use of wiretap evidence at a trial did not violate the fifth amendment's guarantee against compulsory self-incrimination.

Then, in section 605 of the Communications Act of 1934, Congress provided: "No person not being authorized by the sender shall intercept any communication and divulge * * * the contents." This cryptic language was given content by the Supreme Court in 1937. It held that the statute applied to Federal agents as well as private persons and prohibited the use of wiretap evidence in Federal courts.

Despite section 605, the Federal Bureau of Investigation and other Federal agents continue to wiretap. The FBI asserts that its tapping is legal because section 605 makes it a crime only to "intercept and divulge"—both acts, not just the first—and because only public disclosure, not merely reporting to an official superior, counts as divulging under the statute. These somewhat fragile legal theories have never been passed upon by the Supreme Court, but successive Attorneys General have supported them.

At one time the director of the FBI, J. Edgar Hoover, opposed wiretapping on the ground that its benefits would be outweighted by the "discredit and suspicion" it would bring on law enforcement. But his views changed in the 1930's, and in 1940 President Roosevelt officially authorized wiretapping by the FBI provided the approval for each tap be obtained in advance from the Attorney General. That procedure is still followed. According to Mr. Hoover, the Bureau uses taps only in internal security cases and where life is at stake, as in kidnaping and extortion. He testified last February 8 that the FBI then had 78 wiretaps.

As for the States, only a few have restricted tapping. Illinois and Pennsylvania in 1957 enacted statutes flatly prohibiting all wiretapping, police taps included, and barring wiretap evidence. The courts of California and Florida have ruled out the use of wiretap evidence. In five States—New York, Massachusetts, Maryland, Oregon and Nevada—the police are permitted to tap if they first obtain a court order from a judge.

State and local officials are concerned now at the possible effects of the Federal law, section 605, on their use of wiretap evidence. For in 1957 the Supreme Court said section 605 applied to State officials and overrode any State laws purporting to authorize tapping. Since then a few judges in New York have refused to issue wiretap orders or have barred evidence obtained by tapping under other judges' orders. The Supreme Court said in 1952 that nothing in section 605 compelled State courts to exclude wiretap evidence, but this principle is being challenged in a case which the Supreme Court will review next term.

Private wiretapping—by marital investigators, private eyes of all kinds, and criminals—is illegal under section 605 and under some State laws. Until recently there had been virtually no prosecutions, a fact sometimes said to result from government's embarrassment in punishing others for what its own agents do. But in the last half dozen years there has been significant action against private tappers. A tapping case in New York led to a legislative investigation and a general crackdown on tapping by private detectives. Other State prosecutions have been reported; and the Federal Government, which had obtained only one conviction in the first 20 years of section 605, has chalked up six since 1954. (It lost the best-known case, against Teamster Chief James Hoffa.)

In this legal wilderness, how much telephone tapping actually goes on? There are no reliable estimates, but undoubtedly there is a great deal. In 1955 a New York private detective, John Broady, was found in a room with access to 100,000 telephone lines, some of which he was busily tapping. The New York City police, probably the most active official tappers, obtain perhaps 1,000 court orders a year authorizing taps. A recent study by the Pennsylvania Bar Association estimated that the police in New York actually tap as many as 20,000 lines a year without bothering to obtain court orders in advance, but officials ridicule this figure.

The foremost legal analyst of the problem, Alan F. Westin of Columbia University, wrote in 1952: "Despite the statutes and judicial decisions which purport to regulate wiretapping, today this practice flourishes as a wide-open operation at the Federal, State, municipal, and private levels." This year Professor Westin has expressed the belief that the amount of tapping is down somewhat since "the high tide of the early 1950's."

Since no one has a good word to say for private wiretappers, the question of what to do about wiretapping centers on official tapping by law enforcement agencies. What then, are the arguments pro and con?

The basic argument for police wiretapping is that it works. Taps are said to be an essential weapon against crime—especially against a criminal element that is becoming better and better organized. As distinguished a liberal as the late Robert P. Patterson, judge and Secretary of War, endorsed official wiretapping as a necessary device to fight ever more resourceful and sophisticated criminals who do not hesitate to use any contrivance against the law-abiding.

A second argument of those who favor official wiretapping is that, under modern conditions, respect for privacy is an insufficient basis for policy. Society and the individual himself have interests aside from privacy, and one of them is protection against crime. If wiretapping is "dirty business," as Justice Holmes said, so is crime. When the Supreme Court in 1937 construed section 605 to bar wiretap evidence, Justice Sutherland wrote in dissent:

"My abhorrence of the odious practices of the town gossip, the Peeping Tom and the private eavesdropper is quite as strong as that of any of my brethren. But to put the sworn officers of the law, engaged in the detection and apprehension of organized gangs of criminals, in the same category is to lose all sense of proportion. * * * The necessity of public protection against crime is being submerged by an overflow of sentimentality."

Wiretapping proponents argue that under the control of court orders tapping is no more reprehensible than many traditional police practices—the use of informants, for example, or searches under warrant. They argue that regulated wiretapping will not touch the law-abiding.

Some who oppose wiretapping doubt that it is really necessary to law enforcement. Senator THOMAS C. HENNINGS, JR., whose Constitutional Rights Subcommittee has made an exhaustive study of the subject, says the verdict as to need is "not proven." Others concede that wiretapping helps the police, but say the price is not worth paying. Thomas McBride, former attorney general of Pennsylvania, told the Hennings subcommittee that tapping does not catch enough criminals to outweigh the loss of "the feeling of freedom that people have that they are not being listened to."

This threatened loss of privacy is, of course, the basic objection to wiretapping. The fear is that to put this weapon into the hands of Government agencies is to move toward totalitarian spying on individuals. The classic statement of the values at stake was that of Justice Brandeis, in his dissent

from the 1928 decision upholding official wiretapping:

"The makers of our Constitution • • • recognized the significance of man's spiritual nature, of his feelings and his intellect. They knew that only a part of the pain, pleasure and satisfactions of life are to be found in material things. They sought to protect Americans in their beliefs, their thoughts, their emotions, and their sensations. They conferred, as against the Government, the right to be let alone—the most comprehensive of rights and the right most valued by civilized men."

The right to be let alone—a phrase first used by Brandeis in an 1890 law-review article—sums up what lies behind the instinctive aversion to wiretapping. Opponents dispute the claim that tapping affects only the guilty or can be effectively regulated. A judicial order for a tap is not like a search warrant, limited to a particular time and place and object; it may go on indefinitely, without the notice that a search warrant gives the suspect. Conversations with innocent persons as well as conspirators are overheard.

Moreover, say the opponents, authorities may misuse supposedly limited wiretapping authority. A Brooklyn grand jury charged in 1950 that police were using taps to blackmail gamblers after attaching the taps without court approval, and that they were obtaining court orders wholesale on the basis of inadequate or false affidavits of need. The FBI was said to have listened in on conversations between Judith Coplon, the alleged Soviet spy, and her lawyer.

In the present situation, one may conclude, there are elements that dissatisfy all sides. The police and others concerned with law enforcement see what they consider their necessary power to wiretap clouded by section 605 of the Federal law. Opponents of official tapping think too much of it is going on. The citizen has no confidence that private tapping is effectively controlled. Worst of all is the impression that law enforcement officers themselves are violating the law. That was the situation in the 1928 Supreme Court case: Prohibition agents had wiretapped in violation of a District of Columbia statute. Justice Brandeis, in the greatest passage of his great dissent, foresaw the consequences:

"In a government of laws, existence of the Government will be imperiled if it fails to observe the law scrupulously. Our Government is the potent, the omnipresent teacher. For good or for ill, it teaches the whole people by its example. Crime is contagious. If the Government becomes a lawbreaker, it breeds contempt for law; it invites every man to become a law unto himself; it invites anarchy. To declare that in the administration of the criminal law the end justifies the means—to declare that the Government may commit crimes in order to secure the conviction of a private criminal—would bring terrible retribution."

The observer seeking a solution to the wiretapping dilemma may find the British example instructive. A country hardly insensitive to the claims of freedom and privacy, Great Britain nevertheless permits police wiretapping—under the strictest of controls. Each tap must be approved in advance by a high official of the Home Office. A 1957 report by a committee of Privy Councilors, approving the continuation of controlled wiretapping, said it was "an effective weapon" against crime and concluded:

"The interference with the privacy of the ordinary law-abiding citizen or with his individual liberty is infinitesimal, and only arises as an inevitable incident of intercepting the communications of some wrongdoer. It has produced no harmful consequences."

That conclusion of the Privy Councilors can be understood only against the background of the facts on wiretapping in Britain. Official taps in the entire United Kingdom have averaged fewer than 150 a year. The police invariably destroy all records of wiretaps, the Privy Councilors found; it was unthinkable that officials would use taps for private ends. Most astonishing to an American, the councilors found no evidence of the existence of any private wiretapping whatsoever.

The secret behind the generally accepted and satisfactory wiretapping situation in Britain, then, is public confidence—confidence that power given officials will not be misused, confidence that the privacy of the honest citizen's conversation is unlikely to be invaded by either private eavesdroppers or overzealous police.

The problem in this country is to create conditions giving rise to the same degree of confidence. Some argue that in a nation without Britain's tradition of official self-restraint, the only answer is absolute prohibition of all wiretapping. Others believe that there should be regulated wiretapping. Perhaps in part because complete prohibition is likely to be an unrealistic idea so long as crime remains as severe a problem as it is, the alternative of regulation seems to be gaining support among those concerned about wiretapping.

Professor Westin, who favors such limited tapping, notes that the vital element in any legislative plan to that end is control to insure against police excesses. The legislation must at the same time be sufficiently workable so that it will be obeyed and not avoided by law-enforcement officials. Because this is now overridingly a problem of Federal law, any meaningful resolution of the wiretapping conflict must come from Congress.

The legislation envisaged by Professor Westin and others would allow the States to wiretap—if they wished to at all—only under a court-order system rigorously defined by Congress. The State courts would be allowed to issue orders only upon a genuine, particularized showing of need. Orders would be good for a limited time, say a month. The wiretap authority might be limited to serious crimes and placed in the hands of district attorneys rather than the police.

On the Federal level—where the need for legislation is certainly less urgent—the ideal statute would provide a clear legal basis for the kind of wiretapping now done by the FBI. Tapping authority might be limited to certain crimes, such as espionage and kidnaping, and certain Federal agencies, perhaps only the FBI. Some think a Federal court order should be required for each tap, while others think the Attorney General's personal approval, as at present, suffices.

Along with these permissive provisions, the legislation would include a flat and total prohibition on all other wiretapping—that is, on the tapping itself, without regard to fine points about "divulgence." There would be an assumption of strict enforcement by the Justice Department, including prosecution of officers who violate the law.

It would be foolhardly, in light of the record, to forecast early congressional action. Dozens of bills have been introduced and dozens of hearings held in the last 20 years, and Congress has done nothing. But the pressures are rising now, and they come from several directions—from law-enforcement officials worried about their legal position, from libertarians concerned about wiretapping in general, from those who see a gradual breakdown of legal controls in this area. Perhaps the time is approaching when Congress will have to settle this particular conflict between liberty and order.

INTERNATIONAL COMMUNISM—AGGRESSION WITHOUT WAR

Mr. HRUSKA. Mr. President, one of the major problems confronting the Nation is to keep the people informed and aware of the character of the kind of aggression without war which is consistently on the march under the banner of international communism.

Aggression without war is that strategy in which the aggressor comes not as a conqueror but as a champion of people and freedom by offering progress, plenty, and hope to the unfortunates, of the earth—and, it might be added, a new kind of life which has been regarded as attractive by some people within our own Nation.

Communism as such is reprehensible to America. However, this knowledge is not sufficient without an ability to recognize its presence and to be articulate about it.

It is encouraging to know that there are efforts within America to bring about a knowledge and understanding in regard to the philosophy of communism and also a basic understanding of the principles and operation of our American Government.

One such event opened its sessions yesterday in a program entitled "Education for American Security."

It is a 4-day school held at the Naval Air Station in Glenview, Ill., under the sponsorship of the Glenview Chamber of Commerce and presented by the U.S. Naval Air Station at that point.

The purpose of this school is announced as being to motivate an active force against moral decay, political apathy, and spiritual bankruptcy; to bring an awareness of the ominous hammer and sickle that threatens the very life of our Nation.

It is announced further that:

An important phase of the school includes a workshop training program on the various techniques of organizing and participating in discussion group meetings and seminars. As the material to be covered will be unclassified, the program has been opened to all interested citizens, including educators and students, clergy, business and industry leaders, and above all, to mothers and fathers.

Mr. President, a copy of the program has been sent to me by my friend, Capt. Isaiah M. Hampton, U.S. Navy, commanding officer of the Naval Air Station in Glenview, Ill.

Commendations are due in heaping measure to the leadership which makes this school possible. Each and every one of those appearing on the program are performing a great service.

It is quite evident that they are governed by the rule that the most effective proponents of freedom are not governments, but free people.

Truly it can be said that they also are making a vast step in the current battle for the minds and hearts of men.

It is to be hoped that similar programs are undertaken elsewhere along the same line.

AMENDMENT OF DISTRICT OF COLUMBIA TEACHERS' SALARY ACT OF 1955, AS AMENDED

The Senate resumed the consideration of the bill (H.R. 12993) to amend the District of Columbia Teachers' Salary Act of 1955, as amended.

Mr. MANSFIELD. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the District of Columbia teachers' salary bill. The bill is open to amendment.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. McGEE in the chair). Without objection, it is so ordered.

The bill is open to amendment.

Mr. BIBLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Nevada will state it.

Mr. BIBLE. What is the pending bill?

The PRESIDING OFFICER. The pending bill is the one to amend the District of Columbia Teachers' Salary Act of 1955, as amended.

Mr. BIBLE. That is House bill 12993, is it not?

The PRESIDING OFFICER. That is correct.

Mr. BIBLE. Mr. President, I should like to make a short opening statement about the purpose of the bill.

First, let me state, so there will be no misunderstanding, that we have notified both the senior Senator from Delaware [Mr. WILLIAMS] and the junior Senator from Delaware [Mr. FREAR], both of whom are interested in this measure, so they can be here as the debate on the bill progresses.

Mr. President, the purpose of the bill is, first, to increase the entrance salary step of District teachers from the present $4,500 per annum to $4,800 per annum, and, second, to provide an average 7.5 percent salary increase to teachers and officials of the District school system, excluding from this increase the positions of Superintendent and Deputy Superintendent of Schools.

I may say in connection with this exclusion that I had hoped that due recognition would be given to the present Superintendent of Schools for the District of Columbia. I think there should have been a salary increase for this particular salaried position.

But the thinking of the committee was that the teachers and those in the lower level administrative positions should first be taken care of, and that the other positions should be taken care of—as has been done in the past—by a separate bill. I hope that when we return in January, such legislation will move forward expeditiously. I think the present Superintendent of Schools in the District of Columbia has done an outstanding job, and that his salary should be increased. I expect to introduce a bill along that line at the beginning of the next session, and would hope for favorable action by the committee.

In considering these school bills, the committee has before it a number of bills for its consideration. There were many complex differences in the approaches suggested by means of the various bills. An attempt was made to change the classifications of the teachers, and to change the service steps built into the basic act.

The Senate committee felt that due to the short time remaining in this session, to attempt to enact all these proposed classification changes would encumber the bill and possibly make its enactment impossible.

Therefore, the committee arrived at what it regards as a simpler and more direct approach, as represented by the pending bill, and one which we believe to be more feasible.

The committee, in increasing the base salary of step 1, class 18, from the present $4,500 per annum to $4,800 per annum, adopted the view of the Commissioners of the District of Columbia that a $4,800 per annum base salary for teachers entering the school system would be most helpful in recruiting new teachers of high professional caliber and would be of material assistance in retaining them in the system.

The committee decided on a 7½-percent increase in the salaries of employees of the Board of Education, other than those in classes 1 and 2, which, as I explained a moment ago, are the classes which were excluded—namely, those of the Superintendent and the Deputy Superintendent of Schools.

The first year cost of the bill is estimated to be approximately $2,600,000; that is based on an estimate submitted by the Board of Commissioners, at the request of the committee.

The committee arrived at the figure of 7½ percent rather obviously, I think, from the other pay raises which have been voted by the Congress for those in the classified pay category. This percentage follows the same pattern that the distinguished Senator from Ohio [Mr. LAUSCHE] was following so closely last evening in connection with the pay increase for the policemen and firemen of the District of Columbia.

The committee felt that this class of public officials and public servants—namely, the schoolteachers—is entitled to the same percentage increase in salary.

I see that the distinguished senior Senator from Ohio is on his feet. If he wishes to ask some questions, I am happy to yield to him at this time.

Mr. LAUSCHE. I thank the Senator from Nevada for yielding to me.

In the face of the fact that salary increases have been granted generally to the employees of the Federal Government, and the further fact that last night salary increases were granted to the District of Columbia policemen and firemen, obviously it is imperative that the teachers in the District of Columbia not be dealt with differently.

However, I should like to have the RECORD show that with regard to the policemen, the firemen, the teachers, and the school officials, the pending bill, if enacted, will mean that there will have been five pay increases since 1951.

In 1951, a 10-percent pay raise was granted to the policemen and firemen; in 1953, 13.7 percent; in 1955, 7.5 percent; in 1958, 13.8 percent; and now, in 1960, there will be a pay raise of 7½ percent. The total comes to pay increases of 52½ percent since 1951, to the policemen and firemen. The record also shows that every 2 years those increases are granted.

With respect to the teachers and the school officials who are specifically covered by the bill we are debating, the statistics show that in 1951 a 10-percent pay raise was granted; in 1953, 10 percent on the first $3,000 of salary, 8 percent on the portion between $3,000 and $5,000, and 6 percent on the portion in excess of $5,000.

Mr. BIBLE. That was done in 1953, and I believe the figures the Senator from Ohio has submitted are correct. They are in accordance with the table which was furnished to me.

Mr. LAUSCHE. Yes. Let me ask whether any one of the staff members is able to explain what that pay increase amounted to, on the average. It is based on a graduated scale. I have just now been informed, Mr. President, that it averages approximately 8 percent.

In 1955, a 14.9-percent pay raise was granted to the schoolteachers; in 1958, 14 percent; and it is my understanding that the pending bill would grant them an additional 7½ percent.

Mr. BIBLE. That is correct; if the pending bill is enacted into law, it will provide a pay increase of 7½ percent.

Mr. LAUSCHE. I wish to repeat that inasmuch as general pay raises have been granted to all Federal employees, it is simply inescapable—regardless of what the presently proposed pay raise may be—that it, likewise, must be granted to the schoolteachers.

Mr. BIBLE. And I commend the attitude of the distinguished Senator from Ohio in that connection. I know he has some feelings in regard to this area of pay increases. But I think the conclusion inescapable that if pay raises are granted to the other employees of the Government, this one should be granted to the schoolteachers.

Mr. LAUSCHE. I voted against the general pay raise for all Federal employees because I felt that those in the $12,000, $15,000, and $17,000 categories were not the ones we contemplated taking care of on the same basis as that on which we would take care of the employees in the lower categories.

However, I should like to say that when the pay increase now proposed for the teachers in the District of Columbia is granted, the District of Columbia will be second in the Nation, in terms of the salaries paid to schoolteachers—second in the Nation among cities with a population of 500,000 or more.

Mr. BIBLE. That is correct—second among the 17 larger cities, as regards teachers who hold B.A. degrees, if my information is correct.

Mr. LAUSCHE. Yes.

Mr. BIBLE. I think that is commendable, and I believe that the Senator from Ohio will agree that we are required to pay the teachers in the District of Columbia higher salaries, in order to obtain schoolteachers of the proper caliber.

Mr. LAUSCHE. My answer is that when the pay of schoolteachers in the District of Columbia is increased to the extent that the District of Columbia stands second among the larger cities of the Nation, in terms of the salaries paid to schoolteachers, undoubtedly we shall create difficulties for the school operations in the adjoining area, with whom the District of Columbia competes in substantial degree in connection with the hiring of teachers.

Only Chicago, of the 17 large cities in the country, will excel the pay given to teachers in the District of Columbia. The pay in Boston, Pittsburgh, Buffalo, Baltimore, St. Louis, Philadelphia, and Houston will be $800 lower for the initial pay. The pay in New Orleans is $3,490, as compared to $4,800 in the District of Columbia. The median pay in these 17 large cities is $4,300, while the Washington pay will be $4,800 at the beginning.

Mr. BIBLE. That will be the starting pay under the new schedule. I think that is a step in the right direction in urging people to go into teaching as a career.

Mr. LAUSCHE. I do not want to enter into a debate on that question, but I point out that when the pay in Washington, D.C., goes up—and I am not denying that a pay increase should be granted, after what we did in the two previous bills—it will undoubtedly present a problem for Prince Georges, Arlington, Fairfax, and Montgomery Counties, and Falls Church. The pay in Prince Georges is $4,200; in Alexandria, $4,200; in Arlington, $4,300; in Fairfax, $4,200; in Falls Church, $4,300; and in Montgomery, $4,500. By our action we would drive those salaries up to $4,800, if it can possibly be done.

Mr. BIBLE. The various counties are now proposing to raise starting salaries, for example, to $4,500 in Prince Georges and $4,600 in Arlington, and so forth. They are stepping up the salaries in accordance with the metropolitan area pay.

Mr. LAUSCHE. I merely point out that there is a race going on to see who can pirate teachers from one place to the other. In any event, I think I have presented figures for the RECORD so they will be available 2 years from now, and it will be interesting to see if, in the next election, we shall go through the same process of either a 13-percent or a 7½-percent salary increase.

Will the Senator yield so I may offer an amendment?

Mr. BIBLE. I yield.

Mr. LAUSCHE. Mr. President, on behalf of the Senator from Delaware [Mr. WILLIAMS] and myself, I offer an amendment to the bill, which I ask to have stated.

The PRESIDING OFFICER. The amendment offered by the Senator from Ohio, for himself and the Senator from Delaware, will be stated.

The LEGISLATIVE CLERK. At the appropriate place, it is proposed to insert:

That (a) section 125 of the District of Columbia Sales Tax Act (D.C. Code 47–2602) is amended by striking out "2 per centum" and by inserting in lieu thereof "3 per centum".

(b) Subsection (a) of section 127 of such Act (D.C. Code 47–2604(a)) is amended to read as follows:

"(a) On each sale, other than sales of food for human consumption off the premises where such food is sold, and other than sales or charges for room, lodgings, or accommodations furnished to transients, such amounts as may be prescribed by the Board of Commissioners of the District of Columbia to carry out the purposes of this section."

SEC. 2. Section 212 of the District of Columbia Use Tax Act (D.C. Code 47–2702) is amended by striking out "2 per centum" and inserting in lieu thereof "3 per centum".

SEC. 3. The amendments made by the first two sections of this Act shall take effect on the first day of the first month which begins more than sixty days after the date of enactment of this Act. From and after the effective date of such amendments, all references in the District of Columbia Use Tax Act to sections 125 and 127 of the District of Columbia Sales Tax Act shall be deemed to be references to such sections 125 and 127, as amended by the first section of this Act.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. LAUSCHE. Mr. President, with respect to the amendment, will the Senator from Nevada yield for a few questions?

Mr. BIBLE. Yes; I am happy to yield.

Mr. LAUSCHE. What is the cost of the bill the Senate passed last night with respect to the salaries for policemen and firemen?

Mr. BIBLE. The cost of the bill that was passed last night is $2.2 million, and the cost of this bill, as we earlier stated, is $2.6 million.

Mr. LAUSCHE. So the cost of the two bills is $4,800,000?

Mr. BIBLE. Yes; I believe about $4,800,000 or closer to $4,900,000.

Mr. LAUSCHE. I have not calculated the revenues that will be produced by the amendment, but I understand they will be about $5,200,000.

Mr. BIBLE. The figure which was used in the report that accompanied the bill from the District of Columbia Committee is an estimate of the revenues to be expected from the proposed sales tax bill as passed by the House, and as reported by the Senate District of Columbia Committee. The estimate is approximately $5.5 million in fiscal year 1961. About $5½ million is a correct figure.

Mr. LAUSCHE. That statement places in the RECORD what I feel ought to be contained therein.

My amendment is offered to provide revenues that will defray the cost of these two bills, which will entail an expenditure of $4,800,000. The amendment which I offer will produce between $5,500,000 and $5,800,000.

Mr. President, the amendment that I offer has been passed by the House. It is the identical provision that is contained in the House bill. My theory is that we ought to provide the finances with which to meet our obligations. That is all I have to say on it.

Last night I voted against the Williams amendment because I thought it was improperly attached to that bill. It is my understanding the Parliamentarian has ruled this amendment is a proper amendment and comes within the rules.

That is all I have to say.

Mr. MORSE. Mr. President, after adequate debate is had on the amendment, I propose to move to lay it on the table, as I did last night with reference to the policemen's and firemen's bill.

Mr. President, during the course of debate upon the salary increase for police and firemen, the distinguished Senator from Delaware [Mr. FREAR], who is also one of the two members of the Senate Committee on the District of Columbia who serve with the Appropriations Committee on matters pertaining to the District, stated:

We have a taxing program, I advise the Senator from Ohio. I will further state that there is a sufficient amount of revenue in the District of Columbia to carry this program without the addition of the sales tax until the first of the year.

I was pleased to have my worthy colleague state this fact, frankly, because I believe it to be a key point in this debate. My own information, based upon inquiries made of District officials, is to the effect that revenue in conjunction with the approval of the use of borrowing authority is sufficient, beyond the first of the year date supplied by the Senator from Delaware, to finance pay legislation through February, and perhaps even longer than that.

In this connection, I note also that the Appropriations Committee report upon the supplemental bill we considered yesterday, in speaking of District items, stated at page 7, Senate Report No. 1925, H.R. 13161:

The committee has approved additional appropriations of $10,261,500 for essential operating and capital outlay expenses in fiscal year 1961. Testimony presented to the committee showed the sufficiency of revenues in the general fund account that would be required to meet the expenditures anticipated through approval of the items listed as follows:

Operating expenses:	
Executive Office	$47,000
Department of Occupations and Professions	50,000
Courts	155,000
Capital outlay:	
Public building construction	6,170,800
Department of Sanitary Engineering	3,838,000

The request of $3 million as additional Federal payment to the general fund is disapproved. The committee expects to fully explore the financial status of the general fund early in the next session, in consideration of the legislation passed by the 86th Congress respecting pay increase costs and additional revenues expected from new tax measures.

Press reports upon the action of the committee are also of interest.

Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Washington Post and Times-Herald of August 28, 1960, which states, in part, about the junior Senator from Rhode Island:

PASTORE, whose appropriations subcommittee regularly processes the District budget, reported the committee made no assumptions about the pending sales tax increase.

The House has passed a bill raising the levy from 2 to 3 percent.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PUBLIC WORKS PROJECT CLEARS SENATE GROUP; EXTRA $3 MILLION LOST—ADDED SUM WOULD HAVE HELPED TO PAY DISTRICT SALARY INCREASES

(By James R. Carberry)

The Senate Appropriations Committee in effect decided last night to let Congress straighten out the District's finances when it returns in January.

The committee:

Gave the District clearance for its $8.3 million special public works program this fiscal year.

Refused the $3 million added Federal payment the Commissioners asked to help finance $9 million worth of employee pay raises in fiscal 1961.

The District can pay for its public works program, chiefly school construction, with the $8.8 million surplus it expects this year. But the denial of the extra payment, coupled with Senator WAYNE MORSE's threat to talk to death a proposed sales tax increase from 2 to 3 percent, leaves the Commissioners with virtually no ready cash for the salary increases.

MAY BE ADDED IN '61

When asked about this, committee member JOHN O. PASTORE, Democrat, of Rhode Island, replied that since Congress voted the pay raises, the District ought to ask Congress to help pay for them—presumably as an addition to next year's Federal payment.

PASTORE declined to say how much the addition should be.

In less complex actions last night, the committee put back in the supplemental appropriation bill two loan items the House rejected.

First, the committee recommended approval of the full $500,000 appropriation sought to get the National Capital Transportation Agency started. The Agency is to build and possibly operate the area's first mass transit system.

The House cut the request in half Friday, and limited the Agency to 25 instead of the requested 54 staffers. Planners said the move would cripple the Agency before it got started. The Senate committee junked the personnel ceiling.

MASTERS' FUND BACK

Second, the committee endorsed an $80,000 request to hire four special masters to hear the backlog of cases in juvenile court. The House evidently rejected the plan as being legislation on an appropriation bill.

But the Senate committee appeared to agree with an opinion by the District's corporation counsel that Juvenile Court Judge Orman W. Ketcham has the authority to appoint masters; all he needs is the money.

PASTORE, whose Appropriations Subcommittee regularly processes the District budget, reported the committee made no assumptions about the pending sales tax increase. The House has passed a bill raising the levy from 2 to 3 percent, but MORSE has blocked it in the Senate. The Oregon Democrat feels sales taxes are undemocratic.

CONGRESS MAY STEP IN

If the 3-percent sales tax passes, PASTORE said, the Commissioners will have about $5.5 million more this year to apply to the pay raises. If the bill dies, PASTORE said, the District may be able to balance its budget anyway. PASTORE did not specifically say how this could be accomplished, but he implied the next Congress will have to put a thumb on the scales.

On the other hand, PASTORE said he assumes the two bills on the Senate calendar granting policemen, firemen, and teachers $4.8 million in pay raises will be enacted. (A $4.2 million raise for District classified workers has already been passed.)

The reason the $3 million added Federal payment was scuttled, the Senator reported, was that committee members felt it had no chance of winning concurrence by the House.

The committee added to the bill approving the public works program $5.2 million cut out by the House to install fallout shelters in new Federal buildings, including the new Court of Claims Building on Lafayette Square.

The bill is scheduled for Senate debate Monday.

Mr. MORSE. Mr. President, the quotation from the Senator from Delaware [Mr. FREAR] to which I earlier alluded appears in the CONGRESSIONAL RECORD, at page 18156.

We have a taxing program, I advise the Senator from Ohio. I will further state that there is a sufficient amount of revenue in the District of Columbia to carry this program without the addition of the sales tax until the first of the year.

I also ask unanimous consent to have printed in the RECORD at this point a news story from the Washington Sunday Star of August 28, bearing on this same general problem.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DISTRICT OF COLUMBIA PLEA DIES IN SENATE—GROUP RESTORES CUT FOR TRANSIT

(By James G. Deane)

The Senate Appropriations Committee yesterday turned down a District plea for an added $3 million Federal payment to bolster city finances.

But the unit approved $10 million in public works projects, as well as restoring several cuts made Friday by the House in other local spending items. The latter included:

Restoring to $500,000 the allotment for the new National Capital Transportation Agency, cut in half Friday by the House.

JUVENILE COURT FUND

Backing $80,000 for four special masters to help relieve the caseload at juvenile court, which the House deleted.

Recommending an extra $47,700 for the District's executive office expenses.

Senator PASTORE, Democrat of Rhode Island, committee member in charge of District matters, conceded after the committee session that the turndown on the Federal payment was, in effect, postponing the day of reckoning to January.

NEW PLEA SEEN

The District then presumably will be forced to return to Congress for funds to meet urgent city costs, he said.

But he said the committee was forced to be realistic in accepting the refusal of House leaders to do anything more now.

The Rhode Island Senator strongly endorsed the city's claim for further help. The fiscal difficulties are being created primarily, he pointed out, by pay raises enacted without consultation with the District.

"We've got to take cognizance of this and do equity to the city," he told reporters.

The Senator did not commit himself as to what additional Federal payment figure he would support in January, but he indicated it would be whatever proves to be essential at that time.

The Federal allotment for the current fiscal year now stands at $25 million. The Commissioners originally asked for an additional $7 million, but this was scaled down after tax collections improved.

MORSE'S OPPOSITION

The serious fiscal prospect was underscored last night by renewed opposition of Senator MORSE, Democrat of Oregon, to a proposed increase from 2 percent to 3 percent in the city's sales tax. Senator MORSE announced on the Senate floor that he is prepared to offer 22 amendments to a House-passed sales tax measure, along with detailed explanations of all 22.

With adjournment impending, this clearly amounted to a threat to filibuster against favorable Senate action on the bill.

The sales tax rise is being looked to by city officials to produce some $5.5 million this fiscal year. This would be one of the principal means of meeting the pay raises, which are expected to cost some $9 million.

Classified city workers already have received a 7.5 percent raise, and Congress is expected to clear a similar increase for teachers, police, and firemen before adjournment.

FUND PINCH SEEN

Enough cash is available to meet the increased payroll costs through January, but without a sales-tax rise the city's coffers will be in precarious shape soon thereafter, officials said.

The public works projects cleared by the Senate committee include $3.4 million in school facilities, additional sums for library, recreation, correctional, welfare and other construction, and nearly $4 million for sewers to combat Potomac River pollution.

The school projects include the new Bertie Backus Junior High School at South Dakota Avenue and Hamilton Street NE.

Other school projects include additions to Kenilworth Elementary and Deal Junior High, plans for a new elementary school at the site of Garfield Hospital and additions to Eliot Junior High and Bancroft Elementary and sites for new elementary schools at North Dakota and Kansas Avenues NW. and Wheeler Road and Mississippi Avenue SE.

BRANCH LIBRARY SITE

Library items are a branch site near 24th Street and Pennsylvania Avenue NW. and another near 53d Place and East Capitol Street.

Recreation items are for plans for a Benning-Stoddard recreation center and a Randall recreation center.

The principal correctional projects are a $500,000 dormitory at the Lorton (Va.) Youth Center and a dairy barn at the Occoquan work house.

Welfare projects include two children's cottages at Junior Village, a D.C. Village laundry addition and a chapel at the Cedar Knoll School.

Miscellaneous building items include new elevators at 499 Pennsylvania Avenue NW. and the Recorder of Deeds office and some air conditioning in the District Building.

WARNING ON TRANSIT

The restoration of funds for the new transportation agency followed a warning yesterday from Federal officials that the House budget cut would cripple plans for fast development of subways and other new rapid transit facilities to serve the congested metropolitan area.

The House, besides halving the $500,000 asked by President Eisenhower set a 25-employee ceiling on the new agency. The President asked for 54 employees.

Appointments of top agency officials are awaiting clearance of the budget item.

The special masters wanted for Juvenile Court could aid Judge Orman W. Ketcham in reducing a case backlog. The judge and other community leaders have been seeking

extra judges but Congress has not acted to provide them.

The Senate committee restored to the appropriation bill $7.3 million deleted by the House for fallout shelters in Government buildings.

Mr. MORSE. Mr. President, the Senator from Ohio and I are very good personal friends. We disagree very much on this legislative process in which the Senator is engaged at the present time. He is really suggesting a rider to a teachers' salary bill.

I do not think a teachers pay bill is the proper vehicle for the consideration of a sales tax. I intend to discuss, at great length, a sales tax bill, if my motion to lay on the table should fail, because I have made a very detailed analysis of the budget problems of the District of Columbia and the fiscal situation in the District of Columbia and I am convinced there is no need for such an increase in the sales tax. In my judgment no sales tax bill should be passed in this short session of Congress as a rider to a teachers' salary bill.

I therefore move to lay on the table the amendment offered by the Senator from Ohio.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Ohio [Mr. LAUSCHE].

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 12993) was ordered to a third reading, read the third time, and passed.

Mr. MOSS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BIBLE. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

Mr. BIBLE. Mr. President, I move that the Senate indefinitely postpone action on the companion bill to the House bill which has been passed, Calendar No. 1753, S. 3739.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Nevada.

The motion was agreed to.

PROPOSED FREEDOM COMMISSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of calendar No. 1882, S. 1689, the bill providing for the creation of the Freedom Commission, which I desire to have made the unfinished business.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1689) to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy for the training and development of leaders in a total political war.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 1689) to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy for the training and development of leaders in a total political war, which had been reported from the Committee on the Judiciary, with amendments, on page 2, line 3, after the word "the", to strike out "free world" and insert "Free World"; in line 4, after the word "the", where it appears the first time, to strike out "free world" and insert "Free World"; in line 8, after the word "tests", to strike out "the"; in line 14, after the word "the", to strike out "free world" and insert "Free World"; in line 16, after the word "intensive", to strike out "continuous"; on page 3, line 3, after the word "the", to strike out "free world" and insert "Free World"; in line 5, after the word "the", where it appears the second time, to strike out "free world" and insert "Free World"; in line 11, after the word "the", where it appears the second time, to strike out "free world" and insert "Free World"; in line 13, after the word "the", where it appears the second time, to strike out "free world" and insert "Free World"; at the beginning of line 15, to insert "and of the dimensions and nature of the global struggle between freedom and Communism"; at the beginning of line 19, to strike out "true nature of the international Communist conspiracy" and insert "dimensions and nature of the threat"; on page 4, line 3, after the word "conspiracy", to insert "and of the dimensions and nature of the global struggle between freedom and Communism"; in line 20, after the word "Freedom", to strike out "Academy; and" and insert "Academy"; after line 21, to strike out:

(3) The term "joint committee" means the Joint Congressional Freedom Committee.

On page 5, line 8, after the word "United", strike out "States" and insert "States, one of whom shall be selected from the higher echelon of the State Department"; on page 7, line 11, after the word "Commission", to strike out "is authorized and empowered to" and insert "shall"; in line 16, after the word "the", where it appears the second time, to insert "Commission and"; after line 17, to strike out:

(1) the development of systematic knowledge about the international Communist conspiracy;

(2) the development of counteraction to the international Communist conspiracy into an operational science that befits and bespeaks the methods and values of freemen, and to achieve this purpose the entire area of counteraction is to be thoroughly explored and studied with emphasis on the methods and means that may best be employed by private citizens and nongovernmental organizations and the methods and means available to Government agencies other than the methods and means already being used;

(3) the education and training of private citizens concerning all aspects of the international Communist conspiracy and in the science of counteraction to that conspiracy;

(4) the education and training of persons in Government service concerning all aspects of the international Communist conspiracy and in the science of counteraction to that conspiracy to the end that they can be more useful to their Government in defeating the international Communist conspiracy.

On page 8, after line 14, to insert:

(1) to carry on a research program designed to develop an integrated operational science that befits and bespeaks the methods and values of freemen and through which the Free World will be able to meet and defeat the carefully patterned total aggression—political, ideological, psychological, economic, paramilitary, and organizational—of the Soviet Bloc, and through which we, as a Nation, may work toward our national objectives in a systematic manner. To achieve this purpose the full range of methods and means is to be thoroughly explored and studied including the methods and means that may best be employed by private citizens and nongovernmental organizations and the methods and means available to the Government other than the methods and means already being used. This research program shall include the study of our national objectives and purpose and the development of proposals for intermeshing and integrating the full spectrum of methods and means into a coordinated, short and long range strategy for victory, seeking the utilization of our full potential in the public and private sectors,

(2) to educate and train Governmental personnel, private citizens, and foreign students concerning all aspects of the international Communist conspiracy, the nature of the global struggle between freedom and communism, and the science of counteraction to the Communist conspiracy.

On page 9, line 19, after "(a)", to strike out "Academy students shall be selected, insofar as is practicable and in the public interest, from a cross section of the diverse groups, within and without the United States, in which the total political war is being fought. Before accepting any student for training who is an officer or employee of a Government agency, the Commission shall first obtain the concurrence of that agency." and insert "Academy students, other than Government personnel, shall be selected, insofar as is practicable and in the public interest, from the diverse groups within and without the United States where trained leadership and informed public opinion are most needed."; on page 10, line 9, after the word "All", to strike out "other"; in line 10, after the word "to", to strike out "aid and assist the Commission in the selection of students" and insert "assign officers and employees to the Academy for designated training"; in line 20, after the word "Act", to strike out "Foreign students selected for training"; at the beginning of line 22 to insert "(c) Foreign students selected for training"; on page 11, after line 15, to strike out:

NON-ACADEMY TRAINING OF ACADEMY STUDENTS

SEC. 8. The Commission is authorized to provide students selected for training at the Academy (either before, after, or during Academy training) with such additional education and training at colleges, universities, or technical schools other than the Academy, or with such on-the-job training in industry and business as the Commission shall determine to be in the public interest.

On page 12, at the beginning of line 2, to change the section number from "2" to "8"; in line 5, after the word "to", to strike out "disseminate" and insert "disseminate,"; in line 6, after the word "without", to strike out "charge" and insert "charge,"; in line 7, after the word "assist", to strike out "persons" and insert "people"; in line 9, after the word "and", to strike out "the ways and means of defeating that conspiracy" and insert "of the dimensions and nature of the global struggle between freedom and communism, and of ways they can participate effectively toward winning that struggle"; in line 16, after the word "level", to strike out "instruction" and insert "instruction, and also to publish such research materials as may be in the public interest"; at the beginning of line 23, to change the section number from "10" to "9"; on page 13, at the beginning of line 4, to change the section number from "11" to "10"; at the beginning of line 19, to change the section number from "12" to "11"; on page 16, at the beginning of line 16, to change the section number from "13" to "12"; at the top of page 17, to strike out:

ESTABLISHMENT OF JOINT CONGRESSIONAL FREEDOM COMMITTEE; MEMBERSHIP

SEC. 14. There is established the Joint Congressional Freedom Committee hereinafter referred to as the "joint committee" to be composed of seven Members of the Senate to be appointed by the President of the Senate, and seven Members of the House of Representatives to be appointed by the Speaker of the House of Representatives. In each instance not more than four Members shall be the members of the same political party.

After line 10, to strike out:

AUTHORITY AND DUTY OF JOINT COMMITTEE

SEC. 15. The joint committee shall make continued studies of the activities of the Commission and of problems relating to the development of counteraction to the international Communist conspiracy. During the first sixty days of each session of the Congress the joint committee shall conduct hearings in either open or executive session for the purposes of receiving information concerning the development and state of counteraction. The Commission shall keep the joint committee fully and currently informed with respect to all of the Commission's activities. All bills, resolutions, and other matters in the Senate or House of Representatives relating primarily to the Commission shall be referred to the joint committee. The members of the joint committee who are Members of the Senate shall from time to time report to the Senate and the members of the joint committee who are Members of the House of Representatives shall from time to time report to the House, by bill or otherwise, their recommendations with respect to matters within the jurisdiction of their respective Houses which are referred to the joint committee, or otherwise within the jurisdiction of the joint committee.

On page 18, after line 8, to strike out:

CHAIRMAN AND VICE CHAIRMAN OF JOINT COMMITTEE; VACANCIES IN MEMBERSHIP

SEC. 16. Vacancies in the membership of the joint committee shall not affect the power of the remaining members to execute the functions of the joint committee, and shall be filled in the same manner as in the case of the original selection. The joint committee shall select a chairman and a vice chairman from among its members at the beginning of each Congress. The vice chairman shall act in the place and stead of the chairman in the absence of the chairman. The chairmanship shall alternate between the Senate and the House of Representatives with each Congress, and the chairman shall be selected by the members from that House entitled to the chairmanship. The vice chairman shall be chosen from the House other than that of the chairman by the members from that House.

At the top of page 19, to strike out:

POWERS OF JOINT COMMITTEE

SEC. 17. In carrying out its duties under this chapter, the joint committee, or any duly authorized subcommittee thereof, is authorized to hold such hearings or investigations, to sit and act at such places and times, to require by subpena or otherwise, the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, to procure such printing and binding, and to make such expenditures as it deems advisable. The joint committee may make such rules respecting its organization and procedures as it deems necessary: *Provided, however,* That no measure or recommenadtion shall be reported from the joint committee or by any member designated by him or by the joint committee, and may be served by such person or persons as may be designated by such chairman or member. The chairman of the joint committee or any member thereof may administer oaths to witnesses. The joint committee may use a committee seal. The provisions of sections 192–194 of title 2, United States Code, shall apply in case of any failure of any witness to comply with a subpena or to testify when summoned under authority of this section. The expenses of the joint committee shall be paid from the contingent fund of the Senate from funds appropriated for the joint committee upon vouchers approved by the chairman. The cost of stenographic services to report public hearings shall not be in excess of the amounts prescribed by law for reporting the hearings of standing committees of the Senate. The cost of stenographic services to report executive hearings shall be fixed at an equitable rate by the joint committee. Members of the joint committee, and its employees and consultants, while traveling on official business for the joint committee, may receive either the per diem allowance authorized to be paid to Members of Congress or its employees, or their actual and necessary expenses provided an itemized statement of such expenses is attached to the voucher.

On page 20, after line 12, to strike out:

STAFF AND ASSISTANCE; UTILIZATION OF FEDERAL DEPARTMENTS AND AGENCIES; ARMED PROTECTION

SEC. 18. The joint committee is empowered to appoint and fix the compensation of such experts, consultants, and staff employees as it deems necessary and advisable. The joint committee is authorized to utilize the services, information, facilities, and personnel of the departments and establishments of the Government.

After line 20, to strike out:

CLASSIFICATION OF INFORMATION BY JOINT COMMITTEE

SEC. 19. The joint committee may classify information originating within the committee in accordance with standards used generally by the executive branch for classifying restricted data or defense information.

At the top of page 21, to strike out:

RECORDS OF JOINT COMMITTEE

SEC. 20. The joint committee shall keep a complete record of all committee actions, including a record of the votes on any question on which a record vote is demanded. All committee records, data, charts and files shall be the property of the joint committee and shall be kept in the offices of the joint committee or other places as the joint committee may direct under such security safeguards as the joint committee shall determine in the interest of the common defense and security.

And at the beginning of line 12, to change the section number from "21" to "13", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Freedom Commission Act".

CONGRESSIONAL FINDINGS AND STATEMENT OF POLICY

SEC. 2. (a) The Congress of the United States makes the following findings:

(1) The Soviet Union and Communist China are waging a total political war against the United States and against the peoples and governments of all other nations of the Free World.

(2) Unlike the Free World, the Soviet Union has systematically prepared for this total political war over several decades. Drawing on the experience of previous conquerors and upon their own elaborate studies and extensive pragmatic tests, Soviet leaders have developed their conspiratorial version of political warfare into a highly effective operational science. Recognizing that political warfare is a difficult science making unusual demands on its practitioners, the Soviet Union and Communist China have established an elaborate network of training schools, within and without the Free World, in which have been trained large numbers of highly skilled activists. These activists continue to receive intensive training throughout their party careers.

(3) In this total political war the Soviets permit no neutrals. Every citizen, every economic, cultural, religious, or ethnic group is a target and is under some form of direct or indirect Communist attack. The battleground is everywhere, and every citizen, knowingly or unknowingly, through action or inaction, is involved in this continuous struggle.

(4) Since the end of World War II, the Soviets, taking full advantage of their better preparation and often superior organizational and operational know-how, have inflicted a series of political warfare defeats on the Free World. The total sum of these defeats is nothing less than a disaster for the United States and the Free World and the continuation of this political war by the Soviets confronts the United States with a grave, present, and continuing danger to its national survival.

(5) In order to defeat the Soviet political warfare offensive and to preserve the integrity and independence of the nations of the Free World, it is imperative—

(A) that the knowledge and understanding of all the peoples of the Free World concerning the true nature of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and Communism be increased as rapidly as is practicable;

(B) that private citizens not only understand the dimensions and nature of the threat, but that they also know how they can participate, and do participate, in this continuous struggle in an effective, sustained, and systematic manner;

(C) that Government personnel engaged in the cold war increase their knowledge of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and Communism, develop a high esprit de corps and sense of

mission and a high degree of operational know-how in counteracting the international Communist conspiracy.

(b) It is the intent and purpose of the Congress that the authority and powers granted in this Act be fully utilized by the hereinafter created Commission to achieve the objectives set forth in the preceding subsection (a)(5) of this section. It is the further intent and purpose of the Congress that the authority, powers, and functions of the Commission and the Academy as hereinafter set forth are to be broadly construed.

DEFINITIONS

SEC. 3. When used in this chapter—

(1) The term "Commission" means the Freedom Commission;

(2) The term "Academy" means the Freedom Academy.

ESTABLISHMENT OF THE FREEDOM COMMISSION; COMPOSITION; CHAIRMAN AND ACTING CHAIRMAN; QUORUM; OFFICIAL SPOKESMAN; SEAL

SEC. 4. There is established in the executive branch of the Government an independent agency to be known as the Freedom Commission which shall be composed of six members and a Chairman, each of whom shall be a citizen of the United States, one of whom shall be selected from the higher echelon of the State Department. The Chairman may from time to time designate any other member of the Commission as Acting Chairman to act in the place and stead of the Chairman during his absence. The Chairman (or the Acting Chairman in the absence of the Chairman) shall preside at all meetings of the Commission and a quorum for the transaction of business shall consist of at least four members present. Each member of the Commission, including the Chairman, shall have equal responsibility and authority in all decisions and actions of the Commission, shall have full access to all information relating to the performance of his duties or responsibilities, and shall have one vote. Action of the Commission shall be determined by a majority vote of the members present. The Chairman (or Acting Chairman in the absence of the Chairman) shall be the official spokesman of the Commission in its relations with the Congress, Government agencies, persons, or the public, and, on behalf of the Commission, shall see to the faithful execution of the policies and decisions of the Commission, and shall report thereon to the Commission from time to time or as the Commission may direct. The Commission shall have an official seal which shall be judicially noticed.

MEMBERS: APPOINTMENTS; TERMS; COMPENSATION; EXTRANEOUS BUSINESS

SEC. 5. (a) Members of the Commission and Chairman shall be appointed by the President, by and with the advice and consent of the Senate. Not more than four members, including the Chairman, may be members of any one political party. In submitting any nomination to the Senate, the President shall set forth the experience and qualifications of the nominee. The term of each member of the Commission, other than the Chairman, shall be six years, except that (1) the terms of office of the members first taking office shall expire as designated by the President at the time of the appointment, two at the end of two years, two at the end of four years, and two at the end of six years; and (2) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term. The Chairman shall serve during the pleasure of the President. Any member of the Commission may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. Each member, except the Chairman, shall receive compensation at the rate of $20,000 per annum; and the Chairman shall receive compensation at the rate of $20,500 per annum.

(b) No member of the Commission shall engage in any business, vocation, or employment other than that of serving as a member of the Commission.

AUTHORIZATION TO ESTABLISH THE FREEDOM ACADEMY; FUNCTIONS OF COMMISSION AND ACADEMY

SEC. 6. The Commission shall establish under its supervision and control an advanced training and development center to be known as the Freedom Academy. The Academy shall be located at such place or places within the United States as the Commission shall determine. The principal functions of the Commission and Academy shall be—

(1) to carry on a research program designed to develop an integrated operational science that befits and bespeaks the methods and values of freemen and through which the Free World will be able to meet and defeat the carefully patterned total aggression—political, ideological, psychological, economic, paramilitary, and organizational—of the Soviet Bloc, and through which we, as a Nation, may work toward our national objectives in a systematic manner. To achieve this purpose the full range of methods and means is to be thoroughly explored and studied including the methods and means that may best be employed by private citizens and nongovernmental organizations and the methods and means available to the Government other than the methods and means already being used. This research program shall include the study of our national objectives and purpose and the development of proposals for intermeshing and integrating the full spectrum of methods and means into a coordinated, short and long range strategy for victory, seeking the utilization of our full potential in the public and private sectors,

(2) to educate and train Governmental personnel, private citizens, and foreign students concerning all aspects of the international Communist conspiracy, the nature of the global struggle between freedom and Communism, and the science of counteraction to the Communist conspiracy.

ACADEMY STUDENTS; SELECTION; GRANTS AND EXPENSES; ADMISSION AS NONIMMIGRANT VISITORS; DEPORTATION

SEC. 7. (a) Academy students, other than Government personnel, shall be selected, insofar as is practicable and in the public interest, from the diverse groups within and without the United States where trained leadership and informed public opinion are most needed. Persons in Government service coming within the provisions of the Government Employees Training Act may be trained at the Academy pursuant to the provisions of said Act. All agencies and departments of Government are authorized to assign officers and employees to the Academy for designated training.

(b) The Commission is authorized to make grants to students and to pay expenses incident to training and study under this chapter. This authorization shall include authority to pay travel expenses to and from the Academy or other authorized place of training under the chapter, and authority to give financial assistance to the dependents of students during the time they are undergoing training authorized under this Act.

(c) Foreign students selected for training under this Act shall be admitted as nonimmigrants under section 1101 (a) (15) of title 8, United States Code, for such time and under such conditions as may be prescribed by regulations promulgated by the Commission, the Secretary of State, and the Attorney General. A person admitted under this section who fails to maintain the status under which he was admitted, or who fails to depart from the Unted States at the expiration of the time for which he was admitted, or who engages in activities of a political nature detrimental to the interest of the United States, or in activities in conflict with the security of the United States, shall, upon the warrant of the Attorney General, be taken into custody and promptly deported pursuant to sections 1251–1253 of title 8, United States Code. Deportation proceedings under this section shall be summary and findings of the Attorney General as to matters of fact shall be conclusive. Such persons shall not be eligible for suspension of deportation under section 1254 of such title 8.

AUTHORIZATION TO ESTABLISH AN INFORMATION CENTER

SEC. 8. The Commission is authorized to establish an information center at such place or places within the United States as the Commission may determine. The principal function of the information center shall be to disseminate, with or without charge, information and materials which will assist people and organizations to increase their understanding of the true nature of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and Communism, and of ways they can participate effectively toward winning that struggle. In carrying out this function, the Commission is authorized to prepare, make, and publish textbooks and other materials, including training films, suitable for high school, college, and community level instruction, and also to publish such research materials as may be in the public interest. The Commission is authorized to disseminate such information and materials to such persons and organizations as may be in the public interest on such terms and conditions as the Commission shall determine.

RESTRICTIONS ON DISCLOSURE OF INFORMATION

SEC. 9. Nothing in this chapter shall authorize the disclosure of any information or knowledge in any case in which such disclosure (1) is prohibited by any other law of the United States, or (2) is inconsistent with the security of the United States.

SECURITY CHECK OF PERSONNEL

SEC. 10. (a) Except as authorized by the Commission upon a determination by the Commission that such action is clearly consistent with the national interest, no individual shall be employed by the Commission until such individual has been investigated by the Civil Service Commission to determine whether the said individual is a good security risk and a report thereof has been made to the Freedom Commission.

(b) In addition to the foregoing provisions, the Commission may request that any individual employed by the Commission, or under consideration for employment by the Commission, be investigated by the Federal Bureau of Investigation to determine whether the said individual is a good security risk.

GENERAL AUTHORITY OF THE COMMISSION

SEC. 11. In addition to the authority already granted, the Commission is authorized and empowered—

(1) to establish such temporary or permanent boards and committees as the Commission may from time to time deem necessary for the purposes of this Act;

(2) to appoint and fix the compensation of such personnel as may be necessary to carry out the functions of the Commission. Such personnel shall be appointed in accordance with the civil service laws and their compensation fixed in accordance with the Classification Act of 1949, as amended, except that, to the extent the Commission deems such action necessary to the dis-

charge of its responsibilities, personnel may be employed and their compensation fixed without regard to such laws: *Provided, however,* That no personnel (except such personnel whose compensation is fixed by law, and specially qualified professional personnel up to a limit of $19,000) whose position would be subject to the Classification Act of 1949, as amended, if such Act were applicable to such position, shall be paid a salary at a rate in excess of the rate payable under such Act for positions of equivalent difficulty or responsibility. The Commission shall make adequate provision for administrative review of any determination to dismiss any employee;

(3) to conduct such research, studies and surveys as necessary to carry out the purposes of this Act;

(4) to make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this Act;

(5) to make expenditures as may be necessary for administering and carrying out the provisions of this Act;

(6) to utilize, with the approval of the President, the services, facilities, and personnel of other Government agencies. Whenever the Commission shall use the services, facilities, or personnel of any Government agency for activities under the authority of this Act, the Commission shall pay for such performance out of funds available to the Commission under this Act, either in advance, by reimbursement, or by direct transfer;

(7) to utilize or employ on a full- or part-time basis, with the consent of the organization or governmental body concerned, the services of personnel of any State or local government or private organization to perform such functions on its behalf as may appear desirable to carry out the purposes of this Act, without said personnel severing their connection with the furnishing organization or governmental body; and further to utilize personnel of a foreign government in the same manner and under the same circumstances with the approval of the Secretary of State;

(8) to acquire by purchase, lease, loan, or gift, and to hold and dispose of by sale, lease, or loan, real and personal property of all kinds necessary for, or resulting from, the exercise of authority granted by this Act;

(9) to receive and use funds donated by others, if such funds are donated without restrictions other than that they be used in furtherance of one or more of the purposes of this Act;

(10) to accept and utilize the services of voluntary and uncompensated personnel and to provide transportation and subsistence as authorized by section 73b–2 of title 5, United States Code, for persons serving without compensation;

(11) to utilize the services of persons on a temporary basis and to pay their actual and necessary travel expenses and subsistence and in addition compensation at a rate not to exceed $50 per day for each day spent in the work of the Commission.

GENERAL MANAGER; APPOINTMENT; COMPENSATION

SEC. 12. The Commission is authorized to establish within the Commission a General Manager, who shall discharge such of the administrative and executive functions of the Commission as the Commission may direct. The General Manager shall be appointed by the Commission, shall serve at the pleasure of the Commission, shall be removable by the Commission, and shall receive compensation at a rate determined by the Commission, but not in excess of $18,000 per annum.

APPROPRIATIONS

SEC. 13. There is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, so much as may be necessary to carry out the provisions of this Act.

PURCHASE OF SPRINGFIELD, MASS., NEWSPAPERS BY SAMUEL I. NEWHOUSE

Mr. MORSE. Mr. President, several times this year I have spoken before the Senate about what I consider to be a growing and serious problem in our country—the practices of newspapers and publishers of our country in the field of labor relations.

I would expand this discussion, Mr. President, to include a very serious problem which should be raised in regard to the business practices of such newspapers, and in regard to monopolistic trends which we observe in the newspaper industry, not only with regard to monopolistic control of an increasing percentage of the presses of the country, but also the taking over of more and more radio and television stations.

It was Jefferson who said that the strength of a democracy can be no greater than the enlightenment of its people. If the people in this country start to be brainwashed by a monopolistically controlled press, radio, and television business in this country, democracy will be greatly weakened.

It is a rather shocking thing to see the growing octopus control of the Newhouse interests in connection with the press, television, and radio sources of information in this country.

I have studied in some detail the practices of the growing Newhouse monopoly. I am satisfied it is a threat to sound public policy in this country. I serve notice today that in the next session of Congress I shall do all within my power to seek a congressional investigation of the type of monopolistic practices the Newhouse so-called newspaper, radio-television chain is developing in this country. The American people need to be warned before it is too late about the threat which is arising as a result of the monopolistic practices of the Newhouse interests.

Mr. President, I have here an article which was published in the Springfield Republican newspaper of Springfield, Mass., on August 14, 1960. It is an article written by Reverend Ibraham, pastor of the College Highway Methodist Church in Southwick, Mass. In the article he points out that a community suffers when its newspapers lose their independence. He proceeds to set out a point-by-point analysis of the threat to an independent press in that section of Massachusetts as the result of the monopolistic tentacles of the octopus of the Newhouse dynasty stretching into Massachusetts. I ask unanimous consent that the article from the Springfield, Mass., newspaper be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMMUNITY SUFFERS WHEN ITS NEWSPAPERS LOSE THEIR INDEPENDENCE, SAYS PASTOR

The recent grab for control of the Springfield newspapers by outside interests is certainly a most just cause for alarm among the citizens of Greater Springfield. It could usher in an era of impersonal journalism dedicated solely to the profit motive. The disadvantages to the citizens of the Greater Springfield area will be many. In order to fully appreciate the dangers inherent in this situation, let us see what an independent paper means to the people:

1. It means "person-centered" journalism. By this, I mean a journalism which is interested in persons it serves because they are persons and not because they could be manipulated for ends other than serving them. An independent newspaper views its task as a servant of the people, aware of their needs, problems, fears, and frustrations. Sensing their needs, it attempts to minister to them to the extent that journalism is capable to do so. Springfield newspapers have helped in pioneering this person-centered journalism. Indeed, the heart and soul of the papers has always revolved around the service to the local citizens. Thus, the Springfield newspapers have always had a "heart" for the "least" person which outside ownership can never possibly have.

2. The fortunes of an independent, locally controlled newspaper are tied to the local region which nourishes it. Therefore, it is by the very nature of its circumstances, sensitive to the highest economic, social, and spiritual aspirations of the locality it serves. It seeks to promote these aspirations with integrity and honestly formulated policies. It feels part and parcel of the ongoing local social stream. This aspect gives the citizens also, the satisfying feeling that the local papers are "their" papers. A loyalty develops to the paper which is healthy and constructive. This bond of affection and mutual dependency and loyalty between paper and people serves to further and unify the social and political pride which is necessary to maintain, improve, and better the local town or community.

3. An independent newspaper, while desiring to make the profit necessary to keep it going, does not make profit the sole criterion of its usefulness and service. Outside controlling interests aim solely to make money via the successfully run local papers, else what other interest would they have by attempting to seize control of the local paper and incorporate it into a "chain"?

4. An independent newspaper, locally controlled, is easily accessible to the citizens it serves. You can drop in on the editors, reporters; chat with them, talk with them, suggest views and ideas and feel you are at home with the paper.

AN OMINOUS CHALLENGE

Most of us in the Springfield area have grown accustomed to depend on our locally controlled paper to hear us and sympathize with our aspirations to improve our localities and towns. Outside interests cannot possibly have the knowledge of and sympathy for these aspirations of ours or the desire to help us attain them. One cannot now visualize the loss to us all which may come from the taking over of our papers by a "chain." It is well that it be pointed out now before it is too late.

5. An independent newspaper has a local personality of its own spun from the warp and woof of the color and excitement of local history. This becomes a necessary mirror by which a locality needs to see itself. A chain-run paper will import an alien personality and attempt to force that on the citizens of our area. I view with alarm such developments. Common sense observation leads us to conclude that the newspapers, if the Newhouse calamity befalls them, will go for organization men. Rugged Yankee individualism which has characterized the Springfield newspapers will receive a severe blow. It will be a sad day for us and for New England

when that mortal blow falls and rugged individualism disappears from the local journalistic scene.

6. A chain-run paper will have the kind of power, by its very economics, that Lord Acton spoke about when he said that "power corrupts and absolute power corrupts absolutely." It will present an ominous challenge to the many forces striving to give Springfield the go-ahead impetus.

As a reader of your newspapers I may not always agree with your point of view or even with some of the features of your distinguished papers. This, however, is my right as a citizen of a democracy. However, I will feel the loss a personal one if you allow the control to slip into the hands of a money-grabbing clique. I am certain the overwhelming majority of the citizens feel like I do. It will be a sad day for us all when the Springfield newspapers become impersonal, power structures, dedicated to the profit and money-grabbing motive. Please do all you possibly can on our behalf to fight for the local independence of the papers. Rest assured that, in the final analysis, this is also a people's fight for what they deem is right and good for their city, town, and community.

Mr. MORSE. Mr. President, I invite attention to an editorial announcement made in the Springfield, Mass., Republican newspaper for June 19, 1960, announcing that the Newhouse chain had purchased some 40 percent stock of the Springfield newspaper. The article reads in part as follows:

The announcement on Friday, Bunker Hill Day, of the sale by the descendants of the founder of the Republican, Samuel Bowles, of their stock interest in the Springfield newspapers came as a shock. The work and pride of four generations is at an inglorious end.

Inroads by outsiders into New England business are attaining galloping proportions.

The article goes on to point out the undesirable effects, in the opinion of the editors of these newspapers of which the purchase, 40 percent of the stock by the Newhouse chain will have on an independent press in Springfield, Mass.

These editors are under an ownership arrangement by which the employees have the controlling interest in these papers for the next 7 years. They have served notice on the Newhouse dynasty that there will be a fight to the finish. They have probably the best employee pension plan and retirement plan existing in any group of newspapers in the country, but they are fearful as to what the Newhouse group will do, and they have good reason to be fearful. As the editor of one of these newspapers told me this noon at luncheon in the Senate restaurant, when I met with him and his lawyer, the Newhouses have already brought legal action seeking to upset the pension plan of the employees.

Mr. President, the last paragraph of the article to which I refer states:

We assure the readers, advertisers, and employees of the Springfield Sunday Republican, the Springfield Union, and the Springfield Daily News that irrespective of Mr. Newhouse the present employee management will continue to control these newspapers, at least for the next 7 years, perhaps longer. Employees are assured that the substantial assets of the newspapers' pension funds are carefully safeguarded for their exclusive benefit. The funds are controlled by employee trustees who appoint their own successors, and will continue so to be controlled.

The Newhouse interests are determined to use every economic force, pressure, and legal tactic they can in order to upset this employee control of the newspapers in which the Newhouses already have bought a 40-percent interest, and in which they hope to buy another 45-percent interest from some of the heirs of the Bowles estate. What is going on in this part of New Hampshire is but a repetition of what the Newhouse interests are doing in other parts of the country.

In my own State for the past many months we have had the shocking labor practices of the Newhouse interests in the case of the Oregonian and the Journal. I have pleaded several times in the Senate for a Senate investigation of the antilabor policies not only of the Newhouse interests, but also of other newspaper interests in this country, because there are a group of newspaper publishers in this country who are out to break the backs of the unions in the newspaper industry of this Nation.

We find the Newhouse chain engaged in this nefarious economic and antilabor practice in other parts of the country besides Massachusetts and Oregon. We find them in Missouri. We find them seeking to invade Colorado. We find them in New York and New Jersey. Therefore I think it is of the utmost importance that there be a congressional investigation of this Newhouse newspaper dynasty and empire in the early part of the next session of Congress.

I ask unanimous consent that there be printed in the RECORD at this point in my remarks another article appearing in the Springfield Union, issue of June 18, 1960, entitled "Samuel Newhouse Buys Stock in Republican Co."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SAMUEL NEWHOUSE BUYS STOCK IN REPUBLICAN CO.

Sidney R. Cook, treasurer of the Republican Co., today issued the following statement concerning sale of stock in the company: "I wish to announce that Samuel I. Newhouse has acquired from the relatives of the late Samuel Bowles a 40-percent interest in the stock of the Republican Co., a company holding controlling stock interest in companies which publish the Springfield Union, the Springfield Daily News, and the Springfield Sunday Republican.

"Mr. Newhouse has also acquired from the widow and children of the late Sherman H. Bowles, the rights to an additional 45-percent interest in the Republican Co. at a future date.

"Control of the Republican Co. presently remains in a trust, of which the trustees of the two pension funds established by the newspaper companies are a majority."

Mr. MORSE. I happen to know that there is a research study being conducted by some of the foundations of our country in regard to the status of pension funds and retirement funds of employees. I am speaking of private funds. I point out that private pension and welfare funds in many instances are not as secure as employees have been led to believe. We see here an attempt, on the part of the Newhouse empire, to weaken the pension fund in connection with certain Massachusetts newspapers.

This practice should be looked into. I happen to be one who believes that it is inexcusable for Congress to stand by while many millions of workers contribute to private pension and welfare funds in this country on the assumption that when workers reach retirement age they will be able to collect those funds. The pension fund problem is part and parcel of the investigation that I seek. I think the investigation for which I plead should lead also into an investigation as to the extent to which pension funds are administered, so that when the workers are ready for their retirement, they in fact will receive the benefit of the funds.

I mention this subject only because at a luncheon this noon with the editor of one of these newspapers and its very able and distinguished lawyer I was given an insight into the legal tactics of the Newhouse group in trying to undercut and destroy the morale of the employees of these newspapers.

I insert these remarks in the RECORD in the closing days of this session as my notice to the Newhouses: I have only begun to fight.

THE 1960 NATIONAL EASTER SEAL CHILD JOHNNY KEMP

Mr. MANSFIELD. Mr. President, earlier in the year I had the pleasure of visiting with and presenting to the Senate Johnny Kemp, the 1960 National Easter Seal Child. His grandparents, Mr. and Mrs. John B. Kemp of Wolf Point, Mont., are very dear friends of mine.

Johnny and his family are constituents of my good friends, the Senators from North Dakota [Mr. YOUNG and Mr. BURDICK] from my neighboring State, but I have been in close contact with the family for many years. I am now advised that Johnny's father has just recently been promoted to the position of Division Engineer for the Bureau of Public Roads in Bismarck, N. Dak. He will be in charge of the Federal-aid highway activities in the State. It is a difficult position, one with many headaches, but I know he will do an outstanding job because of his previous record of service with the Bureau. Mr. Kemp was a student of mine when I was on the faculty of Montana State University. I also want to point out that he has been doing another fine job of raising a family of three children since the untimely death of his wife nearly 10 years ago.

Mr. President, I ask unanimous consent to have two newspaper articles printed in the CONGRESSIONAL RECORD at the conclusion of my remarks; one from the August 11 issue of the Wolf Point Herald News of Wolf Point, Mont., and the other from the August 18 issue of the Daniels County Leader, of Scobey, Mont.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wolf Point (Mont.) Herald-News, Aug. 11, 1960]

FORMER WOLF POINT RESIDENT PROMOTED BY ROAD BUREAU

John Bernard Kemp, son of Mr. and Mrs. John B. Kemp of Wolf Point, who has been with the Bureau of Public Roads at Bismarck, N. Dak., for the past 8½ years was advanced to the position of division engineer on August 1. As division engineer for the Federal Road agency he will be in immediate charge of the Bureau's Federal-aid highway activities in North Dakota. He will be assisted in that capacity by a staff of about 20 which includes engineers, an auditor, a right-of-way appraiser, and administrative personnel.

Kemp was born at Scobey, August 14, 1918. He attended high school at Scobey and Wolf Point, graduating from Wolf Point High School in May 1935. He then attended Northern Montana College at Havre and Montana State University at Missoula, graduating from the latter with a degree in economics and sociology in March of 1940. Kemp attended the U.S.N.R. Midshipmen's School at Northwestern University of Chicago in 1942. He graduated 13th in a class of 900 men in the spring of 1943 and was retained as an instructor in navigation. He later served on Guam at the Naval Operating Base. While in the Navy he was advanced in rank to lieutenant, senior grade. Upon release from the Navy early in 1946 Kemp entered Iowa State University at Ames, Iowa, where he received a bachelor of science degree in engineering in 1947 and a master of science degree in engineering and economics in 1949. While at Iowa State University he was elected to membership in Tau Beta Pi, national engineering honorary fraternity and to Phi Kappa Phi, national scholastic honorary fraternity.

While attending college he worked during vacation periods for the Montana Highway Department on construction and surveys. After graduating from Montana State University in 1940 he was again employed by the Montana Highway Department for over a year before joining the U.S. Corps of Engineers at Fort Peck where he was empolyed on airport construction work at several airports and bases in Montana before enlisting in the Navy in 1942. In September of 1949 he joined the Bureau of Public Roads staff at the St. Paul office, and on March 1, 1952, he was transferred to Bismarck, N. Dak. From 1952 to 1957 he served as division planning and programing engineer and since 1957 he has been a district engineer in charge of Federal-aid activities in the western half of North Dakota. In 1957 and again in July of 1960 Mr. Kemp was awarded the Bureau of Public Roads citation and a cash award for sustained superior performance of official duties.

While teaching at Northwestern University in Chicago Mr. Kemp met Miss Kathryn Lally, of Dysart, Iowa, whom he married in 1944. Three children were born to this marriage: Kathy now 14, Johnny 10, and Marq 9. Mrs. Kemp died in December of 1950 while the family was living at St. Paul, and since the death of his wife Mr. Kemp has raised the family with the assistance of housekeepers. The son Johnny, who was born a quadruple amputee, is the 1960 National Easter Seal Child and in that capacity he visited the White House in March 1960 to present the first sheet of Easter Seals to Mrs. Eisenhower. While in Washington, Johnny, his father, and two sisters, and his grandparents of Wolf Point, were breakfast guests of Senator MIKE MANSFIELD. The breakfast was also attended by Senator MURRAY and Senator YOUNG of North Dakota.

Mr. Kemp has two sisters living in Montana and one at Calgary, Alta. Mrs. William Wagner lives at Missoula; Mrs. Walt Moreno lives at Miles City; and Mrs. Harold Degnan lives at Calgary. A brother, Robert, is a senior at the Creighton University School of Dentistry, at Omaha, Nebr. Mr. Kemp's parents have been residents of northeastern Montana for 45 years.

In addition to his duties as both father and mother to three healthy children, and those involved in his professional capacity with the Bureau of Public Roads Mr. Kemp has found time for public service. He is currently president of the North Dakota Society for Crippled Children and Adults, and is president of the Capital City Lions Club of Bismarck. He is a member of the Elks, the American Legion, the Knights of Columbus, the American Society of Civil Engineers, and the National Society of Professional Engineers. He is a registered professional highway engineer.

[From the Daniels County Leader, Scobey, Mont.]

WITH PEOPLE MAKING NEWS

J. Bernard Kemp, native of the Scobey community, son of Mr. and Mrs. John B. Kemp, former residents of the Carbert community and Scobey, is the new North Dakota head of the Federal Bureau of Public Roads, and as division engineer he is in charge of that Bureau's activities in that State.

Raised on his parents' farm northwest of Scobey, Bernard received his early schooling and part of high school in rural schools and at Scobey. His folks still have farming interests here.

Since leaving high school (1935) his career has been one of high scholarship and diligence. He received his degree in economics and sociology from Montana State University in 1940, and in 1942 entered the Navy and was assigned to midshipman's school at Northwestern University from which he graduated and became an instructor in navigation, later serving in the Pacific area.

Upon his discharge from the Navy in 1946 he attended Iowa State University where he received his B.S. degree in engineering in 1947 and his master's degree in engineering and economics in 1949.

That year he joined the Bureau of Public Roads staff in St. Paul and in 1952 was transferred to Bismarck where he has been since. In 1957 and again in 1960, Mr. Kemp received the Bureau of Public Roads citation and a cash award for sustained superior performance of official duties.

While Bernard was teaching at Northwestern University, following his graduation from midshipman's school, he met and married Miss Kathryn Lally in 1944. Three children were born to this marriage. His wife passed away in 1950.

One of the children, Johnny, who is 10, was born without feet or hands and was selected as the 1960 National Easter Seal Child and as such visited the White House last March and was introduced to other dignitaries of the Nation. The boy is a marvel of resourcefulness and stout spirits, to the amazement of all who meet him. His father has raised the three children by himself since the passing of the mother. Adversity has not interferred with accomplishment in the Kemp family.

In addition to his work, Bernard heads the North Dakota Society for Crippled Children and Adults, is president of the Lions Club in Bismarck, belongs to a number of other civic and fraternal organizations and is a member of several national scholastic honorary societies.

PENNSYLVANIA RAILROAD STRIKE

Mr. WILLIAMS of New Jersey. Mr. President, a strike will end service on the Pennsylvania Railroad system at 12:01 Thursday unless negotiators, now in continuous session, can reach an agreement before that deadline. According to newspaper accounts, 20,000 maintenance workers would be affected; 52,000 employees in all would be laid off if the strike is not averted; approximately 722 passenger and about 870 freight trains, now operating daily, would be put out of service.

I understand that the railroad, faced with a threat of strike, has discontinued any further through trains from the south to the north. They have discontinued any further shipments of perishables from the west to the east.

As one of the representatives of a State which depends to a great extent upon the passenger and freight operaions of the Pennsylvania I am hopeful that the discussions will lead to a constructive conclusion before the strike deadline, and I believe, too, that we here have a duty to inspect the current situation thoroughly.

The Railway Labor Act, as I understand it, is intended to prevent major disruptions of service. It is also intended to diminish or remove the necessity of resort to a strike in order for labor to win a dispute. If, indeed, a strike is the only answer, then we should determine what is lacking in our legislation.

This impending shutdown of the Pennsylvania Railroad is going to be especially hard on the people, factories, farms, and businesses of New Jersey. This particular railroad carries many thousands of New Jersey commuters a day to and from their jobs. It carries a good many people on business trips to and from our many plants and offices to plants and offices in many parts of the country. A considerable portion of its millions of tons of freight—I believe the figure is 118 million ton-miles a day—move to or from the New Jersey economy; our farms, plants, and stores.

Aside from the immediate damage to New Jersey's people and economy, this strike would inevitably set back the efforts of our State to make possible the survival of commuter services like those of the Pennsylvania. I believe the railroad is already in the red by almost $3 million; this strike would put the railroad even further behind, and seriously jeopardize our State's efforts to keep commuter services alive.

I strongly urge both management and labor that during the time the present emergency negotiations are in progress, that the trains be kept operating for the convenience of the shippers, receivers, and traveling public within our great State of New Jersey and throughout the country.

REPEAL OF WASHINGTON STATE'S ANTIALIEN LAND LAW

Mr. MAGNUSON. Mr. President, I wish to invite the attention of my colleagues to a significant and heartwarming movement now under way in my State of Washington. The movement is headed by a volunteer organization

called the Washington State Committee for the Repeal of the Anti-Alien Land Law. Its members are mostly Japanese Americans, an ethnic minority who are excellent citizens and of whom our State is justifiably proud. No organization which has been fully apprised of this committee's efforts has failed to see the justice of its objectives. The committee is small in numbers and has only limited resources, but it has gained widespread support for the goal it seeks.

Briefly, the committee seeks the repeal, by popular referendum, of a law that is archaic, obsolete, unjust, and legally meaningless. At the same time the law is psychologically repugnant and incompatible with democratic principles. It is a law that should be stricken from the lawbooks.

I am referring to article II, section 33 of the original constitution of the State of Washington, adopted in 1889. Section 33 has been amended several times but the essence of the original law remains unchanged. It prohibits ownership of land by aliens other than those who in good faith have declared their intention to become citizens of the United States.

At first glance, the purpose of the law may appear to be a good one. It is necessary to understand the intent of the law, the history of its application, and its present status, to see clearly why it is an unworthy law.

As originally conceived, section 33 was aimed against immigrants from Asia who, under the U.S. Constitution, were "ineligible to U.S. citizenship." In other words, under Federal law they were forced to remain aliens and consequently never could own land in Washington. Since the Japanese in our midst were the largest group of aliens of Asian ancestry, the law had the effect of discriminating primarily against them.

DISCRIMINATORY EFFECT

Let me digress here just a moment to point out the law's effect. While the law was aimed at the aliens, its greater discrimination was against native-born Americans of Japanese ancestry. The U.S. Supreme Court found in the Oyama case in 1948 that antialien land laws discriminated against American citizens of Japanese extraction when compared to the citizen children of other ancestries. Thus, antialien land laws, which existed for many years in California and Oregon as well as Washington, had the very real effect of reducing Japanese Americans into second class citizenship, circumscribing and restricting the lives of citizens and aliens alike. I am convinced that these antialien land laws helped substantially to create the prejudices which were fanned by hysteria in 1942 into the incident that has been described as "our worst wartime mistake." I have reference to the mass military evacuation of 110,000 persons of Japanese ancestry, regardless of citizenship, age, or sex, from their homes into interior internment camps.

I am proud to say that the Japanese Americans who call Washington home distinguished themselves in many ways during World War II, both as civilians and servicemen. More Japanese Americans per capita volunteered for military service from Washington than any other State, and the list of their awards for valor is a proud and lengthy one.

In 1952, the Congress of the United States saw fit to wipe racism from our naturalization laws and extend the privilege of citizenship to all persons regardless of race, color, creed, or national origin. This made aliens of Japanese ancestry, the last remaining national group of consequence, eligible to naturalization.

Simultaneously, this action by the Congress nullified the substance and intent of antialien laws such as section 33 of the Washington State constitution.

Grateful for the privilege, thousands of Japanese aliens, many of whom had lived in the United States for 40, 50, and 60 years, applied for and were granted American citizenship. Today they are entitled to all the rights and privileges of Americans, including the right to own land.

OTHER WESTERN STATES REPEAL SIMILAR LAWS

One by one, States with the now meaningless antialien statutes on their books repealed them. Oregon, Utah, Arkansas, and Idaho quickly wiped out antialien land laws. The California State Legislature in 1955 approved a referendum repealing such laws and the following year the people passed the measure by a substantial majority.

In the State of Washington a legislative committee after exhaustive study recommended repeal of the offending section 33. Senate Joint Resolution 4, providing for repeal, was passed unanimously in the State Senate and with only two dissident votes in the House.

The proposal is now on the ballot to be presented to the people of the State of Washington in the general election this coming November.

REASONS FOR REPEAL

Perhaps it should be explained here why there is so much concern about repealing a law that is without effect. There are several reasons.

First. Section 33 is a grim and unpleasant reminder of the days when antiorientalism was fashionable in the West. We want to wipe the slate clean.

Second. We are aware of the warning by the late Justice Robert H. Jackson that discriminatory laws are "like a loaded weapon ready for the hand of any authority that can bring forward a plausible claim of an urgent need." In other words, so long as there is legal sanction of the kind provided in section 33, in another time of hysteria and hate it may be used as the pattern for discrimination against an American minority. No American can be secure in his civil rights so long as legal justification for bigotry remains in the statutes.

Third. We are cognizant of the importance of winning friends for democracy in Asia. I can think of no better way to demonstrate our friendship than to repeal a law with its foundations mired in the dark mud of racism.

Fourth. Repeal of section 33 would be recognition by Washingtonians of the great and substantial role played by Japanese Americans in the development, progress and well-being of the Pacific Northwest. Our history, of relatively recent origins, is rich with the contributions Japanese immigrants made in the farming, lumbering, railroad, fishing, and other industries. Today their descendants are an integral and valued part of our commerce, culture and civic life.

Fifth and not least, we realize simple justice cries for repeal of section 33 and the State will be better for the action.

CITIZENS COMMITTEE ORGANIZED

To aid in this vital and necessary effort, an advisory committee to the citizens' Washington State Committee for the Repeal of the Anti-Alien Land Law has been organized. I am proud to be a cochairman of this advisory committee, along with my colleague, Senator Henry M. Jackson, Gov. Albert D. Rosellini, Mayor Gordon S. Clinton of Seattle, Mayor Neal R. Fosseen of Spokane, and the Honorable Henry Schmitz, president emeritus of the University of Washington. The members of this advisory committee are outstanding citizens of my State, representing every aspect of our life, including businessmen, educators, attorneys, realtors, ministers of every faith, veterans, farmers, civic leaders, and so forth.

To demonstrate the bipartisan support for the repeal of this antialien land law, I note that both the Democratic and Republican State conventions unanimously adopted platform pledges to this end.

Representing the organized concern of our citizens are organizations too numerous to mention. Suffice it to list only a few whose endorsement are particularly meaningful, such as the Washington Association of Realtors, the Washington State Board Against Discrimination, the American Legion, the Seattle Civic Unity Committee, and the Japanese American Citizens League.

I have no doubt that the people of the great State of Washington will go to the polls in November and, while making known their choice for President and Members of Congress, vote overwhelmingly in support of Senate Joint Resolution 4. With the indulgence of my colleagues, I take this opportunity to express the hope that Washingtonians will make their renunciation of bigotry an emphatic and vigorous one.

All members of both political parties, of the State of Washington congressional delegation have highly recommended the repeal of this law, and have signed a so-called bipartisan statement of opinions in regard to that matter.

I have held several meetings with my colleague, the Senator from Washington [Mr. JACKSON], on this subject; and to supplement the statement I have made, I ask unanimous consent to have printed at this point in the RECORD a further statement detailing our position on this matter, which in November will come before the people of the State of Washington.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

RELEASE FROM THE OFFICE OF SENATOR WARREN G. MAGNUSON

In the interest of fair play, equality, and justice, Washington voters should, Novem-

ber 8, approve Senate Joint Resolution 4 repealing the so-called antialien land law, the State's congressional delegation urged today in a bipartisan, joint statement.

All legally admitted immigrants are entitled to be free to purchase land, Senators WARREN G. MAGNUSON and HENRY M. JACKSON, Congresswoman CATHERINE MAY, and Congressmen DON MAGNUSON, THOMAS PELLY, THOR C. TOLLEFSON, JACK WESTLAND, and WALT HORAN declared.

They pointed out that the 1959 Washington Legislature had unanimously voted to place the constitutional amendment before the people.

In their joint statement, lawmakers said: "We feel that the resident Japanese aliens who contributed so much to the development of our State and of our country, and whose native-born American citizen sons fought so courageously in both the European and the Pacific theaters of World War II in spite of bigotry and persecution, were not only treated unfairly by this law which will be repealed by an affirmative vote, but they also earned the right to dignity and decency."

Washington's representatives in the Senate and the House said they "urge the repeal of this antiquated statute that can no longer be used against those against whom it was directed because of corrective national legislation on the subject."

Their statement concluded: "For fair play, for equality, for justice, as Americans and citizens of the State of Washington, join us in voting 'yes' on Senate Joint Resolution 4 on November 8."

AUTHORIZATIONS FOR SELECT COMMITTEE ON SMALL BUSINESS TO SUBMIT REPORTS SUBSEQUENT TO ADJOURNMENT

Mr. SPARKMAN. Mr. President, on behalf of the Senator from Minnesota [Mr. HUMPHREY], chairman of the Subcommittee on Retailing, Distribution, and Fair Trade Practices, I ask unanimous consent that the Select Committee on Small Business be authorized, during the adjournment of the 2d session of the 86th Congress, to file with the Secretary of the Senate a report entitled "Dual Distribution in the Automotive Tire Industry," and that the report be printed along with any individual, supplemental or minority views.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPARKMAN. Mr. President, on behalf of the Senator from Florida [Mr. SMATHERS], chairman of the Subcommittee on Government Procurement, I ask unanimous consent that the Select Committee on Small Business be authorized, during the adjournment of the 2d session of the 86th Congress, to file with the Secretary of the Senate a report entitled "Government Procurement, 1960," and that the report be printed along with any individual, supplemental, or minority views.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL EMPLOY THE PHYSICALLY HANDICAPPED WEEK—PAUL STRACHAN

Mr. SPARKMAN. Mr. President, yesterday the Post Office Department issued a stamp commemorating the National Employ the Physically Handicapped Week. I am delighted to see the Post Office Department take this action giving recognition to the program of employment of the physically handicapped, and the dedication of a week each year to that program. I take special pride in it because I was the author of the resolution that established the National Employ the Handicapped Week, and it has been continued in good fashion since.

At the time the resolution was agreed to, a man in Washington, who was himself physically handicapped, headed an organization that worked very hard for the physically handicapped. He was on the brink of death at one time, and it was believed that he would never be able to survive. However, he pulled through. Many Senators and Representatives will recall the man to whom I refer. He is Paul Strachan.

Paul has left Washington and is now living in Florida. I believe no one had more to do with initiating, working for, pushing through, and bringing to final fruition the movement to show some interest in the employment of physically handicapped persons than did Paul Strachan. I believe it is only fitting that on the occasion that this commemorative stamp is issued we should remember the very fine, efficient and effective work that was done by Paul Strachan. He deserves a great deal of credit for what has been accomplished over the years.

A great deal has been accomplished. Physically handicapped people who in former days would not have been thought of in connection with gainful employment have been employed by the thousands throughout the country. We owe a great deal to Paul Strachan. I wish to take this opportunity to pay tribute to him.

I thank the Senator from Connecticut.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. DODD. I yield.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, with the proviso that the Senator from Connecticut will not lose the floor.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENFORCEMENT OF THE BILATERAL AIR AGREEMENTS—STATEMENT BY SENATOR MAGNUSON

Mr. MAGNUSON. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement I sent today to the State Department and to the Civil Aeronautics Board.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MAGNUSON

I want to commend the Department of State and the CAB for taking what I understand to be a step recommended by the Senate Committee on Interstate and Foreign Commerce in its report on International Air Agreements in 1956. Our committee called on the executive branch to enforce the bilateral air agreements. It has taken a long time and the action is long overdue but we are glad to see that some action is finally being taken.

I have reference to the report in the Aviation Daily for August 29, 1960, which indicates that the United States has initiated capacity consultations with the Scandinavian governments. The purpose of these talks will be to review the operations of the Scandinavian airlines to and from the United States to see whether they conform to what is justified in the international air agreements.

Unless prompt, vigorous, and effective action is taken by our Government, our airlines will be driven from the skies.

We do not threaten the legitimate operations of foreign airlines. There is enough traffic for all—if each operates in conformity with its solemn international air agreements. But when a few operate in excess of what is authorized—they threaten the livelihood of our airmen and the continued efficiency of our national flag lines.

Since the Interstate and Foreign Commerce Committee urged that the State Department and the CAB enforce the agreements more than 4 years ago, we wish them success on this precedent-making occasion, when for the first time in our aviation history, our Government has initiated capacity negotiations.

[From Aviation Daily, Aug. 29, 1960]

LIMITS URGED ON SAS TRAFFIC TO UNITED STATES

American-flag carriers are urging that the U.S. delegation to the upcoming Scandinavian bilateral talks adopt specific limitations on traffic which SAS will be allowed to carry out of New York and Los Angeles. ATA President S. G. Tipton has told the CAB that U.S. negotiators should realize that "there is no possibility of getting the Scandinavians to agree to anything."

Tipton, who told the CAB that he spoke for all U.S. carriers except Ponagra, said, "No matter how politely and carefully, in the last analysis the Scandinavians are probably going to have to be told what changes they must make in their scheduling policy. Unless the U.S. team goes to Copenhagen in this frame of mind, the whole consultation will not only be futile but it will be seriously damaging to the posture of the United States in other capacity consultations which must inevitably follow in the near future."

This is the first indication that the SAS negotiations are the first of a series to be held with foreign governments on capacity restriction. Some clue as to who the other airlines are is contained in an ATA table of "Fifth freedom operators." "Bermuda-type" operators says ATA, are those that carry mostly their own nationals or U.S. citizens traveling to or from the foreign-flag carrier's own country.

ATA lists the transatlantic airlines, together with the percentage of legitimate Bermuda-type traffic carriers, as "TWA, 95 percent; PAA, 93 percent; Lufthansa, 76 percent; Irish, 73 percent; BOAC, 72 percent; Air France, 62 percent; Swissair, 50 percent; Alitalia, 47 percent; SAS, 47 percent; Sabena, 33 percent; KLM,, 31 percent." Commenting on these figures, ATA says "the SAS capacity is not primarily tailored to fit the traffic flow between the United States and the three Scandinavian countries."

The United States should require SAS to cut its on-season schedules in half and its off-season schedules by two-thirds, Tipton says. The recommended U.S. position assumes that SAS will retain 50 percent of the total air traffic between the United States and Scandinavia. "This is generous because it means that the U.S.-flag carrier will carry

substantially less than 50 percent—the balance going partially or wholly by other carriers," Tipton says.

In addition, the United States should give SAS credit for "bona fide stopovers as being equal to 10 percent of their third and fourth freedom traffic. This generous allowance results in a figure 24 percent greater than the number of SAS 72-hour stopovers." SAS should also be allowed 30 percent of its total traffic for intermediate and transiting fifth freedom passengers, says the ATA, "even though such traffic of the U.S.-flag airlines on comparable transatlantic sectors probably comprises less than 5 percent of their total."

This proposed SAS limitation, says Tipton, "is not intended to suggest that either 70 or 90 percent is the correct figure for worldwide application. There is no such magic figure. We only say that these figures are reasonable for the sectors under discussion here." Tipton also points out that "it is extremely important to recognize the marked seasonal peaks and valleys of the trans-Atlantic market, i.e., to have one set of figures and conclusions for the on season and another for the off season."

The importance of the United States-Scandinavian talks is emphasized by Tipton. "From the airline standpoint, this is the first capacity consultation undertaken by our Government; the degree to which it is successful is certain to influence the attitude of our Government officials toward the similar consultations which must be held in the near future with the other countries which are also major violators of the Bermuda capacity principles," he told CAB Chairman Whitney Gillilland last week.

"It must be recognized that the Scandinavians will use every instrument of propaganda and political resistance at their command. As in the case of Dutch propaganda, the Scandinavians are trying to strengthen their position by claiming publicly that the U.S.-flag airlines are seeking to drive them off the Atlantic. We trust that the officials of our Government at all levels are convinced that the opposite is true. Our carriers are not opposing the right of the Scandinavians to compete on equal terms for the traffic between the United States and Scandinavia.

"It it the Scandinavians and other fifth freedom operators with low wage costs who would be pleased to drive the high-wage cost U.S.-flag operators off the international air routes—or at least to bring about such a heavy burden of subsidy on the American taxpayers as to weaken U.S.-flag efforts. Still worse, their continued assertion of their demand to operate untrammeled by the Bermuda capacity provisions simply puts the U.S. Government in the position of knowingly violating its obligations to its other bilateral partners who have a primary entitlement, with the United States, to the traffic between the United States and these other countries."

FREEDOM COMMISSION

The Senate resumed the consideration of the bill (S. 1689) to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy for the training and development of leaders in a total political war.

Mr. DODD. Mr. President, on last Friday I called the attention of the Senate to the Freedom Commission bill which we are now considering, S. 1689. I expressed the hope then that, despite the brief time which remains to us, it would be possible to bring the measure to the floor for consideration.

I said I was confident that if the bill could be brought to a vote it would receive a great deal of support in the Senate. I joined my colleague the distinguished Senator from South Dakota [Mr. MUNDT] in the belief that once the Senate had acted on the measure the House would promptly take parallel action.

It is encouraging that the majority leader, who is confronted with so many competing demands from so many sides, has nevertheless decided to bring the Freedom Commission bill before the Senate today. His action in doing so is a tribute to his vision and to the bipartisan spirit which he has always manifested on basic issues of foreign policy.

The Freedom Commission bill seeks to rectify what many of us consider to be the gravest deficiency in our national defense.

There are some who say that if we wish to be secure we must be prepared to spend more for defense purposes—and I agree with this view.

There are others who say that if we are to react intelligently to the Communist menace we must improve our policy-planning machinery—and I agree with that view.

And there are still others who say that if we wish to compete with our Communist opponents for the minds of men we must improve our society and grant the full measure of liberty to all Americans—and I agree. I am in most hearty agreement with all these views.

However, Mr. President, we could do all of these things and still lose the cold war—if we fail to recognize the total nature of the cold war, if we continue to fight it as amateurs against professionals, if we fail to give the representatives of the free world the same kind of intensive, broad spectrum training which the Kremlin provides for its adherents in every part of the world where it is still seeking to obtain power.

When I addressed the Senate last Friday I referred to the successes the Communists have had in such countries as Cuba, Iraq, Japan, and Guinea, and I pointed out that in every case these successes could be traced back principally to two things.

First of all, the Communists have learned the art of total warfare. They have learned how to combine the political, the economic, the psychological, the organizational, and the cultural into a single, integrated strategy of conflict.

Second, the Communists maintain scores of specialized training establishments, where they teach the art of total political warfare to revolutionary recruits from all parts of the world.

So long as the Communists have this advantage in strategic understanding, in training, and in organization, the free world will be helpless against them.

We could make no more fatal mistake than to underestimate the power of a single Communist professional, schooled in the tactics and strategy of subversion.

Among the several thousand men whom Castro had with him in the mountains, no more than several score, probably less than a score, were Moscow-trained Communists. But that handful of trained men were able to subvert a popular revolution and to give the Kremlin effective control in Cuba today.

American missionaries returning from the Congo were agreed that the violence which broke out throughout that country immediately independence was declared was too well organized and too well synchronized to have been accidental or spontaneous. No precise arithmetical estimate may ever be available to us. However, I am convinced that in a country like the Congo, 50 trained agitators, distributed at key posts, would be quite capable of turning over the entire country to rape, mayhem, and chaos.

In his remarks before the Veterans of Foreign Wars in Detroit last February 22, Mr. Allen W. Dulles, Director of the Central Intelligence Agency, made some profound observations. I shall quote a few paragraphs:

> Maybe many people in this country will be taught a new lesson in communism because Khrushchev, right at our doorstep, is applying his methods and techniques. He is perverting a revolutionary movement which initially had the support of some estimable people but which now is in the throes of a Communist takeover. Cuba is not the only country, though it is the one nearest to us, where such a process is underway.
>
> Are we alerted fully to this kind of danger, and are we prepared to do all that we can to see that this development does not occur in a dozen or more countries elsewhere in the world?
>
> This, today, is the major element of the Soviet scheme for world domination. We must understand it. We must analyze it, and through a well coordinated program of education and of action, protect ourselves against it.

Mr. President, in my judgment, the free world does not lack dedication. Of this I am utterly convinced. Nevertheless, so long as we have not developed the science of counteraction to the Communist conspiracy, so long as we do not have cold war professionals who have received intensive training in this science, just so long shall we remain helpless to cope with situations like those which exist in Cuba and the Congo.

The purpose of the Freedom Academy, under the Freedom Commission, is to fill, or attempt to fill, this gap in our defenses. By bringing together under one roof the best brains we have in our country for this purpose we shall be creating the kind of research facilities which have made possible our nuclear development program and our space exploration. In those fields we brought together the best talent available and put them to work, we provided them with facilities and equipment with which to work, and they have been and are producing results that could never have been achieved without a concentration of brains and effort.

At the same time as they engaged in the basic task of research, the Freedom Academy people would impart their knowledge and understanding to Americans and to the nationals of other free countries who come to the Academy for special training.

Mr. President, think how important that can be.

We must never permit ourselves to become fatalists about Communist progress. If we ever become fatalists about Communist progress, we shall be lost. The Communists can be defeated. As I said on Friday, it is not enough to out-

gun them or outspend them. We must outthink them and outmaneuver them, and this can be done with brains. It can only be done on the intellectual level, and at no other level. In my judgment, only in that way will the struggle against communism ever be brought to a successful conclusion.

Day after day, in this body and in the House, men and women of high intention have been saying that this is a struggle for the hearts and minds of men. Indeed, it is. But while we have talked in these terms, what have we actually done to win the hearts and minds of men?

I do not suggest that the Freedom Academy would be a cure-all. I offer it as one suggestion, made by the distinguished Senator from South Dakota [Mr. MUNDT] and the distinguished Senator from Illinois [Mr. DOUGLAS]. They have proposed a plan which is positive, something which should be tried. If this is a battle for the hearts and minds of men, let us get into the battle on that level.

Let us start thinking, and let us get our best minds thinking. Let us place them in touch with each other. Let us provide them with a repository of the thinking of free people all over the world. Let them exchange ideas and expose themselves to the thinking of others. Let them analyze this knowledge, put the bits and pieces together, and come up with a carefully thought-out plan of counteraction to the Communist conspiracy.

Already many battles have been won against the Communists. I think we are inclined to overlook that fact. Let us remember the experience of the people in the labor unions of the Nation. The great trade unions and great labor unions have met the threat of communism head on in their own organizations. In instance after instance, labor has overcome communism. I cite that as a first-class example of the position that the battle against communism can be won. It has been done. It has been done by means of brains, organization, and dedication.

The leaders of the American labor movement did not outspend the Communists. Certainly they did not outgun them. But they out thought them and out fought them. Today, the influence of communism in the labor unions is so small as to amount to very little.

Mr. President, that is the kind of effort we are talking about. That is the kind of task in which we suggest a Freedom Institute can help so much.

Mr. MUNDT. Mr. President, will the Senator yield?

Mr. DODD. I am happy to yield to the distinguished Senator from South Dakota, who is a coauthor of the bill, and who has done so much to bring this matter before the Senate.

Mr. MUNDT. I thank the Senator from Connecticut. I asked him to yield so that I might substantiate what he has said in his words of commendation concerning what has been done in the American labor union movement to rid its ranks of any tinge of communism.

I point out that one of the early advocates of the Freedom Academy, about which we are now speaking, and one of the great crusaders for such legislation, is Mr. Arthur G. McDowell, a prominent labor union official in the United States, who, in addition to holding a responsible position in the trade union movement, has been made secretary of the Council Against Communist Aggression.

Arthur McDowell has been a real tower of strength in pushing the proposed legislation to the point where it is today, and where it appears we shall have an opportunity to vote upon it.

Even though there remain only a few days—or perhaps only 1 day—in which the House can take action, I am confident that as a result of the type of support that has been generated from all over the Nation, in insisting that this Congress do something effective in this area, it will be possible for the Congress to act expeditiously, so this measure can be enacted into law at this session of Congress.

Mr. DODD. I thank the Senator from South Dakota. I know of none who have done more or who are more intelligent in their attitude to the menace of communism than are our labor organizations. In my opinion, they have been far ahead of any other segment of our society on this score. The Senator from South Dakota is quite correct in what he says about Mr. McDowell; and I think we could easily name 100 or 200 other labor leaders who have been outstanding in this regard.

Mr. YOUNG of Ohio. Mr. President, will the Senator from Connecticut yield to me?

The PRESIDING OFFICER (Mr. BURDICK in the chair). Does the Senator from Connecticut yield to the Senator from Ohio?

Mr. DODD. I am glad to yield.

Mr. YOUNG of Ohio. Let me say to the distinguished Senator from Connecticut, who is my personal friend, that I am puzzled about two aspects of the bill.

Upon reading the report, I note that the bill proposes the creation of a Freedom Commission which would establish a Freedom Academy, which would have the responsibility for training Americans, and selecting foreign students and training them, also, to better understand the nature of the international Communist conspiracy and to develop effective methods of combating it.

And the bill includes various provisions in regard to how the Commission and the Academy would function.

In the report it is stated that the Department of Justice is wholly in accord with the view that it is most desirable to develop throughout the world greater awareness of the operations of Communism and the methods of combating it.

But there are two aspects of this proposal that are puzzling to me. First I shall state them, and then I shall ask the Senator from Connecticut to comment on them.

First of all, I wonder how it is that this proposal was not handled by the Senate Foreign Relations Committee, instead of by the Judiciary Committee.

In addition, I note that the report states that the Department of Justice is unable to recommend enactment of this bill. In short, to be blunt about the matter, it would seem that the Department of Justice is opposed to the bill.

So I should like to have the Senator state his views on both of those points.

Mr. DODD. Let me take them up one at a time, if I may.

Mr. YOUNG of Ohio. Certainly.

Mr. DODD. As to the jurisdictional question, I do not know the complete answer. I understand that the Parliamentarian—or someone other than Senators, at any rate—handles the reference of measures to the Senate committees. The Freedom Commission bill was referred to the Judiciary Committee in April 1959.

We held hearings for 3 days, and heard approximately 20 or 30 witnesses—rather distinguished witnesses, I think it fair to say. All of them favored the proposal. No one appeared in opposition to it.

So with respect to the jurisdictional question, I can only say that the bill was referred to the Judiciary Committee—and properly so, I suppose, because this subject concerns the Judiciary Committee. As a matter of fact, I think it will concern many other Senate committees. Certainly, it will concern the Foreign Relations Committee. I suppose it will concern the Committee on Labor and Public Welfare, and also the Appropriations Committee, and perhaps others. Any undertaking of this kind will inevitably involve several of our committees, and I think it is good that this is so.

Originally, it was proposed that a joint committee be established, and that it, in turn, supervise the establishment and functioning of the proposed Academy.

Mr. MAGNUSON. Mr. President, will the Senator from Connecticut yield?

Mr. DODD. I yield.

Mr. MAGNUSON. Just now I was discussing the bill with the Senator from Arkansas [Mr. FULBRIGHT]. Let me ask whether printed copies of the hearings are available.

Mr. DODD. Yes. I believe they have been distributed.

Mr. MAGNUSON. There is none on our desks.

Mr. DODD. I am afraid I do not know what the machinery for their distribution is.

Mr. President, in my answer to the question asked by the distinguished Senator from Ohio in regard to the matter of jurisdiction, I mentioned the Foreign Relations Committee and also the Committee on Labor and Public Welfare. Obviously, I should also mention the Committee on Government Operations. My understanding is that the Foreign Relations Committee probably would also have a great deal to say about the operations of the Commission and the Academy, once they became operational. I assume, also, that the Foreign Relations Committee would wish to make recommendations; and I assume that after the operations got underway, it would make suggestions for their improvement.

That is about all I can say in regard to the question of jurisdiction.

I am not an expert on the subject of committee jurisdiction, and I do not

know the precise answer. But I do know that this proposal seems to be a good one. I have no personal pride in the measure, for, unfortunately, I am not either the author or a coauthor of this proposal. It was authored by others. It was brought to my attention only because of my membership of the committee. I believe the Senate rules were not violated when the measure was referred for consideration to the Judiciary Committee.

Mr. YOUNG of Ohio. As I read the bill and the report, I judged that the proposal deals completely and extensively with the foreign relations of our country. So I wondered why the measure was not handled by the Foreign Relations Committee. I thank the Senator for answering me on that point. Evidently we are all somewhat puzzled that it should be handled by other committees.

Mr. DODD. I do not agree it deals exclusively with matters within the jurisdiction of that committee. I think we have much to do to educate our people on this issue, and in a sense, I suppose, all these matters are foreign relations matters. So much of what we do is so. We do not live by ourselves at all.

Mr. FULBRIGHT. If the Senator will yield, I would like to say for the RECORD that I believe the bill should have gone to the Foreign Relations Committee. It is primarily, I believe, intended to affect our foreign relations. I think the Department of State should be permitted to testify upon it.

Would the Senator from Connecticut tell me whether or not the Department of State appeared in connection with this bill and expressed its support of it?

Mr. DODD. I do not see any record of the Department of State as such. I do recall the names that appear in the list of the contents in the hearings are those of men who are well informed on the subject. But I do not see anyone sppecifically representing the State Department listed.

Mr. FULBRIGHT. It seems to me, under the Standing Rules of the Senate, which provide, among other things, that relations of the United States with foreign nations generally are within the jurisdiction of the Foreign Relations Committee, that this bill is primarily in that field.

I grant there are many bills which affect various establishments of our activities and are not exclusively in one or another field; but I think, on the general principles which apply to this question, that the one which predominates has jurisdiction, and I believe this bill should go to the Foreign Relations Committee, where I certainly would propose that the Department of State and the Department of Justice would both be called as the experts in the executive department to testify upon the merits of this measure.

My own attention was brought to this bill only in the last day or two. It may be a very good bill, but I think my duty as chairman of that committee impels me to suggest to the Senate that the bill be sent to that committee for its consideration.

Mr. DODD. I am sorry the Senator feels that way. I understand his concern. I wish this question had been raised a year ago. It would have saved us a great deal of time. We heard 20 or 30 witnesses. I do not think it was a secret matter on which the Judiciary Committee was conducting the hearings. I do not know of anyone on the committee who wanted to have it that way. I do not think there is any proprietary attitude in the committee itself on the subject.

Because the bill was referred to our committee, we did the best we could. I do not say we did all we could. It seems to me the public notice of the fact that the subject was up for consideration gave ample opportunity, insofar as any committee can give it, for others to appear and to raise the question of jurisdiction, if they felt it should be raised.

I am not one who is a stickler for technicalities, either here or in other places. If this is a good bill, if this is something this country needs, if it ought to be done, if it is a wise proposal, or seems to be such to the Members of the Senate, if it can contribute to a better understanding of the struggle we are in, of what great moment is it that the bill was sent to the Judiciary Committee instead of to the Committee on Labor and Public Welfare, or the Committee on Government Operations, or the Committee on Foreign Relations?

Is not the really important thing that we should get on with the business and get it started and get it underway? Then several other great committees of the Senate can bring all their interest to bear upon the program. They can keep an eye on it and they can have much to say about what is done. That seems to me to be the most important point. I hope at this time we shall not be faced with a delay, which will necessarily result from referring this bill to another great committee of the Senate.

Mr. YOUNG of Ohio. Mr. President, will the Senator yield?

Mr. DODD. I yield.

Mr. YOUNG of Ohio. I hope my distinguished colleague and friend does not think I am resorting to a technicality.

Mr. DODD. Oh, no.

Mr. YOUNG of Ohio. But the fact is that I have been trying to obtain a copy of the hearings. I have a copy of the bill. I have a copy of the report. However, I have not as yet, after efforts late this afternoon and early evening, secured a copy of the hearings.

If the Senator from Connecticut has a copy of the hearings, may I ask whether a representative from the Department of Justice testified before the committee as I observe from the report? This statement carries great weight with me, I may say to the Senator from Connecticut. It states:

> Accordingly, the Department of Justice is unable to recommend enactment of this bill.

I construe that statement to mean that, in reality, the Department of Justice is opposed to the enactment of the bill. May I ask the Senator's views on that subject?

Mr. DODD. Yes; I shall be happy to reply. The committee wrote the Department of Justice, asking if it would like to present its views. The reply we got was in the form of a letter from the Assistant Attorney General, Mr. Walsh, and that letter is contained in the hearings.

I am very distressed that the Senator does not have a copy of the hearings. I do not want to plead ignorance all the time, but I am not familiar enough with the machinery here to understand why he does not have a copy of the hearings. I assumed a copy of the bill, report, and hearings would be on every Senator's desk. I should be glad to give the Senator the copy of the hearings which I have with me for his attention and study right now.

The Department of Justice wrote a letter, over the signature of the Deputy Attorney General, making the point, as I understand the letter, that the services to be provided by the Freedom Commission and Freedom Academy were already available. That seems to be the principal strongpoint of the letter to the committee—namely, we already have it, and therefore we do not need a duplicate facility.

The best answer I can give to that is to quote very briefly from the testimony of Mr. C. D. Jackson, whose name is certainly known to all of us. He was a White House adviser on intelligence matters. He is thoroughly experienced in the whole business of psychological warfare and our efforts to overcome and to successfully resist the menace of communism. I quote from his testimony before the committee.

> Now, Mr. Chairman, if I may repeat and paraphrase, I am sure that there is a general impression that adequate instruction places exist where this art or this profession can be studied.

I will say to my friend from Ohio that, of course, he was referring to the bill under consideration. Mr. C. D. Jackson went on:

> Actually, sir, there is no existing place where the whole problem is pulled together and taught in concentrated form and not in bits and in pieces. That is why I think this is a good idea.

He added another sentence:

> It is only by uniting the study and teaching of these elements in one place and one time that the challenge can be fully comprehended and adequate responses generated.

That is the best answer, I think, to those who contend that the facilities are already available. I think there are several places where one can learn some phase of the matter, but I do not know of a place where it can be learned whole. Mr. Jackson is an expert, and he ought to know better than I.

As the Senator from Ohio knows, the committee in its report made a statement, after hearing all of the witnesses and reviewing the matter not summarily or hastily:

> No concentrated, systematic effort is being made to develop an integrated, operational science for our side which will meet the entire Soviet attack.

The report goes on to explain at greater length.

I think it is sensible to say that we do not have a place where all this information is gathered together and where this kind of service, this kind of facility, can be made available, not only to our own people in Government and in private life, but also to nationals of free countries who wish to learn how to resist communism more effectively.

That is my answer to the question raised by the Deputy Attorney General.

I wish to conclude very briefly. I think the bill is eminently sensible. That is the first point I wish to make.

For many years all of us have heard that people have been saying: "We will never beat the Russians by scolding them, by arguing with them, and by calling them names"—which is all true—"we have to beat them on the intellectual plane."

As they generally put it, "We have to win this fight for the minds of men and for the hearts of men."

We have been saying all this—but this is the first time I have seen any concrete suggestion for implementing it. That is all this is. It is an effort to start using our intellects.

The second point I wish to make is that this program is urgent. Last week I tried to spell out why I thought it was urgent. I pointed out that our opponents in this struggle have been working at it for 40 years. They have all kinds of institutes throughout their empire. We have not one of this kind.

The third point is somewhat related to the second point. In my judgment, the time is desperately short. We have very little time.

For these three reasons it seems to me the bill merits favorable consideration by the Senate.

I can think of no more edifying way in which the Senate might conclude its affairs this year than by unanimous bipartisan action to establish the Freedom Academy, with both sides saying, "Let us try this, anyway. Let us get at the business of developing a scientific strategy to win this fight."

This is not a Republican measure. It is not a Democratic measure. It is a bipartisan measure. Those who urge it upon the Senate have never said—and I certainly have never said—it is the best or only plan which can be suggested. It is a plan—and one which ought to be tried if we are ever to win this fight.

I hope the bill will receive the favorable consideration of the Senate. If it does, I think there is still time to take it to our colleagues in the other body. If they will take the time to study it and to look at it, they, too, will agree that this ought to be done.

This plan should be tried. What can be lost by trying? What great setback will this Nation suffer if it sets up the Commission, and if the Commissioners try to set up, and do set up, an institute or academy in which communism and the counteraction to communism can be studied?

The dollars would be minuscule compared to what we are spending to outbuy and outgun the Communists. Certainly there should not be any great feeling of regret about it.

All I plead for is a chance, for once, to do something positive, something direct, something affirmative, something to win the minds of men that we talk about so much, something to win the hearts of men that we talk about so much.

I hope the bill will be favorably considered.

Mr. YOUNG of Ohio. Mr. President, will the Senator yield for a further question?

Mr. DODD. I yield.

Mr. YOUNG of Ohio. Mr. President, in regard to the Senator's statement that the bill will be sent to the House if it passes the Senate, two thoughts occur to me, about which I wish to ask my distinguished friend questions.

The statement is made, "Accordingly, the Department of Justice is unable to recommend enactment of this bill." That, to me, implies the Department of Justice of this administration is in reality opposed to the passage of the bill.

We are now in the closing moments of this session, which was supposed to be a "clean-up and get-out" session of Congress. We are, in a way, hoping that this is the night before the final night of this session. We are marking time, waiting, and hoping that a conference report will come in on the supplemental appropriation bill.

What basis is there for a belief, even if the bill were to pass the Senate and were to be passed in the House, that the President would sign it? The President has, in fact, vetoed so many bills that sometimes one thinks he takes a fountain pen with him on the golf course and vetoes bills between rounds of golf. What assurance is there to believe that the President would not veto this bill, particularly in view of the fact that the bill provides for the appointment of six members of a commission?

I was somewhat surprised to note, the provisions of the bill. I must say in all frankness to the Senator from Connecticut that I had not read the bill until late today. I thought this might be an honorary commission, with patriotic Americans contributing a large part of their time. Lo and behold, in reading the bill I learned the members of the Commission will be appointed for 6 years, for 4 years, and for 2 years, respectively, and after that for 6-year terms. Each member of the Commission is to receive $20,000 per annum.

To a fellow like me, that seems like a great deal of money. In addition, the bill provides for expenditures by the Commission.

I notice the chairman is to receive $20,500 per annum, and the other members are to receive $20,000 per annum.

There is an academy to be constructed and located.

Some other people would be employed; students, of course, would be employed and paid; and some other personnel are provided. I shall not take the time to cover compensation fully, but I noticed that $50 a day is set forth as compensation. Those points lead me to believe that probably the bill, particularly in view of the opposition of the Department of Justice and the expenditures involved, would face a veto by the President, even if we should pass it tonight and if the House of Representatives should also pass it in the closing hours of the session without amendment.

What basis is there for a contrary belief?

Mr. DODD. I am happy to try to respond. First, I do not know how anyone can ever say with certainty that the House will do this or do that. When I said that I thought the House would pass the measure, I made that statement because I believe in the measure. I think it would be good for the country. Because I believe that it would be good for the country, I must therefore believe that the House would pass it, if it has an opportunity to do so, and if it understands the measure.

With respect to a possible Presidential veto, I assure my friend from Ohio that I am the least knowing of men in this body about such matters. I do not know what the President's mind is in respect to this measure; but if I were to make a guess, my guess would be that he would probably sign the measure.

The Senator may wish to know why I would make such a guess. Largely because of Mr. C. D. Jackson, who has been the President's close adviser. For 2 years he was special assistant to the President, and advised him on a subject very close to this proposal. He was a special assistant on cold war planning.

I do not know what the President would do. Anyway, I might add, we ought not to be concerned about vetoes.

I think this is a proper matter for consideration when we have legislation under discussion. However, when we are considering something that we believe to be right and good for the country, it seems to me it is our duty to pass the bill. We do not know the President's attitude, since he has not expressed it, nor has he expressed opposition. If the President sees fit to veto it, such action is within his power and proper jurisdiction. But I think it is as reasonable to assume that he will sign the bill as it is to assume that he will veto the measure.

With respect to the subject of salaries and expenses, let me say to my good friend, whom I respect and like so much, that I do not care if the Senator wishes to change the salary to $10,000 or to $15,000, or to raise it to $30,000. In the battle in which we are engaged, in which many billions of dollars are being spent every year, it seems to me to be a small question whether members of the Commission should be paid $20,000 or $25,000. I do not believe that that is an important point.

If the men chosen to serve on the Commission are qualified and can do the work, I should like to see them adequately reimbursed. If the Senator believes that $20,000 is too much compensation for a member of this important Commission, then I certainly shall not rise and say that it is outrageous. Twenty thousand dollars is a great deal of money to me, too.

Mr. YOUNG of Ohio. Mr. President, the Senator from Connecticut knows that I have on a number of occasions voted to override President Eisenhower's vetoes of needed legislation which we

had passed. I would not hesitate to do so again. But I raise that question because of the expense involved, and principally because of the expressed opposition of the Department of Justice in this administration.

Mr. DODD. I understand my friend's attitude. I do not want him to think I am being harsh, because I do not intend to be. I have too much respect for him for that. But I wonder if, on reflection, the Senator from Ohio would not agree with me that $20,000 is not a great deal of money today, when we ask a man to devote full time to such an important job as this would be.

I think we would be accomplishing the job at very low cost if we could get good people. I do not think we would ever be able adequately to pay qualified people for service on such a commission under our system. We should obtain people who have a sense of dedication and devotion and who would be willing to work for $20,000 a year. I state my judgment. Even if we should pay the salaries set forth in the bill I do not think we would be paying them anywhere near what they would be worth.

Therefore I do not believe the money point is a serious block to favorable consideration of this proposal.

I would put the question of expenses in the same category. These questions seem to be small when compared with what we are attempting to do in so many areas in which the likelihood of success is not nearly so great as it is in this area.

Mr. MUNDT. Mr. President, I would like to congratulate the distinguished Senator from Connecticut on a very profound and persuasive address and argument on a vitally important bill. I think every Senator recognizes that what he has been discussing, and what the proposed Freedom Commission would attack, is the crux of the problem in the free world today. What are we as free men going to be able to do effectively, short of war, to preserve peace and to preserve freedom?

So we are dealing tonight with a subject of great significance. We have an opportunity, at long last—late in the session to be sure, but not too late—for this Congress to distinguish itself by taking a great forward step in the successful waging of the cold war.

I am happy that the majority leader has vindicated the confidence which the distinguished Senator from Connecticut and I expressed to him last Friday when we said that we were certain that he would bring the bill up for a vote in this session of the Congress. He has done so. Tonight we shall vote. Tonight the Senate will have an opportunity to express itself, as it should, on this vitally important subject.

The great Senate Committee on the Judiciary, in making its report on the subject, said on page 13 of the report:

> The committee considers this bill to be one of the most important ever introduced in the Congress.

Mr. President, that is a pretty superlative phrase, a very strong phrase. Congress has been meeting for a long, long while in the history of this country. But Congress has never met under the threat of a more urgent and virulent danger than it meets tonight on the verge of its adjournment, in an era when communism is running rampant in so many areas of the world. I do not really believe that the argument is whether the members of the Commission should receive $20,000 or $25,000 or $35,000, or whether the bill should be considered by this committee or that committee or some other committee.

One of the criticisms the Communists wage against free men is that democracy does not seem to be able to operate fast enough to meet a challenge on time. I hope the Senate tonight will not do anything to verify that kind of scurrilous attack upon the machinery of democracy.

I serve as the ranking Republican member of a committee headed by the distinguished Senator from Washington [Mr. JACKSON], which is studying the machinery of the cold war. A great many witnesses have appeared before us. We have a very talented staff. We have been trying to determine what recommendation should be made and what changes should be made so that the administrative agencies of the Government in this cold war, can act more expeditiously, efficiently, and effectively to meet the challenges.

It is a proper exercise for Congress to undertake. However, if we bog down at this late hour by demonstrating that we lack, as a legislative body, the cold war machinery to act promptly to meet the challenge, if we thwart ourselves by having the bill shunted aside to another committee, to die a still death, while Congress adjourns, we will be guilty of the kind of inactivity in the legislature that we have created a committee to study and to criticize and to correct in the executive branch of the Government. We would in fact be exercising the errors that we established a committee to correct, if they exist, in the executive department.

I was greatly impressed by the closing comments of the distinguished Senator from Connecticut [Mr. DODD], when he made three irrefutable points.

First is this legislation sensible? Certainly it is sensible to try to establish, through this form of commission, the machinery for properly training in the arts and skills and sciences of the cold war the people who represent America abroad. Certainly it is sensible to spend this pittance, when $40 billion, half of the national budget, is being devoted to trying to do something effective to protect ourselves against communism.

Certainly it is sensible to try a new idea. I hope that people are not afraid of new ideas. I believe that on occasion we must try something different, and I think we have reached that time. We have been spending money. We have been building armaments. We have been working in the area of mutual security, national defense, and missilery, and we are continuing to do all that. However, we have not been getting our quota of manpower and training and knowledge and know-how in order to fight the cold war effectively, short of a shooting war.

It comes as no surprise to me that the bill has attracted support from every section of our American citizens. The Senator from Connecticut has correctly said that it is neither a Republican nor a Democratic bill; it is an American bill.

Its sponsors are from both parties. It is a bill which is not the creature of any segment of our economy. I have been interested by the list of witnesses who appeared before the committee. There is a long list of witnesses. The witnesses represent labor, industry, business, and the professions. They represent a great cross section of support for legislation of this type.

David Sarnoff, who has done as much as any other American to help activate machinery in the cold war, is one of the eloquent witnesses in support of the proposed legislation, and his testimony appears at page 39 of the hearings.

Andrew J. Biemiller, former Member of Congress from Wisconsin, with whom I served in the House of Representatives, speaks in favor of the bill at page 56. He speaks as an acknowledged, authorized representative of the AFL–CIO, whose endorsement he is authorized to present as a part of his testimony, at page 56.

Then there is the testimony of Mr. Jackson. He has already been alluded to, as has the testimony of Arthur G. McDowell, another prominent leader of organized labor.

So it goes, in and out of Congress.

I have in my hand an article written by David Sarnoff entitled "Turn the Cold War Tide in America's Favor." We all want to do that. We want to do it whether we have a commission which pays $20,000 to its members, or $25,000, or any other sum. We want to turn the tide of the cold war in America's favor, to avert a hot war.

It was printed as a feature article in Life magazine, which supported such a proposal long before this bill was introduced, and which has been advocating the establishment of a West Point of the Cold War, as it refers to a commission or academy of this type.

For the information of the Senate, I ask unanimous consent that the article may be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TURN THE COLD WAR TIDE IN AMERICA'S FAVOR

(By David Sarnoff)

The unfolding American debate on national purpose carries the disquieting implication that our traditional purposes, though they served the Nation well in the past, have somehow been outmoded if not wholly invalidated. This I do not believe to be true. I am convinced, on the contrary, that these time-tested purposes, rooted in the Nation's whole history, are more compelling than ever before. More, they are indispensable in enabling the United States to meet the paramount challenge of this epoch: the struggle between communism and freedom. If revitalized, redefined for our times and translated into great decisions, they could turn the tide of conflict in our favor.

The need now, as I see it, is not for tailor-made new purposes but for a renewed understanding and dedication to old purposes—raised to a dimension adequate for this fateful period. The need is for firm and inspiring positions commensurate with the immense perils facing our country and the human race.

The Communists, whatever their tactics in a given period, have never deviated from their purpose. It has been openly proclaimed from Lenin's day down to Khrushchev's and Mao Tse-tung's. It is, in the words of the official Moscow magazine Kommunist, "implacable struggle" looking to "the inevitable end of capitalism and the total triumph of communism." Such a challenge can be met and frustrated only with a purpose of equal scope.

MOUNT A POLITICAL COUNTERSTRATEGY AS MASSIVE AS THE ENEMY'S

Five years ago I submitted a memorandum to the White House sketching a program for a political offensive against world communism. "For Moscow," it said, "the real alternative to a nuclear showdown is not peace but political-psychological warfare of a magnitude to weaken, demoralize, chip away and ultimately take over what remains of the free world." The memorandum therefore urged that we renounce all delusions of easy solutions and compromises; that instead we mount a political counterstrategy as massive, as intensive, and as clear about its ultimate goals as the strategy of the enemy himself.

Events in the intervening years and intensified Communist pressures today have, if anything, fortified this point of view. The essence of my proposed program, for which I claim no originality, was—and still is—an unequivocal decision to fight the so-called cold war with a will and on a scale for complete victory.

The decision would have to be communicated to the entire world as boldly and energetically as the Communists communicate their intentions. Our message to humankind must be that America has decided, irrevocably, to win the cold war and thereby to cancel out the destructive power of Soviet-based communism. A national commitment of this scope, I submit, would be consistent with American instincts and experience, a restatement of historic purposes in contemporary terms.

The nature of those purposes has been sufficiently defined by the editors in the introductory article to this series. It is explicit in basic American documents, beginning with the Declaration of Independence, of which Thomas Jefferson could say, "We are acting for all mankind."

It is implicit in the widespread assertion—presented by some as an accusation—that our foreign policies have been "idealistic." Through the generations Americans have always thought of themselves as being in the vanguard of freedom. They cherished the image of their country as the citadel of democracy and morality and a living defiance to depotism anywhere.

The Rockefeller Bros. Fund report on U.S. foreign policy—prepared by a panel of which I was a member and published last year—put it this way: "The United States at its best has always seen its national life as an experiment in liberty * * * [Americans] have known that the hopes of the world were, in some measure, bound up with their success. * * * Whenever [the United States] has wielded effective power in the world, its ideals and its moral convictions have played a vital part in its decisions. Whenever, on the contrary, the United States has tried to act without moral conviction, or in ways that went counter to its basic beliefs it has found itself inhibited and has ultimately had to rechart its course. * * * Ideas and ideals are thus to the United States an essential element of reality."

WHY THE SHRINKING FROM LOFTY GOALS IN FAVOR OF THE SAFE, THE COMPROMISING?

This is why expediency and appeasement, solutions that condemn other peoples to enslavement, failure to react to international crimes, violate the deepest instincts of the American people. Why is there such a pervasive skepticism about our historic purposes and such a widespread search for substitutes? Why the shrinking from lofty goals for all mankind in favor of the safe, the compromising, or mere survival?

The easy answer—that it is all due to the advent of terrible new weapons—will hardly do. The calendar refutes it: The retreat began before those weapons were forged and grew more panicky during the time when America had a monopoly on the atom bomb. It was precisely in the years before Soviet Russia produced the bomb that communism scored its greatest gains, and it did so almost always by the default of the free world. The Soviet advantages were not military and technological but political and psychological.

The true answer, as I see it, is related to the ever-rising costs of idealism in terms of the sacrifices and the hazards involved. The trouble is not that the older purposes have become irrelevant but that they have become too relevant. I mean that the time when America could serve passively as an example or inspiration to other nations has run out. Today, professions of principle have serious consequences: they must be implemented in policy and action. To say it in slang, the time has come to put up or shut up.

As far as the contest with communism is concerned we had "shut up," quite literally. We had curbed our tongues for fear of offending the delicate sensibilities of those who daily offend us. Few democratic leaders dare to speak as uninhibitedly about the coming doom of the Communist empire as Khrushchev and Mao Tse-tung regularly speak about our impending doom. Our opponents defy, denounce and challenge, while we plead and propitiate. We have left the vocabularly of confidence and victory to the other side, contenting ourselves with such solacing and temporizing words as accommodations, modus vivendi, relaxed tensions and coexistence.

This semantic timidity, of course, is merely a symptom and a minor one. The all-encompassing malady is a loss of nerve, marked by depleted self-esteem and purpose. It has impelled us, whenever we have been faced with a choice of interpretations on some aspect of the Communist affliction, to choose the more agreeable one, the one more conducive to complacency and less likely to tax our courage. With rare exceptions the choice has turned out to be the wrong and often the disastrous one, regardless of the political parties in power in this country and in the free world.

Thus in the 1930's we eagerly found assurance in Stalin's talk about "socialism in one country." Later we relaxed in the cozy conviction that the Chinese Communists were simply "agrarian reformers." We prefer to believe in the "evolution" of communism, though there has not been the slightest revision of ultimate Communist goals. We seek a comforting answer to our prayers in tensions between Moscow and Peking, though these are strictly within the framework of their unshakable alliance against the West, no more significant than Anglo-American tension within our alliance.

A familiar gambit is to list communism as just one item in a long inventory of problems. But if the Sino-Soviet bloc wins world dominion, the other problems will cease to matter: they will have been solved for the free world in about the way that death solves all bodily ills.

In the debate on National Purpose we find at least one area of virtually unanimous agreement. It is that sheer survival, in the elementary physical sense, is not enough. A nation which thinks and acts exclusively for self-preservation cannot, in the present-day world preserve itself. The posture, even if it were desired and desirable, has been turned into an anachronism by the surge of science and technology. The world has become too small for physical, economic or political isolationism. The polarization of forces dueling for supremacy has gone too far to permit the survival of an island of humanism in a sea of dehumanized totalitarianism. No single nation can survive unless the civilization of which it is part survives.

Our civilization, too, cannot remain isolated, confined to a delimited segment of the earth and indifferent to the humanity beyond those limits. The world cannot be frozen in its present patterns. In this period of great flux and of intermeshed revolutions, static, and passive arrangements are doomed to disruption. If the area of freedom is not expanded, then assuredly it will continue to contract.

Despite this, "survival of the free world"—side by side with an unfree world—has been and remains the maximum goal of Western diplomacy. Not the weakening and eventual defeat of communism but a lasting accommodation seems to mark the farthest reach of hope. It is scarcely a vision to inspire confidence or zeal, and in any case it is utterly utopian, because two parties are needed to make an accommodation.

The best analysis of Communist strategy that I know is in a recent book called "Protracted Conflict," by Dr. Robert Strausz-Hupé of the University of Pennsylvania and three associates. The book's title is a phrase used by Mao Tse-tung. The Communist plan, say the authors, is protracted in time and space and in the limitless variety of its techniques and weapons, and the weapons can even include "the final and total knockout punch." Short of surrender, the authors see for our world no alternative but a many-sided, continuous, long-range counteroffensive.

Such a policy would reject all illusions of an enduring truce, let alone a negotiated division of the globe. The historic contest will be with us for a long, long time. We may delay, maneuver, bargain and compromise, but it will be so much flailing of water unless all such moves become for us—as they have always been for the enemy—calculated holding actions geared to long-range objectives, means not ends, tactics not strategy.

RISKS AND SACRIFICES CANNOT BE EVADED BY PIECEMEAL SURRENDERS

Whatever we do or fail to do in the years and decades ahead, we shall be forced to take great risks and make great sacrifices. These cannot be evaded even by piecemeal surrenders. In fact, if Americans and other free peoples are to understand and accept these costs and exertions, there must be some rational relation between the magnitude of the goal and the magnitude of the burdens it imposes.

This means that in the conflict with communism we must become the dynamic challenger rather than remain the inert target of challenge. Only then can freedom regain the initiative. Only then will we have a global goal to match that of communism, and the incentive to apply the full weight of our brains, energies and resources to its achievement. The great decision, once made and communicated to all concerned, will dictate its appropriate program of policy and action. The strategy will shape the necessary tactics.

Even the things we are now doing and must continue to do will become more relevant and more effective when geared to a conscious ultimate goal. Military and economic aid to our allies, to underdeveloped areas and to neutral nations will cease to be hit-or-miss improvisations.

They will be integral elements of an affirmative program. Propaganda, cultural exchanges, diplomatic moves, summit meetings will all acquire for us—as they always have for the Communists—dimensions of purpose beyond their limited immediate effects.

Before the Soviet Union attained its present technological stature, America's paramount problem appeared to be the struggle for men's minds. Today it is dangerous to concentrate on any one facet of the conflict. I think of the image in terms of a table with four legs, military, political, economic, and psychological. The significance of the last three is self-evident, since they relate to activities short of all-out war. But the military leg must not be underrated.

The present approximate balance of terror presents a false appearance of stability. But it may be upset. And if we relax in this area it will be upset. The enemy is constantly probing out vitality and resolution. Any one of these probes may lead to the brink of war and possibly to war itself. No matter how often we repeat that war is unthinkable it remains possible. War may be touched off by accident, or it may come because the Communist high command considers itself ready to deliver the "final and total knockout punch." The maintenance of adequate military power, both offensive and defensive, is therefore of paramount importance. Whether it is ever used or not, moreover, it is the indispensable shield for all other types of action in the protracted conflict.

USE AGAINST THE ENEMY SOME OF THE WEAPONS USED AGAINST US

A strategy for victory in the cold war would, however, begin with a complete reappraisal of present efforts. It would aim to seize the initiative in every possible arena of competition. Not merely the expansion of present projects and the addition of new ones would be considered but how to give each of them a clear role within the framework of the overall objective.

It would not reject courses of action simply because they are unconventional. We would no longer disdain to use against the enemy some of the weapons used against us. Having finally acknowledged that the struggle is decisive and therefore as real as a "real" war, we would not hesitate to fight fire with fire.

American ingenuity would be called upon to evolve devices and techniques to exploit weaknesses and vulnerabilities in the Communist world, to keep the enemy constantly off balance, to impose upon him problems and crises instead of always waiting to counteract crises of his making. By all the instruments of communication and through the loudspeakers of events, we would aim to saturate the Communist world with reminders that we intend to keep alive the memory of human dignity, the hatred of injustice, the hope of liberation and the courage needed for resistance.

Debates in the United Nations and at diplomatic conferences would be made sounding boards for our views as well as for theirs. No allusion to "colonialism" would be permitted to pass without our throwing the limelight on Red imperialism and on the principles of self-determination.

Thus the Communist world, rather than ours, would tend increasingly to become the principal battlefield of ideological and political conflict. The immunity their world has so long enjoyed would be shattered.

A bill to establish a Freedom Academy for training cold-war specialists—what a Life editorial called a political West Point—is before Congress. Whatever the merits or demerits of this particular bill, it is in line with a commitment to victory. Various proposals have been made for setting up a liberation force, a volunteer formation drawn largely from among refugees from captive nations and ready to serve in emergencies. That, too, is in line with a strategy for victory. Official and private agencies of other kinds would be generated by focused strategic thinking in offensive rather than defensive terms. And a new department of Cabinet rank could and should be established to plan and coordinate all cold-war activities.

WE WOULD HAVE TO EMBRACE THE GRIM BUT INSPIRING REALITIES OF OUR EPOCH

Certainly this new approach would call for substantial sacrifices in material terms. But the notion that it would require a deep cut in American living standards underestimates the wealth and productive genius of our country. The more demanding sacrifices, indeed, would be in the psychological and moral domains. Our people, in short, would have to renounce complacency, euphoria, and illusion; they would have to embrace the grim but inspiring realities of our epoch.

The ultimate rise of a world order under law is dictated by the logic of devastating weaponry, the conquest of space, and modern communications. What remains to be settled is whether it will be an order rooted in freedom or in universal tyranny.

I do not doubt that we have what it takes to assure that it will be an order that we may cherish. The Western concepts of open societies, of liberty under law, of government by the consent of the governed, of the supremacy of the individual rather than the State—these are far closer to the natural aspirations of man than the anthill concepts of communism. In any equal propaganda contest, what these Western concepts have brought in human well-being will become obvious and irresistible to the majority of mankind.

In my 1955 memorandum to the White House I wrote: "Once that decision is made, some of the means for implementing it will become self-evident; others will be explored and developed under the impetus of a clear-cut goal. Agreement on the problem must come before agreement on the solution." But Abraham Lincoln said it better a century ago: "Determine that the thing can and shall be done, and then we shall find the way."

Mr. MUNDT. Mr. President, the proposed legislation would fill the most glaring gap in our whole cold war technique, and would provide a basis and the machinery and the manpower to train those who represent America abroad in the business that they are sent to do, effectively to promote America's interest in the cold war.

We would not send a soldier to fight a battle ill prepared and untrained, without any concept of what his job was. Still, we send all over the world to represent us people from the bureaus and agencies of various institutions of the Government who are skilled in their particular pursuits, but who have never had an opportunity to be trained in the machinations of communism, and what it actually means, and what they can expect as they find Communist operatives all over these areas of the world.

We wonder why, in spite of our expenditures and our sacrifices, victories come all too infrequently for our side in the cold war.

The proposed legislation has excited the imagination and attracted the support of many writers and editorialists and commentators. I hold in my hand a very recent endorsement published in the San Diego Union of Sunday, August 21, 1960. It is entitled "The Anatomy of Cold War." The subhead reads: "Only by knowing communism, its goals and tactics, can Americans avert conquest by infiltration."

Does anyone dispute that? Does anyone believe that we can win these wars by not understanding communism, by not being trained in how communism operates and what it proposes to do? Can anyone here tonight point to any place in America where one can go to get that education, that training, and that background?

Where can the young career officer go—for example, the agricultural attaché who is heading for Pakistan? Where will he go to learn? Not about agriculture; he knows that. He has attended the State college. He has been an extension agent. He knows about agriculture. He goes to Pakistan as an agricultural attaché because he is a soldier in the cold war. Where will he learn the major lesson? Where will he learn about communism? Where will he learn about what the Communists plan in that particular area of the world? Where will he learn to fortify himself, equip himself, and train himself, so that he can be an effective leader in the cold war? It is not enough that he goes to Pakistan to teach something about agriculture. We squander pretty much the cost of sending people overseas until and unless they are fully trained to do the job. The bill provides that opportunity. That is why the proposed legislation has attracted bipartisan support and national acclaim from every walk of life.

Americans feel that time is late already to train people in government to do the job in the cold war that they are supposed to do.

Someone will say, "Let us send it to another committee. Let it die. We will be back in another 4 months. Then hearings can be held."

That will be 6 months. Then it can find a place on the calendar, and that will be 9 months. How do we know Khrushchev will wait? What will the Communists be doing in the meantime? How much longer can we delay becoming equipped to fight a war which is raging white hot now? Every day we delay increases the danger. Every week we delay increases the cost. Every month we delay increases the probability of a hot war, unless we successfully conclude victories in the cold war.

"The Anatomy of Cold War," published by objective writers in the San Diego Union, is a most persuasive argument for the legislation which I hope the Senate will adopt with unanimity tonight. It lists specifically the weaknesses in our present approach. It bills persuasively the arguments for doing something effective to remove those weaknesses now.

Mr. President, I ask unanimous consent that the entire article be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE ANATOMY OF COLD WAR

(Only by knowing communism, its goals and tactics, can Americans avert conquest by infiltration.)

The cold war is more than a political phrase. It's a reality, and potentially decisive skirmishes are being fought right now, today, this moment. It's as close as a short jet run, measured in geographic terms. Cuba is only 90 miles from the United States. Since the admission of Alaska, the Soviet Union itself is less than 50 miles from our own borders. Over the pole by subsonic jet, Moscow is 7 hours to New York or Detroit. San Francisco is 30 minutes' missile time from Kamchatka Peninsula. San Diego is 20 minutes from a missile-bearing submarine 500 miles at sea.

But the important characteristic of the cold war is not the physical threat, great as that may be.

What is important is that this war could be won without a single shot. It could be won by encirclement—to the point where the United States is helpless. It could be won by nibbling at our own strength and that of our allies—to the point where we and they are exhausted. It could be won by the invisible softening attack—to the point where an entire nation is brainwashed into believing surrender is proper and regimentation is good.

The maps on the first page [not printed in RECORD], and this have been prepared to emphasize the scope and significance of Communist victories and inroads around the world in relation to our own land. A cabinet shakeup in Africa, a general riot in any country along the Mediterranean, an upswing in Communist activity in Rio or Buenos Aires is an alarm signal that Americans cannot ignore.

But, again, the Communist threat, like disease, knows no international boundaries. It can—and is intended to—take its toll from within. "Within" means "within the United States as well as within our alliances."

Three facts are vital to understanding Communist strategy. If you don't recognize them, much that happens in today's world will appear all but inexplicable.

Fact No. 1 is the nature of the Communist's prime target. It is not any geographical area. It is the human mind. Communist dogma acknowledges that the only lasting conquest is the conquest of the human spirit. If you conquer a man's spirit, you don't have to fight with him physically.

Fact No. 2 is the nature of the Communists' political tactics. Perhaps of all the things about the cold war, this is the most difficult for the average American to realize, for most of us have been reared in a climate of Anglo-Saxon and Roman law, melded with American frontier and British Victorian concepts of fairness, "playing the game." The Communist does not achieve his objectives by normal partisan politics. No Marxist believes in nor accepts open debate and free elections.

When the Communist pays lipservice to democracy and "people's republics," he is indulging in an ironic twist of words. Communist dogma has no abiding faith in the people. It states repeatedly that a "proletarian" elite must make decisions for the people. What Americans and western allies understand as constitutional and democratic processes are regarded by the Communist as unrealistic.

Realism is permitting a display purporting to be a popular choice only after the election, the cabinet change, the court ruling has been rigged. The Communist only bets on a sure thing, and his tactics are designed to bring that sure thing about. Method doesn't matter.

Fact No. 3 is the nature of Communist timing. The Communists are playing for keeps, and they are willing to take as much time as necessary, fluctuating with the immediate times whenever it is expedient. They have alternated between talk of peace and war since the end of World War II, depending upon what best suited the long-range Communist objective—complete domination of the earth. In fact, the only area in the world today that is not a war zone, from a Communist viewpoint, is Soviet Russia and her satellites. This area covering one-sixth of the earth's land mass is already under Communist control.

Related to this fact of a "protracted struggle" is the very nature of democratic processes. Free choice through free institutions after free discussion can function properly only in a climate of order. The Communists recognize this and go to practically any lengths to maintain a worldwide climate of disorder, violence, and unrest.

This helps explain their jamming of allied broadcasts, their demonstrations in Caracas, Tokyo, and Léopoldville, their barrage of publications into unsettled areas like Latin America, southeast Asia, and Africa.

Mao Tse-tung, ruler of Communist China, is fond of quoting an ancient Chinese militarist, Sun Tzu, who lived in 500 B.C. Sun wrote: "To fight and conquer in all your battles is not supreme excellence; supreme excellence consists in breaking the enemy's resistance without fighting." Mao, in his own "Strategic Problems of China's Revolutionary War," quotes Sun again: "Avoid the enemy when he is full of dash, and strike him when he withdraws exhausted." But perhaps the most pointed is this one, quoted by Mao: "Make a noise in the East, but strike in the West."

Mr. MUNDT. Mr. President, one of the great things about our country is that ideas have a habit of popping up all over and finally finding their way to Washington and getting people to embrace them, understand them, endorse them, and advocate them. One of the men who originated this concept of a Freedom Commission and a Freedom Academy is Allen Grant, of Orlando, Fla. He made a most persuasive witness before the committee. He has worked long with Representative HERLONG, of Florida, Representative JUDD, of Minnesota, and other Members of the House who have done Trojan work in this connection; men who, I know, tomorrow will pick up the cudgels and try to induce the House to suspend the rules, as it can tomorrow, to pass the bill, as I hope it will, and send the bill to the President's desk, where I am confident he will sign it, because all Americans want the cold war to be won.

In giving his reasons for favoring the proposed legislation, Mr. Grant testified for the bill more than a year ago, on July 17, 18, and 19, 1959.

This is not a new proposal. It is not something which has suddenly been dropped on the Senate. This is a bill which was introduced in April 1959. Voluminous hearings have been held, and much discussion has taken place. It has been on the Senate Calendar for a long while. We were hopeful that it would be enacted before the recess of Congress for the political conventions. We were hopeful it would be one of the first items of business to occupy our time during this resumed session. However, we are grateful that it is before the Senate today. However, it is not new; it is not unexpected. If there was any question, such as the Senator from Ohio [Mr. YOUNG] raised, about jurisdiction, that question comes 18 months too late. Certainly we need to move more rapidly than that if we expect to win the cold war, than to wait for 18 months and many days; and then, when it is too late for Senate consideration by any committee, suggest that it be killed by cubbyholing it in another committee a day or two before the adjournment of Congress sine die.

I was about to mention Mr. Grant and his small group of Orlando public-minded, public-spirited citizens, most of them, I suppose—probably all of them—Democrats, who met and decided that it was time, at least in that little community, to try to develop a program which would enable the people of Orlando, as they put it, to know their enemy. So they organized a committee of "know your enemy" speakers.

Mr. Grant said:

This committee believed that as an absolute minimum our high school seniors should be given a broad survey course on world communism (in addition to courses in American history and civic courses to show the advantages of an open society) so they could understand something of the frightful challenge—political, scientific, economic, and military—facing their Nation, and as a result would better understand the unique obligations of American citizenship. Our committee soon learned our high school teachers were not prepared to give such a course, and it was up to us if anything was to be done.

Mr. President, that is not the fault of the high school teacher. Except in a few highly to be congratulated institutions of upper learning in this country, there is no place to which teachers can go to learn the facts about communism which they are expected to teach to the children in the classrooms. Except for a few institutions of higher learning, there is no place to which anyone can go to get this kind of information first hand, authoritatively packaged and prepared, ready for people to understand, ready for them to absorb, ready for them to take out and put into practice as willing soldiers of the cold war. I mention that because, it seems to me, that out of that experience comes a situation of great significance.

Last week in Detroit, addressing the Veterans of Foreign Wars, Allen W. Dulles, Director of the U.S. Central Intelligence Agency, spoke most eloquently about the need for the type of program of which the Senator from Connecticut [Mr. DODD] has spoken so effectively tonight, and which would be made available by the bill now before the Senate.

I quote a few paragraphs from the remarkable address delivered by Mr. Dulles on that occasion. He said:

We need far and wide in this country more education on the whole history of the Communist movement.

In our schools and colleges we can find many courses in ancient history, in philosophy, courses on the great movements of the past, the conquests of ancient times from Alexander the Great to Napoleon. Courses on Communist theory and practices are few and far between.

The bill before the Senate moves in the direction of preparing people to teach courses of that type. Mr. Dulles states that in a few higher institutions such courses are available, but he continues:

By and large, however, in our educational institutions, except in the graduate field or in specialized schools and seminars, these subjects are not generally taught.

I have reviewed the curriculums of many of our universities and colleges and, despite a considerable advance in recent years, our students are not yet afforded a broad opportunity to gain the essential background knowledge of Communist history and policy. And we should start this education in our secondary schools.

That is another authoritative voice, the voice of the head of the Central Intelligence Agency, echoing the lament of the people of Orlando, that there is no place where teachers can go to learn the facts that Allen Dulles wants to make available to the children in the high schools. Indeed, we are late in starting such an operation.

Mr. President, I commend to all a reading of the entire speech by Mr. Allen Dulles.

In concluding what I have to say about this matter at this time, let me point out the tremendous disadvantage which we Americans undergo because of our failure to have available to us now the mechanisms provided by this measure, which I have been privileged to sponsor, along with the distinguished Senator from Illinois [Mr. DOUGLAS] and the distinguished Senator from New Jersey [Mr. CASE].

In this exchange-of-persons program—the exchange of Russians with Americans, and back and forth, again—we find that when visitors from the Communist countries come to our country, they come here as agents, many of them as agents provocateur. Some of them are spies, but all of them are agents. All of them are trained in communism, understand communism, and believe in communism; and they are also trained in our way of life, after having studied it for many years, and they know the strengths and the weaknesses of our way of life, and come here prepared to try to make its weaknesses look larger and its strengths look smaller, and they endeavor to do what mischief they can. And when they return home, they are ready to make propaganda attacks of the kind which their experience here would lead them to believe would be the most effective.

Mr. KEATING. Mr. President, will the Senator from South Dakota yield to me?

Mr. MUNDT. I yield.

Mr. KEATING. Anyone who has attended an international conference at which representatives of the Communist countries are present understands the point which the Senator from South Dakota is making. All of the representatives of the Communist countries are extraordinarily well prepared to back up the policies enunciated by the Communist bloc. They are all exceptionally dedicated and of one mind.

The distinguished Senator from South Dakota rightly stresses the need for thorough training and indoctrination on the part of those teachers who will instruct our young people as to the meaning of communism. In my judgment it is very important that this be taught to our young people in addition to American history and other key subjects relevant to the history and meaning of democracy. I do not think enough American history is presently being taught in our schools. I believe that in addition the meaning of communism should be taught in our schools. This should be done by those who know the subject well and have been properly instructed in it, rather than by persons who have taken it up as a sideline.

I believe that by presenting this bill to us, the Senator from South Dakota has performed an important service.

Mr. MUNDT. I thank the Senator from New York for his very profound, interesting, and effective comments. Certainly what he has said is borne out by everyone who has attended an international conference at which Communists have been present. The Communists send their best trained people there; and every one of them who attends such conferences, whether he be a smiling Mikoyan or a scowling Gromyko, goes there knowing full well what he seeks to do. When the Russian farmers came to this country, I suspect that some of them had had experience on farms, but I feel sure that all of them had had thorough instruction in a training school in the Lenin Institute, so that they knew the Communist line, the Communist propaganda approach, the Communist attack on Christianity, and the Communist attack upon capitalism. They came here prepared, equipped, and ready to try to pick flaws in our system and to try to advance arguments in behalf of the system they represent.

On the other hand, when Americans are sent to Russia, whom do we send? We send good Americans, but not one of them in a hundred is as well informed about communism as the most stupid emissary from Russia is informed about our way of life before he ever leaves his homeland.

Mr. President, if one is unprepared, how can he win in such a fight? Without thorough preparation it is impossible to win a tennis match or a baseball game or a fisticuffs match, or the contests at the Olympics which now are being held in Rome. One can do well only when he is well equipped, understanding, and knowledgeable; and the Communist countries take great pains to send such well-trained representatives to our country to represent them.

The pending measure provides for machinery of that kind—by calling for the establishment of a Freedom Commission, which, in turn, will establish a Freedom Academy, where those who are presently in the service of our Government will be trained to represent us in the future. They will receive training in regard to the things they need to know in order to be able to fight effectively in the cold war and to represent us well.

Mr. MANSFIELD. Mr. President, after consultation with the distinguished minority leader, the Senator from Illinois [Mr. DIRKSEN], I send to the desk a proposed unanimous-consent agreement, and ask particularly that the Senator from South Dakota [Mr. MUNDT], the Senator from Connecticut [Mr. DODD], and the Senator from Arkansas [Mr. FULBRIGHT] listen to its reading.

The PRESIDING OFFICER. The proposed agreement will be read.

The proposed agreement was read, as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, effective on Wednesday, August 31, 1960, at the conclusion of routine morning business, during the further consideration of the bill (S. 1689) to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy and for the training and development of leaders in a total political war, debate on any amendment, motion, or appeal, except a motion to lay on the table, shall be limited to one-half hour, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided,* That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further,* That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of the final passage of the said bill debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the majority and minority leaders: *Provided,* That the said leaders, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

The PRESIDING OFFICER. Is there objection to the proposed agreement?

Mr. MUNDT. Mr. President, reserving the right to object—and let me say that I desire to ask some questions, for purposes of clarification—I wish to state, speaking as one Senator who is vitally interested in this proposed legislation, that it is my purpose to cooperate in every possible way to expedite the prompt taking of action on the bill, and I am very hopeful that we can shorten the time allowed for its further consideration to such an extent—if that will be agreeable to the Senate—that we may be able to act on this measure tonight, so that if it is passed tonight by the Senate—as I hope and as I believe it will be—the House will have that much additional time in which to act on the bill. That is important, because the House already is confronted with a crowded agenda.

Mr. MANSFIELD. We could shorten the time limitation proposed, if that is desired. But in view of the fact that the American Bar Association is holding its annual meeting in this city, quite a number of Senators are not in the Chamber at the moment. So we thought the proposed agreement, as read at the desk, would be one way to speed up the further consideration of the bill and the taking of action on it.

Mr. MUNDT. At what time is it proposed that the Senate convene tomorrow?

Mr. MANSFIELD. At 10 a.m.; and tonight the Senate will adjourn, for the benefit of the Senator from New York.

On tomorrow, the House will not convene until 12.

Mr. MUNDT. Will it be agreeable to have an understanding that this measure will be the first order of business tomorrow, following the morning hour?

Mr. MANSFIELD. Yes, indeed.

Mr. MUNDT. What is the likelihood of its being set aside, for the consideration of other matters, until later tomorrow afternoon, perhaps?

Mr. MANSFIELD. Aside from a conference report during the morning—and I believe that the chances for that are very slim—I believe the further consideration of this bill is likely to be concluded at noon, at the latest.

If agreeable, I shall propose that the time available for debate on any amendment, motion, or appeal be 15 minutes, to be equally divided, and that the time available for debate on the bill itself be one-half an hour, also to be equally divided.

Mr. MUNDT. That is agreeable to me. That would be agreeable to me, so far as time is concerned.

Mr. DODD. Mr. President, am I to understand the time would be 15 minutes to a side on motions to recommit or amendments, and then 1 hour a side on the bill?

Mr. MANSFIELD. Twenty minutes on a motion to recommit or amendments, and a half hour on the bill itself.

Mr. DODD. I do not know how many Senators want to be heard.

Mr. JAVITS. Mr. President, if the Senator will yield, I, of course, defer to the Senator from South Dakota, but it occurs to me that it would be the feeling of the Senator from South Dakota that this is a very brief time on the bill.

Mr. MANSFIELD. The shortening of the time was in consideration of the suggestion of the Senator from South Dakota, and the idea was to be cooperative.

Mr. MUNDT. Mr. President, my suggestions were based on the premise that perhaps we could complete action on the bill tonight. The acting majority leader seems to be faced with a situation that a good many Members of the Senate are away at the American Bar Association. Therefore, I do not suppose it would make any difference whether the time might be a little longer or a little shorter. I thought if we could consider it tonight and act, by having a shorter time on it, Senators could get away earlier. But if the Senator prefers another time limitation, it is all right with me.

Mr. MANSFIELD. I prefer the latter suggestion, with the proviso that a motion to recommit would be confined to 20 minutes, with one-half hour on the bill itself. In view of the discussions which have taken place, I think that time would be sufficient.

I make that request.

The PRESIDING OFFICER. Is there objection?

Mr. JAVITS. Mr. President, reserving the right to object, I have no desire to be heard on this bill, so far as I know, but if a bill which is so important is going over until tomorrow, it seems to be unseemly to have only 10 minutes on a side. I certainly hope the majority leader will keep to his original request.

Mr. MANSFIELD. It is perfectly all right. I was doing what the Senator from South Dakota desired.

Mr. JAVITS. The Senator from South Dakota said if it were going over until tomorrow there would be no point in limiting the time to that extent. Ten minutes more or less should not make any difference.

Mr. MUNDT. Mr. President, I suggest that the acting majority leader make his request.

Mr. MANSFIELD. Mr. President, I renew the original request.

Mr. DIRKSEN. Mr. President, will the Chair restate the request?

The PRESIDING OFFICER. The request was 30 minutes on amendments and motions, and so forth, and 1 hour on the bill itself.

Is there objection?

Mr. DWORSHAK. Mr. President, reserving the right to object, is this bill so important that we must take action tonight?

Mr. MUNDT. Mr. President, I was hopeful that we could take action tonight, but I understand the leadership has problems. I know the American Bar Association is in town.

Mr. MANSFIELD. The Senator from Idaho is always cooperative.

Mr. MUNDT. Yes, and we hope he is going to be that way tonight.

I ask the acting majority leader, who was also at one time a Member of the House—my memory of the rules of the House is rusty—if in the closing days of the session, even though the Senate acted tomorrow, the House could still suspend the rules and could act on the bill on the day it passed the Senate. Is that correct?

Mr. MANSFIELD. It certainly would be within the rules of the House to suspend the rules if it saw fit.

Mr. MUNDT. Then we have nothing to lose by waiting until tomorrow, so I hope the Senator from Idaho will concur.

Mr. DIRKSEN. Mr. President, to keep the record straight, the House can suspend the rules in the last 6 days after a sine die resolution.

Mr. KEATING. There has not been any yet.

Mr. MANSFIELD. But it is my understanding that the House can consider a bill under suspension of the rules.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from Montana? The Chair hears none, and the agreement is entered.

ORDER FOR ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate adjourns tonight, it adjourn to meet at 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. GORE. Mr. President——

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. MANSFIELD. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. MANSFIELD. After consultation with the minority leader, I announce for the information of Senators that there will be no more votes tonight.

THE MIDDLE EAST

Mr. GORE. Mr. President, the past 8 years have been characterized by extreme tensions in the Middle East. Armed conflict involving two of our major allies erupted over the operation of the Suez Canal. We ourselves dispatched troops to Lebanon in order to maintain order.

The recent assassination of the Premier of Jordan is an outgrowth of the seething turmoil which pervades the entire area and which continues to constitute a serious threat to peace.

As chairman of the Subcommittee on the Middle East of the Committee on Foreign Relations, I have watched these developments with growing concern. Last fall, together with the able junior Senator from Wyoming [Mr. McGEE], I visited the Middle East. We had an opportunity to talk privately with many political leaders in the area, including Prime Minister Ben-Gurion of Israel and President Nasser of the United Arab Republic. These conversations served to emphasize the seriousness of the basic problems which trouble the area. But also, Mr. President, from these conversations I concluded that progress, perhaps very significant, is possible if we but follow the correct approach. I am constrained to believe that the junior Senator from Wyoming reached a similar conclusion.

I was encouraged that, after lengthy discussion, both Mr. Ben-Gurion and Mr. Nasser separately indicated a willingness to negotiate through an intermediary for the solution of the thorny Palestinian refugee problem. Mr. Ben-Gurion preferred the United States, while Mr. Nasser felt that use of the United Nations for this purpose would be more appropriate, but neither seemed adamant on the identity of the intermediary. I regarded as highly significant the fact that both appeared receptive to the idea of negotiations on this one problem without making such negotiations conditional upon an overall settlement of all the problems of the Middle East.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. GORE. I yield to my distinguished friend from Wyoming.

Mr. McGEE. I compliment my colleague on the statement he is submitting here tonight on the very difficult question of the refugee problem in the Middle East; but in particular I think it is well to underscore for the Senate that the refugee question is deteriorating, has been deteriorating now for 10 years, and in this state of deterioration it has created an explosive situation in the Near East that goes far beyond the matter of a quarrel between the Israelis and the Arabs in that part of the world.

It is so explosive, and the power balance is so delicate, that an explosion of the kind we read of yesterday in Jordan may infect the rest of the world with its consequences. It could even trigger the much larger explosion we all fear. For that reason it is no longer simply a refugee question in an isolated portion of the globe, but it is one which affects all the peoples of the world and concerns all governments.

The question must now be approached as one of world-shaking proportions rather than one of dealing with unfortunate human beings in a narrow part of the world.

Mr. GORE. I agree with the Senator. Does the Senator share with me the feeling that this is a dangerous world tinderbox?

Mr. McGEE. It is dangerous beyond the control of the leaders of any one government in that area. Whereas it was viewed as a personal quarrel, it in fact became much like the dropping of a pebble in the lake—the ripples kept spreading out further and further. As a result, with the concern of the Soviet Union in one part of that portion of the world and the concern of the non-Communist countries in the other part, there was a delicate balance which could be easily disturbed and fearfully disrupted, to the point of open warfare of much greater magnitude than we have been witnessing between Israel and the Arabs.

Mr. GORE. I thank my friend.

The Palestinian refugee question is, of course, but one of the many problems which plague the Middle East. It is a question upon which the position of both sides is strongly influenced by emotions. To many, it operates as a psychological block to progress on all other issues. In my opinion, it represents the key with which the door to other solutions may be unlocked. I am convinced that unless and until this, one of the great human tragedies of our time, is satisfactorily resolved, little progress can be made in bringing about political stability and improving economic conditions in the Middle East.

Unless at least a beginning can be made at resolving the refugee problem, we can but anticipate a succession of incidents such as the recent occurrence in Jordan, increased unrest, the hurling of charge and countercharge, and the constant danger of the outbreak of armed hostilities.

Mr. McGEE. Mr. President, will my colleague again yield?

Mr. GORE. I gladly yield.

Mr. McGEE. Speaking for myself, I think I share the view with the Senator that the single most important impression, next to the explosive capability of that situation, was how much a settlement in that part of the world depended upon the resolution of the refugee question.

Mr. GORE. Even an approach to a settlement.

Mr. McGEE. One could not get the opposing factions to sit down to talk about water, about the Suez, or about many other difficult questions affecting boundary lines which concern them, because there was a psychological block which stemmed from the bitterness, the hatred, and the deterioration resulting from the entire refugee question.

As the Senator has said so well, it was our opinion that unless and until the refugee issue could be removed, we could not approach rationally a useful discussion of the other questions.

Mr. GORE. I thank the Senator. As the Senator will recall, it was only after long negotiation and persuasion that we obtained the assent of the two leaders to whom I have referred to negotiate with an intermediary on the refugee problem as separate and apart from the economic, the political, the geographic, and the many other questions which permeate this troubled area.

Mr. McGEE. I think it was impressive that in these discussions to which the Senator referred, the political sensitivity on both sides on the question of the refugees was such that most of the leaders in those regions dared not appear to be discussing the problem. It was very delicate, because it had been brought home to them in the minds of the people on both sides. The bias, the prejudice, the emotions were so deeply rooted that this problem has become what we might call a political hot potato. Unless the blindness which passions evoke can be eased, a useful negotiation on the other matters cannot be had, because, in my judgment, it will not focus upon the problem which, if solved, has the greatest chance to do the most good. I refer, of course, to relieving the refugee pressure.

Mr. GORE. We have discussed this problem with many people, and we have seen it with our own eyes.

I reached the conclusion, which I am sure the distinguished junior Senator from Wyoming shares, that if the human tragedy could be separated from the other problems and dealt with apart, if we could obtain an agreement to begin treating this as an identifiable separate problem, great progress could be made.

When, separately, Premier Ben-Gurion and President Nasser acceded to our earnest entreaty in this regard, I felt greatly encouraged, and I know my colleague felt greatly encouraged.

I do not know with what vigor these discussions were pursued by the State Department. As the able Senator knows, our discussions were reported to the State Department in detail.

As the 86th Congress draws to a close, and particularly in view of the outbreak of violence in Jordan, I feel it incumbent upon me publicly to express my regret that the administration has not successfully prosecuted a program of action designed to break the stalemate and to bring about a peaceful solution of political and economic controversy in this area which lies at the crossroads of the world.

Mr. President, the stakes in the Middle East are high. Nowhere is the challenge to freedom and democracy more acute. Nowhere are the demands on free world leadership more exacting.

If the United States is to discharge its responsibilities for leadership, it must act in a manner commensurate with the task before it. Here is a task which demands to the fullest the prestige, the power, and the influence of the office of the President of the United States. The settlement of the controversy in the Middle East has not been, and cannot be, successfully accomplished by relegating it to the category of problems for the attention of officials at secondary levels of government. A downgrading of the problem can but make its solution unattainable.

On August 27, in a message to the Zionist Organization of America, meeting in New York City, Vice President NIXON stated:

> The time has come when we should try to bring about an overall settlement of the Palestine question in all its aspects.

I do not argue the question that "the time has come." In fact, the need for leadership and action has been with us throughout the years of the Eisenhower administration.

I am genuinely concerned, Mr. President, with the manner in which Vice President NIXON proposes, if elected, to bring about the solution, the need for which he now recognizes as being acute. I quote from his message, as follows:

> For that reason, I intend if elected President to give this problem the highest priority by assigning primary responsibility for directing negotiations in this field to a man who has so magnificently demonstrated at the United Nations that he is one of the skilled diplomats of our times—my running mate, Henry Cabot Lodge.

Now, it is not my purpose today, Mr. President, to belittle or otherwise characterize the abilities of Mr. Lodge in the field of diplomacy. It is to be noted that he has been an active participant in the formulation and implementation of Middle East policies which have proven singularly ineffective. He is identified with policies which led us to the incongruous position of siding with the Soviet Union and against Great Britain, France, and Israel in the United Nations. He is a part of a record characterized by reaction rather than action, by unsuccessful rather than successful policies.

Now, Mr. Lodge's relative qualifications for the office he seeks are an appropriate subject for discussion. I shall, however, reserve that subject for some other occasion.

Of far greater importance than any question of Mr. Lodge's individual ability as a diplomat is the announcement of Mr. NIXON, if elected, as to how he proposes to discharge the constitutional responsibilities of the Presidency in the conduct of U.S. foreign policy, especially, I should say, in the Middle East.

Under the Constitution, there can be but one person upon whom rests the "primary responsibility" for U.S. foreign policy. That person is not the Vice President, but the President. All the world so understands it.

Mr. NIXON proposes, if elected, to turn over to his Vice President the "primary responsibility" for bringing about a solution to the Palestinian problem. Whether or not other problems such as that of Berlin and Germany would also be turned over to Mr. Lodge, or to someone else, is unclear.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. McGEE. It is my recollection that as we were visiting with the various heads of state over there, there was present a rather keen sensitivity on the question of the level at which they would be able to discuss or deal with this problem. They had the feeling, which they expressed on occasion, that we sometimes dumped them off onto the second,

third, or fourth team. They have a certain innate pride—national pride, I suppose we would call it—with which they regard their problem; and their problem, which has now become very heavily our problem, merits the topmost consideration.

In view of these attitudes, would it not be a disruptive and discomforting move to let it be known that we were going to turn these problems over to a Vice President, regardless of who he might be?

Mr. GORE. A Vice President who has neither constitutional responsibility nor authority.

Mr. McGEE. However, we may view that office, it is very true, from afar, and from a foreign government, that our responsibility, as the Senator has said so well, rests with the President of the United States, and the proposed action would be regarded as something of a downgrading of negotiations if we deliberately announced in advance that we were going to delegate the problem to some secondary or tertiary official of the Government.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. JAVITS. It seems to me what the Senator from Tennessee has said, with all due apology to him, is not very realistic, because the Vice President of the United States is the second highest official of our Government. President Roosevelt did not hesitate to make someone a special ambassador. He selected Harry Hopkins, who was not even a Vice President, and gave him vast power and influence, and quite properly, because he had confidence in him and he was the President's representative.

I think what is more important, frankly, with respect to what the Senator is saying is how he thinks this very trying situation in the Near East can be dealt with. I do not think any briefs need to be drawn for Henry Cabot Lodge. I think, for example, in developing the formula by which the relations between Israel and the Argentine were dealt with in the United Nations on the Eichmann case he avoided one of the most sticky and thorny diplomatic difficulties which could have faced us in that area of the world.

There is no magic about that area, as Senators who have been there know. This is one of the toughest and most difficult bits of hostility which we have on earth. It is very deeply built in, and it has resisted the power of the entire United Nations, let alone an individual, even the President of the United States.

Finally, let us be a little concerned about how much time and how much heart and how much effort any President has, whether he be NIXON or KENNEDY. This is an unbelievably difficult and complex job, and I do not think it is a bit demeaning to this area. On the contrary, I think it would put our actions on a higher level than ever if the problem were entrusted to a man who has the high office of Vice President and it was made a very major cause of his concern, which it could hardly be with the President of the United States without his neglecting a great many other vital duties.

I hope, whether the next President is Mr. KENNEDY, or Mr. NIXON, that he will adopt some technique of that character which will give that responsibility to one very high level person who will rank, incidentally, above the Secretary of State.

I might point out the great responsibility of trying to deal with this very trying problem. I do not wish to engage in any long debate with a Senator tonight. I gather the Senate wants to go home. But I will read what the Senator has to say with the greatest attention. I have enormous and genuine affection for him.

Mr. GORE. I thank the Senator.

Mr. JAVITS. It is a subject which I think the Senator from New York knows a little about. I have lived with it for many years, and perhaps if we get a little time tomorrow or the next day, if we are here, I should like to give my version of the problem, and perhaps the Senator could react to that.

Mr. GORE. I would welcome the reactions of the able senior Senator from New York. I only regret that he does not feel disposed to explore the subject further tonight. But I shall be available for discussion at any time that it serves the wish or the desire or the purpose of the senior Senator from New York.

Mr. JAVITS. If the Senator will yield again, I may have given the Senator the wrong impression. It is not that I am not happy to engage in debate, but it is the first I knew that the Senator was going to make this statement. I really have not gotten the full import or detail of it. I respect the Senator from Tennessee so much that I would really like to see and study what he has said, and then, if I may, react to it.

Mr. GORE. The Senator compliments me highly and I appreciate his statement.

Mr. McGEE. Mr. President, will the Senator yield on this point, while the Senator from New York is still present?

Mr. GORE. I yield.

Mr. McGEE. I trust that none of this debate will be construed in any partisan way. I think a really important point is being contributed, that is not only the psychological but the protocol national point of view, that if this question is submitted to the Vice President, whether he be a Republican or a Democrat, and however able he may be, that we would automatically throw a block in the path of a possible settlement or a disposition to agree on both sides. Those countries would feel that their problem had been downgraded to a secondary level. I think the Senator points out very well the wisdom of our trying to avoid that situation from the very outset. This has become much more than a bilateral quarrel between Arabs and Jews. This subject has become so explosive, in the judgment of the Senator from Tennessee, and certainly in my own, that it merits the deepest concern on a high priority basis of our Government, because of the explosive qualities now attendant upon that question.

For that reason the Senator from Tennessee petitions that we consider placing this question, at long last, without attempting to attribute any blame in the past, but only trying to resolve it in the future, at the top as a priority No. 1 item. So much else hinges upon its wise solution in what the Senator from New York rightly describes as one of the most tortuous and difficult situations anywhere around the world.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. JAVITS. Of course, if Vice President NIXON would entrust the actual conduct of this problem, in a dynamic sense, to the Vice President, that would not mean that the Presidency would not be committed to the resolution, that the Presidency would not participate in its resolution, or even that the Vice President would meet with the other heads of state. All Mr. NIXON or Mr. KENNEDY would say would be that this problem merits the concentration of a high-level, fine mind, and the Vice President, the man who had run with him, is the kind of man who could give it that kind of attention.

I do not think such statement would mean that the Vice President would be the man who would sit in the meetings with the heads of other states or in any way encounter a situation where protocol would cause difficulty with other heads of state.

I think in all fairness we should recognize that, whether it applies to either a Vice President who may be the President of the United States or not.

Mr. GORE. My point of view, whether correct or incorrect, is, nevertheless, firmly held that here is one of the real potentially dangerous, explosive areas of the world.

At this time in history, when we are going through a passage of hazards, the few most dangerous problems of the world which threaten world war require now, have required, and, in my opinion, during the next 8 years will require the full prestige and power and influence of the Presidency of the United States. I claim no vast store of knowledge in this area or any vast knowledge of the problems of the area. I have studied them. I have been hesitant to speak out upon them. Nevertheless, I have some firmly held opinions. I am constrained to believe that if President Eisenhower had secured from these two leaders in that area a commitment which the junior Senator from Wyoming and the junior Senator from Tennessee obtained, it might well have led to significant negotiations and perhaps a beginning of a settlement of the vexatious problems in this area.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. McGEE. Again trying to view this subject as a very serious national question, rather than as a partisan question—for we must never let it become a partisan factor—I would hope that we would have been able to learn from some of the admitted mistakes that we have made in our kind of government, in the new experience we have been going through. As a leader in a difficult world,

we were bound to make some mistakes. We are entitled to make mistakes. However, we are not entitled to repeat the same mistakes.

One of the mistakes that we made in the past was that of misjudging or downgrading the sensitivity of important peoples, in the way that we have treated them in our deliberations of their problems, in that we have favored them with the second team. We realize that the President of the United States can do all these things. He has to do them on a selective basis. What is being said here tonight is on a priority basis, selectively speaking. What was once relatively regional in a bilateral quarrel between two peoples has now been permitted, through one circumstance or another, to become a major explosive problem. This must be put at the top of the list and must command the prime concern and attention of the President of the United States, rather than the Vice President.

We have encountered this situation in South America. Those countries will not settle for the assistant President, the Vice President. They will not settle for any kind of emissary who speaks for the President, when they see the President in direct negotiations considering problems important enough for his personal attention. That is the only point at stake here.

The situation has gotten out of hand, and it therefore requires courageous attention from the Chief Executive, not from his constitutional successor in the event he dies, and the President himself must take command, to try to bring about the kind of settlement the Senator from New York, the Senator from Tennessee, and the Senator from Wyoming now seek.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. JAVITS. With all due respect, the idea that the President's personally laying on his hand will magically solve everything is not the answer. We know that there are places in the world where one can do things only once; and if the conditions are not propitious for success, the effort will have the reverse effect, rather than an affirmative effect.

The promises which some Senators may have obtained privately is another point I should like to touch on. We know the methods of the rulers of states. When we talk to them privately in their chambers, we get a certain impression. Then later we wonder how they could be the same people who the next day in public statements or in deals with the Russians for armaments and other support could have done the things they did. They hold their power because they can charm a bird out of a tree. They charm Senators, too. It does not mean that they will not do things that make negotiations fruitful or possible.

I submit that all this does not hit the main point, that the Vice President should not be charged with responsibility for developing ideas and undertaking negotiations which the President could and would carry through, because I am confident that that will not make the difference; for example, that Nasser or Ben-Gurion will not like the idea that the Vice President, rather than the President, is dealing with them. I cannot believe that that is going to make the difference as to whether some negotiations will succeed or not succeed.

Besides that, it makes a great difference who the President is. Perhaps Eisenhower might have been able to do or not do something that his successor may or may not be able to do. That is the only point I make.

Mr. GORE. I respectfully suggest that Mr. NIXON said he would assign primary responsibility in this field to the Vice President. I suggest that the history of our country does not reflect very favorably upon the diplomatic endeavors of Vice Presidents, including the present Vice President. I could mention the trip to South America or the quarrel in the kitchen. There are few instances which can be cited in history when a Vice President has successfully conducted foreign policy for the United States. In this particular area, so sensitive and dangerous as it is, it is distressing to me that the Republican candidate for the Presidency of the United States should say he would assign primary responsibility to the Vice President in this area. The primary responsibility belongs to the President of the United States. In my humble opinion, it is only with the power and prestige and influence of the Presidency, fully used, that a solution to this dangerous problem can be wrought.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. McGEE. I should like to address myself to the point the distinguished Senator from New York has raised about the possibility of a common basis for understanding being reached because of what the leader of another government might tell some touring Senator. No one is more mindful of the limitations of such conversations than the junior Senator from Tennessee and the junior Senator from Wyoming. It would seem to me that in the face-to-face question of the refugee question in that part of the world, the explosion of which could light fires that could spread to other parts of the world, we have the kind of difficult situation in which we must go one step further, and that is what happens before the bar of history as we look backward, and we perhaps discover that there was a moment, that there was a time, when there was a chance, and we did not have the courage or vision to treat that chance or put it to the test. This may not be the time. But no one has tried it yet. It has not been pressed on the level that, in the judgment of the Senator from Tennessee, it ought to be pressed. That is why it seems imperative that, given the experience we have just gone through over there, in the explosion which occurred only yesterday, it is time that, at least, we listen to the kind of experience which the junior Senator from Tennessee has tried to pass along, and to share with our colleagues; namely, that one of the difficulties of finding a common ground is that we turn to the negotiations in the past, and there is a sensitivity over the question of the level on which we are willing to talk.

The second difficulty has to do with the kind of diplomatic approach—a package deal or an individual problem of refugees, which is really controversial. That splits the diplomats. It splits our State Department. But it needs consideration now. It needs, at least, a careful weighing to determine the chances of combining the approach to the question of urgency with the highest level of executive consideration, but within the field of the sentiments we had reason to believe came rather sincerely from those leaders. Nobody has called their hands. Nobody has given them a chance to put up or shut up. It seems to me the time is imperative for somebody to look into that problem without introducing new obstacles.

Mr. JAVITS. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. JAVITS. If time permits in the next few days, I shall recount the number of times the Arab States and Colonel Nasser have been called from their most eminent podiums. What has happened? I am afraid the Senator is discussing this subject in somewhat of a vacuum, with all due respect to his conviction and feeling that if only the President would lay hands on this subject, all would be well.

I wanted to read the Senator's remarks. There is a great history; there are many precedents. That does not mean that results can be achieved tomorrow. However, I do not think it is fair to say that the proposal of a man who is running for the Presidency, simply because he has said he will give the prime responsibility for the handling of certain duties to one who has really worked at that business, a man with such prestige as Henry Cabot Lodge, will be ill-starred and inauspicious, and will not succeed. I do not agree with the Senator from Tennessee.

Mr. GORE. The fact is that no one can have the prime responsibility except the President of the United States. He can delegate, but the advisability of delegating, the advisability of thus downgrading this very acute problem, is a question which I raise tonight.

Mr. JAVITS. I cannot conceivably agree with the use of the word "downgrading." I think it is most unfair to the office, to the proposal as it was made, and even to the man in question, who is our Ambassador to the United Nations. I sincerely hope that the Senator from Tennessee does not feel that way. If he does, then it is just too bad. I could not possibly agree with him.

Mr. GORE. I do not know why the Senator from New York expresses the hope that I will not feel that way, when I have expressed, as emphatically as I have, that I do feel that way.

Mr. JAVITS. Then I disagree with the Senator, when he speaks of downgrading so distinguished a citizen as Henry Cabot Lodge.

Mr. GORE. I said I was not presuming to discuss the diplomatic qualifications, or lack thereof, of the Ambassador. That is not the subject tonight.

Mr. Lodge is a distinguished American. But I must, so long as the Senator from New York has ventured his remarks, suggest that something less than great success has attended the efforts of Ambassador Lodge.

Mr. McGEE. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. McGEE. I think we should not lose sight of one fact, if the Senator from New York will be considerate enough to listen for an additional moment. Considering the watershed, internationally, across which we are passing right now, all sides are talking about it, all countries are concerned about it. In the Middle East, with all of its explosiveness, we come to one of those points in history where there is a new set of ingredients, a new cast of characters, which might make possible a new approach. If it fails, then it fails, like distinguished efforts in the past. The only urgency is that there must be an element of maximum effort, to see if it cannot be made to work.

There is a new government, which has not been in office for many months up until now, in Israel. There is a new set of changing circumstances in the Arab world. A new administration will be taking office in this country, regardless of which party it may be. Younger leadership will be assuming the Presidency, of whichever party it may be. There will be an approach thus recreated with old facts, with old circumstances, but confronted by new, younger, and different personalities, having a chance to make a fresh approach, without listening to all of the old, warped biases and expressions of a very personal sort. There is that chance. We are simply asking that the chance be exploited to the full. If failure occurs, it will be necessary to try again. We cannot continue to follow the reasoning of the distinguished senior Senator from New York that because such an approach was tried in 1948, 1950, 1957, and 1958, there is no point in trying again, or that it ought not be tried at any other level. The point again remains that we still have not broken through on this question, and we must break through. That breakthrough will have to come with the maximum effort from the highest level of government, and that is the office of President.

Mr. JAVITS. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. JAVITS. I am sorry the Senator apparently has construed my views as quite contrary to what they are. I welcome new initiative. I think it is simply great that we shall have in the Presidency a young man who will make a totally new start on this and many other problems. I simply say, in all respect and affection for the Senator from Tennessee, that I think to pick out the point that NIXON said he would give primary responsibility to Lodge, who has really worked on such problems is carping a little in the situation.

Mr. GORE. I hope the Senator from New York intends to be fair. I certainly have not intended to be carping. I have quoted the Vice President's words, not out of context. I think I have quoted them fairly, and I have found them to be distressing. I found them distressing as an indication of his conception of the role of the Presidency of the United States in the conduct of our country's foreign affairs. I submit that it cannot be the prime responsibility, under our Constitution, of anyone else, whether he be the Vice President, the Secretary of State, the majority leader, the minority leader, or any other official. The world looks to the President of the United States, and the Constitution places that responsibility inexorably and inescapably upon the President of the United States.

I hope the Senator from New York will not insist upon characterizing my remarks as carping. I assure him that they have not been so intended, nor do I think they can so be characterized fairly.

Mr. JAVITS. Mr. President, again I repeat my enormous respect and affection for the Senator from Tennessee. I still cannot bring myself to believe that the use of the words "prime responsibility" in that context means any more than an efficient utilization of a really top level man who would be available for a very difficult job, without any derogation of the final responsibility for the conduct of the foreign affairs of the country, which is inherent in the office of the Presidency.

With all due respect, a President who would try to spread himself to solve all these problems himself—disarmament, the Near East, the Russians, Africa, South America, Taiwan, and the multitude of other problems in the world—would be a pretty bad administrator.

I think Vice President NIXON has made quite the right decision, rather than the wrong one.

I thank the Senator for yielding.

Mr. GORE. Mr. President, I agree with the Senator from New York that the burdens and responsibilities of the Presidency are enormous. One who holds that high office needs and must have qualified advisors of the highest order. But it is to the President himself that the Free World must look for the leadership upon which the cause of peace depends.

Those who yearn for more effective United States leadership will not be reassured by this announcement by Mr. NIXON. For the President of the United States to turn over "primary responsibility" in the dangerous, vexatious problems of the Middle East to anyone, however capable he may be, is to downgrade it. Peaceful solution of the complex controversy will be difficult at best. It can only be attained, in my opinion, with full power and prestige of the President of the United States. Anything less than the active attention of the President himself will cast doubt upon the depth of our conviction and upon our resolution to lead effectively the forces of freedom to an enduring peace.

THE THREATENED STRIKE ON THE PENNSYLVANIA RAILROAD

Mr. WILLIAMS of Delaware. Mr. President, the indications are that the Pennsylvania Railroad is to be shut down by strike at midnight tomorrow night.

This is a national emergency, and should not be permitted.

It is a national emergency because it will, in many States, hamper and, in a large part of the country, come close to paralyzing altogether the rail transportation that people need in order to get to and from their jobs and the rail transportation that is needed to keep the economy going. The Pennsylvania Railroad is the largest railroad in the country, serving a part of the East that contains almost half the Nation's population and much of its industry; it ties that area in with the rest of the country by taking passengers and freight to and from the railroads of the South, the West, and New England.

The emergency is made even worse by its timing. It comes at the time of peak Labor Day vacation travel, and of the return of students to schools and colleges far from their homes. And it disrupts the movement of farm and factory freight right on the brink of the pickup in the national economy that all of us are hoping for.

Our interest here is not in the merits of the dispute that is causing the strike and shutting down the railroad. Our interest here, I suggest, is in the general public—to protect their interest by keeping the trains moving until negotiations are concluded.

In that connection, I think we should note that the dispute has already gone twice to factfinding boards. The first time was before a neutral referee agreed on by both sides. Unsatisfactory as the railroad found some of that referee's decisions, it agreed to accept them.

The leaders of two unions involved in the dispute refused, and served notice that they would strike. The President was notified, and recognized the situation as a national emergency. As authorized by the Railway Labor Act, he named a three-man emergency factfinding board to hear the case as an impartial tribunal and to make recommendations. It did, and again the railroad accepted the recommendations.

The leaders of the two unions again refused, and under the present terms of the Railway Labor Act the unions were free to strike after 30 days. This is the strike scheduled for midnight Wednesday. By midnight tomorrow, service will have stopped for some 136,000 daily passengers, 73,000 of whom are commuters; for some 118 million ton-miles a day of freight important to the national economy; and for several hundred cars a day of mail, express, newspapers, and magazines.

As I indicated, the resources of the Railway Labor Act, as it now stands, are exhausted. If the leaders of these 2 of the railroad's 24 unions choose to shut down the road by their strike and picket lines, there is nothing in the present law to stop them.

This threatened damage is not confined to the people and businesses of the District of Columbia and the 13 States directly served by this railroad. Other localities will be hurt in differing degrees. Here are some specific ways in

which Delaware can expect to suffer unless we act:

First. A good part of our State is devoted to farming; and some of our farmers rely heavily, or even exclusively, on this railroad to get their crops to market. This is especially true on the Delmarva Peninsula, which is largely agricultural, and which we share with our neighboring States of Maryland and Virginia. In fact, the Pennsylvania Railroad is the only railroad which serves that large area. One of our big crops there is soybeans; these are a bulky commodity for which railroad transportation is essential.

Delaware and the Eastern Shore are also the heart of the broiler industry, which is dependent on the railroads to bring in daily hundreds of tons of feed grains from other areas. To cut off this source of supply, which is essential to maintain the flocks, would mean economic ruin to many Eastern Shore farmers and poultrymen.

The food supply in many of our cities and other heavily populated areas would be seriously disrupted, and acute shortages would develop, under even a short suspension of operations.

Second. Although the railroad is being compelled to shut down by the leaders of only 2 of its 24 unions, the action idles the railroad's entire work force—both union and nonunion. Many hundreds of these men and women live in Delaware. There is nothing that they or the railroad can do about this loss of wages which is being forced on them at a time when few people, even those without families, can comfortably lose wages. This loss, by the way, is going to affect even more families in some of the larger States.

Third. A good many hundreds of Delaware men and women use the railroad to get to and from their daily work within the State or in Maryland and Pennsylvania. Also a good many men and women live in Maryland and Pennsylvania and work in Delaware, and use the railroad to go back and forth. The shutdown of the railroad will be a serious and costly inconvenience to all these people.

Fourth. Delaware has, as Senators know, a number of large manufacturing companies that are important to the national economy and to the national defense. Aside from helping to get people to and from their daily work in the plants and offices of these companies, the Pennsylvania Railroad is the one passenger railroad link for travel between these companies and the rest of the country.

Fifth. This railroad has a large responsibility for moving freight to and from these plants, which provide many thousands of jobs for our people. Dislocation of this freight service could mean serious unemployment for thousands of our men and women.

Sixth. Some of our light and power companies have to rely exclusively on this railroad for their coal supplies. The halting of the movement of these supplies could seriously disrupt the home life and the business life of considerable areas.

The Delmarva Peninsula will, of course, experience its share of inconvenience at interruption of important mail service.

This is a very serious public emergency. The intent of the Railway Labor Act was that the procedures set up therein would prevent any cessation of services and resulting inconveniences and hardships to the traveling and the shipping public. If this strike should come to pass, as is indicated, there would seem to be only one remedy for the protection of the public interest, and that would be compulsory arbitration.

I would regret very much the necessity of having to take such action. But if labor and management fail to carry on negotiations which will make it possible to avoid such serious resultant effects on the public, there will be no alternative. The public interest deserves and requires no less.

In making this statement, it is not my intention to take the side of either management or labor. Instead my purpose is to call attention to the economic loss that will be suffered by the public over a large section of the heaviest populated area of the Nation, should this strike be allowed to go into effect.

I call upon both management and labor to recognize that the interest of the general public is paramount in this question, and that arrangements should be made to keep these trains in operation pending a settlement.

If such an arrangement cannot be agreed upon, then the Federal Government should take the appropriate steps to protect the welfare of the general public.

Mr. FREAR. Mr. President, the threatened strike against the Pennsylvania Railroad is an issue of great and immediate concern to all of us.

The technicalities of the situation have been studied and assessed by experts, including a neutral referee and an Emergency Factfinding Board appointed by the President.

I do not propose to discuss them here, since my senior colleague has already given the findings. But it is a matter of public record that this board and another neutral tribunal made these findings.

It is likewise well established that management chose to accept the recommendations of these impartial factfinders, but the union persists in its demands and has announced there is "absolutely no hope" of settlement.

At this time the all-important issue of the public interest, as it is affected by the impending tie-up, is our main concern.

Mr. President, it would seem to me that this is the type of situation that should lend itself to reasonable discussion and traditional negotiation.

Let us remember that the present dispute does not involve wages, but rather work rules.

The public may well ask if it is to be inconvenienced by questions of this kind that should be settled within the house of labor and management jointly.

Is the interpretation of work rules sufficient reason to tie up a major carrier and inflict economic loss and hardship on the public, on private business, and on other railroad employees who are not involved? This is a situation that calls for responsibility.

It recommends statesmanship of an order and degree that will recognize the larger question of public interest and national welfare.

It does not make good sense to stop all trains on a major railroad, whose services are like a blood supply to large and vital sectors of the national economy, because one party to a dispute cannot agree—and this in the face of the findings of impartial boards.

Where would the world be today, Mr. President, in what kind of shape would it be, if every time a nation felt it could not have its own way it would take punitive action? The result would be chaos and worldwide destruction.

This is the reason why we have the United Nations—a place and a forum and an authority wherein differences can be roconciled by negotiation.

I earnestly hope and trust, Mr. President, that even at this late hour this threatened strike—so costly, so harmful to all parties involved—can be avoided.

FAILURE OF CONFERENCE ON MINIMUM WAGE BILL

Mr. PROUTY. Mr. President, on the eve of the failure of the committee of conference to reach agreement on a minimum wage bill, I want to extend my sympathies to the thousands of working men and women and their families whose standards of living would have been raised under such a bill, but who now must wait and wait and wait with no certainty of future action by Congress.

Why, indeed, Mr. President, did this conference fail? I wish I had all the answers to that question. I can only say that never at any time during the course of the conference was there anything resembling a common meeting ground. Is it possible, Mr. President, that there are those in high positions of congressional leadership who publicly profess to want a bill but who privately admit to preferring an issue?

Under the rules of the House, the Speaker has absolute authority in the appointment of conferees. The points of view, and the exact degree of intensity of those views, of each of the conferees appointed by the Speaker, were well known to Congress generally and to the Speaker in particular.

Was there no liaison between the junior Senator from Massachusetts, his running mate, the distinguished majority leader of the Senate, and the close friend of the Senate majority leader, Speaker RAYBURN?

Mr. President, compromise is the essence of democratic lawmaking, and it is for the purpose of reconciling honest differences among equally reasonable and equally patriotic men, and to provide them with a common meeting place, that Congress developed and maintains the institution of the conference committee.

During the course of the conference, I offered a number of compromise pro-

posals which were varied in scope and nature. It became clear at the first meeting that the House conferees were concerned about the term in the Senate bill "activity affecting commerce." It was apparent also that a majority of the Senate conferees felt that the coverage test in the House bill was unacceptable. The House text would bring under the Fair Labor Standards Act only those firms which have five or more establishments in two or more States. The House bill would exempt any chain operating solely within one State.

In short, Mr. President, very little discussion took place in conference as to what wage and hour levels we should have in the new bill or with respect to the number to be covered. Almost all discussion centered on this question of what method would be used to obtain coverage.

In an effort to bring the differing forces together, I offered a compromise which would apply the five establishment, in two or more States, test in combination with another test which would bring under the Fair Labor Standards Act any enterprise that purchased a million dollars worth of goods that moved directly across State lines to its place or places of business. Since it was the House view that two or more States had to be definitely involved in any test for coverage, and since it was the Senate view that some chains operating in just one State should be covered, I felt that my amendment provided a reasonable compromise.

Under this amendment presently covered workers would have received $1.15 and newly covered workers would have received $1.15 at the end of a 3-year period. The new workers would receive initially under this proposal $1.05.

The overtime provision in my first compromise was also designed to bring together the extremes of the House and Senate bills. It called for overtime after 44 hours.

The number of workers who would have been brought under the Fair Labor Standards Act by my first compromise was estimated to be 3.1 million. The major portion of this number, 2.7 million, would be from the retail trade.

I would point out, Mr. President, that this first compromise proposal specifically stated that all exemptions in the Senate-passed bill would be retained.

Mr. President, I regret to say that my first attempt to bring together the conferees failed. It was objected to by a majority of the Senate conferees on the ground that it covered only those intrastate firms that receive goods directly across State lines, and did not cover those firms that purchased from a wholesaler who, in turn, purchases goods that move across State lines.

Although the House conferees never had an opportunity to vote on it under the conference rules, there was an objection raised because the amendment contained the term "enterprise" which was used in the Senate bill in contrast to the term "employer" which was used in the House bill.

I ask unanimous consent that an outline of my first compromise proposal be inserted in the RECORD at this point.

There being no objection, the outline was ordered to be printed in the RECORD, as follows:

FIRST COMPROMISE PROPOSAL SUGGESTED BY SENATOR PROUTY

COVERAGE TEST

I. (a) Eliminate "Activity affecting commerce" concept in Senate-passed bill.

(b) Substitute for the "Activity affecting commerce" concept the term "Enterprise doing business in commerce to a substantial extent."

(c) "Enterprise doing business in commerce to a substantial extent" shall mean (1) any enterprise which has five or more establishments and who operates such establishments in two or more States; or (2) any enterprise that purchases merchandise, materials, or supplies that move directly across State lines to its place or places of business which amount in total annual dollar value to $1 million or more as measured by the preceding calendar or fiscal year.

(d) The substitution of the new coverage test would result in the elimination of 3(t) (1), (2), (3), (4), and (5) in the Senate-passed bill. All exemptions in the Senate-passed bill would be retained.

Wage rates

II. Minimum wage rate for presently covered workers: $1.15.

III. Minimum wage rate for newly covered workers: $1.05, 1961; $1.10, 1962; $1.15, 1963.

IV. Overtime for newly covered workers: Overtime after 44 hours.

Number of workers

V. Number of workers who would be brought under FLSA by compromise proposal: (a) 3.1 million (the major portion of this number—2.7 million—would be from the retail trade).

Mr. PROUTY. Mr. President, my second compromise proposal closely resembled the first except that it used the term "employer engaged in commerce" because of objections raised about problems that might be caused if we inserted the word "enterprise" in the Fair Labor Standards Act. This amendment was squarely rejected by a majority of the Senate conferees and, therefore, never voted upon by House Members. I ask unanimous consent that its text be inserted at this point in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

SECOND COVERAGE TEST PROPOSAL

I. (a) Substitute for the "Activity affecting commerce" concept the term "Employer engaged in commerce."

(b) "Employer engaged in commerce" means (1) any employer who has five or more establishments and who operates such establishments in two or more States; or (2) any employer who purchases for use in his business operations (exclusive of purchases for general maintenance, repairs or capital improvements) merchandise, materials or supplies that move directly across State lines to his place or places of business which amount in annual dollar value to $1 million or more as measured by the preceding calendar or fiscal year.

(c) The substitution of the new coverage test would result in the elimination of 3(t) (1), (2), (3), (4), and (5) in the Senate-passed bill. All exemptions in the Senate-passed bill would be retained.

WAGE RATES

II. Minimum wage rate for presently covered workers: $1.15.

III. Minimum wage rate for newly covered workers: $1, 1961; $1.05, 1962; and $1.10, 1963.

IV. Overtime for newly covered workers: Overtime after 44 hours.

NUMBER OF WORKERS

V. Number of workers who would be brought under FLSA by compromise proposal: (a) 3.1 million (the major portion of this number—2.7 million—would be from the retail trade).

Mr. PROUTY. Mr. President, in an effort to satisfy the objections which were raised to my first and second compromise proposal, I offered a third coverage test which substituted for the Senate-approved concept "activity affecting commerce" the term "employer engaged in commerce." "Employer engaged in commerce" was defined as meaning any employer who has five or more establishments in two or more States or any employer who purchases for use in his business $1 million worth of goods which have moved across State lines. Note the two significant changes this amendment brings forth which the first did not contain. It substitutes the term "employer" for "enterprise." It also would include in the coverage test purchases of material even though such purchases did not move directly across State lines to the retail firm to which the test is to be applied.

What happened to the amendment? I accepted two slight modifications of it which hiked the $1 million inflow figure to $1½ million and made more clear the fact that the test involved both direct and indirect inflow.

Mr. President, the amendment as modified was accepted by a majority of the Senate conferees, but rejected by a majority of the House conferees.

I ask unanimous consent that an outline of my third compromise amendment be inserted in the RECORD at this point.

There being no objection, the outline was ordered to be printed in the RECORD, as follows:

THIRD COVERAGE TEST PROPOSAL

I. (a) Substitute for the "Activity affecting commerce" concept the term "Employer engaged in commerce."

(b) "Employer engaged in commerce" means (1) any employer who has five or more establishments and who operates such establishments in two or more States; or (2) any employer who purchases for use in his business operations (exclusive of purchases for general maintenance, repairs or capital improvements) merchandise, materials or supplies which have moved across State lines and which amount in annual dollar value to $1 million or more as measured by the preceding calendar or fiscal year.

Mr. PROUTY. Mr. President, since the conferees rejected a coverage test which involved direct purchases across State lines, and since the conferees also rejected a coverage test involving both direct and indirect purchases across State lines, I decided that any compromise reached would have to be based on some other concept.

It was with this thought in mind that I drafted a fourth compromise proposal which contained the following coverage test: First, it would have brought under the Fair Labor Standards Act certain employers with five or more establishments in two or more States. It would have also brought under the wage and

hour law certain employers who derive $2 million or more in annual gross sales from activities which depend on or further movement in commerce of goods. In other words, Mr. President, it was a $2 million sales test.

The fourth compromise proposal would also have maintained all of the exemptions in the Senate-passed bill and would have provided a minimum wage rate of $1.15 for presently covered workers and $1 for newly covered workers.

In the course of discussion, Mr. President, I accepted amendments to this fourth compromise proposal so that the proposal would have extended to firms with two or more establishments in two or more States rather than five such establishments. I also accepted amendments which would have hiked the minimum wage rate for newly covered workers from $1.00 to $1.15 over a 3-year period.

As amended my proposal would have provided overtime for newly covered workers according to the following schedule: First year, overtime after 46 hours; second year, overtime after 44 hours; third year, overtime after 42 hours; fourth year, overtime after 40 hours.

Mr. President, this fourth compromise of mine was approved by the Senate conferees by a vote of 4 to 3, but was rejected by a House conferee vote of 2 to 5.

Mr. President, for the information of all Senators, I ask unanimous consent to have printed at this point in the RECORD my fourth coverage test proposal as introduced, to be immediately followed by the text of the fourth proposal as amended.

There being no objection, the proposals were ordered to be printed in the RECORD, as follows:

FOURTH COVERAGE TEST PROPOSAL AS INTRODUCED

I. (a) Eliminate activity affecting commerce concept in Senate-passed bill.

(b) Substitute for the "Activity affecting commerce" concept the term "employer engaged in commerce."

(c) "Employer engaged in commerce" means (1) any employer who has five or more establishments and who operates such establishments in two or more States; or (2) any employer who derives $2 million or more in annual gross sales from activities depending on, or furthering, movement or travel in commerce of persons, or goods, or of communications or otherwise requiring or enabling persons to engage in commerce or in the production of goods for commerce.

(d) The substitution of the new coverage test would result in the elimination of 3(t) (1), (2), (3), (4), and (5) in the Senate-passed bill. All exemptions in the Senate-passed bill would be retained, including the $250,000 establishment exemption.

WAGE RATES

II. Minimum wage rate for presently covered workers: $1.15.

III. Minimum wage rate for newly covered workers: $1.

IV. Overtime for newly covered workers:

FOURTH COVERAGE TEST PROPOSAL AS AMENDED

I. (a) Eliminate activity affecting commerce concept in Senate-passed bill.

(b) Substitute for the "Activity affecting commerce" concept the term "employer engaged in commerce."

(c) "Employer engaged in commerce" means (1) any employer who has two or more establishments and who operates such establishments in two or more States; or (2) any employer who derives $2 million or more in annual gross sales from activities depending on, or furthering, movement or travel in commerce of persons, or goods, or of communications or otherwise requiring or enabling persons to engage in commerce or in the production of goods for commerce.

(d) The substitution of the new coverage test would result in the elimination of 3(t) (1), (2), (3), (4), and (5) in the Senate-passed bill. All exemptions in the Senate-passed bill would be retained, including the $250,000 establishment exemption.

WAGE RATES

II. Minimum wage rate for presently covered workers: $1.15.

III. Minimum wage rate for newly covered workers: $1 first year, $1.05 second year, $1.15 third year.

IV. Overtime for newly covered workers: First year, overtime after 46 hours; second year, overtime after 44 hours; third year, overtime after 42 hours; fourth year, overtime after 40 hours.

Mr. PROUTY. Mr. President, after I found myself in the position of having four compromise proposals turned down because the Senate and House conferees could not agree on the method to be used in bringing about new coverage, I worked out a fifth compromise proposal which no one could deny would apply strictly to employers in interstate commerce. Yet at the same time, Mr. President, it was sufficiently broad in scope so that it would have brought under the Fair Labor Standards Act 2,840,000 workers, a compromise figure midway between the coverage contained in the House and Senate bills.

This fifth and last compromise proposal was made up of two tests to give protection to newly covered workers. The first test would have given wage and hour safeguards to people who work for an employer who has two or more establishments in two or more States. The second test, Mr. President, would have brought under the wage-and-hour law the employees of any employer who gets $100,000 or more in receipts from interstate sales. Note carefully how this proposal attempts to bridge the gap between the extreme positions of various conferees. A majority of the Senate conferees wanted to cover some chains whose establishments were located in only one State. My fifth compromise proposal would have reached many of these chains, because a number of them do at least $100,000 worth of business with customers who live in another State.

Consider any large department store in Washington, D.C., for example. It would have customers in Virginia and Maryland who ordered articles from it. Under my proposal, if such a store in Washington, D.C., had sales totaling $100,000 to these customers from Maryland and Virginia, it would be covered.

Note also, Mr. President, how my fifth compromise proposal was an attempt to meet the view of the House conferees that a firm should only be covered if it does business in two or more States. Certainly a Maryland department store that ships merchandise to a customer in Virginia is in interstate commerce.

The amendment also contained suggested wage rates and overtime rates for presently covered and newly covered workers. They were not rates to which I was wedded. I would have much preferred a more generous schedule, but, again, I was attempting to subordinate my own desires to my overall wish to get an acceptable bill.

I would point out also, Mr. President, that my fifth and last compromise proposal would have given some measure of protection to 2,840,000 new workers.

What happened to this fifth and last compromise proposal? It never even got to a vote among the House conferees because it was flatly rejected by a majority of the Senate conferees.

Why was it rejected? It was not rejected, Mr. President, because of the wage rate schedule. I made it very clear that I was willing to accept amendments to this schedule. Nor, Mr. President, was it rejected because it covered 2,840,000 workers.

It was turned down because a majority of the Senate conferees were not so much concerned with the question of how many workers were involved, but what method was used to bring them under the Fair Labor Standards Act. A majority of the Senate conferees were absolutely and irrevocably wedded to the idea that we must have some method of coverage which will get all—and I repeat—all intrastate—and I repeat—intrastate firms which do approximately the same volume of business no matter how little or how great their connection with commerce might be.

I ask unanimous consent, Mr. President, to have my fifth proposal printed at this point in the RECORD.

There being no objection, the proposal was ordered to be printed in the RECORD, as follows:

FIFTH COVERAGE TEST PROPOSAL

I. (a) Eliminate activity affecting commerce concept in Senate-passed bill.

(b) Substitute for the "Activity affecting commerce" concept the term "employer engaged in commerce."

(c) "Employer engaged in commerce" means (1) any employer who has two or more establishments and who operates such establishments in two or more States; or (2) any employer who derives $100,000 or more in annual receipts from interstate sales.

(d) The substitution of the new coverage test would result in the elimination of 3(t) (1), (2), (3), (4), and (5) in the Senate-passed bill. All exemptions in the Senate-passed bill would be retained, including the $250,000 establishment exemption.

WAGE RATES

II. Minimum wage rate for presently covered workers: $1.15.

III. Minimum wage rate for newly covered workers: $1.

IV. Overtime for newly covered workers:

V. Number covered: 2,840,000.

Mr. PROUTY. Mr. President, I do not know what would have been the fate of this fifth and last compromise proposal if under the conference rules the House conferees had had an opportunity to vote on it, but I do know, Mr. President, that the American public has a right to express its genuine disappointment about the inflexibility and im-

mutability of a majority of both conference groups.

Such obstinacy, Mr. President, calls to my mind the behavior of a poor little rich boy whose parents always bought him everything he wanted, including all kinds of sports equipment. The poorer kids needed his equipment to play baseball, but he insisted that they play according to his rule, and if they did not, he would pick up his equipment and run home to "daddy."

In that case, I always felt sorry for the poor little rich boy who thought he had to have his own way. I feel sorry, too, Mr. President, that the conference committee has run home to "daddy," and has run away from the poor children and poor families who need their help.

For 7 years the President has recommended an extension of wage and hour coverage to new workers. For 7 lean years, 5 of which the Democratic Party has held control of Congress, there has been no bill sent to the White House.

Those who have waited help for 7 years might indeed echo the cry: "How long, oh Lord, how long!"

The answer to that question may well lie within the bosom of the majority leader and the majority leader's leader.

Are we going to have a law or an issue which will be exploited until November 7, and forgotten thereafter?

AUTHORIZATION FOR SELECT COMMITTEE ON SMALL BUSINESS TO SUBMIT REPORT SUBSEQUENT TO ADJOURNMENT

Mr. WILLIAMS of New Jersey. Mr. President, I ask unanimous consent that the Select Committee on Small Business be authorized, during the adjournment of the second session of the 86th Congress, to file with the Secretary of the Senate a report entitled "Case Study in Subcontracting by Weapon-System Contractor," and that the report be printed along with any individual, supplemental, or minority views.

The PRESIDING OFFICER. Without objection, it is so ordered.

MIGRATORY AGRICULTURAL LABOR

Mr. WILLIAMS of New Jersey. Mr. President, as chairman of the Subcommittee on Migratory Labor during the past year, I have had to learn a great deal about the problems facing the American migratory agricultural worker and his employers. These problems call for solutions founded on sound legislative judgment and this requires careful study and analysis of the facts.

Migratory agricultural workers move with and work in three northbound main streams: one along the east coast, another through the Midwest, and the third up the west coast.

The northeastern area of migratory agricultural labor has been excellently described by Mr. Kennett Love in the Monday, August 29, New York Times. In discussing, among other aspects, the social environment in this section, he notes that—

Good and bad, nearly all the camps are situated away from the main roads, isolated from the farmsteads and rural communities. Neither the camps nor the migrants come often into the awarness of the society within which they exist.

Because of the many variables in the agricultural scene, as well as the transient habits of the migratory agricultural worker, the task of writing an accurate and informative article about any part of this area is indeed imposing. The need for such writing is crucial both for the public and for the legislators. Mr. Love's fine article evidences thorough research and will be most helpful to us in achieving a more complete understanding of the northeastern part of this complex problem.

Therefore, I ask unanimous consent that the following article from the Monday, August 29, New York Times be inserted in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

INFLUX OF MIGRANT WORKERS AT PEAK ON FARMS IN EAST

(By Kennett Love)

The annual tide of tattered humanity that follows the harvest up the Atlantic seaboard has reached its high mark in New York and adjacent States. About 60,000 migrant farm workers—men, women, and teenagers, and uncounted myriads of children—have settled for the duration of the "pickin' season" in hundreds of camps scattered among the bean patches and orchards of upstate New York, the vast potato fields of Long Island, the truck gardens of New Jersey, and the shrouded stands of tobacco in the Connecticut Valley.

"Tell me, Mister, how is the potato crop down in Jersey?" asked the spokesman for a hundred migrants newly arrived at a camp near the shore of Lake Ontario. "Potatoes coming in so slow around here that we don't get much work even when the sun shines."

ONE HUNDRED IN FIVE TRUCKS

Eighty grownups and twenty children, the group had come in two stages all the way from Lake Okeechobee, Fla., in five battered, stake-sided, tarpaulin-covered trucks. The trip had been broken by a few weeks of potato picking in North Carolina.

On the road they jolted northward day and night, pausing only to eat and stretch, because neither in the segregated South nor in the North could they find or afford a night's lodging, except in the work camps.

Some of the camps are squalid clusters of tar paper shacks or cooplike barracks of weathered wood and tin on plots of dust or mire, depending on the weather.

Large families are crowded into a single cubicle to sleep, cook, and eat. They lack electricity, screens, or garbage can lids, and have, in place of plumbing, a hand pump out front and a couple of privies out back. State regulations are on the way toward eliminating or improving the worst camps.

SOME CAMPS IMPROVED

Many camps, some of them not much better to look at, are equipped with showers and other plumbing and screened in accordance with health codes. The buildings are sturdier and more comfortable, sometimes of cinder block construction, and the rooms may be provided with bottled-gas stoves instead of kerosene burners.

One large men's camp maintained by the Connecticut shade-grown tobacco planters in a landscaped grove near Poquonock is said to have cost nearly a million dollars, and it looks it.

Good or bad, nearly all the camps are situated away from the main roads, isolated from the farmsteads and rural communities. Neither the camps nor the migrants come often into the awareness of the society within which they exist. Senator HARRISON A. WILLIAMS, Democrat, of New Jersey, and chairman of the Senate Subcommittee on Migratory Labor, has called them the forgotten people.

MILLION ON ROAD

The Atlantic migration stream is part of a pattern in which a million people, from coast to coast, move northward "on the season" every year.

The larger and better known part of the pattern is the migration up through the Midwest, the Great Plains, and the Pacific States that has attracted both legal and illegal immigrants from Mexico, the latter known as "wetbacks." Nearly half a million Mexicans and a similar number of Americans, chiefly of Mexican origin or Negroes, make the yearly harvest trek west of the Appalachian mountain chain.

The sources of the Atlantic seaboard stream are mainly in the colored quarters that sprawl out into the pines and palmetto on the poor side of southern towns.

The stream is fed also from the sugarcane and tobacco fincas of Puerto Rico by Spanish-speaking men who flock to San Juan to take the $45 airplane trip north. A smaller current joins the stream from the West Indies. And a few white "knights of the road" come into the migration from the skid rows of the Central Atlantic and New England cities.

Much of the movement is prompted by dire economic need. Lois Garrison, a young woman from Palmetto, Fla., explained it in simple terms one rainy, workless day this month in a camp near Cranbury, N.J.

"If you don't get no work in the summer," she said, "the rent man's going to shut you right out the door."

LEFT CREW IN VIRGINIA

She had come up "freewheeling" in search of work after leaving a crew that had completed a harvesting contract in Virginia.

Other migrants, including some substantial, provident citizens, come north as much for the opportunity to travel as for economic reasons.

Mrs. Willie Brown, in a beanpickers' camp in the Genesee Valley, complacently broke snap beans into canning lengths on a recent evening as she told how she took leave every summer from a permanent job as a cook in Sanford, Fla., to work in the northern New York climate. She has entered her eldest daughter in Tallahassee University and plans to send her other three children to college.

In "Tobacco Valley" along the Connecticut River, 2,250 Negro youths and girls from southern high schools and colleges are nearing the end of a 10-week season harvesting the delicate leaves of tobacco grown in the shade of vast canopies of cotton netting.

Alphonzo R. Liggins, a grammar-school teacher of Goldsboro, N.C., who brought 168 students to a dormitory camp at Broadbrook, Conn., said the students would take home up to $400 each. It is the 24th Connecticut season for students from his school.

Students, smaller and slimmer than adults, are preferred for the early part of the harvest, when the lower leaves of the 8- to 10-foot stalks are picked, because they can move among the close-set rows without damaging the plants.

Although most migrants' lives are disorganized, precarious, and impoverished to a degree unknown in other sectors of society, they bear their lot with a resignation that is more often cheerful than gloomy.

"They make very few complaints," said Samuel P. Singletary, employment practice representative of the State labor department. "Mostly, they're just interested in getting work and aren't much concerned about living conditions. And some are

mainly interested in seeing New York and will lay off every couple of days."

EARNINGS AVERAGE $859

As agricultural workers, migrants are excluded from Federal minimum wage and unemployment compensation laws. Secretary of Labor James P. Mitchell has estimated that the average migrant in 1957 worked 131 days and earned $859—about $6.55 a day.

Frank Pixley, a large employer of migrants on his Genesee County, N.Y., string bean harvest, asserts that growers do not want to pay low wages but that low produce prices force them to. He concedes that he has paid harvesters 70 cents for each 35-pound hamper of beans since 1946, but he observes that in the same period his own return on each ton of beans had dropped from $125 to $113.40. A good worker can pick up to 20 hampers in a day.

Hourly wage rates vary from 80 cents in New Jersey's truck gardens to 95 cents in the tobacco fields of Connecticut.

In the last decade progress has been made toward regulating the agricultural migration by the annual worker plan administered by State farm placement service agents and financed by Federal funds.

Planning begins in February and March when local State employment officials obtain estimated labor requirements and job orders from farmers in participating States from South Carolina to Massachusetts and Vermont.

Then the farm placement service agents go to Florida to lay out a comprehensive schedule of the migratory labor demands for harvests phased progressively northward. The trekking begins as early as April as Florida harvesting tapers toward a close.

A typical schedule was that worked out last year for Alvin Braboy of Lakeland, Fla., whose crew at first consisted of 11 families—23 adults and 6 children.

The crew picked oranges, tangerines, and grapefruit in Florida until June 20. Then it moved up to Painter, Va., to dig potatoes until July 20. From July 25 to September 7 it picked tomatoes in Trappe, Md., and arrived in Linlithgo, N.Y., September 9 to harvest apples and grapes.

On November 10, Alvin Braboy and his crew took to the road again in a truck, a bus, and two cars, Florida bound, to start again on the oranges, tangerines, and grapefruit.

The employment record shows that the Braboy crew stuck remarkably close to a schedule subject to variations imposed by the weather, produce market conditions, sickness and often-recurring breakdowns of its dilapidated vehicles.

The record also shows that when the crew started south its composition had changed to 3 families with 7 children, 11 unattached men and 1 unattached woman.

Similar fluctuations are disclosed by the records of many of the 371 crews brought into New York State last year by registered leaders.

Statistically, the migrant problem is a nightmare. There is no certainty that workers who have stopped in more than one State have not been counted more than once. A similar uncertainty exists regarding migrants joining and leaving crews during the season.

It has been estimated that up to 40 percent of the whole migration are free wheelers, crews and families who travel without work agreements with farmers. And many crews contract with farmers outside the annual worker plan.

New York is the largest user of migrant labor among the Eastern States, having employed last year some 31,500 southern Negroes and nearly 5,000 Puerto Ricans. Of the Puerto Ricans 1,144 were under contract and the rest were walk-ins who came without work assurances.

CONNECTICUT PLAN

New Jersey reported an August peak of 25,600 seasonal farmworkers last year but nearly half were day hauls, workers recruited at dawn shape-ups from the Negro and Puerto Rican neighborhoods of Philadelphia and other Pennsylvania and New Jersey cities and returned home at night. The New Jersey migrant workers last year included 3,000 southern Negroes and more than 8,000 Puerto Ricans, three-quarters of whom came on contract.

Connecticut differs from other Eastern States in that no families accompany workers going there under formal agreements, although some walk-in families arrive. Connecticut this season has 1,200 West Indians and 1,350 Puerto Ricans in addition to the 2,250 southern students.

The present pattern of agricultural migration is a post-World War II development, although it has been influenced by wartime and prewar economic and technological developments.

A major factor has been the disappearance of local seasonal labor as the immigrant groups that formerly did it moved up the economic ladder into industrial and white-collar jobs.

Nelson Hopper, director of the State Farm Placement Bureau in Rochester, said:

"Fifteen years ago the farmer, his family and local workers did 90 percent of the harvest. Now they handle maybe as little as 25 percent and they need migrants for the rest."

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent, the following additional routine business was transacted:

REPORT OF COMMITTEE ON ARMED SERVICES

By unanimous consent, the following report of a committee was submitted:

By Mr. RUSSELL, from the Committee on Armed Services, with amendments:

H.R. 5132. An act to amend title 10, United States Code, with respect to active duty agreements for reserve officers, and for other purposes (Rept. No. 1935).

EXECUTIVE REPORT OF A COMMITTEE

As in executive session,

The following favorable report of a nomination was submitted:

By Mr. DODD, from the Committee on the Judiciary:

J. Joseph Smith, of Connecticut, to be U.S. circuit judge for the second circuit.

AMENDMENT OF WAR CLAIMS ACT OF 1948 TO PROVIDE COMPENSATION FOR CERTAIN WORLD WAR II LOSSES—AMENDMENTS

Mr. KEATING. Mr. President, I send to the desk, and ask to have printed and lie on the table, for the information of Senators, certain amendments to the war claims bill, H.R. 2485, reported yesterday from the Committee on the Judiciary. This is an extremely important bill, Mr. President. It deals with American war damage claims which have been passed over for more than 14 years in the enactment of legislation by the Congress for the recognition and payment of other types of American war losses. My amendments are designed to improve the bill in the following particulars:

First, the category of eligible claimants would be broadened, so as to include individuals who are American citizens on the date of the bill's enactment into law.

Second, provisions for the payment of the claims from the net proceeds of former enemy vested assets, as provided for in the bill as passed by the House, would be restored.

Third, among the types of claims authorized are claims for the removal of American-owned capital and other industrial equipment in Germany for reparation purposes.

Finally, there would be added provisions authorizing the Attorney General to dispose of any vested properties that may be affected by pending litigation, with full safeguards for just compensation to any successful litigant in any suit brought for the return of such properties.

The background of these amendments and the problems involved in them are quite fully explained in the supplemental views attached to the committee's report (S. Rept. 1934). I feel very strongly that they are needed in order to make the bill a fully rounded war claims measure. The absence from the bill of the provisions found in the changes I am recommending is extremely regrettable. Although H.R. 2485, as reported from the committee, is a long overdue recognition of the importance of the war claims problem, it is, in my judgment, seriously defective in the areas I have indicated.

We can no longer blind ourselves to the need for immediate action in the matter of these claims, but neither can we turn our backs upon the proper handling of the matter by making a half-hearted gesture, as proposed in the bill as it comes to us from the committee.

Mr. President, I ask unanimous consent that the text of my amendments be printed at this point in the RECORD.

The PRESIDING OFFICER. The amendments will be received, printed, and will lie on the table; and, without objection, the amendments will be printed in the RECORD.

The amendments are as follows:

On page 8, line 8, following the comma, insert the following: "or on the date of enactment of this title are".

On page 12, line 17, amend that portion of subsection (a) of proposed section 213 preceding paragraph (1) to read as follows:

"SEC. 213. (a) The Secretary of the Treasury shall pay out of the War Claims Fund on account of awards certified by the Commission pursuant to this title as follows and in the following order of priority:"

SEC. 2. On page 17, line 5, amend section 5 of the bill to read as follows:

"SEC. 5. Section 39 of the Trading With the Enemy Act is amended by adding at the end thereof the following new subsection:

"(d) The Attorney General is authorized and directed to cover into the Treasury from time to time for deposit in the War Claims Funds such sums from property vested in him or transferred to him under this Act as he shall determine in his discretion not to be required to fulfill obligations imposed under this Act or any other provision of law, and

not to be the subject matter of any judicial action or proceeding. There shall be deducted from each such deposit 5 per centum thereof for expenses incurred by the Foreign Claims Settlement Commission and by the Treasury Department in the administration of title II of the War Claims Act of 1948. Such deductions shall be made before any payment is made pursuant to such title. All amounts so deducted shall be covered into the Treasury to the credit of miscellaneous receipts."

On page 7, following line 17, insert the following:

"(f) losses resulting from the removal of industrial or other capital equipment in Germany owned, directly or indirectly, by a national of the United States on the date of removal and removed for the purpose of reparations including losses from any destruction of property incident to such destruction."

On page 18, following line 10, add a new section 6 to read as follows:

"SEC. 6. Section 9(a) of the Trading With the Enemy Act, as amended, is amended by striking out the period at the end thereof and inserting in lieu thereof a colon and the following: *'Provided further*, That upon a determination made by the President, in time of war or during any national emergency declared by the President, that the interest and welfare of the United States require the sale of any property or interest or any part thereof claimed in any suit filed under this subsection and pending on or after the date of enactment of this proviso the Alien Property Custodian or any successor officer or agency may sell such property or interest or part thereof, in conformity with law applicable to sales of property by him, at any time prior to the entry of final judgment in such suit. No such sale shall be made until thirty days have passed after the publication of notice in the Federal Register of the intention to sell. The net proceeds of any such sale shall be deposited in a special account established in the Treasury, and shall be held in trust by the Secretary of the Treasury pending the entry of final judgment in such suit. Any recovery of any claimant in such suit in respect of the property or interest or part thereof so sold shall be satisfied from the net proceeds of such sale unless such claimant, within sixty days after receipt of the notice of the amount of net proceeds of sale serves upon the Alien Property Custodian, or any successor officer or agency, and files with the court an election to waive all claims to the net proceeds, or any part thereof, and to claim just compensation instead. If the court finds that the claimant has established an interest, right, or title in any property in respect of which such an election has been served and filed, it shall proceed to determine the amount which will constitute just compensation for such interest, right, or title, and shall order payment to the claimant of the amount so determined. An order for the payment of just compensation hereunder shall be a judgment against the United States and shall be payable first from the net proceeds of the sale in an amount not to exceed the amount the claimant would have received had he elected to accept his proportionate part of the net proceeds of the sale and the balance, if any, shall be payable in the same manner as are judgments in cases arising under section 1346 of title 28, United States Code. The Alien Property Custodian or any successor officer or agency, shall, immediately upon the entry of final judgment, notify the Secretary of the Treasury of the determination by final judgment of the claimant's interest and right to the proportionate part of the net proceeds from the sale, and the final determination by judgment of the amount of just compensation in the event the claimant has elected to recover just compensation for the interest in the property he claimed.'"

On page 18, line 11, renumber section 6, as section 7.

On page 18, following line 15, strike out the text of the amended title and insert: "An act to amend the War Claims Act of 1948, as amended, to provide compensation for certain World War II losses, and to amend the Trading With the Enemy Act, as amended."

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. THURMOND. Mr. President, under the order previously entered, I move that the Senate adjourn until 10 o'clock a.m. tomorrow.

The motion was agreed to; and (at 8 o'clock and 34 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow Wednesday, August 31, 1960, at 10 o'clock a.m.

WITHDRAWALS

Executive nominations withdrawn from the Senate August 30 (legislative day of August 24), 1960:

POSTMASTERS

Mrs. Cecile M. Hill to be postmaster at Tok, in the State of Alaska.

Mrs. Florabelle Rominger to be postmaster at Bangor, in the State of California.

Donald E. Trees to be postmaster at Armstrong, in the State of Iowa.

HOUSE OF REPRESENTATIVES

TUESDAY, AUGUST 30, 1960

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Psalm 55: 22: *Cast thy burden upon the Lord, and He shall sustain thee.*

O Thou Lord God omnipotent, may we daily unburden ourselves humbly and reverently to Thy listening ear and understanding heart for Thou alone canst supply all our temporal needs and satisfy our eternal longings.

We penitently confess that we so frequently fail to see life in its true perspective and are tempted to enter upon the duties and responsibilities of a new day with fear and foreboding.

Grant that we may appropriate Thy overtures of friendship more courageously and avail ourselves more eagerly of those moral and spiritual resources which Thou hast placed at our disposal to sustain us.

Hear us in the name of our Master. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 11561. An act to authorize and direct the Secretary of the Army to convey part of lock and dam No. 10, Kentucky River, Madison County, Ky., to the Pioneer National Monument Association for use as part of a historic site; and

H.R. 13053. An act to increase the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3258. An act to amend the District of Columbia Alcoholic Beverage Control Act.

The message also announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 1870. An act to provide for examination, licensing, registration, and for regulation of professional and practical nurses, and for nursing education in the District of Columbia, and for other purposes; and

S. 3648. An act to authorize the Commissioners of the District of Columbia on behalf of the United States, to transfer from the United States to the District of Columbia Redevelopment Land Agency title to certain real property in said District.

WATERSHED PROTECTION AND FLOOD PREVENTION PROJECTS

The SPEAKER. The Chair laid before the House the following communication which was read by the Clerk, and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON AGRICULTURE,
Washington, D. C., August 29, 1960.

Hon SAM RAYBURN,
The Speaker,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of section 2 of the Watershed Protection and Flood Prevention Act, as amended, the Committee on Agriculture has today considered the work plans transmitted to you by Executive Communications 2394 and 2306 and referred to this committee and unanimously approved each of such plans. The work plans involved are:

State	Watershed	Exec. Comm.
Texas	Kickapoo Creek	2394
Oklahoma	Timber Creek	2394
Maryland	Long Marsh	2394
Virginia	Beaver Creek	2306
New Mexico	Upper Gila Valley	2306
Mississippi	Bentonia	2306
Hawaii	Waianae Nui	2306
Georgia	Sandy Creek	2306
Colorado	Franktown-Parker tributaries of Cherry Creek.	2306

Sincerely yours,
HAROLD D. COOLEY,
Chairman.

SUBCOMMITTEE ON ELECTIONS, COMMITTEE ON HOUSE ADMINISTRATION

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Subcommittee on Elections of the Committee on House Administration may sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

SUPPLEMENTAL APPROPRIATIONS, 1961

Mr. THOMAS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 13161) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes, with amendments of the Senate thereto, disagree to the amendments of the Senate and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. GROSS. Reserving the right to object, I understand this is a request to send to conference the supplemental appropriation bill.

Mr. THOMAS. That is correct.

Mr. GROSS. Then, I think a little review of this situation is in order.

Mr. THOMAS. I think the question is timely, and I am glad the gentleman asked the question.

Mr. GROSS. If I remember correctly, on last Friday the House had before it and adopted the conference report on the foreign aid bill.

Mr. THOMAS. Let me review it briefly for the gentleman.

Mr. GROSS. Just a moment. The House had before it the conference report on the foreign aid bill, and that report was the product of a free and untrammeled conference between the House and Senate. Is that correct?

Mr. THOMAS. Yes.

Mr. GROSS. Then about an hour and a half later the gentleman from Texas called up the deficiency appropriation bill. Is that correct?

Mr. THOMAS. That is correct.

Mr. GROSS. That was sent to the other body only last Friday and yesterday afternoon it was messaged back with some $190 or $200 million added to it.

Mr. THOMAS. $215 million, in round figures, was added by the other body.

Mr. GROSS. Practically all of which should have been in the foreign aid bill if it was to be appropriated at all.

Mr. THOMAS. $190 million of it was in the foreign aid bill.

Mr. GROSS. I ask the gentleman this question: Why was not this money put in the bill when the conference was held on the mutual security bill?

Mr. THOMAS. The gentleman is asking me a question I cannot answer. Let me explain what the facts are and what we are up against. I might say I am in sympathy with the position of the gentleman from Iowa. We had a budget estimate—I am referring to the deficiency bill, covering some 40 items, $118 million. The House reduced that amount to about $90 million. Then the other body meets and they add about $215 million over and above the $90 million as it left the House, some 35 or 40 additional amendments. Of that $215 million $190 million was for the mutual security program. What we are seeking to do here is to go to conference, and we will inquire why it is the other body will march up the hill one day and down the hill the next day to the tune of $190 million.

Mr. GROSS. Your subcommittee which is in charge of the deficiency appropriation bill never held a single day's hearings on the appropriation for mutual security, did you?

Mr. THOMAS. Technically you are right. We discussed the items yesterday with the Under Secretary of the State Department, Mr. Dillon, but that covered the sum and substance of it.

Mr. GROSS. This is the strangest proceeding I have heard of in my time in the House. We have before us today a deficiency appropriation bill and it is in such shape that one of the most distinguished and veteran Members of the other body declined to serve as a conferee, saying in effect that he would be ashamed to face the Members of the House in defense of what had transpired in the Chamber in which he serves.

Mr. THOMAS. May I say to the distinguished gentleman that he is 100 percent correct in everything he has said. Of course the House has not passed on the actions of the other body. The purpose of the conference is to give the House an opportunity to be heard. I hope the distinguished gentleman will uphold the hands of the House.

Mr. GROSS. I yield to the gentleman from Louisiana [Mr. PASSMAN].

Mr. PASSMAN. Mr. Speaker, it has been my great privilege to serve as chairman of the Foreign Operations Subcommittee for 6 years. I think perhaps I can contribute something to the matter under consideration.

The subcommittee, and at a subsequent date, the full committee, and at another date, the House approved the action of the subcommittee and the full committee. It was my privilege to take the bill to conference last Thursday. We made substantial concessions, brought the bill back $131,850,000 above the original House bill. The total called for was $490 million more than we appropriated last year. There was complete agreement with two or three reservations. Inasmuch as I have spent 6 years on this matter, took 10,000 pages of transcript this year, having had the support of the full committee and the House on two occasions, and inasmuch as not a single member of the Deficiency Appropriations Subcommittee has asked me one single question about one single item in this bill, I do not believe that the subcommittee intends to allow one additional dime or intends for any of the language to be amended. I could not imagine the members of this subcommittee going to conference on this bill to put back what we agreed to take out last Thursday without at least consulting some member of the subcommittee that has been holding hearings for years.

I am just as confused as the gentleman from Iowa. I do not believe that the House would ever reverse its decision, but on that we will just have to wait see.

Mr. GARY. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Virginia, a ranking member of Appropriations Subcommittee which spent many long weeks in hearings on the foreign aid bill.

Mr. GARY. May I say to the gentleman that there is far more involved in these proceedings than mere dollars. Using the slang of the day, $190 million "ain't hay"; it is a considerable sum of money, But the integrity of the committee system in the House of Representatives and in the Congress of the United States is at stake in these proceedings.

Our subcommittee has sat day after day, week after week, month after month hearing numerous witnesses form various parts of the world on foreign aid. Our members have traveled extensively gathering information. We brought in what we believed was a fair bill. The House adopted that bill. It went over to the other body. It was increased. Then according to regular parliamentary procedure and the rules of both bodies, we went into conference with the other body and we reached a fair and impartial compromise in the conference committee, agreed to in writing by both the Senate and the House conferees. The conference report was adopted by this body and also by the Senate. Subsequently the Senate put back every dollar that had been deleted in the conference, put it back in this bill.

The gentleman is correctly informed, according to my information, that one of the conferees of the Senate felt that this was such an improper action that he absolutely refused to sit on another conference on this bill. I feel that the integrity of the entire system is involved. If the House yields 1 inch in this matter I think it will be disastrous to our entire congressional system of procedure.

Mr. GROSS. I thank the gentleman.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Louisiana.

Mr. PASSMAN. I wish to clear up a possible misunderstanding. I did mention to each of the five conferees who will represent the House, the principle involved, but not the details of the bill. I have not discussed it with the leadership on either side or the leadership in the other body. I did discuss the principle involved with the five members who I assume will be the conferees on the part of the House, but not the details of the bill in any respect.

Mr. THOMAS. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield.

Mr. THOMAS. Mr. Speaker, may I assure the House that your House conferees will demand a very complete and a very adequate answer from the other body as to why they marched up the hill one day and marched down the hill the next day. I assure you we will do that.

Mr. PASSMAN. I want to assure the Members of the House that if I am given the same amount of time that was awarded Mr. Dillon yesterday morning, and if I cannot refute what Secretary Dillon has said and what Mr. Murphy has said and what the Members on the other side have said, if I cannot refute

that successfully I will withdraw my objection and support their position. If I cannot do that I should no longer serve as chairman of the subcommittee, but I do ask an opportunity to explain to the House something about this matter and how we are being run out on in connection with a sound agreement we obtained last Thursday and approved by this House last Friday.

Mr. GROSS. This is a thoroughly unwarranted and in many respects a shameful proceeding. Mr. Speaker, I must object.

Mr. THOMAS. Mr. Speaker, may I ask the gentleman from Iowa to let this bill go to conference. There is a good deal involved in this matter, a good deal involved besides dollars and cents. I do hope that our distinguished friend will let this bill go to conference so that we can work out the entire 86 items in disagreement to the satisfaction of the membership of the House. I sincerely hope my friend will not object. Let us get this thing to conference and get out of here.

Mr. GROSS. That is the point I have been trying to make. The sum of $190 million is important but of equal importance is the integrity of the House and its committees.

Mr. THOMAS. Yes; it is.

Mr. GROSS. The situation with which we are faced clearly violates the orderly procedures of the House.

Mr. THOMAS. I hope our friend will trust our judgment. I agree with the gentleman, and there is a lot to what he said.

Mr. GROSS. I understand the gentleman cannot commit the conferees on the part of the House, but with the assurance of the gentleman that the sentiment he has expressed will be brought into full play in conference, I withdraw my objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection, and the Chair appointed the following conferees: Messrs. THOMAS, KIRWAN, CANNON, JENSEN, and TABER.

OPERATION VERACITY

Mr. RHODES of Arizona. Mr. Speaker, this is the second day in Operation Veracity.

Yesterday, in a special order, we exposed numerous misstatements in the Democrat platform. In a special order later today, we shall expose still more.

But here is a quick one. The Democrat platform states that the Republicans have reduced "outlays for essential public services which directly benefit our people."

What do the platform writers mean by outlays for essential public services?

Outlays for natural resources? Such outlays have been increased 27 percent under this administration.

Do they mean outlays for veterans? These have been increased 28 percent.

In matters of health, the Eisenhower-Nixon administration has 13 concrete accomplishments to point to, which I have inserted in the CONGRESSIONAL RECORD. They surely do not mean health.

Mr. Speaker, with the lack of further qualification, it is only natural to question the accuracy of this Democrat platform statement.

AMENDING COMMUNICATIONS ACT OF 1934 WITH RESPECT TO THE PROCEDURE IN OBTAINING A LICENSE AND FOR REHEARINGS UNDER SUCH ACT

Mr. HARRIS. Mr. Speaker, I call up from the Speaker's desk the bill (S. 1898) to amend the Communications Act of 1934 with respect to the procedure in obtaining a license and for rehearings under such act, with Senate amendments thereto to the House amendments, and ask for its immediate consideration.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 14, line 4, strike out "SUSPENSION, REVOCATION," and insert "REVOCATION".

Page 14, line 6, strike out "(a) Section" and insert "Subsections (a) and (b) of section".

Page 14, line 7, strike out "is" and insert "are".

Page 14, line 23, after "any" insert "final".

Page 15, line 10, strike out "action." and insert "action.' "

Page 15, strike out all after line 10 over to and including page 17.

Page 18, strike out lines 8 to 24, inclusive, and insert:

"'(b)(1) Any licensee or permittee of a broadcast station who—

"'(A) willfully or repeatedly fails to operate such station substantially as set forth in his license or permit,

"'(B) willfully or repeatedly fails to observe any of the provisions of this Act or of any rule or regulation of the Commission prescribed under authority of this Act or under authority of any treaty ratified by the United States,

"'(C) fails to observe any final cease and desist order issued by the Commission,

"'(D) violates section 317(c) or section 509(a)(4) of this Act, or

"'(E) violates section 1304, 1343, or 1464 of title 18 of the United States Code, shall forfeit to the United States a sum not to exceed $1,000. Each day during which such violation occurs shall constitute a separate offense. Such forfeiture shall be in addition to any other penalty provided by this Act.

"'(2) No forfeiture liability under paragraph (1) of this subsection (b) shall attach unless a written notice of apparent liability shall have been issued by the Commission and such notice has been received by the licensee or permittee or the Commission shall have sent such notice by registered or certified mail to the last known address of the licensee or permittee. A licensee or permittee so notified shall be granted an opportunity to show in writing, within such reasonable period as the Commission shall by regulations prescribe, why he should not be held liable. A notice issued under this paragraph shall not be valid unless it sets forth the date, facts, and nature of the act or omission with which the licensee or permittee is charged and specifically identifies the particular provision or provisions of the law, rule, or regulation or the license, permit, or cease and desist order involved.

"'(3) No forfeiture liability under paragraph (1) of this subsection (b) shall attach for any violation occurring more than one year prior to the date of issuance of the notice of apparent liability and in no event shall the forfeiture imposed for the acts or omissions set forth in any notice of apparent liability exceed $10,000.'

"(b) Section 504(a) of the Communications Act of 1934 (47 U.S.C. 504) is amended by inserting after *'Provided,'* in the first sentence thereof the following: 'That any suit for the recovery of a forfeiture imposed pursuant to the provisions of this Act shall be a trial de novo: *Provided further,'*.

"(c) Section 504(b) of such Act is amended by striking out 'section 507' and inserting in lieu thereof 'sections 503(b) and 507'.

"(d) Section 504 of such Act is further amended by adding a new subsection to read as follows:

"'(c) In any case where the Commission issues a notice of apparent liability looking toward the imposition of a forfeiture under this Act, that fact shall not be used, in any other proceeding before the Commission, to the prejudice of the person to whom such notice was issued, unless (i) the forfeiture has been paid, or (ii) a court of competent jurisdiction has ordered payment of such forfeiture, and such order has become final.' "

Page 22, line 12, strike out all after "317." down to and including "section." in line 14 and insert:

"(e) The inclusion in the program of the announcement required by section 317 shall constitute the disclosure required by this section."

Page 22, line 15, strike out "(e)" and insert: "(f)".

Page 22, line 25, strike out "(f)" and insert "(g)".

Amend the title so as to read: "An act to promote the public interest by amending the Communications Act of 1934, to provide a pre-grant procedure in case of certain applications; to impose limitations on payoffs between applicants; to require disclosure of payments made for the broadcasting of certain matter; to grant authority to impose forfeitures in the broadcast service; and to prohibit deceptive practices in contests of intellectual knowledge, skill, or chance; and for other purposes."

Mr. HARRIS. Mr. Speaker, I send a motion to the Clerk's desk.

The Clerk read as follows:

Mr. HARRIS moves that the House concur in the Senate amendments to the House amendments.

Mr. HALLECK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HALLECK. Mr. Speaker, I propound a parliamentary inquiry as to the request of the gentleman from Arkansas. I had no information this request was going to be made and I do not know what the request is.

The SPEAKER. The gentleman from Arkansas can explain what it is.

Mr. HARRIS. I shall be glad to explain the parliamentary inquiry. As I understand, Mr. Speaker, I have an hour now.

The SPEAKER. If the gentleman desires to take that much time, yes.

Mr. HALLECK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HALLECK. I would like to know what the request of the gentleman was, whether it was for the immediate consideration of the Senate amendments.

The SPEAKER. The gentleman called up from the Speaker's table a Senate bill

with Senate amendments to the House amendments.

Mr. HARRIS. If the gentleman will permit, I will explain the amendments, and I yield myself 10 minutes.

Mr. Speaker, the bill which I have just called up is one that we have had before the House. It is a Senate bill which was amended by the House to include such matters as pregrant procedure with reference to the Federal Communications Act, the so-called payola requirement, amendment to section 317, deceptive practices problems, and so forth. I would like to describe what this is.

After the bill went back to the other body it was amended in two instances and has come back to us with those amendments thereto. I have asked to take from the Speaker's desk the bill with Senate amendments and moved that the House concur in the Senate amendments, which will finalize and complete the bill.

Mr. HOFFMAN of Michigan. Mr. Speaker, if the gentleman will yield, what did the amendments do? That is what we want to know.

Mr. HARRIS. Well, I am just about to explain to the gentleman that I thought the procedure that the gentleman from Indiana would like to have was important.

I might say that the members of the committee have been advised that this motion was going to be made as of yesterday, and everyone on the committee has been notified that this action would be taken today.

Mr. HALLECK. I might say to the gentleman, as I understand under the parliamentary situation, it is now a matter before the House to be acted upon one way or the other and that no objection could be made. I have learned since the gentleman called it up that the members on my side on the committee were consulted with reference to this procedure, and as I understand have no objection to it now.

Mr. HARRIS. That is true, with the exception of the ranking minority member whom I advised personally that it would be called up today, and he wanted some time. I hope he was notified so that he will come in right away.

Mr. Speaker, this motion today is in further consideration of S. 1898, which has to do with amending the Federal Communications Act to close some of the loopholes and bring about some correction badly needed, which resulted from the investigation by our Special Committee on Legislative Oversight.

Mr. RHODES of Arizona. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Arizona.

Mr. RHODES of Arizona. Mr. Speaker, I ask unanimous consent to extend my remarks in the body of the RECORD immediately preceding the portion of the RECORD when this bill was brought up.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. HARRIS. Mr. Speaker, the Members are familiar with the legislation as it passed the House because I took considerable time explaining what the committee had done. As you will recall, this bill as passed by the Senate dealt exclusively with the pregrant procedure in connection with the licensing of broadcasting facilities. Our committee amended the bill in several ways. As a matter of fact, there were five major amendments dealing with the problems which I explained very carefully at that time.

The bill went back to the other body. As you recall, during the debate, there were two provisions of the bill about which many Members raised questions. One had to do with the suspension provision authorizing the Federal Communications Commission under certain conditions to suspend a broadcasting license for not to exceed 10 days. In other words, it provided a lesser penalty than revocation—the so-called death penalty—which has been a part of the Communications Act from the beginning.

Another provision about which great concern was expressed was the forfeiture provision, which gives the Federal Communications Commission authority to levy a fine on broadcasters for violations of the Communications Act and the Commission's rules.

Those were the only two provisions of the bill as it passed the House concerning which any questions have been raised. The Senate, when it received the bill, amended only those two provisions. So we come back now and ask the House to concur in the action of the Senate.

The principal amendments proposed in the Senate were to eliminate completely the power to suspend licenses for a brief period of time, to wit, 10 days.

The changes made by the Senate in the forfeiture section—section 7 of the bill—are as follows:

In the first place, the Senate amendment provides that in no event shall the forfeiture imposed for any act or omission exceed $10,000. The House-passed bill contains no such limitation.

Second, the Senate amendment provides that the Notice of Apparent Liability which the Commission is required to send to the licensee shall set forth the date, facts, and nature of the act or omission with which the licensee is charged and shall specifically identify the particular provision of the law, rule, or regulation, or the particular provision of the license or cease-and-desist order involved so that the licensee is properly advised with respect to the violation with which he is charged.

Furthermore, under the Senate amendment the licensee so notified is granted an opportunity to show in writing, within such reasonable period as the Commission shall by regulation prescribe, why he should not be held liable.

The Senate amendment substitutes the words "willfully or repeatedly" for the words "negligently or intentionally," contained in the bill as passed by the House. Because of this change it became necessary to refer specifically to violations of section 317(c) or section 509(a)(4) which impose an obligation to exercise reasonable diligence on licensees with respect to payola and deceptive practices. A requirement that violations of these two sections must have been either willful or repeated would be tantamount to making unavailable the forfeiture sanction in the case of violations of these two sections which are being added to the Communications Act by this legislation.

The Senate amendment provides specifically that any suit for recovery of a forfeiture shall be a trial de novo. It was the understanding of our committee that such suits traditionally are trials de novo and, therefore, I am glad to see that this has been specifically spelled out in the Senate amendment. The committee inquired of the FCC and the FAA with respect to such suits under present law and received the following information from them:

FEDERAL COMMUNICATIONS COMMISSION,
Washington, D.C., July 13, 1960.

Hon. OREN HARRIS,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN HARRIS: This is in reply to your letter of July 1, 1960, requesting a memorandum setting forth the procedures followed by the Commission together with the rights of persons upon whom forfeitures are imposed to obtain judicial review of the Commission's decision imposing the forfeiture.

Section 6 of S. 1898 would amend the Communications Act to provide for forfeitures similar to those now applying to vessels involved in violations of the Communications Act, title III, parts II and III and section 507. (See, especially, 47 United States Code secs. 364, 386, and 507, appended hereto.)

The procedure followed by the Commission when it receives information of an apparent violation of the Communications Act by a vessel is set out in section 1.581 of the Commission's rules (title 47 Code of Federal Regulations sec. 1.581) which provides as follows:

"§ 1.581 Forfeitures against ships and ship masters.

"(a) Whenever information is received indicating that reasonable grounds exist to support a suit for collection of forfeitures provided by sections 364, 386, and 507 of the Communications Act of 1934, as amended, the owner of the ship and the master will be notified of apparent liability for forfeitures. The notification will specify dates, places, and the nature of the alleged violations or irregularities, and will advise the parties of the Commission's authority under section 504(b) of the act to remit or mitigate such forfeitures upon application therefor. Applications for mitigation or remission may be filed within 30 days from the date of receipt of the notification letter, or within such extended time as may for good cause be granted. The application must be in duplicate but need not follow any special form. After a review of the case in the light of all the information available, including the information and arguments presented in the application, the applicant will be notified of the determination, which may be either remission of the entire amount, an offer of mitigation of the forfeiture to the extent which appears warranted under the circumstances, or denial of any relief.

"(b) Acceptance of an offer of mitigation may be accomplished through payment, within 30 days from the date of receipt of the notification, of the amount specified therein by check or similar means drawn to the order of the Treasurer of the United States and mailed to the Commission.

"(c) In lieu of acceptance of an offer of mitigation, or in the event of denial of relief, application may be made within 30 days from the date of receipt of the notification for review by the Commission as provided in section 5(d)(2) of the act. The application should set forth the reasons for applicant's belief that the original action on his application should be modified. It may include

a statement of any material facts that may have been omitted from the original application for relief. On review the Commission may affirm, modify, or set aside the previous action, or direct any further proceedings that appear necessary and in the public interest.

"(d) If the applicant fails to take any action in respect to a notification of apparent liability for forfeiture or an offer of mitigation or a notification of denial of relief, the case may be referred by the Commission to the Attorney General of the United States for appropriate civil action to recover the forfeiture in accordance with the provisions of section 504(a) of the act."

As section 1.581 states, if the person incurring the forfeiture persists in his refusal to pay the forfeiture the matter is referred to the Department of Justice for recovery of the forfeiture under section 504 of the act. If a civil or libel action should be commenced the persons incurring the forfeitures are entitled to a trial de novo in a court of law before being finally required to pay.

Since the forfeiture provisions of section 6 of S. 1898 are to be incorporated in sections 503 and 504 of the Communications Act which already apply to established Commission forfeiture proceedings, we are of the view that any forfeitures levied under S. 1898 would follow the same general procedural pattern as have been already established by the Commission in marine forfeiture cases. After the passage of S. 1898 a study will be made the Commission to determine the specific rules which should be adopted to implement congressional intent as expressed in the final version of the bill.

We hope that this information is sufficeint for your purposes. If it is not, please do not hesitate to request any further information which you would deem helpful.

Sincerely,

FREDERICK W. FORD,
Chairman.

APPENDIX

Communications Act of 1934, as amended (47 U.S.C. 151 et seq.):

"SEC. 364. The following forfeitures shall apply to this part, in addition to the penalties and forfeitures provided by title V of this Act:

"(a) Any ship that leaves or attempts to leave any harbor or port of the United States in violation of the provisions of this part, or the rules and regulations of the Commission made in pursuance thereof, or any ship of the United States that is navigated outside of any harbor or port in violation of any of the provisions of this part, or the rules and regulations of the Commission made in pursuance thereof, shall forfeit to the United States the sum of $500, recoverable by way of suit or libel. Each such departure or attempted departure, and in the case of a ship of the United States each day during which such navigation occurs shall constitute a separate offense.

"(b) Every willful failure on the part of the master of a ship of the United States to enforce or to comply with the provisions of this Act or the rules and regulations of the Commission as to equipment, operators, watches, or radio service shall cause him to forfeit to the United States the sum of $100.

"SEC. 386. The following forfeitures shall apply to this part in addition to penalties and forfeitures provided by title V of this Act:

"(a) Any vessel of the United States that is navigated in violation of the provisions of this part or of the rules and regulations of the Commission made in pursuance thereof shall forfeit to the United States the sum of $500 recoverable by way of suit or libel. Each day during which such navigation occurs shall constitute a separate offense.

"(b) Every willful failure on the part of the master of a vessel of the United States to enforce or to comply with the provisions of this part or the rules and regulations of the Commission made in pursuance thereof shall cause him to forfeit to the United States the sum of $100.

"SEC. 507. (a) Any vessel of the United States that is navigated in violation of the provisions of the Great Lakes Agreement or the rules and regulations of the Commission made in pursuance thereof and any vessel of a foreign country that is so navigated on waters under the jurisdiction of the United States shall forfeit to the United States the sum of $500 recoverable by way of suit or libel. Each day during which such navigation occurs shall constitute a separate offense.

"(b) Every willful failure on the part of the master of a vessel of the United States to enforce or to comply with the provisions of the Great Lakes Agreement or the rules and regulations of the Commission made in pursuance thereof shall cause him to forfeit to the United States the sum of $100."

FEDERAL AVIATION AGENCY,
OFFICE OF THE ADMINISTRATOR,
Washington, D.C., July 15, 1960.

HON. OREN HARRIS,
Chairman, Committee on Interstate and Foreign Commerce, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Reference is made to your letter dated July 1, 1960, in which you inquired as to the authority of the Federal Aviation Agency to impose forfeitures for violations of laws and regulations applicable to the Agency's operations. You also requested information as to the procedures used for imposing any such forfeitures, as well as the rights of persons to appeal forfeiture actions to the courts.

Under section 901 of the Federal Aviation Act of 1958 (49 USC 1471), persons who violate specified titles of the act, or any rule, regulation, or order issued thereunder are subject to a civil penalty not to exceed $1,000 for each violation, and the Administrator of the Federal Aviation Agency is authorized to compromise any such civil penalty. The section further provides that:

"(b) In case an aircraft is involved in such violation and the violation is by the owner or person in command of the aircraft, such aircraft shall be subject to lien for the penalty."

The procedure for collection of civil penalties which are not voluntarily compromised by the violator and the Administrator is contained in section 903(b), which provides:

"(b)(1) Any civil penalty imposed under this act may be collected by proceedings in personam against the person subject to the penalty and, in case the penalty is a lien, by proceedings in rem against the aircraft, or by either method alone. Such proceedings shall conform as nearly as may be to civil suits in admiralty, except that either party may demand trial by jury of any issue of fact, if the value in controversy exceeds $20, and the facts so tried shall not be reexamined other than in accordance with the rules of the common law. * * *

"(2) Any aircraft subject to such lien may be summarily seized by and placed in the custody of such persons as the Board or Administrator may by regulation prescribe, and a report of the cause shall thereupon be transmitted to the U.S. attorney for the judicial district in which the seizure is made. The U.S. attorney shall promptly institute proceedings for the enforcement of the lien or notify the Board or Administrator of his failure to so act.

"(3) The aircraft shall be released from such custody upon payment of the penalty or the amount agreed upon in compromise; or seizure in pursuance of process of any court in proceedings in rem for enforcement of the lien, or notification of the U.S. attorney of failure to institute such proceedings; or deposit of a bond in such amount and with such sureties as the Board or Administrator may prescribe, conditioned upon the payment of the penalty or the amount agreed upon in compromise.

"(4) The Supreme Court of the United States, and under its direction other courts of the United States, may prescribe rules regulating such proceedings in any particular not provided by law."

You will observe that these provisions do not authorize the Administrator to initiate seizure and forfeiture actions in the nature of those provided for in the customs and immigration laws. He is empowered only to compromise liability for a civil penalty or, if the violator declines to pay, to refer the matter to a U.S. attorney for collection through civil suit.

You also inquire as to the procedure followed by this Agency. Violations of the Federal Aviation Act or of the regulations thereunder are investigated by FAA inspectors. If, in a particular case, the inspector's report and supporting statements and other evidence show that a violation, in fact, occurred and that a civil penalty should be imposed, the Agency sends a certified letter to the alleged violator, advising him of the circumstances of the incident, the sections of the act or the regulations allegedly violated, and the amount we would be willing to accept as a compromise settlement of the penalty.

The alleged violator is advised of his right to (1) furnish additional information in defense or mitigation of the charges, (2) request an informal hearing at the Federal Aviation Agency, at which time he, or his counsel, will have an opportunity to discuss the charges and the amount of any acceptable compromise offer, (3) submit the suggested offer in compromise, or (4) refuse to make a compromise settlement.

If an alleged violator fails to submit satisfactory evidence in answer to the charges, or if he does not prefer to effect a compromise settlement, the matter is then referred to the appropriate U.S. attorney where a suit is instituted in U.S. district court to collect a civil penalty. The court will determine, after trial, whether a violation has occurred, as well as the amount of the civil penalty, if any, to be imposed.

Although the Administrator is authorized to summarily seize an aircraft subject to a lien for violations under the act, the lien is possessory only, and such action is initiated only in a situation where it would be difficult or impossible to collect the penalty in any other way. Then, as provided in section 903(b) of the act, the U.S. attorney must institute proceedings for enforcement of the lien, and the aircraft must be released from custody upon payment of the civil penalty, or the amount agreed upon in compromise, or for one of the other reasons specified in section 903(b)(3).

Please advise if I may be of any further assistance to you in this matter.

Sincerely,

E. R. QUESADA,
Administrator.

Finally, the Senate amendment provides that the fact of the issuance of a notice of apparent liability shall not be used in any other proceeding before the Commission to the prejudice of the person to whom such notice was issued, unless the forfeiture has been paid or a court of competent jurisdiction has ordered payment of such forfeiture and such order has become final.

In summary, the changes made by the Senate in the forfeiture section are entirely satisfactory and in most respects merely spell out in greater detail what the House language sought to express in more general language.

Those are the particulars in which the Senate modified these two sections of the bill.

Actually it boils down to this: First, the Senate knocked out completely the suspension provision and secondly, the Senate amended the forfeiture provisions in a number of respects.

The amendments relating to the forfeiture provision do not change that provision in any basic respect. Consequently, the only important change which we have here deals with the suspension provision, about which great concern was expressed by several Members on the floor of the House. I may say that adoption of the Senate amendments would bring this bill in line with what some Members wanted at the time when it was originally before the House.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from West Virginia.

Mr. BAILEY. The gentleman will recall I participated in the debate in support of the amendments to liberalize this rather restrictive authority given to the Communications Commission.

Mr. HARRIS. Yes; I recall the gentleman's great interest in that change.

Mr. BAILEY. May I ask the gentleman from Arkansas if he considers this more liberal treatment than was in the House bill? The Senate has gone even further than we went in that direction. Is that true?

Mr. HARRIS. The Senate has imposed a ceiling on forfeitures which may be imposed and there would be no suspension now at all under the Senate amendments with which we are trying to concur here.

Mr. BAILEY. I thank the gentleman.

Mr. HARRIS. The Senate amended the forfeiture provision so that the Commission can deal with those who violate provisions included in the bill relating to deceptive practices or who violate section 317 (c) of the act. Even though the penalty of forfeiture is not nearly as severe as the penalty of suspension, I think it would reach the problem, and the licensees are put on notice that they must observe those provisions of the law and discharge the responsibilities that are imposed on them by these provisions, or else be subject to a civil penalty which may be imposed by the Commission.

Mr. BAILEY. In the event this penalty still imposed resulted in a court trial, we will say in the U.S. court, what is the status of the broadcasting station or radio station? Is it permitted to operate?

Mr. HARRIS. There would be no interference with the station at all. It could go on operating without interruption. The licensee on whom a forfeiture is imposed could come in and say, "We are not guilty." Then the Federal Communications Commission would have to go to court to collect the forfeiture and it would have to prove that there was a violation.

Mr. BAILEY. In other words, it is a fine and not a forfeiture?

Mr. HARRIS. It is referred to as a forfeiture, a civil penalty, and that is the usual way in which the FCC and the FAA enforce compliance with their laws and regulations.

Mr. BAILEY. But the station does not have to be closed down?

Mr. HARRIS. No; not at all.

If I may continue with my statement on the Senate amendments, when the Senate committee proposed to amend the forfeiture provision and before they reported the bill, we discovered that there would be what I referred to as a windfall for the licensees with reference to two of the provisions of the bill that we passed. I called this to the attention of the Members of the other body and explained what would happen if their proposal would be accepted. They understood the problem, and they agreed that the broadcasters should not escape certain responsibilities imposed on them by this bill, so that they could close their eyes or turn their backs on a deceptive programing and payola practices that were going on. When we called this to their attention, they agreed to include a specific provision to that effect in the forfeiture section. That in turn caused me to agree to ask the House to accept the action of the Senate.

This provision is referred to on pages 9 and 10 of the Senate report which was issued August 19, 1960.

I would like to quote these two brief sentences from that report:

> Your committee specifically authorizes the imposition of a forfeiture where there is a violation of the amendment herein provided as section 317(c) which concerns the responsibility of a licensee to make an announcement with reference to certain matters that are broadcast, as well as the amendment added as section 509(a)4 which concerns the responsibility of a licensee to prohibit deceptive practices in cases of contests of intellectual knowledge, intellectual skill or chance.

In other words, the forfeiture provision will reach those provisions of the bill which resulted from our investigation over the last 3 years namely the provisions relating to payola and deceptive programs.

Mr. HIESTAND. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from California.

Mr. HIESTAND. Without any intention, Mr. Speaker, of objecting to the bill, I would like to ask the chairman a couple of questions having to do with making the record clear so far as the intent of the committee and the Congress is concerned. The first question is:

Theatrical motion pictures and television motion picture producers have arrangements with manufacturers with respect to the use of their product for motion picture production purposes. Some contracts have been in existence for many years; others are of more recent origin. Would the following type of arrangement be in violation of the proposed legislation and thus require the prescribed notice at the risk of incurring the $10,000 and/or 1-year imprisonment penalty?

For example, an automobile manufacturer has a written agreement with a motion picture producer whereby the automobile manufacturer will make available to the producer 10 motor vehicles of various kinds for its general use. The producer makes no payment for these automobiles which are returned annually and replaced with new automobiles, but does agree that when automobiles are needed for photographic purposes in conection with any theatrical or television motion picture, it will photograph automobiles manufactured by this automobile manufacturer, but without any attempt to emphasize or even necessarily show the brand name in connection with such usage.

Mr. HARRIS. The gentleman from California has been kind enough to submit these questions to me, and I have had an opportunity to examine and analyze them.

The question raised by the gentleman from California [Mr. HIESTAND] can be answered rather specifically, I think, by referring to the report of the Interstate and Foreign Commerce Committee—Report No. 1800, which accompanied the bill S. 1898.

In this report we set forth a number of specific examples in order to clarify the meaning of the general language contained in section 317 of this bill. Let me refer the gentleman to example No. 17 on page 22 of the report which reads as follows:

> An automobile manufacturer furnishes his identifiable current model car for use in a mystery program, and it is used by a detective to chase a villian. No anouncement is required. If it is understood, however, that the producer may keep the car for his personal use, an announcement would be required. Similarly, an announcement would be required if the car is loaned in exchange for a mention on the program beyond that reasonably related to its use, such as the villian saying: "If you hadn't had that speedy Chrysler, you never would have caught me."

It appears from the gentleman's question that the motor vehicles were made available to the producer for general use and not solely for use on the set in connection with the production of a motion picture. Under these circumstances an announcement would be required pursuant to section 317 and therefore the film producer would be required to furnish the necessary information to the network or broadcast licensee for whom the film is being produced.

Mr. HIESTAND. The second question is:

In addition to the arrangements of the nature illustrated by the foregoing example, there are other situations which permit a producer to put more value into its programs at no additional cost to the sponsor.

For example, a producer of motion pictures for theater and television may have a contract with a network providing that the producer will supply a series of television programs for a stated dollar cost. Among other terms of the agreement, the producer has the right to include a 30-second trailer—a preview of coming attractions—relating to a current theatrical release of the producer, and an announcement that such theatrical motion picture may soon be seen at the viewer's neighborhood theater.

Would such a provision in the contract have to be acknowledged at the close of each broadcast?

Mr. HARRIS. It is my considered opinion, with reference to that question,

that no special announcement will be required, since the content of the trailer itself would indicate that this is in the nature of a paid commercial.

In other words, it seems to me that section 317 does not require a special announcement to be made in those cases where it is clear from the matter broadcast itself that payment is ordinarily made for the broadcasting of such matter.

If Goodrich or Firestone, for example, buy a spot commercial for their tires, no announcement need to be made to the effect that Goodrich or Firestone have paid for these commercials. That is inherent in the commercial itself and it is the same with regard to an announcement that a certain film can be seen in the neighborhood theaters. The fact that it has been produced by the same producer who produced the film shown on television makes no difference, in my opinion.

I hope that these explanations will help to clear up the questions propounded by the gentleman from California.

Let me say, in addition, that Senator PASTORE, chairman of the Senate Interstate and Foreign Commerce Committee, has addressed a letter to the Federal Communications Commission and has been assured by the Commission that it would, in the near future, arrange informal conferences with interested parties to discuss what is a reasonable approach to the implementation of this bill. I have every confidence that the FCC is going to proceed with these conferences prior to issuing rules and regulations under this bill and many, if not most, of these problems will be worked out.

Mr. JENSEN. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Iowa.

Mr. JENSEN. Referring to section 312, is the language in parts 3 and 4 identical with the language which the House acted on when the bill was before the House originally?

Mr. HARRIS. What does that deal with?

Mr. JENSEN. That deals with willful and repeated violations.

Mr. HARRIS. As I have explained, we would amend it if the House concurs in the Senate amendments.

Mr. JENSEN. You feel that is an improvement over what the House agreed to?

Mr. HARRIS. I think it is more acceptable to the broadcasters.

Mr. JENSEN. It will protect the small broadcasters?

Mr. HARRIS. I think it will amply do so.

The SPEAKER. The time of the gentleman from Arkansas has again expired.

Mr. HARRIS. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan [Mr. BENNETT].

Mr. BENNETT of Michigan. Mr. Speaker, I opposed this bill when it was last before this body because I considered it woefully inadequate to remedy the abuses which were uncovered during the course of our hearings. Moreover, and perhaps more important, the bill places responsibility upon, and imposes sanctions against, the one who needs it the least, the individual station licensee. For practical purposes the networks of the country originate, produce and control the major part of all radio and television programing. The individual station licensee for the most part passes on to the viewing and listening public what is handed to him by the networks. Thus, while the networks virtually control the radio and television business and are broadcasters in every sense of the word, there is no provision in this bill or in present law which places any responsibility on them to operate in the public interest. The individual station owner is licensed and regulated. The big networks who hand the station licensee his programs remain free of any regulation or any legal obligation to operate in the public interest.

Mr. Speaker, we could have produced an effective, meaningful piece of legislation. The record of our committee contains more testimony and more evidence on the subject of network regulation than on any of the other matters covered in this bill. Regulation or licensing of the networks has been recommended by the Attorney General of the United States, the Federal Communications Commission and by our own Legislative Oversight Subcommittee. On the basis of the record before us it is a real sham and delusion to be legislating additional penalties against innocent individual station licensees while letting the real violators—the networks—go scot free. I am sure the American public will recognize this bill for what it is—a smoke screen to penalize the little fellow and let the big fellow get away.

Mr. Speaker, so that all the Members of the House might know what our committee record reveals, last month I requested the chief counsel of the Oversight Committee to prepare a memorandum setting forth in detail the evidence from the record and the reasoning which prompted our committee membership to make this unanimous recommendation. Mr. Speaker, I ask unanimous consent that the aforementioned memorandum be inserted in the RECORD immediately following my remarks.

The SPEAKER. Is there objection?

There was no objection.

The memorandum follows:

JULY 28, 1960.

To: Chairman HARRIS.
From: Robert W. Lishman.
Subject: Reasons for interim report recommendation that television networks should be licensed by the FCC.

In response to the July 8, 1960, written request of Hon. JOHN BENNETT, Member of Congress, this memorandum summarizes some of the reasons for the recommendation in our interim report[1] that networks be licensed by the FCC.

As you know, the original draft of the report did not contain the recommendation. You will recall that, after discussing it with me, you directed several changes in and additions to the draft. One of the additions was the network licensing recommendation. That recommendation, appearing on pages 38–39 of the report, is as follows:

"3. A new section should be added to the act requiring that radio and television networks be licensed and be subject to the regulations of the Federal Communications Commission for a term of not to exceed 3 years, with provisions for renewals thereof. The license and renewal should be conditioned upon a determination by the FCC after a hearing of record that the issuance or renewal is in the public interest. The section should also provide guidelines as to what constitutes the public interest as used in this section. Included in such guidelines should be a requirement prohibiting the network (a) from furnishing deceptive material to any radio or television station; (b) surrendering control of material to be broadcast to an advertiser, advertising agency, producer, or any person other than a licensee; (c) using any broadcasting facility, directly or indirectly, in promoting the sale or distribution of the product or service of any company or person in which it has any direct or indirect financial or beneficial interest; and (d) entering into any contract which would limit the ability of any station licensee to fulfill its responsibility to operate in the public interest."

As was disclosed in the subcommittee's hearings on television quiz programs and as has been pointed out in several Congressional studies and reports, there is no way whereby a licensee (i.e., under existing law, a TV station) can determine whether deception has gone into the production of a network program at its source. Most network programs, whether produced by a network itself, or by outsiders, originate in New York, Chicago or Hollywood. Under existing network affiliation contracts providing for "option time," especially in prime (evening) viewing hours, the licensee broadcasts pretty much what the network sends him. While legally he may not abdicate his responsibility to broadcast in the public interest by pleading the existence of an oppressive network affiliation agreement, the fact is that he broadcasts what is transmitted to him and the FCC knows it.[2]

It is common knowledge that the network, through its superior bargaining power and the threat it holds over every licensee of withdrawing affiliation, can effectively insist that an affiliate broadcast a heavy diet of network-originated programs. And despite their bargaining disadvantage, most affiliates are quite content with this arrangement which relieves them of the effort and expense of originating their own programs and carries several additional benefits (e.g., with respect to selling time to national advertisers) of network affiliation. These circumstances may not be ideal from the standpoint of a lofty interpretation of the public interest requirements of the Communications Act, but the licensees are also businessmen with obligations to their shareholders. So long as commercial broadcasting is financed by advertising dollars and under primary control of private businessmen, it is only realistic to recognize the concern of the licensee for his stockholders. Proposals to change the present system of financing television (e.g., subscription television and a competing Federal or federally-subsidized network) have not yet found wide favor.

Except for a few independent stations in large urban markets, TV licensees have viewed network affiliation as practically essential for economic survival. This is primarily for two reasons; the enormous costs of TV (as opposed to radio) programing and transmission and the relative (to radio) scarcity of frequencies available for commercial broadcasting. Since there are some 447 commercial VHF stations now licensed and in operation and only 3 important TV networks, the fact that affiliation is economically necessary to most licensees gives the networks tremendous bargaining leverage vis-a-vis stations. Indeed, former Senator John W. Bricker has referred to the "unprecedented economic stranglehold" of

[1] H. Rept. No. 1258, 86th Cong., 2d sess., Feb. 9, 1960.

[2] Cf. testimony of W. Theodore Pierson, Esquire in App. A, attached hereto.

the two major networks (NBC and CBS) over their affiliates.[3] Licensees are understandably reluctant to reject network programs or to take any other action that might tempt the network to look elsewhere for a local outlet. And while a few licensees chafe under such dominance, as suggested above most of them are apparently satisfied.[4]

When television quiz programs were most popular, and networks, licensees, advertisers, producers, etc., were waxing rich at the expense of a deluded viewing public, there was little disposition to question whether all was what it seemed to be.[5] Indeed, if licensees, the only group accountable under existing law, had desired to question the propriety of quiz show production, they would have had little or no opportunity to prove their suspicions. The hearing record contains testimony that even the networks, which had supervisory personnel present at the quiz shows, did not believe the charges of "fixing" when told.[6] Its representatives accepted at face value the false assurances of the producers that rigging charges made against the producers of "21" were untrue. There is also evidence that in other instances the CBS network made little or no investigation to ascertain the validity of "rigging" charges.[7]

The staff drew from the quiz hearings the general conclusion that the existing law, placing sole responsibility on licensees and none on networks qua networks, places responsibility where power to discharge it is lacking. This conclusion is reinforced by the fact that some 80 percent of programs broadcast during the prime viewing hours originate with network organizations, over whom the licensee's theoretical legal control is illusory.[8]

The staff was influenced by the following statement of then Chairman Doerfer, of the FCC, in answer to a question by Representative ROGERS of Texas:

"Mr. DOERFER. I wouldn't hesitate to give very serious consideration to a reversal of my opinion some time ago that network licensing would be a vain effort on the part of Congress because we could reach it through the licensee. With the developments, as you have indicated, I am inclined very much to consider very carefully the licensing of networks, indeed. * * * I think that where we cannot reach network practices through our power over the licensee, certainly it calls for the licensing of the network." [9]

We were similarly impressed with the suggestion of the Attorney General of the United States in his December 30, 1959, report to the President [10] contained in the following paragraph:

"First, as earlier explained, the networks, as such, are not regulated by the Federal Communications Commission. This is so even though the individual broadcasters rely upon the networks so heavily for matter broadcast, and the networks are ordinarily in a far better position than the individual licensee to select and control the presentation of that matter. Legislation could be enacted which would place direct regulatory authority over the networks in the FCC."

The FCC under existing law indirectly regulates networks in two ways. First, the major networks, NBC, CBS, and ABC, all own TV stations subject to FCC licenses. Secondly, the chain broadcasting rules promulgated in 1941, before the spread of commercial TV and still ill adapted to the newer medium, are used by the Commission to regulate certain aspects of the relations between networks and the licensees contractually affiliated with them.

The networks have contended repeatedly that these means are adequate to prevent network-originated competitive and programing evils. The question arises, then, what is to be gained by subjecting network organizations to direct regulation through licensing?

If offending program material (i.e., offending material not falling under the protection of section 326 of the Communications Act or under the first amendment to the Constitution) is transmitted from a network source and broadcast by network owned and affiliated stations, existing law logically requires that the same sanction be applied to every licensee broadcasting the material. As a practical matter, and as the history of FCC regulation indicates, such a logical approach would be unduly harsh. If the Commission decided instead to proceed against one or more network-owned stations, the network could plausibly argue that neither the statute nor regulations authorize such discriminatory enforcement action. The statute does not distinguish between licensees based on their ownership. Since it would be unduly Draconian to punish all licensees carrying an offending program, where they might have no effective means of detecting or preventing the offending matter, the practical result is that no one is subjected to FCC sanctions. To punish licensees for the dereliction of networks would be comparable to punishing a ventriloquist's dummy when his master puts bad words into his mouth. This anomalous situation is clearly a threat to the regulation of broadcasting in the public interest. That regulation cannot be effective until it extends to the source of supply rather than merely to conduits was implicit in H.R. 5042, introduced by Congressman BENNETT on February 26, 1959 (86th Cong., 1st sess.).

One of the most persuasive arguments for direct network regulation is contained in the 1957 report of the network study staff of the FCC Network Study Committee (hereinafter Barrow report).[11] The foundation of the argument is the practical difficulty in enforcing the Commission's chain broadcasting rules, by which sanctions can be imposed on licensees only and not on networks qua networks. The existing chain broadcasting rules (some slight changes have been made since the Barrow report) prescribe certain restrictions on the terms of agreement between networks and their affiliates. These relate, among other things, to territorial exclusivity, term of affiliation, option time, the right to reject network programs, network ownership of stations, and control by networks of station advertising rates. Following an exhaustive review of the reasons for and against direct regulation,[12] the report concludes that "the Commission's rules and regulations relating to network-station relations should be applied both to stations and networks; those applying only to network conduct should be applied exclusively to networks." [13]

The following quotation from pages 619–620 of the Barrow report summarizes succinctly most of the Barrow staff's reasons for its recommendation of direct regulation:

"Rigid application of the sanctions under such rules to stations would result in the stations raising sufficiently strong objections to the network conduct to prevent its continuance. However, when the rule and sanction are applied to the injured party, the atmosphere is not conducive to the most effective enforcement. Some evidence of this is found in the Don Lee case. In that case the Commission disclaimed supervisory control over network organizations, yet recognized explicitly that the proven violations of the chain broadcasting rules which had occurred were primarily the result of network practices.

" 'The chain broadcasting regulations, * * * are designed to govern the conduct of the individual stations rather than the networks. Thus they provide that no license shall be issued to a station which violates any of the regulations. Where, however, a station has been induced to violate one or more of the regulations because of pressure or coercion from a network, it is the network which is primarily responsible for the violations of the regulations. For an individual station does not deal with a network as an equal, particularly when it is a small station.' (5 R. R. 1197–1198 (1950).

"It is unlikely that stations will have their licenses revoked, or have other substantial sanctions imposed, for submitting, in the interest of retaining a necessary network affiliation, to the domination of the networks in matters proscribed by the rules. In the Don Lee case, while it was found that almost every chain broadcasting rule relative to network-station relations had been violated, the licenses of the affiliates were not revoked because it was realized that the proscribed conduct by the station had been induced by the network. Since the rules did not apply to the network, there was no action which could be taken against the network unless the network were found unqualified to be a broadcast licensee. Such a determination logically would have required that the network surrender licenses to all its stations and this the Commission considered too harsh a penalty for the violation of the rules. The conduct in violation of the rules was discontinued following the investigation and Commission action in that case. Hence, it cannot be said that rules addressed to stations are necessarily ineffective in controlling network conduct. Nevertheless, enforcement would be more readily effected and sanctions more rigidly applied were the rules directed to the parties responsible for the proscribed conduct.

"The Commission's regulatory design has been to license broadcasting stations and to hold the licensee to the responsibility of

[12] Barrow report, pp. 614–632, 653–654, 660–661. One objection to direct regulation discussed in the report was the possibility that FCC supervision of restrictive network affiliation practices would interfere with Justice Department antitrust enforcement. Cited as an instance of such possible friction was the NBC-Westinghouse station exchange approved by the FCC with respect to which the Justice Department brought a civil antitrust action in 1956. Barrow report, pp. 622–624. This objection, which the Barrow staff found wanting, has been rendered even weaker by the subsequent decision of the U.S. Supreme Court that FCC approval of a station transfer was no bar to Justice Department antitrust action. *U.S.* v. *RCA* (358 U.S. 334 (1959)).

[13] Barrow report, p. 631.

broadcasting in the public interest. As the industry developed, however, the decision-making power in providing programing for television has passed, to a great degree, from the hands of the station to those of the network, and to a lesser extent to the advertiser. An advertiser-supported national network system of broadcasting has been accepted as an integral part of the industry structure. The advertiser desires programing which is designed to attract an audience of buyers for the product. The network must produce or select programs which fulfill the need of the advertiser. Of course, the advertiser and network must take into account the viewing tastes of the desired national audience. However, in programing to a national audience for the purpose of advertising a product, the decisions are made not from the individual station viewpoint but from a national viewpoint. Thus, of necessity, the selection of programs offered over the network is made by the network, and the station licensee's function has been limited accordingly.

"Power and responsibility go hand in hand, not weakness and responsibility. Decisions are more responsible when those who make them are answerable to those affected by the decisions. The important service of television is programing. The group most directly affected by programing service is the viewing public. To establish appropriate responsibility of the networks to the people, the Commission's rules and regulations which are concerned with network activities in areas of importance to the public interest should be applied to the networks."

Of great interest in this connection is the following colloquy occurring during the testimony of a leading network spokesman, Dr. Frank Stanton of CBS, before the Antitrust Subcommittee of the House Committee on the Judiciary,[14] a part of which is quoted on pp. 626–627 of the Barrow report:

"The CHAIRMAN. The FCC adopted rules back in 1941 concerning radio chain broadcasting and those rules were approved by the Supreme Court, which said the FCC had the right to issue those rules. Presently the FCC regulates stations, is that correct?

"Mr. STANTON. Yes; that is correct.

"The CHAIRMAN. And the FCC does not regulate the networks?

"Mr. STANTON. Not directly, sir.

"The CHAIRMAN. They only do it by virtue of their regulation of the stations?

"Mr. STANTON. That is correct.

"The CHAIRMAN. In other words there is indirect regulation by virtue of Commission jurisdiction over stations, but there is no direct regulatory jurisdiction over networks?

"Mr. STANTON. As I understand it, that is a correct statement of the situation.

"The CHAIRMAN. Now, I would like to ask you this, and you do not have to answer if you do not wish: Would you be averse to having the Federal Communications Commission regulate directly in the way that they now regulate indirectly; that is, have direct regulatory jurisdiction over the networks?

"Mr. STANTON. I think, Mr. Chairman, that it would make sense if that were what the regulation was intended to accomplish. So as not to look as if I am on both sides of the issue, I have opposed network regulation when it was nonspecified, because I feared program control and certain other features that might be introduced into such regulation, but if you are asking me, as I understood your question, would I prefer to have what I have now got, directly as against indirectly, my answer is in the affirmative.

"The CHAIRMAN. In other words, you would rather see direct regulation concerning what you have not got rather than indirect regulation?

"Mr. STANTON. Yes; I think it is a less complicated way to live, because we get our regulation now only as it affects our affiliates and our company-owned stations, whereas if the same regulations were applied directly to us, I think it would be a more businesslike and systematic way to handle the situation. But it is the blank check kind of regulation that troubles me, and that is the reason I opposed it.

"The CHAIRMAN. Now, just one more question: If it is found by the Federal Communications Commission that they just cannot change their regulations to conform to what you desire, you would not be averse to changing the statute to give them the power?

"Mr. STANTON. No.

"Mr. KEATING. You had better talk that over with the lawyers first.

"Mr. STANTON. I wanted to say just that, Mr. KEATING, but if you look through to the end of what the net result is, I think it is better to have the regulations direct than to have them indirect, and I stand by that.

"The CHAIRMAN. Well, I think it is a natural inference to state that if the Federal Communications cannot do that, but needs changes in the statute, it would seem advisable to make the changes to give them the power."

The staff was at the time of preparation of the recommendations contained in the subcommittee's interim report[15] also engaged in preparation for the hearings into "Payola and Related Deceptive Methods in the Broadcast Field," which were held in February, April, and May 1960, after issuance of the report. Information in the files indicated that broadcasters, and conspicuously the major network organizations, made frequent use of their broadcast facilities to promote commercially the sale of articles in which they, or persons or corporations affiliated with them, had a financial interest.[16] It has long been well known that each of the major network organizations is affiliated with phonograph record manufacturing and music publishing enterprises.[17] In addition, RCA, parent corporation of NBC network, and CBS, of which CBS radio and television networks are divisions, manufacture broadcast receiving sets and other equipment. ABC network, a division of American Broadcasting-Paramount Theatres, Inc., is associated with the Paramount motion picture theater chain. There is evidence in the subcommittee files and in executive session testimony that ABC employees have been pressured to book some of their outside activities in Paramount theaters.[18]

There is need for a thorough study into the effects on competition of broadcasters who use their publicly licensed facilities to promote the sale of goods and services in which they are directly or indirectly interested. Are nonbroadcaster equipment and appliance manufacturers afforded access to broadcast advertising time on the same terms as those affiliated with broadcasters? To what extent are independent songwriters, music publishers, record manufacturers, etc., at a competitive disadvantage unless they meet terms imposed by broadcasters? What are the competitive and overall implications for the public interest of the widespread ownership of broadcast facilities by the increasingly concentrated newspaper and magazine publishing industries?[19] And would the public policy against restrictive practices through patent control be more readily effected in the broadcasting equipment industry through direct FCC control over networks affiliated with such patentholders?[20]

APPENDIX A

On November 16, 1959, the FCC issued a general invitation to organizations and persons to appear and present views at public hearings on various matters relating to the field of radio and television network broadcasting. Thereafter, extended hearings were held, commencing December 7, 1959, and terminating February 1, 1960. In the course of these hearings, several witnesses testified to the need for network licensing. For example, at the hearing on December 11, 1959, Theodore Peterson, dean of the College of Journalism and Communications at the University of Illinois, stated:

"In any medium, responsibility for content must be clearly fixed somewhere. In the broadcast media, the legal responsibility for programing seems to me fixed at the weakest possible place for maintaining high standards—the local station. The average network affiliate produces fewer than 10 percent of the programs it carries, I understand; local stations depend greatly on the networks not only for their programs, but also for their economic survival. As the Barrow report on the network broadcasting put it: '* * * network practices have, to some extent, restricted the programing responsibility of the station licensee and limited the licensee's opportunities to program according to the specific needs of his local community. They have also curtailed the availability of alternative program sources to the station and thus to the public which it serves.'

"True, the networks are to some degree accountable to the Commission through the stations for which they hold licenses. But this to me seems a devious and unsatisfactory way for the Commission to exert its influence. Indeed, even Frank Stanton of CBS in testimony in 1956 said that he thought the direct application of existing regulations * * * to networks rather than their indirect application through company-owned stations would represent 'a less complicated way to live.'

"I am quite aware, of course, of some of the problems, legal and otherwise, involved in extending the Commission's authority over networks. I am quite aware, too, of the special nature of networks: that they exist essentially as dealers in services, that they technically do no broadcasting of their own, except through their company-owned stations.

"Yet I think that network regulation is important enough to demand serious study and consideration by the Commission and by Congress. One possible approach might be to give legal recognition to the important and unique part which the networks play in broadcasting operations and to license them under standards of performance similar to those asked of individual stations." ("Study of Radio and Television Network Broadcasting," FCC Docket No. 12782, vol. 4, pp. 841–3.)

Peterson viewed network licensing as a means of more readily holding the networks

[20] See app. D, attached hereto.

"to standards of broadcasting in the public interest," particularly as to the enforcement of a requirement that the networks devote a portion of prime time to "public service broadcasting" (pp. 853–4). Such a requirement, in his opinion, would not constitute censorship (p. 854).

If networks were licensed, they would be compelled to assume direct responsibility for the content of programs originating with them. Certain witnesses appearing before the FCC in the course of its public hearings recommended the exercise of greater control by the networks. For example, one witness stated:

"Implicit in the license * * * is the assumption * * * that the licensee will operate responsibly and in the public interest and welfare, with honesty, integrity, and acceptable moral purpose.

* * * * *

"It is the licensee who promises to retain control over programs when he accepts the license, and it is the licensee who ultimately must assume responsibility for what is done all the way down the line. * * *

"Now this is the theory. In practice, however, the sponsor and his advertising counsel may—and I assume sometimes does—exercise a high degree of responsibility and authority for program content.

"This results in a dispersal of responsibility from network or station * * * to producer, to advertising agency, to sponsor. This division of responsibility may well be responsible for some of the current problems in broadcasting." (Steiner, vol. 1, p. 51–52.)

W. Theodore Pierson, a member of the law firm of Pierson, Ball & Doud, Washington, whose well-considered testimony was stated to represent in substance the views of 10 station licensees whom he represents, urged that "the fiction of licensee responsibility for choice and selection of network programs * * * be eliminated by permitting stations to transfer that responsibility to any network that is licensed as such by the Commission" (vol. 14, p. 2706).

His lengthy opening statement surveyed the problem of program content, highlighting the difficulties, both legal and practical, which would be encountered if the Commission itself were to exercise greater control over programing. It concludes with the following observations:

"We believe that no legislation should be sought by the Commission to give it authority to dictate broadcast programing in any degree, because of its doubtful constitutionality and because it would impose a new system of broadcasting which could not possibly be as effective as the present system in meeting the demands of the public.

* * * * *

"With respect to quiz rigging and payola, we are unaware that any licensee has been found to have been responsible for such conduct, but in any event, program regulation is not necessary to eliminate such evils. If any licensee did commit fraud and deceit similar to that involved in some of the quiz shows, it would raise a serious question as to his licensee qualifications. * * * Likewise a licensee who knowingly indulged the payola schemes. * * * Legislation making the receipt of payola by a station employee a crime might be helpful in the station's attempt to regulate its own shop. * * *

"There is a failure under the present system to merge the legal and practicable responsibility for the programs that are broadcast. While under the law the licensee has the nondelegable duty to choose and select his programs, he cannot as a practical matter, with respect to network programs, perform any real and substantial function in this connection. If we are to have network sales and programing, this responsibility of the licensee to choose and select programs must primarily remain a legal fiction and a virtual practical impossibility. * * * The indulgence of any fiction cannot help but spread its mockery to other areas of the law, with the result that responsibility tends to break down all along the line. We believe it essential, in order that broadcasting can expand its facilities to meet the ever-increasing public demand for service, that it have the practical means of competing in the national market for national advertising and of distributing program material countrywide to a large group of markets. To function effectively in competition with other media * * * there must be efficient means of clearing time for advertisers and programs by a central source.

"Under the present rules of the Commission a station may not grant rights of clearance to a network but can only give the network what has loosely been called option time, but which is not in reality an option. Clumsy procedures are required under the rules before the network can determine whether a package of markets that an advertiser wants to buy can be supplied. These procedures were imposed by the Commission on the grounds that the act placed the responsibility for choosing and selecting programs upon the licensee and this duty and responsibility was not delegable by contract to any other person, including a network. This interpretation of the act was upheld by the Supreme Court.

"We believe the Commission should recommend legislation that would permit a licensee to grant absolute rights of clearance for a portion of his time to any network organization that itself was licensed as a network by the Commission and that the Commission should be given the same licensing and regulatory authority and powers over the network that it now has over individual licensees. It would then be possible for a station, if it so desired, to transfer to the network the responsibility for programing a certain portion of its broadcast day under such conditions as the station might wish to impose. This would enable stations and the networks to establish a far more efficient system of time and program clearance. It would remove once and for all the fiction that a licensee can in reality choose and select the programs that he receives from the network. It would fix legal responsibility for network and nonnetwork programs in the hands of the ones who could practically and realistically control them" (Pierson, vol. 14, pp. 2732–2735).

In the course of interrogation by the Commissioners, the witness supplemented the foregoing statement as follows:

"Commissioner FORD. * * * I am afraid that what this proposal you have here might do, or might lead to, ultimately, would be an abdication to three men in the United States of the program fare throughout the country.

"Mr. PIERSON. Well, to no greater extent does it need to than it does now. Because as a practical matter, this is true now. The Commission, however, has limited the time, in its rules, that can be delegated to a network, and it has done this on the basis of avoiding concentration of controls, and it has been upheld by the Supreme Court as not involving any violation of censorship." (Pierson, vol. 14, p. 2790.)

APPENDIX B

The subcommittee's interim report, dated February 9, 1960, recommends that the proposed legislation providing for network licensing set forth particular factors to be considered by the Commission in determining whether the issuance or renewal of the license to the applicant-network meets the standard of public interest. These four factors or guidelines included a requirement prohibiting the network from "using any broadcasting facility, directly or indirectly, in promoting the sale or distribution of the product or service of any company or person in which it has any direct or indirect financial or beneficial interest."

At the time the subcommittee's interim report was written, its files contained material indicating that certain networks had used their facilities in promoting the sale of products of companies in which the networks had financial interests. In the course of the subcommittee's payola hearings following the publication of the report, testimony was developed which supported these allegations.

For example, the network facilities of American Broadcasting-Paramount Theaters Inc., were used to promote sales of a record-carrying case which was specifically endorsed by Dick Clark and plugged in various ways on the "Dick Clark Show," and "American Bandstand." Although there is doubt as to the actual amount, if any, received by the network, the financial arrangement between the company which manufactured the product (in which company Dick Clark has a financial interest) and the network contemplated apparently the distribution to the network of one-third of any royalties paid on sales of the record cases. ("Payola" and Related Deceptive Methods in the Broadcast Field, 1960, Tr. 2070.)

Although Mr. Leonard Goldenson, president of ABC-Paramount, denied that the network ever condoned the free plugs of the product over the air, he pointed out that royalty agreements between networks and manufacturers of products (such products being identified in some way with a television personality) are common throughout the television industry:

"This was a merchandising thing under which the Dick Clark name and face, as a subsidiary right, had been made by WFIL with whatever the company is that had this carrying case. And this is common in the business, to have licensing of subsidiary rights of a personality, which helps to merchandise that personality and get him known in different areas." (Tr. p. 2069.)

ABC-Paramount has similar royalty contracts with other manufacturers. Mr. Goldenson cited one specific example:

"Well, there would be a contract, let us say, Rifleman, a program. It may be the sponsors have as a result of the show, they have plastic guns made up in the form of a rifle. Now those are given out in, say, stores as premiums throughout the United States.

"We, together with the talent and the producer of the show may get a royalty for licensing that gun that was created out of that show." (Tr. p. 2085.)

Although the witness contended that the revenue derived by the network in the form of royalties from the sale of the carrying cases, plastic rifles, etc., are nominal, he frankly stated that such "merchandising tieups" were obtained in order to "better get the American public acquainted with the show." (Tr. p. 2087.) The ultimate pecuniary benefit to the network resulting therefrom is obvious.

There are also products in which the network has a direct financial interest, by way of a stock interest in the company which manufactures the product. ABC-Paramount owns 35 percent of Disneyland, a unique type of amusement park located near Los Angeles. A television program produced by Walt Disney originates from Disneyland and is carried over the ABC network. Although the primary purpose of the show is not to "merchandise" Disneyland as such (but rather some sponsor's product), that is surely one of the incidental effects:

"Mr. BENNETT. Are you trying to sell Disneyland?

"Mr. GOLDENSON. It is not being done. The program is emanating from it but actually Disneyland is in a sense being sold when the program is emanating from there." (Tr. p. 2074.)

The temptation to use the broadcast facility improperly by the network for the purpose of promoting the product, whatever its

nature, is obvious. Were a more searching investigation made in this area, frequent and widespread abuses, resulting from the application of subtle but nevertheless coercive means, would undoubtedly be revealed. For instance, Mr. Alan Freed, formerly an employee of ABC-Paramount, testified in executive session before this subcommittee regarding his activities as a network diskjockey. This testimony has not been publicly released. However, Mr. Goldenson, who apparently had learned of a certain charge made by Mr. Freed in the course of his testimony, undertook to refute Mr. Freed's testimony on that point, and in doing so revealed its substance:

"If I may disgress for a minute * * * it has come to my attention that Mr. Freed advised this committee in executive session that Mr. Mortimer Weinbach, vice president and general counsel of the American Broadcasting Division, stated to Mr. Freed at the time—Mr. Freed was about to sign his contract with ABC dated May 20, 1958—that 'I trust you will be sure to play heavily on ABC-Paramount records now that you are in the family; and I also trust that you would play nothing but Paramount theaters with your station show.' * * * Mr. Weinbach has assured me that Mr. Freed's statement is completely untrue." (Tr. pp. 2021–2022.)

The injury to the public interest inherent in ownership by diskjockeys of recording companies and the like also exists with respect to ownership by networks of such and other facilities. Network licensing and regulation will provide a statutory means of curbing network broadcasting which enhances profits from their outside commercial ventures without public disclosure of the existence of their interest in such ventures. The principle that diskjockeys should not be allowed to exploit the airwaves for their own hidden profit applies with equal directness to the same type of exploitation by the networks.

APPENDIX C

In the course of the subcommittee's quiz show hearings, considerable testimony was developed which clearly indicates the lethargic attitude of the networks toward the exercise of control and assumption of any direct responsibility for the material broadcast over their facilities.

Mr. Merton Koplin, producer of the quiz shows, "$64,000 Challenge" (CBS), "$64,000 Question" (CBS), and associate producer, for a time, of "The Big Surprise" (NBC), gave some illuminating testimony regarding the methods by which the outcome of such contests was arranged by the producers of these shows. The inertia displayed by network officials, even in the face of news accounts clearly indicating the use of deceptive practices, can reasonably be interpreted as an acceptance on their part that the networks' role be reduced to that of a cipher, a mere conduit through which program matter moves on its way to the viewer. For example:

"Mr. GOODWIN. Prior to these incidents which were the first ones which received public attention where a contestant made a complaint, in the years of production of the Question and the Challenge, did any representative of the Columbia Broadcasting System ever ask you in any fashion whether the shows * * * were controlled?

"Mr. KOPLIN. No, sir.

"Mr. GOODWIN. Did any representative of the National Broadcasting Company ever, throughout the life of the show, 'The Big Surprise,' ask you whether or not that show was a controlled show?

"Mr. KOPLIN. No, sir.

* * * * *

"Mr. GOODWIN. * * * in April, 1957, * * * an article entitled 'The $60 Million Question', in Time magazine * * * charged that people appearing on shows had been guaranteed money * * * that producers of shows were using techniques in order to make contestants continue in order to raise ratings, that a contestant on 'The Big Surprise' admitted publicly in Time magazine that on some of the questions he answered during his screening interviews they turned up on the show itself, that the article concluded, a 4-page article, by saying that the producers seem to be able to control everything except their own fears of losing an audience.

* * * * *

"To your knowledge, during 1957, was any member of your organization approached and asked if the shows were controlled?

"Mr. KOPLIN. Not to my knowledge.

"Mr. GOODWIN. Have you discussed this matter with Mr. Carlin, who was the head and executive producer of Entertainment Productions, Incorporated? * * * Has he stated if anyone ever approached him and asked if the shows were controlled?

"Mr. KOPLIN. He stated that no one has.

* * * * *

"Mr. GOODWIN. In light of the fact of * * * these national publications, of charges which show control, and in light of the fact that at least within your experience and the experience of your organization, one of the largest producers of quiz shows, no inquiries were ever made, would you consider it a fair statement to say that at least the eyes of the television industry were closed to this mass deception of the American public?

* * * * *

"Mr. KOPLIN. No one seemed to care.

* * * * *

"Mr. GOODWIN. * * * Would it be fair to say that the most charitable thing that can be said is that the television industry closed its eyes to this deception? * * *

"Mr. KOPLIN. I think they accepted it as a natural part of show business." ("Television Quiz Show Programs," 1959, Tr. 241–246).

APPENDIX D

During the subcommittee's 1958 hearings, a great volume of testimony and other evidence was presented relating to the technical standards of the FCC which pertain to the manufacture and sale of transmitters and receivers for FM and TV broadcast stations. The issue which principally concerned the subcommittee was whether these standards are conducive, because of their lack of flexibility, to the establishment and continuation of patent monopolies. "The problem of formulating technical standards so as to avoid tying the standards to patents owned or controlled by a single manufacturer has long been recognized." ("Investigation of Regulatory Commissions and Agencies," 1958, pt. 7, p. 2426.)

A distinct but closely related issue before the subcommittee was whether, and in what circumstances, the Commission ought to revoke or refuse to license anyone whose conduct, in respect to patents, is considered by the Commission to have violated the antitrust laws.

Section 313 of the Communications Act, as amended, provides that the antitrust laws apply to the "manufacture and sale of and to trade in radio apparatus and devices entering into or affecting" interstate and foreign communications. The section also provides that a court may, in cases where "any licensee" is "found guilty of the violation of the provisions of such laws," not only impose appropriate penalties under the antitrust laws, but also revoke the license of such licensee. Section 311, a companion provision, expressly directs the Commission to refuse a station license or construction permit to any person (or to persons directly or indirectly controlled by such persons) whose license has been revoked by a court pursuant to section 313. (Pt. 7, p. 2832.) However, the Supreme Court has held that the FCC's authority is not limited merely to instances where there has been a prior judicial determination of the existence of an antitrust violation. In the Chain rules case, *National Broadcasting Co., et al.* v. *United States*, 319 U.S. 190 (1943), the Supreme Court declared that the Commission is under a duty to challenge the qualifications of an existing licensee, or any applicant for a license, to operate the station in the public interest when the licensee or applicant can exercise monopolistic patent control as to broadcasting equipment, even though such licensee or applicant has not been adjudged guilty by a Federal court of violating the Sherman or Clayton Act. (Id., pt. 7, p. 2796.) The Court said, 319 U.S. at pp. 222–223:

"That the Commission may refuse to grant to persons adjudged guilty in a court of law of conduct in violation of the antitrust laws certainly does not render irrelevant consideration by the Commission of the effect of such conduct upon the public interest, convenience, or necessity. A licensee charged with practices in contravention of this standard cannot continue to hold his license merely because his conduct is also in violation of the antitrust laws and he has not been proceeded against and convicted. By clarifying in S. 311 the scope of the Commission's authority in dealing with persons convicted of violating the antitrust laws, Congress can hardly be deemed to have limited the concept of public interest so as to exclude all considerations relating to monopoly and unreasonable restraints upon commerce. Nothing in the provisions or history of the acts lends support to the inference that the Commission was denied the power to refuse a license to a station not operating in the public interest merely because its misconduct happened to be an unconvicted violation of the antitrust laws." (Id., pt. 7, p. 2796.)

Hence, the Commission need not wait until a violation of law is found to exist by some other forum prior to taking action looking toward the challenging of the licensee's qualifications to use his license in the public interest. But, as noted by the Supreme Court in the NBC case, it is not the Commission's function to apply the antitrust laws, as such. (Id., pt. 7, pp. 2832–2833.)

A memorandum prepared by William H. Bauer in the course of his duties as patent adviser to the FCC contains the following summary of Commission policy regarding information which indicates antitrust violations by a broadcast licensee:

"The Commission will refer to the Department of Justice facts evidenced by its records which it believes show a violation of one or more antitrust laws for appropriate action, and if the 'person' or 'persons' involved are licensees or applicants for licenses the Commission will consider the facts in a separate proceeding, to determine whether said 'person' or 'persons' are qualified to operate a broadcast station in the public interest or do both." (Id., pt. 7, p. 2538.)[1]

Notwithstanding the powers of the Commission outlined above, it has in practice, apparently, followed in this connection what

---

[1] The "Commission Report on Uniform Policy as to Violation by Applicants of Laws of United States" (1950) contains the following statement:

"As hereinabove pointed out, the Commission has the authority to examine pertinent aspects of the past history of an applicant and this history, of course, includes any violation of Federal law. Even though no suit alleging illegal conduct has been filed, or if one has been filed but has not been adjudicated, the Commission may consider and evaluate the conduct of an applicant insofar as it may relate to matters intrusted to the Commission." (Id., pt. 7, p. 2832.)

might be described as a hands-off policy. In 1951 the Commission, upon the advice of its patent adviser, recommended to the Department of Justice that antitrust proceedings be instituted against RCA and NBC, but reserved to itself consideration of the issue whether revocation of NBC's licenses should be sought. In 1954 the Department of Justice filed its antitrust action against RCA and NBC, naming the Bell System, General Electric, and Westinghouse as coconspirators, but its complaint, in accordance with the Commission's reservation, did not seek revocation of NBC licenses (id., pt. 7, p. 2639). However, in 1952 the Commission voted against challenging several NBC license renewals on the ground of patent misuse, despite memorandums of the patent staff calling attention to the Commission's policy (set forth in a 1949 letter report to the chairman of the Senate Interstate and Foreign Commerce Committee) which was based on the 1943 opinion of the Supreme Court in the *NBC* (chain rules) case (id., pt. 7, pp. 2614, 2722).

The opposing position of the Commission (or at least its General Counsel) and the patent adviser is illustrated by 1956 memorandums of the latter in which he took the position that (under the principle of the chain rules case) the Commission was charged with a nondiscretionary duty to challenge the qualifications of a licensee in the public interest, whereas the former took the position that this duty was discretionary, pending a court determination of the existence of a patent misuse (id., pt. 7, p. 2642).

Ex-Commissioner Doerfer testified that he was not aware of any instance where the FCC had challenged a license's renewal because of the licensee's participation in a patent misuse (id., pt. 7, p. 2819).

POWER OF FCC TO REVOKE LICENSE OF SUBSIDIARY COMPANY

Where a radio and television network organization operates the manufacturing and broadcasting phases of its business as merely separate divisions of one large company, the construction permits and licenses for stations which it has been granted by the Commission, together with its patents, are all held by the same entity. The company is the licensee. As licensee, in the event it engages in any monopolistic patent practice, it is subject to challenge by the FCC that it is not fit to operate its broadcasting activity in the public interest, in accordance with the views expressed by the Supreme Court in the NBC chain rules case.

On the other hand, where the broadcasting and manufacturing phases of the business are carried on by separate corporate entities, the various station licenses and construction permits are issued to the broadcasting company, i.e., the network; the manufacturing company is not the licensee as such. The broadcasting company is a wholly owned subsidiary of the manufacturing company (as in the case of NBC and RCA). In this situation, can the licensee (the network subsidiary) be challenged because of alleged improper patent practices of the manufacturing parent?

Some consideration of this question was given in the course of the subcommittee's 1958 hearings. The FCC's former patent adviser, William H. Bauer, stated in a memorandum dated October 24, 1952, that there "seems to be no question respecting the Commission's legal right to initiate a proceeding on the question of NBC's qualifications as a license of TV broadcast stations because of RCA's acquisitions and practices for obtaining and maintaining its monopoly." (Id., pt. 7, p. 2623.)

In his testimony, ex-Commissioner Doerfer, after noting that any patent misuse or patent monopoly on the part of broadcast licensees who are also engaged in manufacturing "would be of concern to the Commission" because such misconduct "if brought to the attention of the Commission and finally established * * * is a character blemish which may disqualify a licensee," went on to say that the Commission, "of course, has no direct jurisdiction over manufacturers who are not licensees of the * * * Commission, nor does the * * * Commission have direct jurisdiction over the parent company of one of its licensees." (Id., pt. 7, p. 2800.)

Commissioner Doerfer's views concerning this question were further developed in the course of interrogation by Chairman HARRIS and Representative FLYNT:

"The CHAIRMAN. * * * you testified that the Commission did not have direct jurisdiction over a parent company of one of its licensees. Is that true?

"Mr. DOERFER. That is correct.

* * * * *

"The CHAIRMAN. Are you in a position to state an opinion * * * whether or not the Commission should grant or renew a license to a subsidiary of what would be considered an unfit parent company?

"Mr. DOERFER. * * * I would hestitate to lay down sanctions or urge sanctions for the refusal to renew a license outside of the conduct of the licensee. If in fact the licensee is not independent in carrying out the purpose for which he got the license, that would be a matter of consideration, but as long as that licensee exercises complete independence of judgment and is not the tool for carrying out some unlawful purpose, or purposes, contrary to the public policy, I am very doubtful that any action of the FCC would be other than arbitrary and capricious.

"The CHAIRMAN. You see what I am getting at, as to whether or not you would think there is need for legislation in this field regarding the authority of the Commission. If there is any lack of authority to look into the character of the parent campany, and if the Commission does not have that power, then perhaps legislation might be considered. * * *

"Mr. DOERFER. * * * I hesitate to try to defend the proposition, for illustration, whereby a licensee should be refused a license because his brother or his relatives are not good citizens, or somebody's son is a reprobate. * * * I think that we have to take a look at the licensee, and if he is not the tool or the instrument or whatever you call him, just a front, I don't wish to go that far.

* * * * *

"Mr. FLYNT. * * * Do you feel that you as a Commissioner have, under existing law, full power and authority to deny or withdraw a license from a subsidiary in a case where the parent company is disqualified for the license which the subsidiary seeks to get or to have renewed?

"Mr. DOERFER. Yes; but there is this qualification: let's take an illustration. Let's assume that a company is convicted of an antitrust violation, but the court, having the power to revoke the license, does not revoke the license.

"It is my understanding that Congress in 1952 indicated that it did not want the FCC to revoke that license on the theory of the injustice of double jeopardy.

"With respect to a parent company, certainly the Commission may have the authority, but again if in the divestiture proceeding the court did not see fit to divest the subsidiary and correct an abuse, I cannot say that the Commission would be warranted in inflicting the extreme sanctions of revocation. After all, there is a relationship between a sanction which the FCC administers and which a court does. * * *

"Mr. FLYNT. * * * If John Doe is the sole stockholder of A company which is a licensee, and if he is convicted, you would certainly then go behind the corporate identity and associate the sole individual with the corporation that owns it?

"Mr. DOERFER. * * * Yes.

"Mr. FLYNT. * * * Then would you permit a licensee subsidiary company to hide behind the cloak of corporate separation and treat that company differently than you would treat A company, which was owned by an individual other than by a parent company?

"Mr. DOERFER. Absolutely not; but I wanted to add that whether or not there would be an absolute revocation depends upon the facts of the condition and the circumstances.

* * * * *

"The CHAIRMAN. In other words, the act requires the Commission to refuse such station license when the court has revoked such license, but if the court convicts someone in an antitrust proceeding, as an example, and does not revoke the license, then you are not required to take such action, but you may if you feel it necessary. Is that true?

"Mr. DOERFER. Yes; we may if we found it necessary. * * * my reaction is, if it were within the power of the court to revoke the license and if it had it under consideration and did not do so, I think it would be rather presumptuous on the part of the FCC to inflict a further penalty." (Id., pt. 7, pp. 2854–2858.)

Mr. HARRIS. Mr. Speaker, I will just take a minute to respond to the gentleman, because I do not want the record to be left with inaccuracies.

This bill was thoroughly explained to this House at length some time ago. The gentleman, and every member of the committee, is well aware of the fact that there is no one who has to do with the preparation of programs who is freed from responsibility. The provisions of this bill which get at the problems of payola and deceptive programing apply to the networks, the producers, the advertisers, and everybody, and would subject them to penalties if they do not discharge their responsibilities. In connection with deceptive practices, section 509(a)(4) of this bill, which I explained before, is applicable to networks, to advertisers, and to producers. Consequently the gentleman's remark that it is ineffective by leaving a windfall for certain groups is contrary to the fact. I refer you to those sections of the bill and to the application of the forfeiture provision to those sections.

Mr. BENNETT of Michigan. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield.

Mr. BENNETT of Michigan. Is there anything in this bill which places any legal responsibility upon the networks to operate in the public interest as the individual licensees is required to operate?

Mr. HARRIS. Yes; two provisions—sections 508 and 509 to which I have referred, are applicable to everybody connected with programing.

Mr. BENNETT of Michigan. These sections provide for criminal penalties against anyone who knowingly violates the law. They do not bring the networks under FCC regulation in the sense that the individual station owner is regulated. They do not require the networks to operate in the public interest. The networks remain completely free as such from FCC regulation.

Mr. HARRIS. The responsibility is placed on them: No. 1, with respect to payola and matters associated therewith; and, No. 2, with respect to deceptive programs that are put on the air

through a broadcasting facility. In other words, the producers and the networks cannot turn their backs and close their eyes any more on these practices without being subject to the penalty of the law.

Mr. AVERY. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield.

Mr. AVERY. They certainly are not excluded from the responsibilities set out in the bill.

Mr. HARRIS. The gentleman knows they are not. They are included.

Mr. AVERY. Of course they are.

Mr. HARRIS. Mr. Speaker, I move the previous question.

The previous question was ordered.

The motion was agreed to.

ESTABLISHMENT OF ANNUAL NATIONAL FOREST PRODUCTS WEEK

The SPEAKER. The Chair recognizes the gentleman from Georgia [Mr. FORRESTER].

Mr. FORRESTER. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution (S.J. Res. 209) providing for the establishment of an annual National Forest Products Week.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the present consideration of the resolution?

There being no objection the Clerk read the resolution, as follows:

Whereas our country and its people have always found constant strength, individual peace and personal pride in the bounty of our forest and timber lands; and

Whereas from the beginning of our Nation's founding, the forest and its products have provided a core of living and freedom touching and inspiring each citizen with majestic beauty and practical use; and

Whereas as our only renewable resource, wood offers the availability and abundance to satisfy the Nation's ever growing demands and through modern forestry we can be assured of a continuous supply of timber for the future; and

Whereas the first settlers gained foothold in the new world and carved for themselves and their descendants a free nation and built homes, schools, and churches using the forests as an ever plentiful source of material; and

Whereas this early building is now multiplied a thousandfold in these great United States and the importance of our forest lands has developed with equal vigor through wise management, constant replanting and growth of his vital resource, and today our forests provide thousands of products—lumber, paper, building materials, chemicals, furniture, and cloth—all dedicated to improving the lives of our people; and

Whereas in order to reemphasize to each citizen in the United States the importance and heritage of our vast forest resources which are inseparably tied to our present and our future: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the seven-day period beginning on the third Sunday of October in each year is hereby designated as National Forest Products Week, and the President is requested to issue annually a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

The resolution was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

PUBLIC WORKS APPROPRIATION BILL, 1961

Mr. CANNON. Mr. Speaker, I call up the conference report on the bill (H.R. 12326) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the statement.

The conference report and statement follow:

CONFERENCE REPORT (H. REPT. No. 2181)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12326) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 8, 9, and 14.

That the House recede from its disagreement to the amendments of the Senate numbered 11, 12, 16, and 18, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$12,023,000"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$706,491,600"; and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$71,896,000"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$4,893,000"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$3,943,000"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$4,290,000"; and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$10,800,000"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,451,210,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$212,750,000"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,550,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,250,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 4, 10, and 20.

CLARENCE CANNON,
LOUIS C. RABAUT,
MICHAEL J. KIRWAN,
BEN F. JENSEN,
JOHN TABER,
Managers on the Part of the House.

ALLEN J. ELLENDER,
CARL HAYDEN,
RICHARD R. RUSSELL,
JOHN L. MCCLELLAN,
A. WILLIS ROBERTSON,
LISTER HILL,
SPESSARD L. HOLLAND,
WARREN G. MAGNUSON,
ROBT. S. KERR,
CLINTON P. ANDERSON,
HENRY DWORSHAK,
MILTON R. YOUNG,
KARL MUNDT,
MARGARET CHASE SMITH,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12326) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TITLE I—CIVIL FUNCTIONS, DEPARTMENT OF THE ARMY

Rivers and harbors and flood control

General Investigations

Amendment No. 1: Appropriates $12,023,000 instead of $10,895,800 as proposed by the House and $13,062,800 as proposed by the Senate. The funds provided are to be distributed as follows.

Item	Budget estimate for fiscal year 1961	Conference allowance
GENERAL INVESTIGATIONS		
Examinations and surveys:		
Navigation studies	$880,000	$1,320,000
Flood control studies	2,720,000	4,000,000
Beach erosion cooperative studies	150,000	150,000
Special studies:		
San Francisco Bay survey	400,000	500,000
Ohio River Basin review	400,000	400,000
Great Lakes Harbor survey	107,000	264,000
Coordination studies with other agencies	150,000	150,000
Rampart Canyon, Alaska	100,000	225,000
Hurricane studies	850,000	850,000
Hudson River (siltation) studies	90,000	90,000
Potomac River review	400,000	400,000
Colorado River, Tex	118,000	118,000
Trinity River	250,000	321,000
Subtotal, examinations and surveys	6,615,000	8,788,000
Collection and study of basic data:		
Stream gaging (U.S. Geological Survey)	$235,000	$235,000
Precipitation studies (U.S. Weather Bureau)	340,000	340,000
Fish and wildlife studies (U.S. Fish and Wildlife Service)	50,000	50,000
International water studies	60,000	60,000
Subtotal, collection and study of basic data	685,000	685,000
Research and development:		
Beach erosion development studies	200,000	200,000
Hydrologic studies	150,000	150,000
Civil works investigations	1,200,000	1,200,000
Mississippi Basin model:		
Construction	700,000	700,000
Mississippi River comprehensive study	150,000	150,000
Subtotal, research and development	2,400,000	2,400,000
Arkansas-Red River pollution survey		150,000
Total, general investigations	9,700,000	12,023,000

Budgeted funds for the Missouri River slack-water navigation study and the Garfield, Utah, small-boat harbor have been disallowed.

Within the amount provided for the flood control studies, $10,000 is to be used on the J. Percy Priest Reservoir study.

Construction, General

Amendment No. 2: Appropriates $706,491,600, instead of $662,622,300 as proposed by the House and $737,884,600, as proposed by the Senate. The conferees are in agreement that funds appropriated under this item should be allocated as set forth in the following tabulation:

Construction, general, State and project	Budget estimate for fiscal year 1961		Conference allowance	
	Construction	Planning	Construction	Planning
Alabama:				
Aquatic plant control. (See Louisiana.)				
Columbia lock and dam, Alabama and Georgia	$3,325,000		$3,325,000	
Holt lock and dam		$378,000		$549,000
Jackson lock and dam	4,409,000		4,238,000	
Millers Ferry lock and dam				200,000
Walter F. George (Fort Gaines) lock and dam, Alabama and Georgia	20,178,000		20,178,000	
Alaska:				
Douglas Harbor			[1] (364,000)	
Fairbanks		100,000		100,000
Homer Harbor, small-boat harbor	542,000		542,000	
Ninilchik Harbor	[1] (229,000)		[1] (229,000)	
Seldovia Harbor, small-boat harbor	548,000		548,000	
Arizona:				
Alamo Reservoir		175,000		175,000
Gila River-Camelsback Reservoir			150,000	
Tucson		90,000		90,000
Arkansas:				
Arkansas River and tributaries, Arkansas and Oklahoma:				
(a) Emergency bank stabilization	5,000,000		5,000,000	
(b) Other bank stabilization			2,000,000	
Arkansas River and tributaries, Arkansas and Oklahoma (general studies)		381,000		381,000
Beaver Reservoir	2,800,000		2,800,000	
Bull Shoals Reservoir (units 5 and 6), Ark. and Mo	3,200,000		3,200,000	
Bull Shoals Reservoir (units 7 and 8), Ark. and Mo	100,000		100,000	
Dardanelle lock and dam	6,100,000		6,100,000	
DeGray Reservoir		300,000		300,000
Gillham Reservoir		100,000		100,000
Greers Ferry Reservoir	14,143,000		14,143,000	
McKinney Bayou and Barkman Creek, Ark. and Tex	668,000		668,000	
Millwood Reservoir			500,000	
Red River at Garland City			200,000	
Red River levees and bank stabilization below Denison Dam, Ark., La., and Tex	700,000		700,000	
Table Rock Reservoir, Ark. and Mo. (See Missouri.)				
California:				
Bear Creek		70,000		70,000
Black Butte Reservoir	5,900,000		5,900,000	
Bodega Bay			405,000	
Carbon Canyon Dam and channels	1,207,000		1,207,000	
Devil, East Twin, Warm, and Lytle Creeks	1,300,000		1,300,000	
Halfmoon Bay Harbor (Pillar Point)	1,800,000		1,800,000	
Los Angeles County drainage area	13,100,000		13,100,000	
Lower San Joaquin River and tributaries	1,260,000		1,260,000	
Middle Creek	403,000		403,000	
Mill Creek levees	503,000		503,000	
New Hogan Reservoir	1,800,000		1,800,000	
Noyo River and Harbor (breakwater)				56,000
Oroville Reservoir		50,000		50,000
Pine Flat Reservoir	500,000		500,000	
Playa Del Rey Inlet and Harbor	154,000		154,000	
Port Hueneme Harbor	2,422,000		2,422,000	
Russian River Reservoir	400,000		400,000	
Sacramento River	2,200,000		2,200,000	
Sacramento River and major and minor tributaries	1,000,000		1,000,000	
Sacramento River, Chico Landing to Red Bluff		50,000		50,000
Sacramento River deep-water ship channel	8,000,000		7,000,000	
San Antonio and Chino Creeks	1,336,000		1,336,000	
San Jacinto River and Bautista Creek	1,300,000		1,300,000	
San Lorenzo Creek	1,608,000		1,608,000	
Santa Clara River	305,000		305,000	
Santa Cruz Harbor	300,000			
Santa Maria Valley levees	1,850,000		1,850,000	
Success Reservoir	2,588,000		2,588,000	
Terminus Reservoir	6,300,000		6,300,000	
Truckee River and tributaries, California and Nevada. (See Nevada.)				
Tuolumne River Reservoir (new Don Pedro)		25,000		25,000

See footnote at end of table.

Delaware:				
Inland Waterway, Delaware River to Chesapeake Bay, Del. and Md.: Canal improvement (pt. II)		103,000		103,000
Rehoboth Beach to Indian River Inlet (reimbursement)	75,000		75,000	
Florida:				
Aquatic plant control. (See Louisiana.)				
Central and southern Florida	10,000,000		11,500,000	
Intracoastal Waterway, Caloosahatchee River to Anclote River	2,000,000		2,000,000	
Intracoastal Waterway, Jacksonville to Miami (10′ by 125′ channel)			400,000	
Lake Worth Inlet to South Lake Worth Inlet, Palm Beach County (reimbursement)	118,200		118,200	
Little Manatee River (deferred for restudy)		12,000		12,000
Port Everglades Harbor, 1958 act	750,000		750,000	
Tampa Harbor, 30-, 34-, and 36-foot channels	117,000		117,000	
Georgia:				
Aquatic plant control. (See Louisiana.)				
Carters Dam				75,000
Columbia lock and dam, Alabama and Georgia. (See Alabama.)				
Hartwell Reservoir, Ga. and S.C	21,375,000		21,375,000	
Savannah River below Augusta	900,000		900,000	
Walter F. George lock and dam, Alabama and Georgia. (See Alabama.)				
Hawaii:				
Hilo Harbor				100,000
Honolulu Harbor	1,216,000		1,216,000	
Kahului Harbor			808,000	
Kawainui Swamp	500,000		500,000	
Idaho:				
Bruces Eddy Reservoir (construction not yet authorized)				600,000
Columbia River local protection: Blackfoot River			(1)	
Illinois:				
Beardstown	700,000		700,000	
Calumet Harbor, Ill. and Ind				70,000
Calumet Harbor and River, Ill. and Ind. (breakwater)		31,000		31,000
Calumet Harbor and River, Ill. and Ind. (Cargill docks only)			225,000	
Campbells Island	175,000			
Carlyle Reservoir	3,500,000		3,500,000	
Chicago, Burlington & Quincy RR. bridge, including channel change	752,000		752,000	
Clear Creek drainage and levee district	270,000		270,000	
East St. Louis and vicinity	2,476,000		2,476,000	
Freeport (deferred for restudy)		10,000		10,000
Hunt Drainage District and Lima Lake Drainage District	900,000		900,000	
Illinois Waterway Calumet-Sag Channel (part I)	9,500,000		7,500,000	
Kenilworth (reimbursement)	5,200		5,200	
Mississippi River between St. Louis, Mo., and lock and dam 26, dam 27, Illinois and Missouri	1,500,000		1,500,000	
Mississippi River between the Ohio and Missouri Rivers, Ill. and Mo.: Regulating works	1,500,000		1,500,000	
Mississippi River between the Ohio and Missouri Rivers (repair dikes and revetments)		20,000		20,000
Mississippi River between Missouri River and Minneapolis, Minn.: Rectification of damages	2,660,000		2,660,000	
Shelbyville Reservoir		250,000		250,000
Subdistrict No. 1 of Drainage Union No. 1 and Bay Island Drainage and Levee District		111,000		111,000
The Sny Basin	1,800,000		1,800,000	
Wood River drainage and levee district	1,180,000		1,180,000	
Indiana:				
Calumet Harbor, Ill. and Ind. (See Illinois.)				
Cannelton locks and dam, Indiana and Kentucky				150,000
Evansville	450,000		100,000	
Huntington Reservoir		125,000		125,000
Indiana Harbor				25,000
Levee unit No. 5, Wabash River				25,000
Louisville lock and dam, Indiana and Kentucky. (See Kentucky.)				
Markland locks and dam, Indiana, Kentucky, and Ohio. (See Kentucky.)				
Mississinewa Reservoir		156,000		156,000
Monroe Reservoir	275,000		275,000	
Salamonie Reservoir		56,000		56,000
Sugar Creek levee		15,000		15,000
West Terre Haute			100,000	
Iowa:				
Decatur Bend Cutoff			155,000	
Dubuque			(1)	
Floyd River and tributaries	791,900		791,900	
Green Bay levee and drainage district No. 2		45,000		45,000
Little Sioux River	2,300,000		2,300,000	
Missouri River agricultural levees, Iowa, Kansas, Missouri, and Nebraska (active portion only)				175,000
Missouri River channel stabilization, Iowa, Kansas, Missouri, and Nebraska:				
(a) Sioux City, Iowa, to Omaha, Nebr	5,600,000		5,600,000	
(b) Omaha, Nebr., to Kansas City	2,800,000		2,800,000	
(c) Kansas City to the mouth	3,475,000		3,475,000	
Missouri River, Kenslers Bend, Nebr., to Sioux City, Iowa, Nebr. and S. Dak. (See Nebraska.)				
Muscatine Island Levee District and Muscatine-Louisa County Drainage District No. 13	1,400,000		1,400,000	
Rathbun Reservoir				130,000
Red Rock Reservoir	3,600,000		3,600,000	
Saylorville Reservoir		165,000		165,000
Kansas:				
Council Grove Reservoir	2,000,000		2,000,000	
Frankfort		20,000		20,000
John Redmond (Strawn) Reservoir	3,800,000		3,800,000	
Kansas City, Kans. and Mo			500,000	
Manhattan	800,000		800,000	
Marion Reservoir		150,000		150,000
Milford Reservoir	1,000,000		500,000	
Missouri River agricultural levees, Iowa, Kansas, Missouri, and Nebraska. (See Iowa.)				
Missouri River channel stabilization, Iowa, Kansas, Missouri, and Nebraska. (See Iowa.)				
Ottawa	940,000		940,000	
Perry Reservoir		175,000		175,000
Pomona Reservoir	3,500,000		3,500,000	
Topeka	1,700,000		1,700,000	
Tuttle Creek Reservoir	16,500,000		16,500,000	
Wilson Reservoir	2,000,000		2,000,000	

See footnote at end of table.

Construction, general, State and project	Budget estimate for fiscal year 1961		Conference allowance	
	Construction	Planning	Construction	Planning
Kentucky:				
Barkley Dam, Ky. and Tenn	$17,100,000		$17,100,000	
Cannelton locks and dam, Indiana and Kentucky. (See Indiana.)

	(710,819,000)		(706,491,600)	

[1] Not included in totals—eligible for selection under appropriate lump-sum appropriation at end of table.

Amendment No. 3: Strikes language proposed by the Senate.

Amendment No. 4: Reported in disagreement.

Operation and Maintenance, General

Missouri River, Kansas City to the mouth

The conferees of both Houses are in agreement that the Senate report statement concerning the use of maintenance funds to remove shoals in this section of the Missouri River is to be disregarded and that the prohibition carried in the language of the bill concerning the use of such funds is to be followed without deviation or modification in any manner.

Flood control, Mississippi River and Tributaries

Amendment No. 5: Appropriates $71,896,000 instead of $69,560,000 as proposed by the House and $74,896,000 as proposed by the Senate. The funds appropriated under this heading are to be distributed as follows:

Projects	Budget estimate for fiscal year 1961		Conference allowance	
	Construction	Planning	Construction	Planning
1. General investigations:				
(a) Examinations and surveys		$60,000		$60,000
(b) Collection and study of basic data		55,000		55,000
Subtotal, general investigations		115,000		115,000
2. Construction and planning:				
Mississippi River levees	2,760,000		3,386,000	
Channel improvement	22,000,000		23,000,000	
Memphis Harbor	640,000		640,000	
Greenville Harbor			150,000	
Vicksburg Harbor	1,370,000		1,370,000	
Old River control	8,400,000		8,400,000	
St. Francis Basin	4,600,000		4,600,000	
Lower White River	150,000		150,000	
West Tennessee tributaries	400,000		400,000

Total, construction and planning	52,135,000		54,531,000	
4. Maintenance	17,250,000		17,250,000	
Grand total	69,500,000		71,896,000	

TITLE II—DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

General Investigations

Amendment No. 6: Appropriates $4,893,000 instead of $4,575,000 as proposed by the House and $5,376,000 as proposed by the Senate. The increase above the House figure is distributed as follows:

Evaporation reduction materials and methods	$100,000
Middle Gila River project, Arizona	10,000
W. C. Austin project, Oklahoma	25,000
Opal project, Wyoming	156,000
Lahontan Basin, California-Nevada	2,000
For general distribution	25,000

Amendment No. 7: Provides that $3,943,000 of the funds provided for General Investigations shall be derived from the reclamation fund instead of $3,375,000 as proposed by the House and $4,426,000 as proposed by the Senate.

Amendment No. 8: Strikes language inserted by the Senate providing funds for the General Investigations (Special Currency Program).

Construction and Rehabilitation

Amendment No. 9: Appropriates $166,444,880 as proposed by the House instead of $173,855,200 as proposed by the Senate. The conferees are in agreement that the funds provided in this item are to be allocated to projects and activities as shown in the following tabulation:

Projects	Budget for fiscal year 1961		Conference allowance	
	Construction	Planning	Construction	Planning
Arizona:				
Boulder Canyon project	$2,857,000		$2,857,000	
Colorado River front work and levee system	769,500		869,500	
Gila project	4,219,000		4,219,000	
California:				
Central Valley project	61,306,100		61,278,100	
Colorado River front work and levee system. (See Arizona.)				
Klamath project. (See Oregon.)				
Washoe project. (See Nevada.)				
Colorado:				
Collbran project	5,140,000		5,140,000	
Trinidad project		$5,000		$5,000
Idaho:				
Minidoka project, north side pumping division	429,000		429,000	
Palisades project, Burns Creek Dam and powerplant			(1)	
Spokane Valley project. (See Washington.)				
Nevada:				
Boulder Canyon project. (See Arizona.)				
Washoe project, Prosser Creek Dam and Reservoir	3,137,000		3,137,000	
Washoe project, initial phase		149,000		149,000
New Mexico:				
McMillan Delta project	100,000		100,000	
Middle Rio Grande project	1,729,000		1,729,000	
Oklahoma:				
Washita project	6,960,000		6,960,000	
Norman project				150,000

[1] $487,500 of previously appropriated funds available.

Projects	Budget for fiscal year 1961		Conference allowance	
	Construction	Planning	Construction	Planning
Oregon:				
Crooked River project	$2,235,000		$2,235,000	
Klamath project	868,000		868,000

Total, Missouri River Basin project	50,585,280	5,000,000	50,585,280	4,761,000
Subtotal, construction and rehabilitation	183,950,000		182,312,000	
Undistributed reduction based on anticipated delays	−10,000,000		−15,867,120	
Total, construction and rehabilitation	173,950,000		166,444,880	

The increase of $140,000 above the House figure provided for the Central Valley project is to be used on the Cow Creek Unit (Trinity Division, California).

The conferees of both Houses are in agreement that up to 15% of the $4,606,000 provided for the Columbia Basin project may be transferred to this project for unforeseen contingencies if necessary.

Amendment No. 10: Reported in disagreement.

Operation and Maintenance

Amendment No. 11: Appropriates $31,443,000 as proposed by the Senate instead of $31,000,000 as proposed by the House.

Loan Program

Amendment No. 12: Appropriates $11,642,825, as proposed by the Senate instead of $9,742,825 as proposed by the House.

General administrative expenses

Amendment No. 13: Appropriates $4,290,000 instead of $4,200,000 as proposed by the House and $4,320,000 as proposed by the Senate.

Administrative Provisions

Amendment No. 14: Strikes language inserted by the Senate.

The Senate language providing a salary increase for the Commissioner of the Bureau of Reclamation has been deleted without prejudice. The conferees recognize the outstanding manner in which the present incumbent has discharged his duties. The purpose of the provision was to correct the inequity resulting from the failure to make the recent classified pay raise applicable to officials covered by the Executive Pay Act. As over 200 employees are involved in this category, it was believed that, in lieu of individual corrective action, the matter should await appropriate consideration by the legislative committee.

Bonneville Power Administration

Operation and Maintenance

Amendment No. 15: Appropriates $10,800,000 instead of $10,750,000 as proposed by the House and $10,850,000 as proposed by the Senate.

Southwestern Power Administration

Operation and Maintenance

Amendment No. 16: Appropriates $1,250,000 as proposed by the Senate instead of $1,200,000 as proposed by the House.

TITLE III—INDEPENDENT OFFICES

Atomic Energy Commission

Operating Expenses

Amendment No. 17: Appropriates $2,451,210,000 instead of $2,450,560,000 as proposed by the House and $2,452,960,000 as proposed by the Senate.

The increase above the House figure is for the following:

Reactor development nuclear technology and general support, direct conversion research	$400,000
Isotopes development program	250,000

Amendment No. 18: Strikes House language limiting the amount for the airplane propulsion reactor program to $58,000,000.

Plant Acquisition and Construction

Amendment No. 19: Appropriates $212,750,000 instead of $208,500,000 as proposed by the House and $223,000,000 as proposed by the Senate.

Of the increase above the House figure, $3,500,000 is for a nuclear power reactor at McMurdo Sound in the Antarctic. These funds, plus the $1,500,000 already made available for this purpose by the Department of the Navy, are to be used for full funding of the reactor.

The remaining portion of the increase above the House figure provides $750,000 for a radiation laboratory at the University of Notre Dame.

The Senate proposed also to provide for planning and engineering of a materials research laboratory at the University of Illinois. The program which would be carried on in this laboratory is the same as that being sponsored by the Advance Research Projects Agency of the Department of De-

fense. Under this program, contracts are made with universities which provide for amortization of laboratories to be constructed by the universities. It is considered equitable that the laboratory at the University of Illinois be constructed on the same basis. The conferees of both Houses are in agreement that a laboratory financed in this manner should be considered as either an AEC or an ARPA project.

Amendment No. 20: Reported in disagreement.

U.S. Study Commission—Southeast River Basins

Salaries and Expenses

Amendment No. 21: Appropriates $1,550,000 instead of $1,500,000 as proposed by the House and $1,600,000 as proposed by the Senate.

U.S. Study Commission—Texas

Salaries and Expenses

Amendment No. 22: Appropriates $1,250,000 instead of $1,200,000 as proposed by the House and $1,300,000 as proposed by the Senate.

CLARENCE CANNON,
LOUIS C. RABAUT,
MICHAEL J. KIRWAN,
BEN F. JENSEN,
JOHN TABER,
Managers on the Part of the House.

Mr. CANNON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, all appropriation bills for the session, with one exception, have cleared conference. In the 18 bills cleared, the President's budget requests for appropriations have been cut $301,544,748, even after congressional adjustments upward on the defense budget bill and the customary excessive increases in the Labor-HEW budget.

The one remaining bill—the closing supplemental—messaged back from the Senate yesterday, is $232,762,000 over the pertinent budget requests, largely because of the $190 million foreign aid addition inserted by the Senate. Thus the total of this final bill now stands as a substantial mortgage against the net reduction already made on the other 18 bills:

Public works appropriation bill, 1961

Budget estimate	$4,013,793,180
House bill	3,914,798,985
Senate bill	4,030,010,605
Conference report	3,969,982,485
Conference report compared with:	
Budget	−43,810,695
House bill	+55,183,500
Senate bill	−60,028,120

[1] Increase above the budget figure.

Mr. CANNON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include certain tables.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. JENSEN. Mr. Speaker, will the gentleman yield?

Mr. CANNON. I yield to the gentleman from Iowa.

Mr. JENSEN. Mr. Speaker, the chairman of the Committee on Appropriations [Mr. CANNON] has given some figures relating to this bill but I think those figures should be supplemented by the following figures:

The public works appropriation bill for 1961 budget estimate was $4,013,793,180. The House bill as it passed the House provided for $3,914,798,985. The Senate raised that figure by $116,211,620, making a total of the Senate bill $4,030,010,605. The conference report comes back to the House in the amount of $3,969,982,485, or $60,028,120 below the Senate figure and $43,810,695 below the budget.

Mr. Speaker, as everyone knows, this is a bill which includes the Atomic Energy Commission's request for funds, and for all flood control, reclamation, irrigation, river and harbor improvement, hydropower projects, and so forth, nationwide. We have done the best we could to eliminate unnecessary projects and reduce amounts in the bill which we thought were exorbitant. In many items I feel we have done as good a job as possible, and I hope this conference report will be accepted.

Mr. CANNON. Mr. Speaker, I yield such time as he may require to the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Speaker, this bill is brought back with less new starts than it was expected we would be able to do, but the 22 new projects that are included will ultimately cost $365 million, which will have to be added year by year to the items that have heretofore been considered by the committee.

Mr. Speaker, I include as part of my remarks the following table:

1961 public works appropriation bill

	Number	Total estimated Federal cost
New construction starts added	[1] 23	[1] $350,567,000
Budgeted new construction starts deleted	−5	−7,928,000
New cost of new commitments	18	342,639,000
Resumptions of old projects	[2] +4	[2] +12,827,000
Total (net change)	22	355,466,000

[1] 19 added by Senate, total cost of $339,348,000; 4 added by House, total cost of $11,219,000.

[2] 3 added by Senate, total cost of $11,082,000; 1 added by House, total cost of $1,745,000.

(In addition, a total of 50 new unbudgeted planning starts included in bill of which 16 were added by House; 34 by the Senate.)

Mr. TABER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include a table.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CANNON. Mr. Speaker, I yield such time as he may desire to the gentleman from Illinois [Mr. YATES].

Mr. YATES. Mr. Speaker, the Public Works Appropriations conference report is a great disappointment to the people of Illinois because it deletes from the public works appropriations bill the $900,000 appropriation inserted by the Senate for the removal of the Western Avenue highway bridge. This is an appropriation which in all justice and fairness should have been approved by the House conferees. Compounding the injury is the fact that the manner in which the conference reached agreement precludes bringing the matter before the House for a separate vote. Had the Senate not receded and had the item been reported in disagreement, a separate vote could have been had upon the amendment. This cannot be done now. Under the parliamentary situation now, the only way to upset the conferees' action is to reject the entire bill, an obviously impossible goal.

Mr. Speaker, Members of Congress from Illinois have made their position known time and again to the members of the Public Works Subcommittee of the Appropriations Committee. We have been unable to move them from their opposition to this appropriation, even though reason and equity are on our side. Their argument was presented in a letter written by one of the members to the dean of the Illinois delegation, Hon. THOMAS J. O'BRIEN, and it stated the justification for the subcommittee's action, as follows:

ILLINOIS WATERWAY—CALUMET-SAG

The critical consideration underlying the committee's action on this item is that this particular project was singled out for special consideration with respect to local contributions. When the Truman-Hobbs Act was amended in the 82d Congress to provide that the cost of relocating highway bridges would be shared between the Federal Government and the owners, there was no intention that it should be applied retroactively to either already authorized projects or those in the construction stage.

In the public works authorization bill of 1958, this particular project was singled out for preferential treatment and language was included to make the provisions of the amended Truman-Hobbs Act retroactive in order to relieve the local interests of a cost of $10 million in the relocation of highway bridges which they had committed themselves to in order to get the project authorized in the first place.

There are, of course, many instances in which liberalizing legislation alters the more stringent requirements of earlier acts and authorizations. However, it can certainly be considered unusual when there is a following action in a specific instance to go back of the liberalizing legislation and apply its provisions to already accomplished projects and contracts. The committee considers this a dangerous precedent. There is enough inequity in water resources legislation without adding to it in as obvious a manner as has been done in this particular case. The view that the committee insists is a correct one is that this action has the practical effect of penalizing the contributors on all prior projects for having met the commitments on which their projects were originally authorized.

The point has been made that the specific instruments received by the corps on local assurances indicate that the local interests expected to pay all costs of relocations of highway bridges under laws existing at the time of their construction and that this means that the amended Truman-Hobbs Act should apply in figuring their contribution on highway bridges. If these assurances were valid there would have been no reason for the special legislation in the public works bill of 1958.

When the project was originally authorized in 1946, it was on the basis that the full cost of highway relocations would be carried by the local interests and a search of the hearings and the reports on this authorization fail to show that there was any such conditioning on the local contribution commitments before the legislative committee when the project was authorized. The fact that assurances were later finalized in these terms has no bearing on the issue since they could not be accepted in this form by the corps under the strict terms of the original authorization on the project.

Pertinent report statements in connection with this question are, as follows:

1. From the report of the Committee on Public Works on the river and harbor, beach control, and flood control project authorization bill for 1958, page 69:

"Local interests were required to bear the cost of alterations to highway bridges in accordance with policy at that time."

2. From the report of the Secretary of the Army, House Document No. 45, dated January 3, 1957 on the Illinois Waterway and Grand Calument River, Ill. and Ind. (Calumet-Sag navigation project), page 2:

"The district engineer states that for the existing project, the cost of alterations to highway bridges was assigned to local interests in accordance with the then-established policy of Congress under the General Bridge Act, approved March 23, 1906. This assignment was generally acceptable to local interests at the time the project was authorized."

Page 15: "The present authorization for the Calumet-Sag project requires as a condition of local cooperation that the cost of all highway-bridge alterations will be borne by local interests."

Page 22: "Legislation contained in Public Law 564 of the 82d Congress, in amending the Bridge Act of 1940 to include publicly owned highway bridges, contains no retroactive provision, and application of the amended act retroactively to highway bridges included in previously authorized navigation projects is not considered proper or justified."

There are three parts to this project. The special provision in the 1958 authorization, designed to relieve the local sponsors of a $10 million commitment which was a condition precedent to authorization, involves only part I. If this provision is implemented with appropriations, it would logically follow that the local contribution of $38 million more on parts II and III, also a condition precedent to authorization, would be excused.

It is, of course, speculative as to whether or not there would have been favorable action on the original authorization if this total of $48 million had been planned as an additional Federal cost. Under such circumstances, the Federal cost is $183 million and the local cost is only $17 million, instead of $135 million Federal and $65 million local, which the original authorization anticipated.

Mr. Speaker, an analysis of the subcommittee's position shows that the subcommittee's conclusions are not well founded for the following reasons:

First. There is no basis in fact or legislative history for the assertion in the first paragraph that at the time of the enactment of the amendment to the Truman-Hobbs Act it was intended that it would not be applied retroactively to either already authorized projects or those in the construction stage. If there had been a declaration of any such legis-

lative intention, certainly it would have quoted it from either the bill, the reports, or the CONGRESSIONAL RECORD. Page 17 of the report of the subcommittee for 1961 itself points out:

> The Truman-Hobbs Act was silent on the question of applying its provisions to already authorized projects and projects in the construction stage.

There is no merit to the contention that such an interpretation will require payment by the Federal Government for all highway bridges constucted prior to passage of the Truman-Hobbs amendment. I believe, however, that projects upon which construction was not begun until after passage of the amendment in 1952 should certainly be examined to determine whether they are so important to the national interest as to warrant the assumption of payment by the Federal Government for removal of any highway bridges involved in the project. The Engineers so described this project.

Second. This paragraph is entirely conjectural. The facts are that the Public Works Committee in 1958 considered whether the Cal-Sag project was of sufficient importance to warrant assumption of the cost by the Federal Government of removing the highway bridges. The matter was submitted to the Corps of Engineers for its recommendation. The Corps could have taken the same viewpoint as the subcommittee. It could have declared that the amendment to the Truman-Hobbs Act was not meant to apply to projects authorized prior to the 1952 amendment. However, the Corps came to the opposite conclusion. It declared that because of the importance of the development, the cost of removing highway bridges should be assumed by the Federal Government in the same manner as railroad bridges—House Document No. 45, 85th Congress, 1st session. The Public Works Committee approved the recommendation of the Corps of Engineers. The Bureau of the Budget, which cannot be accused of approving projects which are not authorized or which are given preferential treatment, approved a budget item for the appropriation to remove the highway bridges.

The subcommittee's adamance is shown by its position in which it refused even to grant funds for the removal of railroad bridges. There can be no possible question but that the appropriation for removing such bridges should be granted. Yet, it is said on page 17 of its report that it would not approve the appropriation of any additional funds for the project, because "it is the committee's intention that no new work be undertaken on this project until the question of financing the highway bridges has been settled in favor of the Federal Government." If this intractable attitude prevails, the investment by local governments and the Federal Government in excess of $100 million is likely to go down the drain.

Paragraph 3 states that "the committee insists that this action has the practical effect of penalizing the contributors on all prior projects for having met the commitments on which their projects were originally authorized." This is again a conclusion which is not based on fact or upon recognition of the effect of legislation. The same argument might be made against approving funds for removals authorized and constructed following passage of the Truman-Hobbs amendment. If some local governments have paid for removal of projects prior to 1952, why should those whose projects happened to follow the critical date be relieved of payment? The reason, of course, is the fact that passage of a law establishes a separation and may grant benefits where they did not previously exist. There are always fringe cases, such as the present one, which require special interpretation to determine whether the benefits should be conferred or not.

However, that question was passed on by three relevant and authoritative agencies, the Corps of Engineers, the Public Works Committee, and the Bureau of the Budget. All decided that the present case was one in which the costs should be assumed by the Federal Government. This subcommittee said no.

Fourth. The next paragraph indicates that local interests have given assurances of their expectation to pay the cost of relocating the highway bridges. Assuming for the purpose of argument that this is true, and I do not know whether it is because I have not seen the instruments, must payments still be required of such local interests if it is legal and equitable for assumption of such costs by the Federal Government? Suppose such assurances had been given in 1946 and the amendment to the Truman-Hobbs Act had been passed in 1946 prior to the authorizing legislation: Would the subcommittee then have insisted, too, that because agreement to pay such costs had been given by the local government that passage of the amendment would not have relieved them of their obligations? Of course not.

Fifth. The next paragraph is only a half statement of the pertinent facts. Of the assertions in the paragraph, it is stated that a search of the hearings and reports in 1946 failed to show that there was any conditioning of local contribution commitments before the legislative committee. Even if that be true, that exact question was presented to the Public Works Committee of the House during the 85th Congress, 2d session. In its report on H.R. 12955, House Report 1894, at page 69, the committee said:

> The review made by the Corps of Engineers of the existing project was directed at determining if the conditions of local cooperation with respect to highway bridges should be modified in any way at this time.

After considering this question, which is the heart of the controversy, the committee said:

> It [the committee] considers that modification of part 1 to accomplish that portion of the waterway for which funds have been appropriated should be made, and recommends that the highway bridge cost of $9,884,000 in part 1 of the improvement be borne by the Federal Government.

Sixth. The next paragraph dealing with "pertinent report statements" distorts the action of the Committee on Public Works. It is like citing the dissenting opinion of a law case to justify a position, for if one reads the balance of section 109 from which the statement is taken, one finds the recommendation of the committee as follows, and I quote it again:

> It considers that modification of part I to accomplish that portion of the waterway for which funds have been appropriated should be made, and recommends that the highway bridge cost of $9,884,000 in part I of the improvement be borne by the Federal Government.

The subcommittee's next argument uses the same approach. Again, they are half statements which result in improper conclusions from the documents. One needs only to quote the statement and the balance of the paragraph on page 22 of the document alluded to, namely, House Document No. 45 of the 85th Congress, 1st session, as follows:

> The legislation contained in Public Law 564, 82d Congress, in amending the Bridge Act of 1940 to include publicly owned highway bridges contains no retroactive provision, and application of the amended act retroactively to highway bridges included in previously authorized navigation projects is not considered proper or justified. It is proper, however, to consider further the extent of local participation with regard to the cost of alteration of highway bridges in the light of present conditions, including the policy of Congress as contained in the 1942 amendment to the Bridge Act. Alteration of the highway bridges involved in the Calumet-Sag project is not necessary to remove any unreasonable obstruction to navigation under existing channel conditions but is required to permit the extensive widening of the channels beyond the present tops of banks in order to undertake the presently authorized projects to provide for a waterway to accommodate prospective navigation. Consequently, the alteration of bridges is an essential and integral part of the improvement. The only special local benefits accruing from the project are those resulting to bridge owners from the bridge construction program.
>
> 50. In view of the predominantly general nature of the benefits accruing from the project and of the major local contributions toward the development of the project, and in consideration of the special benefits to highway bridge owners, it is considered equitable that the allocation of cost of highway bridge alterations be made in accordance with the provisions of section 6 of Public Law 647, 76th Congress, as amended, in a similar manner to that authorized for railroad bridges.

If one reads the rest of the report by the Corps of Engineers it will be noted the recommendation by the corps that the cost should be assumed by the Federal Government in the same manner in which the Government assumes the cost for removal of railroad bridges.

Mr. Speaker, finally, in conversations with members of the subcommittee it was suggested that the present attitude of the Corps of Engineers be ascertained. Accordingly, General Itschner was contacted, and again asked for the corps' recommendation. On May 17, the corps reaffirmed its earlier recommendation that the Federal Government should pay the costs of removing the highway bridges.

Mr. Speaker, proponents of the appropriation have done everything possible to sustain their position. In spite of the

fact that the Corps of Army Engineers, the Public Works Committee of the House and the Bureau of the Budget have all approved the appropriation, the members of the Appropriations Subcommittee refuse to change their position.

It is unfortunate that the matter cannot be brought before the House today for a vote. I believe that if the matter were presented to the House for its consideration, the subcommittee's viewpoint might be overruled.

Whether the question can be raised again next year is problematic. Obviously the bridges must be removed if the work on this vital waterway is to continue, and the work must be completed as promptly as possible. Whether it can be delayed sufficiently to permit another attempt to obtain a redetermination of this controversy is not known at this time and I shall reserve that question until I have had an opportunity to check the matter further.

Mr. CANNON. Mr. Speaker, I yield such time as he may desire to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Speaker, I would like to inquire if it is not the basic purpose of this supplemental appropriation to cover deficits in the previous year's spending. Here, if I understand the situation right, you are proposing to inject expenditures or make money available for expenditures in this year, which has nothing to do with a deficiency appropriation at all.

Mr. CANNON. This is not a deficiency bill. This is a public works bill. The matter the gentleman refers to was covered in the bill which just went to conference.

Mr. Speaker, I yield such time as he may desire to the gentleman from Oregon [Mr. PORTER].

Mr. PORTER. Mr. Speaker, I very much regret the misunderstanding in the Appropriations Committee of the House which has resulted in the deletion from this bill of the amount of $23,000 which was budgeted for preconstruction planning on the Coos and Millicoma Rivers project in my district.

Apparently some members of the committee felt that this project would be in the nature of a subsidy for private industry—a sort of an unnecessary water substitute for a timber access road to serve private timber stands. I hope that next year we will be able to have full hearings on this point. I know that it can be shown that this project would serve vast stands of public timber, much of it Federal timber, as well as creating some benefits for industry in the area. To construct access roads in lieu of the project would be immensely expensive. The cost per mile of even minimum standard logging roads in that area is not less than $20,000 and often as high as $60,000.

The Corps of Engineers had carefully studied this project and brought in a favorable report. It has been ready for a planning start for 3 years and the administration included it finally in this year's budget. It should have been approved by both committees and made a part of this bill. However, the House committee knocked it out, it was restored by the Senate committee and deleted again by the conferees.

I certainly intend to do everything possible, if I am returned to Congress, to have this project appropriation reconsidered and acted upon favorably at the next session.

Mr. CANNON. Mr. Speaker, I yield such time as he may desire to the gentleman from Minnesota [Mr. ANDERSEN].

Mr. ANDERSEN of Minnesota. Mr. Speaker, I will take just a moment to congratulate and commend the subcommittee conferees upon the splendid job which they have done with a very difficult task.

Mrs. MAY. Mr. Speaker, I wish to say, as a matter of record, that the full amount of $6,100,000 recommended by the President for construction work on the Columbia Basin reclamation project in the State of Washington was not allowed by the conference committee. The agreement reached, instead, provides for $5,296,900, including funds which can be transferred to the project for unforeseen contingencies.

What this means, of course, is that some construction work will have to be deferred until 1962, instead of being programed at this time. It is too early to be able to determine exactly where the necessary cutbacks in construction will occur, but I have been assured by the Bureau of Reclamation that most urgent priority work can be carried out with the funds allowed by the conference committee.

I feel it is regrettable that the full amount of $6,100,000 in the President's budget could not have been retained because all of the work which had been programed could be accomplished within the limits of the existing farmers' 1945 repayment contract. I believe it is now clear, moreover, that progressive steps are being taken by both the irrigation districts and the Bureau of Reclamation toward putting a new and more satisfactory contract into operation at the earliest practicable date.

Mr. PORTER. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. PRICE] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. PRICE. Mr. Speaker, H.R. 12326, as reported out to us by the conference committee, does not contain the funds required to start design work on the materials research laboratory at the University of Illinois. I think this was a serious oversight. I am happy to report, however, that I have been assured by the Chairman of the Atomic Energy Commission that design work will be provided for this facility from AEC operating appropriations so that time will not be lost.

I think a brief summary of the consideration of the University of Illinois Materials Research Laboratory during the year will be of value for the record. The Joint Committee on Atomic Energy added project 61–f–8, authorizing $5,600,000 for the construction of the laboratory, to the Atomic Energy Commission's fiscal year 1961 authorization bill. This was done by the Joint Committee because the importance of research work in the field of materials to the atomic energy program was recognized and the special talents of the University of Illinois to perform this work was also recognized.

The Congress agreed in the need for the materials research laboratory for the University of Illinois and approved the inclusion of the item in the AEC authorization bill.

During subsequent consideration of the appropriation bill for the Atomic Energy Commission on May 26, 1960, before the Senate Appropriations Committee, Mr. McCone, Chairman of the AEC, testified in support of the project. In his testimony Mr. McCone explained why the project was not included in the original bill submitted to the Congress by the Commission and why, now that a policy question concerning the financing of laboratories has been settled, it could be included.

Quoting from the testimony, Mr. McCone explained it this way:

Mr. MCCONE. Something over a year ago, 18 months ago now, a study was made of the facilities throughout the country for materials research. It was recognized by those who made the study—this study was done under the direction of the scientific adviser to the President—that the country was lagging in its facilities for basic material research and, therefore, a recommendation was made that several laboratories be constructed at universities and the interested agencies of Government undertake to finance these laboratories. The total of the six was in the order of capital costs of $30 million to $35 million, and it was indicated the operating costs would be about $20 million per year.

The Atomic Energy Commission considered this matter very seriously, as did the Department of Defense. Of the six, one of the ones most attractive to us, because of the quality of the men, was the one at Illinois.

We, however, deferred action because no policy was developed at the Government level on construction of facilities at university sites at private universities or State universities using Federal funds, although there have been at various times very extensive amounts of Federal funds used at universities for this purpose by the Atomic Energy Commission and others.

It was for that reason, the absence of national policy, that we deferred action on the University of Illinois project at the time that our authorization bill was formulated and our appropriation bills submitted to the Bureau of the Budget.

Subsequently the Federal Council, Science Council, has more or less agreed, certainly informally, and perhaps formally.

Mr. WILLIAMS. I think they have adopted the resolution formally.

Mr. MCCONE. They have adopted the resolution formally, thereby indicating that this was a thing we should support. Therefore, although this item was not included in our authorization bill, when it was included by the committee, we considered it and felt that in the ensuing months the project could be advanced by the expenditure of design money and negotiations with the university so that we could submit the whole amount in an orderly fashion next year and that is what we intended to do.

I think we will have funds that would be available for design although we do not have any particular item in our budget. A million dollars is in the order of magnitude of the funds we might be able to use.

The University of Illinois facilities would be in our opinion desirable.

As indicated in the above-quoted testimony, the AEC considers the University of Illinois one of the most attractive materials research facility proposals because of the abilities of the scientists at the university. The testimony also indicates the intent of the Commission to proceed with the design of the University of Illinois facility.

In summary, although the authorization for the University of Illinois Research Laboratory was deleted from the AEC appropriations bill, the necessary design work on this important facility will be able to proceed and consideration for full authorization of construction can be handled in the next appropriations bill.

RADIATION RESEARCH LABORATORY FOR THE UNIVERSITY OF NOTRE DAME

I was also happy to see that the planning and engineering work for the Radiation Research Laboratory at the University of Illinois was included in the AEC appropriation bill for next year. The Notre Dame facility was also recognized by the Joint Committee and the Congress as a necessary item in our atomic energy program and, accordingly, also added to the Atomic Energy Commission's authorization bill this year.

Mr. MONAGAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut.

There was no objection.

Mr. MONAGAN. Mr. Speaker, I support this public works conference report.

It contains provision for two new important flood control works in my district. I refer to the funds provided for planning projects at Hancock Brook and Northfield Brook. Although these projects were not included in the President's Budget, nevertheless, it has been possible to get authorization and appropriation at the same time and this represents a very unusual procedure but one which means that we do not have to wait until 1961 to obtain the money for these projects.

Also included in the bill are funds for the continuance of construction at the Thomaston Dam, at Mad River, at East Branch Brook and Hall Meadow Brook. Thus again, this year, we take a great step forward. Our program is not complete but with the inclusion of these new works we have moved well toward the initiation of the major works required in the engineers plan for this area.

We must, of course, continue to press for the completion of this program and for appropriations for the final projects at the earliest possible opportunity.

The SPEAKER. The question is on the conference report.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 4: Page 4, line 22, after "bridge" insert ": *Provided further* That not to exceed $200,000 of the funds herein or hereafter provided for 'Construction, general,' shall be available for the construction of necessary bank stabilization and other protective measures on Red River in the vicinity of the St. Louis Southwestern Railroad and the Arkansas State highway bridges at Garland City, Arkansas: *Provided further,*".

Mr. CANNON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. CANNON moves that the House recede from its disagreement to the amendment of the Senate numbered 4 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 10: Page 10, line 18, after "customer" insert ": *Provided further*, That not to exceed $25,000 shall be available toward investigation and the emergency rehabilitation of the Dalton Gardens, Avondale, and Hayden Lake Unit, Rathdrum Prairie Irrigation Projects, Idaho, to be repaid in full under conditions satisfactory to the Secretary of the Interior."

Mr. CANNON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. CANNON moves that the House recede from its disagreement to the amendment of the Senate numbered 10 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 20: Page 23, line 22, after "gram" insert ": *Provided further*, That not to exceed $13,000,000 of this appropriation may be transferred to the appropriation 'Other procurement, Navy', solely for construction of power reactor plants for the Antarctic".

Mr. CANNON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. CANNON moves that the House recede from its disagreement to the amendment of the Senate numbered 20 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert ": *Provided further*, That not to exceed $3,500,000 of this appropriation shall be transferred to the appropriation 'Other procurement, Navy', solely for construction of power reactor plants for the Antarctic".

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

Mr. CANNON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the conference report just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. DERWINSKI. Mr. Speaker, the action of the Congress in refusing to approve $2.9 million for necessary relocation of railroad and highway bridges over the Cal-Sag Channel constitutes a major detriment to the completion of this vital project. I wish to point out to you that this Cal-Sag navigation project easily ranks as one of the most vital in the Nation, since it represents the necessary link between the commerce now generating through the St. Lawrence Seaway and the commercial traffic on the inland waterway system which serves all of mid-America.

Work on the Cal-Sag Channel has continued at a rapid pace, a tribute to the citizen communities that have provided the inspiration, and the recognition by the Corps of Engineers of the importance of this program.

Behind the Cal-Sag project stands a record of intense local participation; a record of accomplishments and spending amounting to millions of dollars. Three years ago, the Illinois General Assembly passed a bill which granted the metropolitan sanitary district the authority to issue bonds to provide purchase of land necessary for the channel-widening project. I must point out to you that local cooperation has been received from the city of Chicago and numerous suburban communities, county of Cook, through which the channel runs, State of Illinois, and, as indicated, the Sanitary District of Chicago—all of which have contributed direct funds as well as tremendous amount of time and energy on the part of their officials to the furtherance of this project.

Mr. Speaker, an important phase of the Cal-Sag project is the replacement, alteration, or removal of railroad and highway bridges in conformity with the horizontal and vertical clearance requirements of the vastly improved channel. It must be pointed out that in the omnibus rivers and harbors bill of 1958, the House Public Works Committee, after a separate survey report had been ordered and processed through channels, authorized the inclusion of the Western Avenue Highway Bridge under the Truman-Hobbs Act. Their reason for so doing, that they felt this to be sufficiently justified, may I call your attention to House Report 1894, 85th Congress, 2d session, section 109, on page 69, which gives a detailed explanation of the reason for the inclusion of this project in the 1958 act:

The committee recognizes the importance of the Cal-Sag Navigation Project as a vital link, through commerce, between the Great Lakes and Mississippi-Ohio Inland Waterway system.

Mr. Speaker, I regret the failure of the committee to properly assess this matter.

My purpose in calling this matter to your attention at this time is in the hope that the Members of the House, especially those members of the Appropriations Committee, will carefully study this matter and in the early days of the 87th Congress move to rectify what I consider to be a serious error in judgment.

"PLEDGE OF ALLEGIANCE TO THE FLAG"

Mr. JONES of Missouri. Mr. Speaker, I ask unanimous consent for the immediate consideration of the joint resolution (H.J. Res. 704) to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the joint resolution, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the musical composition "Pledge of Allegiance to the Flag", covered by copyright EU399400, granted to Irving Caesar on June 3, 1955, assigned by Irving Caesar to Congressman Louis C. Rabaut by an instrument recorded in the Office of the Register of Copyrights in assignment record book 942 at page 57, and assigned by Congressman Louis C. Rabaut to the Congress of the United States by an instrument recorded in the Office of the Register of Copyrights in assignment record book 943 at page 451, is hereby declared to be in the public domain.

SEC. 2. The Joint Committee on Printing is authorized and directed to cause to be prepared three arrangements of the musical composition "Pledge of Allegiance to the Flag" suitable for use in nonprofessional performances. One arrangement shall be for vocal, one for band, and one for orchestral performance. The Joint Committee on Printing shall cause to be printed and distributed one hundred copies of each such arrangement to each Member of Congress and to the Resident Commissioner from Puerto Rico.

SEC. 3. The Joint Committee on Printing shall cause copies of the arrangements authorized by section 2 to be printed for sale to the public through the Superintendent of Documents, and shall cause additional copies to be printed from time to time for such purpose in such quantities as may be necessary to meet public demand. Such sales shall be made at such prices as the Committee may from time to time determine as adequate to cover the cost of printing.

With the following committee amendment:

Page 2, line 17, strike out "Such sales shall be made at such prices as the committee may from time to time determine as adequate to cover the cost of printing."

The committee amendment was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

Mr. RABAUT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. RABAUT. Mr. Speaker, House Joint Resolution 704, which just passed the House, represents the culmination of several years of work concerning the "Pledge of Allegiance" to our flag. As you will recall the President, on Flag Day—June 14—in 1954, signed into law the legislation which I introduced to insert the words "Under God" in the "Pledge of Allegiance." On Flag Day of the following year, 1955, as you will also recall, the Pledge was played and sung on the floor of the House in an unprecedented ceremony. Subsequent to that the copyright to the song, which was held by the composer, Irving Caesar, was turned over to me and I, in turn, assigned the copyright to the Congress. That is where the matter stands at the present time. However, with the Congress holding the copyright, it develops that the many groups, organizations, schools and so forth that would like and would have occasion to use the song cannot freely do so. As a consequence, I introduced the resolution just passed for the purpose of making this song, "Pledge of Allegiance to the Flag," public domain. This will enable anyone who so desires to use, print, reproduce and distribute this musical composition without restrictions or inhibitions.

Further than this, House Joint Resolution 704 authorizes and directs the Joint Committee on Printing to cause to be prepared three arrangements of the song. One of these arrangements will be for vocal, one for band, and one for orchestra. Mr. Donald Hunsberger, of the Crane Department of Music, New York State Teachers College, has graciously donated his services for the preparations of these arrangements. This resolution further directs the Joint Committee on Printing to print and distribute to each Member of Congress 100 copies of each arrangement. These would be for the specific purpose of allowing each Member to present these arrangements to schools and various groups in his home area. In addition the committee is also directed to print copies of the arrangements for sale to the public through the Superintendent of Documents in sufficient numbers to meet public demand.

Mr. Speaker, this is a very worthwhile undertaking. It is primarily aimed for the children of the country. The arrangements will be purposely simple in form with the foremost objective being their use by school chorus, classroom singing periods, school bands, and the like. As we all know, the children of today are the lifeblood of America's future. We know also that music and song constitute one of the highest forms of praise and devotion. I submit, Mr. Speaker, that there is no better place to concentrate on teaching and instilling love of country and devotion to the national flag in the children of this Nation than through the schools. This is the primary intent of the resolution. However, not only the children will benefit. In a time when all of us are so concerned with vast international problems and the many major domestic issues, it is well indeed that we reflect and lay new emphasis upon the basic principles for which this Nation stands. Those principles are all embodied in the shining symbol of this country—our flag. When we pledge our allegiance to our flag, we are pledging our devotion to the fundamental precepts for which it stands—freedom, democracy, justice, and equality. The more emphasis we can lay on this pledge, this allegiance, the stronger our Nation will be. This resolution will further that purpose.

CONSENT CALENDAR

The SPEAKER. This is the day for the call of the Consent Calendar. The Clerk will call the first bill on the Consent Calendar.

AGRICULTURAL ATTACHÉ ROTATION

The Clerk called the bill (H.R. 8074) to amend section 602 of the Agricultural Act of 1954.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

CLAIMS OF CERTAIN EMPLOYEES OF ALASKA RAILROAD

The Clerk called the bill (H.R. 4084) to confer jurisdiction upon the Court of Claims to determine the amounts due and owing and render judgment upon the claims of certain employees of the Alaska Railroad for overtime work performed.

Mr. PELLY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

MARKER TO COMMEMORATE ACHIEVEMENTS OF JOHN C. PAGE

The Clerk called the joint resolution (H.J. Res. 416) to provide for the erection in the city of Page, Ariz., of an appropriate marker to commemorate the achievements of former Commissioner of Reclamation, John C. Page.

Mr. PELLY. Mr. Speaker, at the request of another Member who could not be present, I ask unanimous consent that the joint resolution be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

USE OF PESTICIDES OR OTHER CHEMICALS

The Clerk called the bill (H.R. 12419) to provide for advance consultation with the Fish and Wildlife Service and with State wildlife agencies before the beginning of any Federal program involving the use of pesticides or other chemicals designed for mass biological controls.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. WEAVER, Mr. MARSHALL and Mr. NATCHER objected.

OPERATION ROUTE OF POSTAL POWERBOAT SERVICE IN ALASKA

The Clerk called the bill (S. 1849) to amend the act of August 10, 1939, authorizing the Postmaster General to contract for certain powerboat service in Alaska.

Mr. PELLY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

NATIONAL GUARD CLAIMS

The Clerk called the bill (H.R. 5435) to extend the Federal Tort Claims Act to members of the National Guard when engaged in training duty under Federal law, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2671 of title 28, United States Code, is amended to read as follows:

"§ 2671. Definitions

"As used in this chapter and sections 1346(b) and 2401(b) of this title, the term—

"'Federal agency' includes the executive departments and independent establishments of the United States and corporations primarily acting as instrumentalities or agencies of the United States, but does not include any contractor with the United States.

"'Employee of the Government' includes officers or employees of any Federal agency; members of the military or naval forces of the United States and, while engaged in training or duty under section 316, 502, 503, 504, or 505 of title 32 of the United States Code or other provision of law under which they are entitled to Federal pay or for which such pay has been waived; members of the National Guard, as defined in section 101(2) of title 32 of the United States Code; civilian employees of the National Guard of a State, Territory, or Commonwealth, employed under the authority contained in section 709 of title 32 of the United States Code, and paid from Federal funds; and persons acting on behalf of a Federal agency in an official capacity, temporarily or permanently in the service of the United States, whether with or without compensation.

"'Acting within the scope of his office or employment' in the case of a member of the military or naval forces of the United States or, while engaged in training or duty under section 316, 502, 503, 504, or 505 of the United States Code, or other provision of law under which he is entitled to Federal pay or for which such pay has been waived, a member of the National Guard, as defined in section 101(2) of title 32 of the United States Code, means acting in line of duty."

SEC. 2. Section 2733(f) of title 10, United States Code, is amended to read as follows:

"(f) For the purposes of this section

"(1) a member of the Coast and Geodetic Survey or of the Public Health Service who is serving with the Navy or the Marine Corps,

"(2) a member of the National Guard who is engaged in training or duty under section 316, 502, 503, 504, or 505 of title 32 of the United States Code, or other provision of law under which he is entitled to Federal pay or for which such pay has been waived, and

"(3) a civilian employee of the National Guard of a State, Territory, or Commonwealth, employed under the authority contained in section 709 of title 32 of the United States Code and paid from Federal funds, shall be treated as if he were a member of the armed force concerned."

Amend the title so as to read: "A bill to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard."

With the following committee amendment:

Strike all after the enacting clause and insert:

"That chapter 7 of title 32, United States Code, is amended—

"(1) by adding the following new section at the end thereof:

"'§ 715. Property loss; personal injury or death: activities under certain section of this title

"'(2) Under such regulations as the Secretary of the Army or Secretary of the Air Force may prescribe, he or, subject to appeal to him, the Judge Advocate General of the armed force under his jurisdiction, if designated by him, may settle, and pay in an amount not more than $5,000, a claim against the United States for—

"'(1) damage to, or loss of, real property, including damage or loss incident to use and occupancy;

"'(2) damage to, or loss of, personal property, including property bailed to the United States or the National Guard and including registered or insured mail damaged, lost, or destroyed by a criminal act while in the possession of the National Guard; or

"'(3) personal injury or death;

either caused by a member of the Army National Guard or the Air National Guard, as the case may be, while engaged in training or duty under section 316, 502, 503, 504, or 505 of this title or any other provision of law for which he is entitled to pay under section 301 of title 37, or for which he has waived that pay, and acting within the scope of his employment; caused by a person employed under section 709 of this title acting within the scope of his employment; or otherwise incident to noncombat activities of the Army National Guard or the Air National Guard, as the case may be, under one of those sections.

"'(b) A claim may be allowed under subsection (a) only if—

"'(1) it is presented in writing two years after it accrues, except that if the claim accrues in time of war or armed conflict or if such a war or armed conflict intervenes within two years after it accrues, and if good cause is shown, the claim may be presented not later than two years after the war or armed conflict is terminated;

"'(2) it is not covered by section 2734 of title 10 or section 2672 of title 28;

"'(3) it is not for personal injury or death of such a member or a person employed under section 709 of this title, whose injury or death is incident to his service;

"'(4) the damage to, or loss of, property, or the personal injury or death, was not caused wholly or partly by a negligent or wrongful act of the claimant, his agent, or his employee; and

"'(5) it is substantiated as prescribed in regulations of the Secretary concerned.

For the purposes of clause (1), the dates of the beginning and end of an armed conflict are the dates established by concurrent resolution of Congress or by a determination of the President.

"'(c) Payment may not be made under this section for reimbursement for medical, hospital, or burial services furnished at the expense of the United States or of any State or the District of Columbia or Puerto Rico.

"'(d) If the Secretary of the military department concerned considers that a claim in excess of $5,000 is meritorious and would otherwise be covered by this section, he may pay the claimant $5,000 and report the excess to Congress for its consideration.

"'(e) Except as provided in subsection (d), no claim may be paid under this section unless the amount tendered is accepted by the claimant in full satisfaction.

"'(f) In any case where the amount to be paid is not more than $1,000, the authority contained in subsection (a) may be delegated to any officer of the Army or the Air Force, as the case may be, who has been delegated authority under section 2733(g) of title 10 to settle similar claims.

"'(g) Notwithstanding any other provision of law, the settlement of a claim under this section is final and conclusive.

"'(h) In this section, "settle" means consider, ascertain, adjust, determine, and dispose of a claim, whether by full or partial allowance or disallowance.'; and

"(2) by adding the following new item at the end of the analysis:

"'715. Property loss; personal injury or death: activities under certain sections of this title.'"

Mr. LANE. Mr. Speaker, I offer an amendment to the committee amendment.

Mr. FORD. Mr. Speaker, will the gentleman yield?

Mr. LANE. I yield.

Mr. FORD. Is this an amendment which was agreed to by the committee or is it some other proposal outside of the recommendations by the committee?

Mr. LANE. This is an amendment agreed to by the committee to the committee amendment. It is a matter of phraseology and not substance.

Mr. FORD. It does not go to the substance of the bill?

Mr. LANE. That is right.

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Massachusetts.

The Clerk read as follows:

Clause (1) of subsection (b) of new section 715 of title 32 added by the bill is amended to read, as follows:

"(1) it is presented in writing within 2 years after it accrues, except that if the claim accrues in time of war or armed conflict or (if such a war or armed conflict) intervenes within 2 years after it accrues, and if good cause is shown, the claim may be presented not later than 2 years after the war or armed conflict is terminated;"

The last sentence of subsection (b) is amended to read as follows:

"For the purposes of clause (1), the dates of the beginning and end of an armed conflict are the dates established by concurrent resolution of Congress or by a determination of the President."

The amendment to the committee amendment was agreed to. The committee amendment, as amended, was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard."

Mr. LANE. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 1764) to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

Mr. FORD. Reserving the right to object, Mr. Speaker, it was my understanding that there was some printing flaw or some other similar problem connected with the bill which went through the other body.

Mr. LANE. That is the amendment to the committee amendment which I just offered. In two places words were left out by the Senate. The amendment I intend to offer will strike out all after the enacting clause of the Senate bill and insert the provisions of the bill we have just passed, H.R. 5435.

Mr. FORD. While I have the floor, Mr. Speaker, may I say that I had some reservations concerning this legislation. I have consulted with responsible authorities in the Department of Defense. They have made certain representations to me. I have been supplied with a letter by Mr. George S. Leonard, First Assistant to the Assistant Attorney General, Civil Division, dated August 25, 1960, which resolves my reservations concerning this legislation. I ask unanimous consent that this letter from Mr. Leonard may be included in my remarks at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The letter referred to follows:

DEPARTMENT OF JUSTICE,
Washington, D.C., August 25, 1960.

Re H.R. 5435.

Hon. GERALD R. FORD, Jr.,
House of Representatives,
Washington, D.C.

DEAR MR. FORD: I am informed by Colonel Blatt of the National Guard Bureau of your interest in this matter. He has advised me of your request for a restatement of the position of this Department with respect to the above numbered bill, as now amended to limit the legislation to administrative payment of claims arising from National Guard activities under the terms of chapter 7 of title 32, United States Code, the Military Claims Act.

In writing to Senator EASTLAND on May 23, 1960, we noted that the administrative disposition of claims for property damage and personal injuries under the Military Claims Act was "not a matter of direct concern to the Department of Justice." The same position was taken in my statement before Subcommittee No. 2 of the House Committee on the Judiciary on May 11, 1960, in which I added that "this Department would defer to other agencies on this point."

Both in the letter and statement referred to, this Department suggested the alternate possibility of indemnification of State liability for these activities. This proposal was intended solely as a constructive suggestion and was not intended as a limitation upon our stated policy that the administrative disposition of tort claims is within the primary jurisdiction of the agency from whose activities the liability arises.

Accordingly, in reaffirmation of the position previously taken, we defer to the recommendation of the Department of Defense and do not object to enactment of this legislation.

Sincerely,

GEO. S. LEONARD,
First Assistant.

Mr. RIVERS of South Carolina. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS of South Carolina. Mr. Speaker, this legislation, looking to the assumption by the Federal Government of pecuniary responsibility for the acts of members of the National Guard and the civilian employees authorized by section 709 of title 32, United States Code while of tremendous importance, and a landmark in National Guard legislation is not entirely without precedent.

Since 1937, with the exception of the war years, the Congress in its annual appropriation acts for the military departments has provided for the payment from Federal funds of claims for damage to private property incident to the operation of National Guard camps of instruction. Initially limited to $500 per claim, the maximum amount authorized to be paid during recent years has been $1,000. These enactments have resulted from the conviction that the Federal Government had a moral obligation to such private persons as might be damaged by actions of National Guardsmen performing training duties authorized by Federal law, even though the National Guard while performing training duty under title 32, United States Code was not as a matter of law in the Federal service. All of this prior legislation provided for administrative settlement by the service Secretaries. None has provided for judicial review or relief.

The essential fact that members of the National Guard performing training duty authorized by the National Defense Act, now codified as title 32, United States Code, were nevertheless not in Federal service has been repeatedly recognized by the Federal courts in construing the Federal Tort Claims Act. The recent case of *Storer Broadcasting Co.* v. *U.S.* C.C.A. (1958), 251 F. 2d 268, certiorari denied 356 U.S. 951, is illustrative of the established doctrine. The only exception has been the unusual case of *O'Toole* v. *U.S.* (C.A. Del. (1953) 206 F. 2d 912) which involved the District of Columbia National Guard. In this case, because of the unique status of the District of Columbia National Guard, a contrary result was reached, and the United States was held liable.

The Federal courts, however, have repeatedly held the United States liable for tortious acts of these civilian employees of the National Guard whose hire is authorized under section 709 of title 32, United States Code. The United States Circuit Courts of Appeal in four circuits have so held. None of these cases have been decided in the United States Supreme Court.

In the light of previous legislation and the cited court decisions, the Department of Defense has recommended enactment of that portion of H.R. 5435 which would authorize the Secretaries of the Army and of the Air Force to pay claims arising out of federally authorized National Guard activities to the same extent and in the same manner as they now pay claims under section 2733 of title 10, United States Code—familiarly known as the Military Claims Act—for death, personal injury, or property damage caused by members or civilian employees of the Army and Air Force. The Federal Government would not, of course, undertake to pay any claims arising out of activities of the National Guard at other times, such as when they might be ordered to duty by the Governor or other State authorities, in their capacity of State troops and divorced from their federally authorized training.

This legislation recognizes the gradual change in emphasis on the mission and training of the National Guard. Over the years, what were once primarily State forces have become principal elements of the Ready Reserve of the Army and Air Force. The training of the guard is now directed almost entirely to readying it for instantaneous mobilization in augmentation of the active Federal establishment in the event of war or national emergency. The National Guard is armed and equipped, for Federal use, with such armament as jet aircraft, heavy tracked vehicles, and missiles. Inherent in the training with such weapons is the possibility of accidental personal injury to members of the civilian community, or to their property. The crash in Worcester, Mass., of a New Hampshire Air National Guard aircraft, resulted in damage by fire to several homes, and Public Law 85–760 was enacted as a result; the midair collision in Maryland with a commercial airline cost many lives and resulted in several pending lawsuits; the potential damage and litigation that might arise out of an explosion on an Army National Guard Nike site might be imagined.

In this connection, the present attitude of the States deserves consideration. State legislatures do not feel that their States should shoulder the financial burden of paying claims incident to National Guard activities which are primarily intended to prepare these forces for their Federal mission. The situation becomes even more complex when the damage is done not in the guardsman's home State but while training in another State.

The individual guardsman is also placed in an untenable legal position. If he refuses to drive his assigned vehicle he is subject to trial under a State court-martial; if he drives that vehicle he may find himself party defendant in a civil suit, and possibly in a foreign State. He will receive no Federal assistance, and only in rare instances will his home State be able to furnish him counsel or protect him against a personal money judgment.

Thus, from the standpoint of the Federal Government, the State, the individual National Guard member, and the public, the present state of the law is unsatisfactory.

Legislation authorizing payment of National Guard claims on a year round basis, rather than a limited class of claims, restricted in nature, amount, and point of time, as now authorized for payment in annual appropriation acts is appropriate and essential.

Administrative relief comparable to that provided by section 2733 of title 10, United States Code, would be provided under this bill. This legislation should be couched as an amendment of title 32, United States Code, which title relates to the National Guard not in Federal service rather than as an amendment to title 10, United States Code, which relates to the Armed Forces in Federal service. H.R. 5435 in the form recommended by the Judiciary Committee is calculated to restate the substance of 10 U.S.C. 2733.

If this legislation is enacted, the Departments of the Army and of the Air Force will amend their regulations which now implement section 2733 of title 10, United States Code, to implement as well this new section. New joint Army-Air

National Guard regulations supplementing the regulations of the Army and Air Force will provide for the transmission of claims to the agencies of those Armed Forces designated by the service Secretaries to settle them.

The fiscal impact of this legislation is so speculative as to preclude any reasonably accurate forecast. Past experience indicates an annual cost upward of $25,000. This $25,000 figure is however manifestly low, since it is based solely on the cost of claims incident to the operations of the National Guard during annual field training, exclusive of claims for damage to property of public agencies, personal injury, death, or in excess of $1,000, all of which have heretofore been beyond the statutory authority. These claims have, in the main, resulted from automobile accidents. The potential claims which might arise out of catastrophes such as midair collisions, with attendant loss of life, aircraft crashes in metropolitan areas, or missile explosions, make it impossible to estimate annual costs with any degree of precision.

This inherent uncertainty and unpredicability as to the nature and magnitude in loss of life and damage to property is perhaps the most cogent and persuasive argument for enactment of this legislation, which will furnish a reasonable degree of protection to members of the National Guard and the several States, and provide appropriate compensation to private citizens who may sustain injury or damage by reason of accidents arising out of the training of the National Guard with these modern weapons of war, issued by the Federal Government to equip these troops for Federal service. I endorse and strongly urge the passage of this bill in its amended form.

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, the bill, in the form recommended by the committee, contains the language suggested by the Department of the Army which is intended to provide a means for settlement of claims arising from activities of the National Guard while engaged in training which involves a distinct Federal relationship. The sections referred to in the language of the committee amendment, sections 502 to 505 of title 32, the National Guard title of the United States Code, concern inactive duty training, annual field training, field exercises, National Guard schools and small arms competitions, Army and Air Force schools. The claims which could be settled under the provisions of the amended bill would be those arising from activities provided for under those sections. It is further provided that settlement authority would extend to claims caused by a National Guard member engaged in training or duty for which he would be entitled to pay under section 301 of title 37, the pay and allowances title of the United States Code, which section concerns training duty of Reserve and National Guard personnel. Similarly, that authority would also extend to claims based on actions of caretakers and clerks employed under the authority of section 709 of title 32. The claims would have to be caused by persons acting within the scope of their employment "or otherwise incident to noncombat activities of the Army, National Guard, or the Air National Guard, as the case may be, under one of those sections."

The training activities covered by sections 502 and 505, referred to above, are "primarily intended" to make the members of the National Guard ready for active Federal service in the event of an emergency. It is further observed that equipment such as jet aircraft, tanks, and heavy artillery would seldom, if ever, be useful in accomplishing a State mission. These modern military weapons are of such a character that provision should be made for the payment of claims incident to their use for National Guard training.

This is borne out by the Army report to the Committee on the Judiciary which referred to the fact that the potential financial magnitude of the damage which may be caused by National Guard aircraft crashes, ammunition explosions, and other activities is a matter of great concern to the States. The crash of a New Hampshire Air National Guard plane in Worcester, Mass., resulted in Federal legislation—the act of August 26, 1958, Public Law 85–760, 72 Stat. 853—authorizing the payment of the unsubrogated portion of property damage claims. The subrogee has since instituted suit against the adjutant general of New Hampshire.

The enactment of the claims settlement authority provided in the amended bill would provide a means of extending administrative relief where damage is suffered to National Guard activities of the sort covered by the bill. The need is demonstrated by the fact that incidents involving such activities have occurred and no authority existed for the United States to pay compensation. For example, National Guard aircraft have caused damage by dropping tow target cables in Arizona and Illinois. Claims arising out of the activities of the National Guard in these and almost every other State in the Union, when not incident to the operation of a camp of instruction—as for instance, during a routine training flight, or weekend drill—have necessarily been rejected by the Federal Government.

Present day realities require that the U.S. Government be empowered to settle claims administratively when they arise from activities included within the scope of the sections referred to in the committee amendment. This language would be added to title 32, and the claims arising out of the activities, in the scope of the employment, of members of the National Guard employed under authority of section 709 of that title; or incident to noncombat activities under that title would be administered and settled by the same personnel, in the same manner, and to the same extent as claims cognizable under section 2733, title 10, United States Code, are now settled by the Secretaries of the Departments of the Army and of the Air Force under regulations implementing that section.

Claims arising out of the ordinary traffic accident and other tort-type claims will, however, be made payable only when the proximate cause of the accident was the negligent act or omission of the National Guard man or civilian employee acting in the scope of his employment. Claims for damage to or destruction of property caused by acts of depredation, willful misconduct, or such reckless disregard of property rights as to carry an implication of guilty intent will not be payable. On the other hand, claims incident to noncombat activities, though not caused by any ascertainable negligence, such as those proximately caused by maneuvers, special field exercises, operating aircraft and missiles, using explosives, firing guns, or other weapons, including vibration or concussion, using equipment or devices having latent mechanical defects, moving combat or other vehicles designed especially for military use, and using and occupying real property, will be made payable.

In conclusion, Mr. Speaker, this legislation recognizes the gradual change in emphasis on the mission and training of the National Guard. In fact where the National Guard was previously regarded as being composed primarily of State forces, it is now the source of important elements of the Ready Reserve of the Army and Air Force. The training of the National Guard is now directed almost entirely to making it ready for rapid mobilization to augment the active Federal Military Establishment in the event of war or national emergency. It, therefore, must be recognized that the National Guard is trained and equipped with modern equipment for Federal purposes. The possibility of accidental injury to persons and property incident to National Guard training, particularly that involving such modern weapons as jet aircraft, heavy tracked vehicles, and missiles, provide a realistic basis for this legislation.

The SPEAKER pro tempore. Is there objection to the present consideration of the Senate bill?

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 7 of title 32, United States Code, is amended—

(1) by adding the following new section at the end thereof:

"§ 715. Property loss; personal injury or death: activities under certain sections of this title

"(a) Under such regulations as the Secretary of the Army or Secretary of the Air Force may prescribe, he or, subject to appeal to him, the Judge Advocate General of the armed force under his jurisdiction, if designated by him, may settle, and pay in an amount not more than $5,000 a claim against the United States for—

"(1) damage to, or loss of, real property, including damage or loss incident to use and occupancy;

"(2) damage to, or loss of, personal property, including property bailed to the United States or the National Guard and including registered or insured mail damaged, lost, or

destroyed by a criminal act while in the possession of the National Guard; or

"(3) personal injury or death;

either caused by a member of the Army National Guard or the Air National Guard, as the case may be, while engaged in training or duty under section 316, 502, 503, 504, or 505 of this title or any other provision of law for which he is entitled to pay under section 301 of title 37, or for which he has waived that pay, and acting within the scope of his employment; caused by a person employed under section 709 of this title acting within the scope of his employment; or otherwise incident to noncombat activities of the Army National Guard or the Air National Guard, as the case may be, under one of those sections.

"(b) A claim may be allowed under subsection (a) only if—

"(1) it is presented in writing two years after it accrues, except that if the claim accrues in time of war or armed conflict intervenes within two years after it accrues, and if good cause is shown, the claim may be presented not later than two years after the war or armed conflict is terminated;

"(2) it is not covered by section 2734 of title 10 or section 2672 of title 28;

"(3) it is not for personal injury or death of such a member or a person employed under section 709 of this title, whose injury or death is incident to his service;

"(4) the damage to, or loss of, property, or the personal injury or death, was not caused wholly or partly by a negligent or wrongful act of the claimant, his agent, or his employee; and

"(5) it is substantiated as prescribed in regulations of the Secretary concerned.

For the purpose of clause (1), the dates of the beginning and end of an armed conflict are the dates established by concurrent resolution of Congress or by a determination of the President.

"(c) Payment may not be made under this section for reimbursement for medical, hospital, or burial services furnished at the expense of the United States or of any State or the District of Columbia or Puerto Rico.

"(d) If the Secretary of the military department concerned considers that a claim in excess of $5,000 is meritorious and would otherwise be covered by this section, he may pay the claimant $5,000 and report the excess to Congress for its consideration.

"(e) Except as provided in subsection (d), no claim may be paid under this section unless the amount tendered is accepted by the claimant in full satisfaction.

"(f) In any case where the amount to be paid is not more than $1,000, the authority contained in subsection (a) may be delegated to any officer of the Army or the Air Force, as the case be, who has been delegated authority under section 2733(g) of title 10 to settle similar claims.

"(g) Notwithstanding any other provisions of law, the settlement of a claim under this section is final and conclusive.

"(h) In this section, 'settle' means consider, ascertain, adjust, determine, and dispose of a claim, whether by full or partial allowance or disallowance."; and

(2) by adding the following new item at the end of the analysis:

"715. Property loss; personal injury or death: activities under certain sections of this title."

Mr. LANE. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LANE: Strike out all after the enacting clause of the bill S. 1764 and insert the provisions of H.R. 5435, as passed, as follows: "That chapter 7 of title 32, United States Code, is amended—

"(1) by adding the following new section at the end thereof:

"'§ 715. Property loss; personal injury or death: activities under certain sections of this title

"'(a) Under such regulations as the Secretary of the Army or Secretary of the Air Force may prescribe, he or, subject to appeal to him, the Judge Advocate General of the armed force under his jurisdiction, if designated by him, may settle, and pay in an amount not more than $5,000 a claim against the United States for—

"'(1) damage to, or loss of, real property, including damage or loss incident to use and occupancy;

"'(2) damage to, or loss of, personal property, including property bailed to the United States or the National Guard and including registered or insured mail damaged, lost, or destroyed by a criminal act while in the possession of the National Guard; or

"'(3) personal injury or death;

either caused by a member of the Army National Guard or the Air National Guard, as the case may be, while engaged in training or duty under section 316, 502, 503, 504, or 505 of this title or any other provision of law for which he is entitled to pay under section 301 of title 37, or for which he has waived that pay, and acting within the scope of his employment; caused by a person employed under section 709 of this title acting within the scope of his employment; or otherwise incident to noncombat activities of the Army National Guard or the Air National Guard, as the case may be, under one of those sections.

"'(b) A claim may be allowed under subsection (a) only if—

"'(1) it is presented in writing within two years after it accrues, except that if the claim accrues in time of war or armed conflict or if such a war or armed conflict intervenes within two years after it accrues, and if good cause is shown, the claim may be presented not later than two years after the war or armed conflict is terminated;

"'(2) it is not covered by section 2734 of title 10 or section 2672 of title 28;

"'(3) it is not for personal injury or death of such a member or a person employed under section 709 of this title, whose injury or death is incident to his service;

"'(4) the damage to, or loss of, property, or the personal injury or death, was not caused wholly or partly by a negligent or wrongful act of the claimant, his agent, or his employee; and

"'(5) it is substantiated as prescribed in regulations of the Secretary concerned.

For the purposes of clause (1), the dates of the beginning and end of an armed conflict are the dates established by concurrent resolution of Congress or by a determination of the President.

"'(c) Payment may not be made under this section for reimbursement for medical, hospital, or burial services furnished at the expense of the United States or of any State or the District of Columbia or Puerto Rico.

"'(d) If the Secretary of the military department concerned considers that a claim in excess of $5,000 is meritorious and would otherwise be covered by this section, he may pay the claimant $5,000 and report the excess to Congress for its consideration.

"'(e) Except as provided in subsection (d), no claim may be paid under this section unless the amount tendered is accepted by the claimant in full satisfaction.

"'(f) In any case where the amount to be paid is not more than $1,000, the authority contained in subsection (a) may be delegated to any officer of the Army or the Air Force, as the case may be, who has been delegated authority under section 2733(g) of title 10 to settle similar claims.

"'(g) Notwithstanding any other provision of law, the settlement of a claim under this section is final and conclusive.

"'(h) In this section, 'settle' means consider, ascertain, adjust, determine, and dispose of a claim, whether by full or partial allowance or disallowance.'; and

"(2) by adding the following new item at the end of the analysis:

"'715. Property loss; personal injury or death: activities under certain sections of this title.'"

Amend the title so as to read: "A bill to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard."

The amendment was agreed to.

The bill was ordered to be read the third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The proceedings whereby a similar House bill (H.R. 5435) was passed were vacated and the House bill was laid on the table.

SURVIVORS' ANNUITIES UNDER CIVIL SERVICE RETIREMENT

The Clerk called the next bill (H.R. 6743) to provide for certain survivors' annuities in additional cases under the Civil Service Retirement Act of May 29, 1930.

Mr. FORD. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

FORT BOWIE NATIONAL HISTORIC SITE, ARIZ.

The Clerk called the next bill (H.R. 11876) to authorize the establishment of the Fort Bowie National Historic Site in the State of Arizona, and for other purposes.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

JUDICIAL REVIEW OF VETERANS' CLAIMS

The Clerk called the next bill (H.R. 12653) to amend title 38, United States Code, to establish a Court of Veterans' Appeals and to prescribe its jurisdiction and functions.

Mr. FORD. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

NATIONAL BOTANICAL GARDEN IN HAWAII

The Clerk called the bill (S. 2919) providing for a study and investigation of the desirability and feasibility of establishing and maintaining a national tropical botanic garden.

Mr. PELLY. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

LAND TRANSFER TO CITY OF SUSANVILLE, CALIF.

The Clerk called the bill (H.R. 11917) to authorize and direct the Secretary of Agriculture to convey certain lands in Lassen County, Calif., to the city of Susanville, Calif.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture is authorized and directed to convey by quitclaim deed, without consideration, to the city of Susanville, California, all the right, title, and interest of the United States in and to the following lands which were previously donated to the United States by C. D. Mathews and Ethel M. Mathews, his wife, by deed dated December 6, 1939, and recorded in book 38 of deeds, at page 218, in the records of Lassen County, California:

All those certain lots, pieces, ad parcels of land situate, lying and being in the county of Lassen, State of California, and particularly described as follows, to wit:

Parcel 1. Commencing at the corner common to sections 29, 30, 31, and 32, in township 30 north, range 12 east, of the Mount Diablo Base and Meridian; thence north 89 degrees 22 minutes east along the section line 497.37 feet; thence south 16 degrees 50 minutes west 1,908.58 feet to the point of intersection of the center line of Roop Street with the center line of Main Street of the city of Susanville; thence south 73 degrees 10 minutes east along said center line of Main Street 1,525.6 feet to the center line of Weatherlow Street of said city; thence continuing along said center line of Main Street of said city south 73 degrees 08 minutes 15 seconds east 1,264.25 feet; thence continuing along said center line of Main Street south 73 degrees 37 minutes 15 seconds east 445.12 feet; thence north 19 degrees 52 minutes 45 seconds east 40.07 feet to the notherly line of the California State Highway and the true point of beginning; running thence north 19 degrees 52 minutes 45 seconds east 229.20 feet; thence south 73 degrees 07 minutes 15 seconds east 115.0 feet; thence south 15 degrees 22 minutes 45 seconds west 227.80 feet to the northerly right-of-way line of the California State Highway, and thence north 73 degrees 37 minutes 15 seconds west along the said northerly right-of-way line to the California State Highway, a distance of 136 feet to the true point of beginning.

Parcel 2. Lots numbered 1, 2, and 3 of block numbered 18 of the east addition to the city of Susanville, as shown on the map entitled "Map of East Addition to Susanville, Lassen County, California" filed in the office of the county recorder of Lassen County, California, January 6, 1911.

With the following committee amendment:

Page 3, line 1, strike out "to" and insert "of".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PERMANENT REGULATIONS OF SAVINGS AND LOAN HOLDING COMPANIES

The Clerk called the bill (S. 3619) to make permanent law the provisions of section 408 of the National Housing Act regulating savings and loan holding companies.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FORD. Reserving the right to object, Mr. Speaker, the information at my disposal indicates that the report of the Federal Home Loan Bank Board in reference to this legislation, although it supports the legislation, is not included in the committee report. I also understand that the Bureau of the Budget, although it has no objection to the legislation, does not have its views set forth in the committee report.

I raise this point at this moment because those of us who are objectors on the Consent Calendar cannot be expected to make an evaluation and a sound analysis of the pieces of legislation that come before us unless the committee reports are full, complete, and comprehensive. I have made an effort in this case to look into the matter. I think the situation deserves and warrants affirmative action. But there is no excuse for this situation to prevail in the future. I give warning here and now that the rule will be observed as far as I am concerned unless we have this information in the committee report.

Mr. SPENCE. Mr. Speaker, if the gentleman will yield, I want to say for the information of the House that if the expiration date is stricken from the Holding Company Act, then the act will be exactly as it was reported out unanimously by the Banking and Currency Committee and passed unanimously by the House. This is a bill which was recommended by the savings and loan associations. The Federal Home Loan Bank Board favors the bill, although they did propose some amendments to it. I do not think there can be any valid objection to the bill.

Mr. FORD. Mr. Speaker, I am not raising any objection as to the merits of the legislation. In fact, the legislation is extremely meritorious and I am wholeheartedly in favor of it. The only question I raise is that the committee report does not contain information which would be helpful and beneficial to the members of the Consent Calendar objectors committee. Therefore, Mr. Speaker, I urge that the staff of this committee in the future as well as the staffs of other committees make a conscientious effort to provide reports from the executive branch so that we can do a better job for the benefit of all the Members of the House.

Mr. Speaker, I withdraw my reservation of objection.

Mr. BECKER. Mr. Speaker, reserving the right to object, is there anyone who can tell us anything about this bill? We do not seem to have much information on this. We do not seem to have the slightest idea at this time what this is about.

Mr. SPENCE. Mr. Speaker, this is a bill to regulate and control the savings and loan holding companies. Many of the holding companies were organized for the purpose of persuading mutual associations to convert to stock companies so that the holding companies could gain control of them by purchasing their stock, for which they often paid more than a fair price. Then, by reorganization, an increase in stock was effected again, which was sold to the public. I am told that many of the organizers were greatly enriched by this process. It was to remedy this condition that the Savings and Loan Holding Company Act was enacted. This does not imply that there are not many good and lawful holding companies that are rendering good service. Also, one of the principal purposes of the Holding Company Act is to preserve the local character of the savings and loan associations, which have endeared themselves to the people by reason of the interest local management has shown in the welfare of the community. I think the holding companies are entitled to maintain what they have and nothing will be taken away from them, but we just cannot permit resumption of certain promoters' practices which are neither good for the public nor for the industry.

Mr. BECKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The clerk read the bill, as follows:

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That subsection (g) of section 408 of the National Housing Act (12 U.S.C. 1730a.(g)) is hereby repealed.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BILL TO QUIET TITLE

The Clerk called the bill (H.R. 12491) to authorize the Secretary of Agriculture to convey certain lands in the State of Wyoming to the county of Fremont, Wyo.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture is authorized and directed to convey by quitclaim deed, without consideration, to the county of Fremont, Wyoming, all the right, title, and interest of the United States in and to lot 5, block 14, of the original townsite of Lander, Fremont County, Wyoming.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

USE OF SURPLUS FOODS IN HOME ECONOMICS

The Clerk called the bill (S. 3146) to authorize the Commodity Credit Corporation to donate dairy products and other agricultural commodities for use in home economics courses.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That schools receiving surplus foods pursuant to clause (3) of section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) or section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c) are authorized to use such foods in training students in home economics.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. QUIGLEY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. QUIGLEY. Mr. Speaker, writing to your Congressman can bring results. Proof of this is found in the action just taken by the House of Representatives in passing S. 3146. This measure provides for the use of surplus foods in home economics classes and was in effect written by a constituent of mine, Mrs. Emerson Towers of Spring Grove, Pa.

Mrs. Towers did not set out to write legislation but merely, as people will, wrote her Congressman to ask if he knew why it was that she could not use surplus foods in the home economics classes she teaches in the Spring Grove Junior High School.

Upon investigation, I discovered that the law did not provide for the use of surplus foods in this manner and promptly introduced the bill we have just passed. At the same time, Senator JOSEPH S. CLARK introduced a similar bill in the other body. The Senate approved the measure just before the July recess.

I trust the President will act favorably and promptly on this bill so that it may become law in time to become effective with the new school year. Under its provisions, any school participating in the school lunch program would be eligible to receive additional food from the Commodity Credit Corporation for use in its home economics classes.

This bill is not likely to make a big dent in this country's vast farm surpluses, but it will help consume some of our overabundance of food immediately, and, who knows, if our future homemakers become adept in the preparation of these foods in a variety of ways, it may help us eat our way out of the surplus.

Since no additional personnel or money is required to operate this addition to the school lunch program it will not add to the Federal taxpayers' burden, and it should be a real help to Mrs. Towers and home economics teachers like her throughout the country who must operate on a very tight budget. Mrs. Towers, for example, operated last year on a budget of $45 a month for 235 students. To do this requires some real penny watching. So you can see what surplus rice, flour, dried eggs, butter, and other foods will mean to her.

For the information of my colleagues I would like to say that Mrs. Towers is a 49-year-old housewife who has only recently returned to teaching. She is a graduate of Hood College in Frederick, Md.; she has been absent from the teaching profession for 22 years. Two years ago the shortage of teachers prompted her to return to her profession, and she has been serving since as an instructor in home economics in Spring Grove Junior High School.

Finally, Mr. Speaker, I would like to include as part of my remarks, the letter which gave birth to the law we have just enacted. On February 17, 1960, Mrs. Towers wrote to me, as follows:

As a housewife and a teacher of home economics, I have decided to bring to your attention a situation I think is very unfortunate in this land of plenty—the United States of America. This concerns a Federal law that governs the distribution of excess foods to schools for use in cafeterias. I am sorry that I cannot give you the number of the law.

We who teach home economics in public schools wonder why we cannot use some of these surplus foods in the classrooms in our foods work. The foods prepared in class are eaten in class by the same children who eat in the cafeterias. They learn how to prepare foods and the food is not wasted. Surely this is a contribution to the future American housewife:

1. Proper preparation of food;
2. Economical foods prepared so that they are tasty;
3. Proper serving of these foods so that they are appetizing;
4. Use of surplus foods on which the Government is paying storage;
5. Teaching how to use these foods in a balanced diet.

Most home economics teachers are on limited budgets. These surplus foods would really fill a great need in the U.S. educational system.

Is there a misinterpretation of the law? I certainly would appreciate some action that would change this sorry situation, and I am sure that I am not alone in this line of thinking. Will you help all of us who teach home economics?

CLARIFYING THE RIGHT OF STATES TO SELECT CERTAIN PUBLIC LANDS SUBJECT TO ANY OUTSTANDING MINERAL LEASE OR PERMIT

The Clerk called the bill (H.R. 10102) to clarify the right of States to select certain public lands subject to any outstanding mineral lease or permit.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2276(a)(3) of the Revised Statutes of the United States (43 U.S.C. 852(a)(3)) is amended to read as follows:

"(3) Lands subject to a mineral lease or permit may be selected if none of the lands subject to that lease or permit are in a producing or producible status, but if a State shall select part but not all of the unappropriated, surveyed public lands subject to any mineral lease or permit, there shall be reserved from such part to the United States, for so long as that lease or permit shall remain in effect, the mineral for which that lease or permit issued, together with a right to enter upon the same to prospect for, recover, and remove the said mineral without unreasonably interfering with other rights therein; where lands subject to a mineral lease or permit are selected and acquired without reservation of the leased mineral as provided for herein, the State shall succeed to the position of the United States thereunder."

With the following committee amendment:

Page 1, line 3, strike out all after the enacting clause and insert "That subsection (a) of section 2276 of the Revised Statutes (43 U.S.C. 852(a)) is amended by the deletion of the existing paragraph (3) and the substitution therefor of the following paragraphs:

"'(3) Land subject to a mineral lease or permit may be selected if none of the land subject to that lease or permit is in a producing or producible status, subject, however, to the restrictions and conditions of the preceding and following paragraphs of this subsection.

"'(4) If a selection is consummated as to a portion but not all of the lands subject to any mineral lease or permit, then, as to such portion and for so long only as such lease or permit or any lease issued pursuant to such permit shall remain in effect, there shall be automatically reserved to the United States the mineral or minerals for which the lease or permit was issued, together with such further rights as may be necessary for the full and complete enjoyment of all rights, privileges and benefits under or with respect to the lease or permit: *Provided, however,* That after approval of the selection the Secretary of the Interior shall determine what portion of any rents and royalties accruing thereafter which may be paid under the lease or permit is properly applicable to that portion of the land subject to the lease or permit selected by the State, the portion applicable being determined by applying to the sum of the rents and royalties the same ratio as that existing between the acreage selected by the State and the total acreage subject to the lease or permit; of the portion applicable to the selected land 90 per centum shall be paid to the State by the United States annually and 10 per centum shall be deposited in the Treasury of the United States as miscellaneous receipts.

"'(5) If a selection is consummated as to all of the lands subject to any *mineral lease* or permit or if, where the selecting State has previously acquired title to a portion of the lands subject to a mineral lease or permit, a selection is consummated as to all of the remaining lands subject to that lease or permit, then and upon condition that the United States shall retain all rents and royalties theretofore paid and that the lessee or permittee shall have and may enjoy under and with respect to that lease or permit all the rights, privileges, and benefits which he would have had or might have enjoyed had the selection not been made and approved, the State shall succeed to all the rights of the United States under the lease or permit as to the mineral or minerals covered thereby, subject, however, to all obligations of the United States under and with respect to that lease or permit.'

"SEC. 2. Paragraph (1) of subsection (d) of section 2276 of the Revised Statutes (43 U.S.C., sec. 852(d)(1)) is amended to read as follows:

"'(d)(1) The term "unappropriated public lands" as used in this section shall include, without otherwise affecting the meaning thereof, lands withdrawn for coal, phosphate, nitrate, potash, oil, gas, asphaltic minerals, oil shale, sodium, and sulfur, but otherwise subject to appropriation, location, selection, entry, or purchase under the nonmineral laws of the United States; lands withdrawn by Executive Order Numbered 5327, of April 15, 1930, if otherwise available for selection; and the retained or reserved interest of the United States in lands which have been disposed of with a reservation to the United States of all minerals or any specified mineral or minerals.'"

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER pro tempore. That concludes the bills on the calendar eligible for consideration.

WORLD SPORT PARACHUTING CHAMPIONSHIPS AT ORANGE, MASS.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution, House Joint Resolution 723, extending an invitation to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass., which is No. 562 on the Consent Calendar but which was not reached on the calendar today as it has not been on the calendar 3 days. The chairman of the Committee on Foreign Affairs has sent word to me that it has been cleared by both sides of the aisle.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

Mr. PELLY. Mr. Speaker, reserving the right to object, some of us were opposed to the congressional recess for the political party conventions at a date as early as it took place. Also we wanted to come back earlier and finish the business of the House. Our objection is that under those circumstances much legislation would have been eligible at this time. Actually, I think this is a good bill and I shall not object to it, but with bills that are not eligible for consideration on the Consent Calendar in the future I am not going to let go by without objection, because as I said we did not get back to work in this bobtailed session as soon as we should have, and we should not have recessed as early as we did.

I withdraw my reservation of objection, Mr. Speaker.

Mr. GROSS. Mr. Speaker, reserving the right to object, I note in the committee report, on this resolution, page 3, the last line, "No expense to the United States Government is involved." May we take that as gospel in connection with this resolution?

Mr. McCORMACK. I cannot conceive of any committee report carrying that unless it were so.

Mr. GROSS. With the statement of the distinguished majority leader that this will not cost the U.S. Government any money, I withdraw my reservation of objection.

There being no objection, the Clerk read the House joint resolution, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, whereas the National Aeronautic Association has invited the Federation Aeronautique Internationale to hold the biennial world sport parachuting championship in the United States at Orange, Massachusetts, in 1962, the Government of the United States joins in the invitation of the National Aeronautic Association to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championship in the United States at Orange, Massachusetts.

SEC. 2. The Secretary of State is directed to transmit a copy of this joint resolution to the Federation Aeronautique Internationale.

The resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONFERENCE REPORT ON SUPPLEMENTAL APPROPRIATION BILL—1961

Mr. McCORMACK. Mr. Speaker, on behalf of the gentleman from Texas [Mr. THOMAS], I ask unanimous consent that the managers on the part of the House have until midnight tonight to file a conference report on the bill H.R. 13161, the second supplemental appropriation bill for 1961.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PRICE SUPPORT AND PRODUCTION ADJUSTMENT ACTIVITIES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations may have permission to file reports on price support and production adjustment activities and on grain activities until midnight Wednesday night, August 31, 1960.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CLARIFYING THE RIGHTS OF STATES TO SELECT CERTAIN PUBLIC LANDS SUBJECT TO ANY OUTSTANDING LEASE OR PERMIT

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent to return to the consideration of the bill (H.R. 10102) to clarify the right of States to select certain public lands subject to any outstanding mineral lease or permit. Consent Calendar No. 599.

The SPEAKER pro tempore. H.R. 10102 passed the House just a few moments ago on the Consent Calendar.

Mr. ASPINALL. I ask unanimous consent, Mr. Speaker, that we take up consideration of S. 2959 and that it be substituted in lieu of the bill which was passed.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the present consideration of the Senate bill?

Mr. FORD. Mr. Speaker, reserving the right to object, will the gentleman explain what he intends to do?

Mr. ASPINALL. Mr. Speaker, S. 2959, which passed the other body on June 28 is a combination of the provisions of two House bills. One of these bills is H.R. 11957, which has passed the House, and the other is H.R. 10102, pending consent calendar business.

Sections 1 and 2 of S. 2959 are identical to H.R. 10102 as reported by the committee. Sections 3 and 4 of S. 2959 are identical to H.R. 11957 as it passed the House.

Passage of S. 2959 would render unnecessary further action by the other body on H.R. 11957.

Mr. FORD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the Senate bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 2276 of the Revised Statutes (43 U.S.C. 852(a)) is amended by the deletion of the existing paragraph (3) and the substitution therefor of the following paragraphs:

"(3) Land subject to a mineral lease or permit may be selected if none of the land subject to that lease or permit is in a producing or producible status, subject, however, to the restrictions and conditions of the preceding and following paragraphs of this subsection.

"(4) If a selection is consummated as to a portion but not all of the lands subject to any mineral lease or permit, then, as to such portion and for so long only as such lease or permit or any lease issued pursuant to such permit shall remain in effect, there shall be automatically reserved to the United States the mineral or minerals for which the lease or permit was issued, together with such further rights as may be necessary for the full and complete enjoyment of all rights, privileges and benefits under or with respect to the lease or permit: *Provided, however,* That after approval of the selection the Secretary of the Interior shall determine what portion of any rents and royalties accruing thereafter which may be paid under the lease or permit is properly applicable to that portion of the land subject to the lease or permit selected by the State, the portion applicable being determined by applying to the sum of the rents and royalties the same ratio as that existing between the acreage selected by the State and the total acreage subject to the lease or permit; of the portion applicable to the selected land 90 per centum shall be paid to the State by the United States annually and 10 per centum shall be deposited in the Treasury of the United States as miscellaneous receipts.

"(5) If a selection is consummated as to all of the lands subject to any mineral lease or permit or if, where the selecting State has previously acquired title to a portion of the lands subject to a mineral lease or permit, a selection is consummated as to all of the

remaining lands subject to that lease or permit, then and upon condition that the United States shall retain all rents and royalties theretofore paid and that the lessee or permittee shall have and may enjoy under and with respect to that lease or permit all the rights, privileges, and benefits which he would have had or might have enjoyed had the selection not been made and approved, the State shall succeed to all the rights of the United States under the lease or permit as to the mineral or minerals covered thereby, subject, however, to all obligations of the United States under and with respect to that lease or permit."

SEC. 2. Paragraph (1) of subsection (d) of section 2276 of the Revised Statutes (43 U.S.C. 852(d)(1)) is amended to read as follows:

"(d)(1) The term 'unappropriated public lands' as used in this section shall include, without otherwise affecting the meaning thereof, lands withdrawn for coal, phosphate, nitrate, potash, oil, gas, asphaltic minerals, oil shale sodium, and sulphur, but otherwise subject to appropriation, location, selection, entry, or purchase under the nonmineral laws of the United States; lands withdrawn by Executive Order Numbered 5327, of April 15, 1930, if otherwise available for selection; and the retained or reserved interest of the United Staets in lands which have been disposed of with a reservation to the United States of all minerals or any specified mineral or minerals."

SEC. 3. The second and third sentences of subsection (h) of section 6 of the Act of July 7, 1958 (72 Stat. 342), are hereby replaced by the following sentences: "Such selections shall be made only from lands that are otherwise open to selection under this Act. When all of the lands subject to a lease, permit, license, or contract are selected, the patent for the lands so selected shall vest in the State of Alaska all the right, title, and interest of the United States in and to that lease, permit, license, or contract that remains outstanding on the effective date of the patent, including the right to all the rentals, royalties, and other payments accruing after that date under that lease, permit, license, or contract, and including any authority that may have been retained by the United States to modify the terms and conditions of that lease, permit, license, or contract: *Provided*, That nothing herein contained shall affect the continued validity of any such lease, permit, license, or contract or any rights arising thereunder. Where only a portion of the lands subject to a lease, permit, license, or contract are selected, there shall be reserved to the United States the mineral or minerals subject to that lease, permit, license, or contract, together with such further rights as may be necessary to the full and complete enjoyment of all rights, privileges, and benefits under or with respect to that lease, permit, license, or contract; upon the termination of the lease, permit, license, or contract, title to the minerals so reserved to the United States shall pass to the State of Alaska."

SEC. 4. Subsection (a) of section 6 of the Act of July 7, 1958 (72 Stat. 340), is hereby amended by the addition of the following: "*Provided further*, That for the purposes of this section the term 'public lands of the United States in Alaska which are vacant, unappropriated, and unreserved' shall include, without limiting the use thereof, the retained or reserved interest of the United States in lands which have been disposed of with a reservation to the United States of all minerals or any specified mineral or minerals."

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

The proceedings whereby the bill H.R. 10102 was passed were vacated, and that bill was laid on the table.

CONVEYANCE OF PART OF LOCK AND DAM NO. 10, KENTUCKY RIVER, TO PIONEER NATIONAL MONUMENT ASSOCIATION

Mr. BLATNIK. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 11561) to authorize and direct the Secretary of the Army to convey part of lock and dam numbered 10, Kentucky River, Madison County, Ky., to the Pioneer National Monument Association for use as part of a historic site, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

On page 2, line 5, strike out "without monetary payment therefor but" and insert "in return for the payment of an amount equal to 50 per centum of the fair market value of the land conveyed, as determined by the Secretary of the Army after appraisal, and".

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

RHODE ISLAND TURNPIKE AND BRIDGE AUTHORITY

Mr. FALLON. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3681) authorizing the Rhode Island Turnpike and Bridge Authority to combine for financing purposes the bridge across the West Passage of Narragansett Bay with the Newport Bridge and any other project acquired or constructed by said authority.

The Clerk read the title of the bill.

Mr. GROSS. Mr. Speaker, reserving the right to object, may we have a brief explanation of the bill?

Mr. FALLON. Mr. Speaker, S. 3681 amends the act of April 4, 1938 (52 Stat. 194), which authorized the State of Rhode Island, acting through the Jamestown Bridge Commission or its successors, to construct a bridge across the West Passage of Narragansett Bay between the towns of Jamestown and North Kingston. The bridge was completed in 1940. Section 3 of the act provides for adjustment of tolls to provide a fund sufficient to amortize the cost of the bridge within a period of not to exceed 40 years and to provide a fund to pay for maintaining and operating the bridge. After establishment of such funds, the bridge would become free of tolls.

This bill would amend the 1938 act so as to provide that, upon title to the bridge becoming vested in the Rhode Island Turnpike and Bridge Authority, the authority would be authorized to combine into one project for financing purposes the existing bridge and any other bridges of the authority and to charge tolls for all such bridges, with adjustment of tolls to provide a fund to pay maintenance and operation costs and a fund to amortize the aggregate construction or acquisition cost of all the structures within a period not exceeding 40 years from the date of completion of the last bridge included in the project. At the end of the 40-year period from the date of completion of the last bridge the bridges in question would become free.

The principle involved is purely an intrastate matter wholly within the State of Rhode Island and is not in conflict with the objectives of the Federal-aid highway program. It is consistent with legislation previously adopted at various locations throughout the country. Federal legislation is needed to permit early planning and remove any impediment to the future operation of the State agency. The need for enactment of this legislation at this time is due to the fact that a referendum concerning a State guarantee authorization will be voted upon by the people of Rhode Island in the November election. If this referendum is favorably acted upon, the turnpike and bridge authority will be in a position to take prompt and immediate action, and failure to obtain this permissive legislation will delay the authority's taking any action.

The Rhode Island Legislature has passed legislation which in effect is a mandate to the turnpike and bridge authority to utilize the tolls on the existing Jamestown Bridge covered by S. 3681 to help finance construction of a new and larger series of bridges.

All interested agencies, including the Department of Commerce and the Department of the Army, have reported favorably on this legislation.

Mr. GROSS. There will be no cost to the Federal Government?

Mr. FALLON. No.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act authorizing the State of Rhode Island, acting by and through the Jamestown Bridge Commission as an agency of the State, to construct, maintain, and operate a toll bridge across the West Passage of Narragansett Bay between the towns of Jamestown and North Kingston", approved April 4, 1938 (52 Stat. 194), is hereby amended by striking out section 4, and inserting in lieu thereof the following new section:

"SEC. 4. That upon title to the bridge which was constructed under the authority of this Act becoming vested in the Rhode Island Turnpike and Bridge Authority, created by chapter 3390, Public Laws of Rhode Island, 1954 (chapter 12 of title 24, General Laws of Rhode Island, 1956), said authority shall be authorized to combine said bridge for financing purposes with any other bridge, bridges, or structures financed by said authority under the provisions of said chapter 12, as heretofore amended, and to fix and charge tolls in accordance with State law for the use of said bridge and such other bridges

and approaches so combined into one project, and to pledge the use of such tolls in accordance with the provisions of said chapter 12, as amended."

SEC. 2. That the word "bridge" in the first line of section 5 be stricken and the word "bridges" inserted in lieu thereof.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COMMITTEE ON GOVERNMENT OPERATIONS

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations may have until midnight tomorrow to file a report dealing with the sale and transmission of power.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. HARDY. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations may have until midnight tonight to file a report regarding foreign operations.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

PRIVATE CALENDAR

The SPEAKER pro tempore. Under the previous order of the House, the Private Calendar will be called at this time. The Clerk will call the first bill on the calendar.

COL. JOHN A. RYAN, JR.

The Clerk called the bill (S. 2353) for the relief of Col. John A. Ryan, Jr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to John A. Ryan, Junior, colonel, United States Air Force, the sum of $100,000. The payment of such sum shall be in full satisfaction of all claims of the said Colonel John A. Ryan, Junior, against the United States, or any foreign country, resulting from the development by him outside of official working hours of a new bombing system known as the low altitude bombing system and apparatus, the said Colonel John A. Ryan, Junior, having been unable to protect or retain the domestic or foreign commercial rights to such system because of the security laws of the United States: *Provided,* That such payment shall be upon condition that Colonel John A. Ryan, Junior, assign to the United States the entire right, title, and interest to such invention: *And provided further,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BORINQUEN HOME CORP.

The Clerk called the bill (S. 2770) for the relief of Borinquen Home Corp.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Borinquen Home Corporation of San Juan, Puerto Rico, the sum of $19,204.14. The payment of such sum shall be in full satisfaction of all claims of such Corporation against the United States for compensation or work performed by such Corporation pursuant to an agreement entered into between the Corporation and the Tenth Naval District, Department of the Navy, for the construction of two storm sewers for the use of the San Patricio Naval Project: *Provided,* That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GRANT OF EASEMENT TO CINCINNATI SOUTHERN RAILWAY

The Clerk called the bill (S. 3665) to authorize the Secretary of Agriculture to grant an easement over certain lands to the trustees of the Cincinnati Southern Railway, their successors and assigns.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the Secretary of Agriculture is authorized, upon such terms as he may deem advisable, to grant and convey by proper instrument a perpetual easement to the trustees of the Cincinnati Southern Railway, their successors and assigns, in, upon, across, and over national forest lands and other lands under the jurisdiction of the Department of Agriculture for the construction, maintenance, and operation of the line of railway incident to the relocation of its main line between Tateville, Kentucky, and Flat Rock, Kentucky, and for any related purpose deemed appropriate by the Secretary: *Provided,* That such easement (a) shall be granted only upon a finding by the Secretary that it will not be incompatible with the public interest, (b) shall not include any more land than is reasonably necessary for the purpose for which granted, (c) shall include provisions for payment of adequate compensation, and (d) may include a right to use from the subject lands materials and products for the construction and maintenance of authorized improvements thereon upon the payment of adequate compensation therefor.

SEC. 2. All or any part of such easement may be annulled or forfeited by declaration of the Secretary for failure to comply with the terms of the grant or for nonuse for a period of two consecutive years or abandonment of rights granted under authority hereof.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ROBERT FROST MEDAL

The Clerk called the bill (S. 3439) authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized to present, in the name of Congress, an appropriate gold medal to Robert Frost in recognition of his poetry, which has enriched the culture of the United States and the philosophy of the world. For such purpose, the Secretary of the Treasury shall cause to be struck a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary.

SEC. 2. There is authorized to be appropriated the sum of $2,500 to carry out the provisions of this Act.

Mr. HOFFMAN of Michigan. Mr. Speaker, I move to strike out the last word.

The SPEAKER pro tempore (Mr. MILLS). The gentleman cannot be recognized for that.

Mr. HOFFMAN of Michigan. A Member cannot be recognized to offer an amendment?

The SPEAKER pro tempore. An amendment to strike out or reduce an amount would be in order, but not a pro forma amendment.

Mr. HOFFMAN of Michigan. This is to authorize the President to present a gold medal. That is the one I want to offer an amendment to.

The SPEAKER pro tempore. The gentleman may proceed.

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, this is a bill to authorize the President to present a gold medal to this New England poet. I am in favor of that, but I would like to add to it the presentation of a gold medal to the chairman of any committee of the House who will give consideration to a bill I have pending. We all recall that the politicians in both parties have been "het up" and bothered about the civil rights of certain persons; that is to say, it is claimed certain individuals, because of their race, color, or state of origin have been discriminated against. Permit me to say something about civil rights protection for some—not all.

Certainly every citizen, regardless of race, creed, color, or state of origin, should have the right to vote.

Certainly he should have equal rights to participate in every activity where the expenditure of Federal funds is involved.

Equally important is the right to earn a livelihood.

Certainly no one should be deprived of that right by being forced to work where conditions are detrimental to his health or the wage is insufficient to buy not only necessities but the enjoyable customary advantages offered by our economic system.

Most assuredly no one who has created a job, an opportunity for work, the earning of a wage, should be required to pay an amount or accept conditions which will not permit him to continue his activities.

It is necessary that the public be protected from exorbitant charges where there is a monopolistic control of the necessities of life. Hence the proposition that Government—State and Federal—shall impose the restrictions upon services and products which are necessary for the continued existence of our people.

But strange as it may seem the politicians who are so active in behalf of what they call the people's civil rights are blind in this, a political year, to the obvious fact that it is not only un-American, unconstitutional, but obviously unfair and oppressive to permit any group to exercise the power of levying a tax upon the right to earn a living, upon the right to a job, upon the right to work. But such is the fact.

In Boston, on August 22, 1960, a busdriver's refusal to work overtime—either 2 minutes or 3 hours—caused a strike which tied up Boston's Metropolitan Transit Authority System just as the evening rush hour began—the New York Times, August 23, 1960. The strike ended 24 hours later.

An editorial of August 24, 1960, from the Washington Evening Star, referring to the busdriver, carried this caption, "He Wanted To Go Home," and called attention to the fact that thousands who wanted to use the buses also wanted to go home—the Washington Evening Star, August 24, 1960.

An Associated Press news story of August 29, 1960, called attention to the fact that negotiations were pending in an effort to prevent on September 1 a sitdown and strike of the entire Pennsylvania Railroad, the issue being whether the company should have the privilege, in managing its business, of "farming out" repair work to other companies, that is to say, whether the company or the union should determine how much of its business should be carried on in the home plant—the Washington Evening Star, August 29, 1960.

It has long been my contention that, where a public utility was involved, where the Government—State or Federal—fixed the conditions and the amount of the rate under which an organization should operate, when it was furnishing services or products upon the existence of which our daily activities depended, no one, no organization, should be permitted to halt the supply of those necessities.

Many can remember the statement of Governor Coolidge who unhesitatingly announced that strikes against the public would not be tolerated in Massachusetts. His subsequent election as Vice President, his assumption of the office of President on the death of President Harding, is proof that the people overwhelmingly subscribed to that statement.

As recently as March 10, 1959, when Mr. Meany, president of the AFL–CIO, appeared before a House committee, in answer to my question as to what he would say about legislation which would prohibit employees of public utilities, where the Government has something to do with fixing rates, from striking, replied:

> Well, I'll tell you, the idea of that legislation, Mr. HOFFMAN, would be that because of a tremendous public interest in a public utility, because the operation of a public utility touches the lives of practically all the people in the community, that the employee, should not have the right to strike because that would sort of have an adverse effect on all the people.

When hundreds of thousands of Federal employees, engaged in transacting the business of the Government here in Washington, were prevented from going to their jobs by a strike against the Capital Transit Co., a bill, H.R. 4612, was introduced by me on November 7, 1945, "to expedite the business of the Federal Government."

Again, on July 7, 1955, a similar bill was introduced. Again, on February 9, 1959, another effort was made by introducing a bill which, among other things, provided:

> 1. It shall be unlawful for any individual employed in any public utility affecting commerce whose rates are fixed by some governmental agency to participate in any strike.

Since then, after the Congress had authorized the appropriation of billions upon billions of dollars for national defense, including expenditures for the production of missiles, strikes in Florida and California halted the production of needed implements of war.

Day after day, time and time again, we are advised by those in authority, those who should have accurate information, that our country is in danger because we have lacked production and so endangered our national security.

One of the paramount issues of this campaign is whether we have adequate defense—defense equal or superior to the war power of Russia.

Time and again in the past, and many times I have put the facts in the record, our ability to defend ourselves has been impaired by strikes.

Yet the politicians and the statesmen seeking office have refused, both on the Committee on Education and Labor, of which I am a member, and in the House, to give any consideration whatsoever to the issue as to whether an American citizen shall or shall not be permitted to work for his own advantage, for national security, permitted to participate in the preparation for national defense, without paying tribute to some organization.

Will some of the officeseekers, some of the statesmen, in either or both political parties, give the public the reason for their failure to act?

It cannot be because of a lack of information, a lack of knowledge—ignorance of the right involved. Why is it? Is it because we lack the courage to deny the commands of union officials?

Is any small group to be permitted to fix the cost of national defense or determine whether our defense shall be adequate?

It has been my privilege to serve on the House Committee on Education and Labor since 1940. Repeatedly, consideration of legislation similar to that to which reference has been made has been requested, not only of early chairmen of that committee, but the request was made to a Republican chairman—Chairman McConnell of Pennsylvania—to the present Democratic chairman, GRAHAM BARDEN of North Carolina.

No consideration whatever has been given to this measure.

The House itself, when the Landrum-Griffin bill was under consideration, at the dictation of those in charge of the bill, limited my discussion of this and another equally important amendment to 54 seconds on each proposition.

Is it not the desire for political advantage which is denying at least a hearing of this vital proposition that no longer shall a minority be permitted to interfere with the welfare of our citizens—the future national security of the Nation?

The editorials referred to follow:

[From the New York Times, Aug. 23, 1960]

TRANSIT IN BOSTON HALTED BY STRIKE—METROPOLITAN EMPLOYEES ACT AFTER DRIVER IS SUSPENDED—690,000 USE SYSTEM

BOSTON, August 22.—A general strike, caused by a driver's refusal to work overtime, tied up Boston's Metropolitan Transit Authority System today, just as the evening rush hour began.

The management suspended the driver and said that the overtime work involved about 2 minutes at the end of the run. Union officials denied this and said the overtime involved a total of 3 hours.

More than 690,000 commuters were stranded when 4,600 members of MTA Local 589 of the Street, Electric Railway, and Motor Coach Employees Union called the strike.

The transit authority said the strike was caused by a public-be-damned attitude on the part of the drivers.

Thomas J. McLernon, MTA general manager, who came to the job in July from a post with the New York Transit Authority, and Joseph Fahey, a member of the international executive board of the carmen's union, met with Gov. Foster Furcolo and Atty. Gen. Edward J. McCormack, Jr., to confer on a proposal to end the walkout.

COMPROMISE SOUGHT

Officials said a compromise was sought. It repeatedly involved the return to work of Edward Burns of Westford, the driver who refused the overtime, and simultaneous return to work of the strikers.

The issue was complicated by the fact that, since last December 31, the MTA workers have been without a formal contract. The union's demand for a wage increase is before two arbitrators, but the aribtrators have been unable to agree on a third, or neutral, member of the arbitration board.

The last strike on what is now the MTA system was a 12-hour walkout against the Boston Elevated Railway Co. in 1945. There were also brief strikes against the Boston El in 1912 and 1919. The deficit-ridden Boston El was purchased by the State in 1957 for $22 million.

MAIN ROADS JAMMED

The Boston police reported that many main roads into the city were jammed with cars. They said the city's Common, a grassy park in the heart of the downtown area, was

ringed with double and triple lines of automobiles as suburban housewives sought their husbands, stranded in the city by the transit tieup.

At Revere Beach, about 10 miles north of Boston, the MTA reported nearly 2,000 persons, many clad in bathing suits and carrying beach umbrellas and picnic baskets, were milling about the transit system's beach station seeking transportation home.

The vast transit authority system extends like the spokes of a wheel over 114 square miles and serves more than a dozen cities and towns on Boston's periphery. It is a combination of rapid transit subway tunnels and above-ground trolleys and buses, serving a Greater Boston population of nearly 2 million persons.

[From the New York Times, Aug. 24, 1960]

TRANSIT STRIKE IS ENDED IN BOSTON

BOSTON, August 23.—A strike that tied up Greater Boston's rapid transit system for 24 hours ended late today.

Gov. Foster Furcolo announced the settlement after an all-day conference with representatives of the Metropolitan Transit Authority and the Street Railway and Motor Coach Employees Union. The authority runs the transit system.

Commuters had resorted to walking, hitchhiking, car pools, and taxicabs during the brief strike.

The authority said the strike was called over a driver's refusal to work 2 minutes overtime. The union denied this.

The bus driver involved was Edward L. Burns of Westford. He said the run he was asked to take would have caused 30 minutes of overtime. "I wanted to go home," he said.

The strike involved 4,500 operators and affected 1,500 other employees who were thrown out of work.

Under the agreement Mr. Burns will be reinstated.

[From the Washington Evening Star, Aug. 24, 1960]

HE WANTED TO GO HOME

Hundreds of thousands of hapless commuters in Greater Boston have just been subjected for 24 hours to the enormous indignities, inconveniences and discomforts of a sudden, unexpected and altogether crippling transit strike. Why?

Well, it seems that a bus driver up there—a 42-year-old man named Edward Burns, with "a very good record"—refused to take on an overtime task that would have required him to work, according to his boss, only an extra 2 minutes. He disputes this. He says it would have been nearer a half hour. Anyhow, he walked away from the job. As he has put it, "I just wanted to go home."

In response, Mr. Burns' boss temporarily suspended him, and then his union reacted by going on strike without warning—at the height of the evening rush hour for buses, streetcars, and subway trains. There then followed chaos in the transportation system run by Boston's Metropolitan Transit Authority whose general manager bravely declared: "I don't intend to retreat one bit * * *. The basic point at issue is whether management is going to run the MTA or whether the union is going to run it.

This is good talk and sound principle. Yet the fact remains that the people of Boston's metropolitan area—people who like to travel normally to work in the morning and who want to go home in the evening quite as much as anybody else, including Mr. Burns—have been caught in the middle. On one hand, the transit authorities have sought to be properly firm; on the other, acting with what might be called ironfisted whimsicality, the union has created a paralysis of transportation in protest against the mild disciplining of a driver who had refused to work a few minutes overtime at overtime pay.

Perhaps we should hail this event as another example of how wonderfully free is our free way of life, and how gloriously armed are our unions to safeguard their members from laboring a few extra minutes at bonus rates of pay. Boston's commuters, however, probably take a less cheery view of the matter. Some people, of course, can be pretty narrowminded.

[From the Washington Evening Star, Aug. 29, 1960]

PENNSY DISPUTE TALKS SLATED

PHILADELPHIA, August 29.—Last-minute negotiations to prevent a September 1 strike and shutdown of the entire Pennsylvania Railroad begin today on an unpleasant note.

Francis A. O'Neill, chairman of the National (Railway) Mediation Board, meets separately with the Transport Workers Union and the railroad and then, if possible, with both sides jointly.

Over the weekend, Michael J. Quill, international president of the TWU, said he wanted the joint session to be open to the public because the railroad has said the public will suffer greatly from a strike.

Railroad spokesmen countered that Mr. Quill's proposal was a publicity gag. In any event, they said, public sessions were a matter for the mediation board to decide.

LITTLE HOPE OF ACCORD

Mr. O'Neill has not commented on the proposal.

Mr. Quill also said that Allen J. Greenough, president of the railroad, must be present at the negotiations. The railroad said Mr. Greenough had not changed earlier plans to attend.

"There is absolutely no hope of a settlement," Mr. Quill added.

His union represents 20,000 nonoperating employees who are scheduled to strike at 1 minute past midnight Thursday morning. Five thousand more nonoperating employees, represented by the system federation, also are to strike.

ISSUES OUTLINED

The railroad has said that all but 2,000 of its remaining 50,000 employees will be furloughed and the entire line from New York to St. Louis will be shut down.

The major issue is the farming out of repair work to other companies. The two unions claim this practice endangers the jobs of the employees they represent. The railroad says some repair work can be done more efficiently by outside companies.

Another big issue is job classification, or spelling out in the contract the exact duties of each employee.

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, our most distinguished living poet, Robert Frost, was born in San Francisco, Calif. He was named for the Confederate general, Robert E. Lee. And he was raised in Massachusetts.

The biographical summary of Mr. Frost, prepared by the Library of Congress, observes that "Robert disliked study and refused to read any book by himself until he was 12." Then came the first turning point in his life:

At Lawrence High School, however—

In Lawrence, Mass.—

he developed an enthusiasm for learning, and was graduated in 1892 as valedictorian and class poet.

We pause, in tribute to the unsung teachers of his formative years. In discovering and encouraging his genius, they fulfilled the inspiring traditions of their profession.

After a brief stay at Dartmouth College, Robert Frost returned to Lawrence. For the next few years he worked in the textile mills, tried newspaper reporting, and helped his mother in the management of a small private school. It was during this period that his first poem was accepted for publication by the New York Independent.

He married his high school sweetheart, and enrolled as a special student at Harvard, but later abandoned the academic career. In 1900 he moved to Derry, N.H., where he struggled to support his family as a poultry farmer, with ill success, until 1909. From 1906 until 1911 he taught English at Pinkerton Academy in Derry, and for the academic year 1911 and 1912 was teacher of psychology at the State normal school, Plymouth, N.H. In 1912, he decided to give up farming and teaching. Taking his wife and four children to England, he concentrated on developing the style and the insights that eventually "brought pleasure, comfort, inspiration, thoughtfulness, keener awareness of nature, and greater understanding of fellow human beings to thousands of people in all parts of the civilized world."

His first book of poems, "A Boy's Will," won the acclaim of critics and poets. It was followed by "North of Boston," which delighted and impressed many readers. In the New York Times book review of June 19, 1960, Winfield Townley Scott wrote:

Finally there has been his emergence as the most widely read poet of our time, read by highbrow and low; his establishment in the public consciousness as an ancient sage endowed almost with sainthood * * * an American institution right along with motherhood and the flag.

The lengthy list of honorary degrees and prizes awarded to Frost testify to his talent and his prestige. In 1959, he accepted an appointment as honorary consultant in the humanities of the Library of Congress, for a 3-year term.

Mr. Speaker, a civilization becomes immortal through the creations of its mind and spirit. The proud and brazen symbols of its material power crumbles in the dust of centuries, while the expression of its highest aspirations, become timeless.

So it was with Greece and Rome, and others before and since. Plato, Leonardo da Vinci, Shakespeare, Lincoln, Einstein, and many more; saints and poets, philosophers and scientists, they have opened up new frontiers for the human race in its restless search for truth.

In the United States today, thoughtful citizens are seeking to define our national purposes and objectives as if to rediscover something we once knew and have forgotten.

The age of affluence is not enough. We need modern prophets, with insight

imagination, wisdom, and courage, to illuminate the way for us. Men like Robert Frost "whom age cannot wither nor custom stale his infinite variety."

Today in the Congress, we take a minute's recess from ponderous matters to consider a small and simple bill. By the numbers, it is identified as S. 3439. It calls for a modest appropriation of $2,500. This small sum will enable the Bureau of the Mint to design and strike a gold medal which the President of the United States will then present to Robert Frost.

It will be a small token of gratitude that will pass unnoticed among the billions of dollars appropriated for defense and for other compelling material requirements. And yet, future generations in passing judgment on our times, may well conclude that this act coincided with the beginning of greatness for American civilization.

Robert Frost will cherish this honor in his own right. But he will derive much more satisfaction from the fact that he opened the way for others.

Robert Frost had the vision to see and to say that the United States would come of age when it granted national recognition to those who make outstanding contributions to the cultural development of our society.

For only the Nation that values and honors creative excellence is worthy of honor, itself.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

J. B. WHITE

The Clerk called the bill (S. 882) for the relief of heirs of J. B. White.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture is authorized and directed to convey by quitclaim deed, without consideration, to the heirs of J. B. White (living at the time of the death of the said J. B. White) all oil, gas, and other mineral rights which are held by the United States in lands conveyed by such heirs to the United States and described in the records of the office of the county court clerk of Powell County, Stanton, Kentucky, in deed book 31, pages 362–367, inclusive, such rights having been erroneously conveyed to the United States.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUBURN UNIVERSITY, AUBURN, ALA.

The clerk called the bill (S. 3759) authorizing the Secretary of Agriculture to convey certain lands to Auburn University, Auburn, Ala.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, subject to the provisions of section 2 of this Act, the Secretary of Agriculture is authorized to convey by quitclaim deed to Auburn University, a land-grant college located at Auburn, Alabama, all right, title, and interest in and to the following described tract of land which constitutes a portion of a forty-acre tract of land donated in 1939 to the United States by the Alabama Polytechnic Institute (now Auburn University), and which is essential to the planned immediate expansion of such university: Beginning at a point 336.1 feet north 0 degrees 57 minutes west of the southeast corner of section 25, township 19 north, range 25 east, Saint Stephens meridian in the city of Auburn, county of Lee, State of Alabama; thence continuing north 0 degrees 57 minutes west along the east boundary line of said section 25, 1,144.2 feet; thence south 89 degrees 40 minutes west 1,164.0 feet to the southeasterly margin of the Wire Road; thence south 36 degrees 15 minutes west along said margin of the Wire Road 126.8 feet; thence south 24 degrees 26 minutes east 780.0 feet; thence south 10 degrees 06 minutes west 328.0 feet; thence south 89 degrees 50 minutes east 938.9 feet to the point of beginning, containing 27 acres more or less.

SEC. 2. In consideration of the conveyance authorized by the first section of this Act, Auburn University shall lease to the Department of Agriculture forty-two acres of land, more or less, in the vicinity of such university suitable (as determined by the Secretary of Agriculture) for carrying on the same or similar type research now engaged in by the Department of Agriculture on lands to be conveyed pursuant to the first section of this Act. Any lease entered into pursuant to the provisions of this section shall run for a period of one year from the date of its execution by Auburn University, and shall contain an option in favor of the Department of Agriculture for its renewal for one or more periods, the total leasing period not to exceed 99 years.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LAND CONVEYANCE, BIBB COUNTY, GA.

The Clerk called the bill (H.R. 12503) to provide for the conveyance to Carolina Freight Carriers Corp., a corporation of the State of North Carolina, of certain lands and any improvements thereon located in Bibb County, Ga.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Commerce is directed to convey to Carolina Freight Carriers Corporation, a corporation of the State of North Carolina, at the fair market value, all the right, title, and interest of the United States in and to a certain rectangular parcel of land, situate in Bibb County, Georgia, measuring 15.1 feet by 21.4 feet, and hereinafter more particularly described together with any and all improvements thereon: *Provided,* That the consideration of and for said conveyance shall be limited to the fair market value of the land alone, the improvements having been inadvertently erected thereon by and at the sole expense of said Carolina Freight Carriers Corporation.

Said parcel of land to be conveyed is more particularly described as follows:

That portion of the right-of-way on project FAGS 252–A(1) Bibb County, Georgia, beginning on the northerly right-of-way line at station 28+00 and running thence in a southerly direction perpendicular to the right-of-way a distance of 15.1 feet to a point 84.9 feet from the center line of said project, which point is at the southerly end of the building located thereon; thence angle right running east a distance of 21.4 feet to a point at station 27+78.6, which is the easterly edge of the building located thereon; thence angle right running northerly a distance of 15.1 feet to the northerly right-of-way line of said project; thence angle right, running 21.4 feet to the point of beginning.

A plat delineating the property to be conveyed, bearing date of June 29, 1959, was prepared by and is of record in the Department of the Navy.

With the following committee amendments:

Page 1, line 3, strike out "Commerce" and insert "the Navy".

Page 1, line 7, strike out "situate" and insert "situated".

Page 2, line 14, strike out "east" and insert "west".

Page 2, line 16, strike out "easterly" and insert "westerly".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RELATING TO TIMBER RIGHTS OF IVAN H. McCORMACK

The Clerk called the joint resolution (S.J. Res. 9) to provide for the removal of a reservation of timber rights from a patent issued to Ivan H. McCormack.

There being no objection, the Clerk read the joint resolution, as follows:

Whereas the Act of August 23, 1935, authorized the conveyance of certain land in Oregon to Ivan H. McCormack; and

Whereas the patent conveying such land contained a reservation to the United States of the timber on such land; and

Whereas a field inspection by the Department of the Interior has revealed that no merchantable timber remains on such land: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the Act entitled "An Act for the relief of Ivan H. McCormack", approved August 23, 1935 (49 Stat. 2163), is amended by striking out "': *Provided further,* That the patent issued hereunder shall contain a reservation to the United States of the timber on the northeast quarter southwest quarter and the northwest quarter southeast quarter of said section 31, which timber shall remain subject to sale, and the proceeds thereof shall be credited to the 'Oregon and California land-grant fund' in accordance with the provisions of the Act of June 9, 1916 (39 Stat. L. 218)".

SEC. 2. The Secretary of the Interior shall execute and deliver to Clarence A. Sapp and Pearl E. Sapp of Philomath, Oregon, an appropriate written instrument which will effect with respect to the land conveyed under such Act the amendment made by the first section of this Act.

The joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONVEY TITLE TO CERTAIN LANDS IN IDAHO

The Clerk called the bill (H.R. 10586) to enable the Oregon Short Line Railroad Co. to convey title to certain lands in

Idaho to the Pocatello First Corp., of the Church of Jesus Christ of Latter-day Saints.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any provisions of the Act of September 1, 1888 (25 Stat. 452 and the following), relating to the ratification of an agreement between the United States and the Shoshone and Bannock Indians, or any other provision of law, no forfeiture or reversion to the United States or to any tribe or tribes of Indians shall take place by reason of any conveyance, quitclaim, or otherwise, made within one year after the date of enactment of this Act by the Oregon Short Line Railroad Company and/or the Union Pacific Railroad Company (corporations of the State of Utah), to the Pocatello First Corporation of the Church of Jesus Christ of Latter-day Saints (a corporation solely of the State of Idaho) of any or all right, title, or interests which such companies, or either of them, has or would have in and to the following described real property lying in Bannock County, State of Idaho:

An irregular tract of land situate in the northeast quarter of southwest quarter of section 35, township 6 south, range 34 east of the Boise meridian in the city of Pocatello, Bannock County, Idaho, bounded and described as follows:

Beginning at the northwest corner of said northeast quarter of southwest quarter of section 35; thence east along the east and west centerline of said section 35, a distance of 465.8 feet, more or less, to the southwesterly line of Grant Avenue in the city of Pocatello; thence southeasterly along the southeasterly extension of said southwesterly line of Grant Avenue, a distance of 643.5 feet; thence southwesterly, at right angles, a distance of 228.2 feet; thence west along a straight line parallel with said east and west centerline of section 35, a distance of 563.5 feet, more or less, to a point in the southeasterly extension of the northeasterly line of Lincoln Avenue; thence northwesterly along said extension of northeasterly line of Lincoln Avenue a distance of 229.0 feet, more or less, to a point in the west line of said northeast quarter of southwest quarter of section 35; thence north along the west line of said northeast quarter of southwest quarter a distance of 463.0 feet, more or less, to the point of beginning.

Containing an area of 10.0 acres, more or less.

SEC. 2. That said railroad companies are hereby authorized to quitclaim jointly or separately any or all interest they, or each of them, have in and to the above described property to said church, reserving, however, to themselves, their successors and assigns, an easement for any and all existing pipelines and pipeline right-of-way over, under, and across the premises hereinbefore described, and also reserving to said railroad companies the right to operate and maintain the same, and that the rights of forfeiture or reversion of all lands granted in said Act passed and approved September 1, 1888, be, and the same are in all respects, insofar as they pertain to the lands above described, including the easements and rights reserved, hereby revoked and held for naught.

SEC. 3. That upon said railroad companies, or either of them, conveyed by quitclaim deed, or otherwise, to such Pocatello First Corporation of the Church of Jesus Christ of Latter-day Saints pursuant to sections 1 and 2 of this Act, the lands described in section 1, the United States hereby waives, relinquishes, and quitclaims to said railroads, or either of them, all right, title, or interest which the United States may have in or to the easements and rights reserved by said railroad companies, or either of them, and waives, relinquishes, and quitclaims to said church all right, title, or interest which the United States may have in and to such lands, subject to the aforementioned reservations in favor of said railroads.

With the following committee amendments:

Page 1, lines 9 and 10, strike out the words "made within one year after the date of enactment of this Act".

Page 3, line 7, strike out the words "That said" and insert in lieu thereof "Said".

Page 3, line 15, strike out the word "that".

Page 3, line 17, strike out the words "be, and the same".

Page 3, line 21, strike out the words "That upon" and insert in lieu thereof "Upon".

Page 3, line 22, strike out the word "conveyed" and insert "conveying".

Page 4, after line 8, add a new section to read as follows:

"SEC. 4. The provisions of this Act shall be effective only upon payment to the United States within one year from the date of this Act of the present fair market value of the lands described in section 1 hereof except such part of said value as is attributable to improvements on said lands which were not placed thereon by the United States as determined by the Secretary of the Interior."

The committee amendments were agreed to.

Mr. HALEY. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HALEY: On page 3, line 17, after the date "September 1, 1888" strike out the word "be".

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER pro tempore. That concludes the call of the Private Calendar.

AMENDING THE ACCIDENTS REPORTS ACT

Mr. HARRIS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 1964) to amend the act requiring certain common carriers by railroad to make reports to the Interstate Commerce Commission with respect to certain accidents in order to clarify the requirements of such act.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the Act entitled "An Act requiring common carriers engaged in interstate and foreign commerce to make full reports of all accidents to the Interstate Commerce Commission, and authorizing investigations thereof by said Commission", approved May 6, 1910 (45 U.S.C., sec. 38), is amended to read as follows:

"It shall be the duty of the general manager, superintendent, or other proper officer of every common carrier engaged in interstate or foreign commerce by railroad to make to the Interstate Commerce Commission at its office in Washington, District of Columbia, a monthly report, under oath, of all collisions, derailments, or other accidents resulting in death or injury to any person sufficient to incapacitate such person from performing his regular work for 24 hours or more, or damage to equipment or roadbed arising from the operation of such railroad, which report shall state the nature and causes thereof and the circumstances connected therewith: *Provided,* That hereafter all said carriers shall be relieved from the duty of reporting accidents in their annual financial and operating reports made to the Commission."

SEC. 2. Section 5 of such Act of May 6, 1910 is amended to read as follows:

"SEC. 5. The Interstate Commerce Commission is authorized to prescribe such rules and regulations and such forms for making the reports hereinbefore provided as are necessary to implement and effectuate the purposes of this Act: *Provided, however,* That this shall not authorize the Commission to limit in any way reports required under this Act of all collisions, derailments, or other accidents resulting in injury to persons, equipment, or roadbed arising from the operation of such railroad as provided in section 1 of this Act."

SEC. 3. Section 7 of such Act of May 6, 1910, is amended (1) by inserting "(a)" after "SEC. 7.", and (2) by inserting at the end thereof a new subsection as follows:

"(b) The phrase 'arising from the operation of such railroad', as used in this Act, shall include all activities of the railroad which are related to the performance of its transportation business."

With the following committee amendments:

Page 1, line 9, strike out "It" and insert "That it".

Page 2, in lines 6, 7, and 8, strike out "sufficient to incapacitate such person from performing his regular work for 24 hours or more,"; and in line 8, after "roadbed" insert a comma.

Page 2, line 15, after "1910" and before the comma insert "(45 U.S.C., sec. 42)".

Page 2, line 21, strike out the colon and all that follows through the word "Act" in line 2 on page 3.

Page 3, line 3, after "1910" and before the comma insert "(45 U.S.C., sec. 43)".

Mr. GROSS. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, I do this merely to ask a question of the chairman of the committee. Is there any cost involved in this bill?

Mr. HARRIS. None at all.

Mr. GROSS. I thank the gentleman.

Mr. HARRIS. This bill has to do with reporting requirements by common carriers; that is, the railroads, of accidents. It was approved by the railroads, the Interstate Commerce Commission, the Railroad Retirement Board, the Railway Labor Executives Association, and everyone concerned.

Mr. GROSS. And there is no cost to the Federal Government?

Mr. HARRIS. No additional cost to the Federal Government at all by reason of this bill.

The SPEAKER pro tempore. The question is on the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GRANTS-IN-AID TO UNIVERSITIES, HOSPITALS, LABORATORIES, AND OTHER PUBLIC OR NONPROFIT INSTITUTIONS

Mr. HARRIS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 10341) to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, what, if any, will be the cost of this bill to the Federal Government?

Mr. HARRIS. Not any additional cost at all. This has to do with institutions which receive research grants under the present program. This authority would permit up to 15 percent of the allocations to be made to the institutions for allocation by the institutions instead of Federal Government making it directly to the individual.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 301(d) of the Public Health Service Act, as amended (42 U.S.C. 241(d)), is amended by adding after the semicolon at the end thereof "and make, upon recommendation of the National Advisory Health Council, grants-in-aid to public or nonprofit universities, hospitals, laboratories, and other institutions for the general support of their research and research training programs: *Provided,* That such uniform percentage, not to exceed 15 per centum, as the Surgeon General may determine, of the amounts provided for grants for research projects for any fiscal year through the appropriations for the National Institutes of Health may be transferred from such appropriations to a separate account to be available for such research and research training program grants-in-aid for such fiscal year;".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SECTION 4(a) OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED

Mr. HARRIS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 13066) to amend section 4(a) of the Securities Exchange Act of 1934, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the fourth sentence of subsection (a) of section 4 of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78(d)), is amended by adding ", except that the chairman shall receive additional salary at the rate of $500 a year" after "$20,000 a year".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks immediately prior to the passage of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. GROSS. Mr. Speaker, reserving the right to object, cannot the gentleman, without my having to get up each time, make a brief statement and say what his proposal is going to cost, if anything. I do not like to get up on all these bills, but I would like to know.

Mr. HARRIS. Mr. Speaker, I appreciate the gentleman's situation and I hope he appreciates mine. But I would have some hesitancy in reserving the right to object to my own request in order to make a statement.

Mr. GROSS. Very well, then, I will do it for the gentleman.

Mr. HARRIS. This will cost no more money than is now the case. We passed a bill a few days ago affecting the terms of office of the Chairman and other members of the Securities and Exchange Commission, but there was a little item overlooked. Under established procedure, under the Federal Executives Pay Act it is provided that the chairmen of these regulatory commissions would be paid $500 in salary more than the other commissioners. When we amended the bill, affecting their terms of office, in the last few days, we overlooked that and in fact reduced the chairman's salary by $500. This corrects the error.

Mr. GROSS. So there is some money involved in this bill. Why should the Chairman of the Securities and Exchange Commission have $500 more than the chairman of any other commission? Is not that the statement the gentleman just made?

Mr. HARRIS. The procedure was established many years ago, because of the extra duties required of the Chairman, and has been so recognized throughout the years, to do as I have stated.

Mr. GROSS. Let us get this straight. Does the gentleman say that he gets $500 more than the chairman of any other commission? That is, $500 more than the chairman of any other commission in Government?

Mr. HARRIS. No; $500 more than the members of that particular commission. The chairmen of other commissions receive $500 more than the members of their commission.

Mr. GROSS. I can understand that, but I thought the gentleman was saying the chairman of the Federal Securities and Exchange Commission got $500 more than the chairman of any other commission.

Mr. HARRIS. I did not intend to leave that impression.

Mr. GROSS. I thank the gentleman.

Mr. HOFFMAN of Michigan. Reserving the right to object, Mr. Speaker, the gentleman has been here a long, long time and is quite familiar with the procedure. Does the gentleman recall any instances over the years where we have had any of these equalization bills up where anyone's compensation has been reduced in order to equalize the compensation? Now, think hard. After due deliberation the gentleman cannot recall a single one.

Mr. HARRIS. After due deliberation, I cannot think of a single one.

Mr. HOFFMAN of Michigan. It seems to me that some time when we are on this equalization process we should reduce the whole outfit, to reduce this tendency toward inflation all the time.

The SPEAKER pro tempore. Without objection, the gentleman's request to extend his remarks is agreed to.

There was no objection.

TERMS OF OFFICE OF CERTAIN REGULATORY AGENCIES

Mr. HARRIS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 13067) to amend Public Law 86-619, an act to make uniform provisions of law with respect to the terms of office of the members of certain regulatory agencies, approved July 12, 1960.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. YOUNGER. Reserving the right to object, Mr. Speaker, I should like to have our distinguished chairman explain this bill.

Mr. HARRIS. Mr. Speaker, this is another bill to correct an error that was made when the House passed a bill extending the terms of office of members of the Federal Power Commission. We accepted an explanation of the provision. They sent it up here. The language was used at that time that the second sentence of the first section of the act was amended, and so forth, when in fact it should have been the second sentence of the second paragraph of the first section of the act. That is all this does, amend what we did before to correct an error.

Mr. YOUNGER. I thank the gentleman.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of Public Law 86-619 (74 Stat. 407), approved July 12, 1960, is amended by inserting "of the second paragraph" immediately following the word "sentence". As so amended, section 1 reads as follows:

"That the second sentence of the second paragraph of the first section of the Federal Power Act (16 U.S.C. 792) is amended to read as follows: 'Their successors shall be appointed each for a term of five years from the date of the expiration of the term for which his predecessor was appointed and until his successor is appointed and has qualified, except that he shall not so continue to serve beyond the expiration of the next session of Congress subsequent to the expiration of said fixed term of office, and

except that any person appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed only for the unexpired term.'"

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENSION OF SUGAR ACT

Mr. COOLEY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 13062) to extend the Sugar Act of 1948, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 412 of the Sugar Act of 1948 (relating to termination of the powers of the Secretary under the Act) is amended to read: "The powers vested in the Secretary under this Act shall terminate on December 31, 1961, except that the Secretary shall have power to make payments under title III under programs applicable to the crop year 1961 and previous crop years".

SEC. 2. Sections 4501(c) and 6412(d) (relating to the termination and refund of taxes on sugar) of the Internal Revenue Code of 1954 are amended by striking out "September 31, 1961" in each place it appears therein and inserting in lieu thereof "June 30, 1962".

SEC. 3. Section 408 of the Sugar Act of 1948, as amended (relating to suspension of quotas), is amended by striking out of subsection (b) "for the period ending March 31, 1961" and inserting "for the period ending December 31, 1961" and by striking out of subsection (b)(1) "for the balance of calendar year 1960 and for the three-month period ending March 31, 1961" and inserting "for the period ending December 31, 1961".

SEC. 4. Section 302(b) of the Sugar Act of 1948, as amended (relating to the establishment of proportionate shares for farms), is amended by striking out the period at the end of the first sentence and inserting a colon and the following: *"Provided,* That 75 per centum of any increase in proportionate shares in any area where restrictions are in effect for the 1961 crop year over the total of restricted proportionate shares established for such area in the preceding year, less any shares arising from the 1960 growth factor, shall be reserved for new producers.".

With the following committee amendments:

Page 2, line 2, strike out "31" and insert "30".

Page 2, following line 21, add following new section:

"SEC. 5. Subparagraph (iii) of subsection (b)(2) of section 408 of the Sugar Act of 1948, as amended, is amended—

"(a) by inserting after the word 'shall' the word 'next'; and

"(b) by striking out the proviso therein and inserting: '*Provided,* That if at any time after this Act goes into effect, collective economic sanctions against one or more of the countries from which purchases are to be made under the provisions of this subsection are agreed upon by and between the United States and other countries, pursuant to treaty, and effective specific actions to implement such sanctions are undertaken by a majority provided in the treaty of such other treaty signatories, the President may discontinue, in whole or in part, and for such periods of time as he may deem necessary, further purchases from such country or countries under this subsection to the extent that such further purchases are in excess of an amount equivalent to the amount established under section 202(c), except that for the calendar year 1960 unless such sanctions are agreed upon and implemented prior to October 15, 1960, no purchases under this subsection for 1960 may be discontinued or deferred and authorization for such purchases shall be made in time to permit shipment of the entire amount to be received in the United States prior to December 31, 1960: *And provided further,* That if amounts of sugar in addition to those purchased hereunder are required, the President may authorize the purchase of such amounts from any foreign countries, without regard to allocation, but with preference to those countries agreeing to purchase United States agricultural commodities;'."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time, and passed.

The title was amended so as to read: "A bill to amend the Sugar Act of 1948, as amended."

A motion to reconsider was laid on the table.

AMENDMENT OF TRUST INDENTURE ACT OF 1939

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 3771) to amend certain provisions of the Trust Indenture Act of 1939, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (c) of section 304 of the Trust Indenture Act of 1939, as amended, is amended to read as follows:

"(c) The Commission shall, on application by the issuer and after opportunity for hearing thereon, by order exempt from any one or more provisions of this title any security issued or proposed to be issued under any indenture under which, at the time such application is filed, securities referred to in paragraph (3) of subsection (a) of this section are outstanding or on January 1, 1959, such securities were outstanding, if and to the extent that the Commission finds that compliance with such provision or provisions, through the execution of a supplemental indenture or otherwise—

"(1) would require, by reason of the provisions of such indenture, or the provisions of any other indenture or agreement made prior to the enactment of this title, or the provisions of any applicable law, the consent of the holders of securities outstanding under any such indenture or agreement; or

"(2) would impose an undue burden on this issuer, having due regard to the public interest and the interests of investors."

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HARRIS. Mr. Speaker, I direct the attention of the Members of the House to the purpose of the bill S. 3771, as set forth in the report:

The amendment to the Trust Indenture Act of 1939 embodied in the bill (S. 3771) here being reported would extend the time within which certain applications for exemption from the act might be filed.

The Trust Indenture Act of 1939 requires that bonds, notes, debentures, and similar securities publicly offered for sale, except as specifically exempted by the act, be issued under an indenture which meets the requirements of the act and has been duly qualified with the Securities and Exchange Commission. The act requires the indenture to be qualified to designate standards of eligibility and qualification of the corporate trustee, to outlaw exculpatory provisions with respect to the liability of the indenture trustee, and to provide provisions by which the securities issued thereunder may be protected and enforced.

Section 304(c) of the Trust Indenture Act of 1939 presently permits the filing of an application for exemption from provisions of the act where the change in an indenture would require the consent of holders of securities outstanding under the indenture or would impose an undue burden on the issuer having due regard to the public interest and the protection of investors. However, this application may be filed only if there are outstanding at the time of filing securities which were outstanding prior to or within 6 months after August 3, 1939.

In anticipation of the fact that the opportunity to file application for exemption would some day expire, most companies have inserted such provisions of the act in their indenture to become effective when such old indenture securities are no longer outstanding. However, in some cases there was a delay in inserting such provisions so that there may be a period of time when such a company would be unable to do mortgage financing because of its inability to comply with certain provisions of the act under the standards of this provision.

In order to afford such companies an opportunity to bring their indentures fully into compliance with the act without undue hardship, the Commission proposes to amend such provision so as to extend the time of filing applications for exemption thereunder if securities were outstanding when the application is filed which were outstanding on January 1, 1959.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING SECTION 202(b), COMMUNICATIONS ACT OF 1934

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (S. 1740) to amend section 202(b) of the Communications Act of 1934 in order to expand

the Federal Communications Commission's regulatory authority under such section, with an amendment, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (b) of section 202 of the Communications Act of 1934 (47 U.S.C. 202(b)) is amended to read as follows:

"(b) Charges or services, whenever referred to in this Act, include charges for, or services in connection with, the use of communication facilities of common carriers in chain broadcasting or incidental to radio communication of any kind."

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Page 1, strike out lines 6 to 10, inclusive, and insert in lieu thereof the following:

"(b) Charges or services, whenever referred to in this Act, include charges for, or services in connection with, the use of common carrier lines of communication, whether derived from wire or radio facilities, in chain broadcasting or incidental to radio communication of any kind."

The committee amendment was agreed to.

Mr. FLYNT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. FLYNT. Mr. Speaker, the purpose of S. 1740 is clearly stated in the short and concise report—Report No. 2148—which accompanies this bill. It simply is an amendment to the scope of authority provision of the Federal Communications Act in the area of radio and wireless communications by common carrier facilities.

It is a provision which has been made necessary by recent technical electronic developments in the transmission of communications.

For example, until recent years, most communications were by means of wire facilities, and the regulations of charges, rates, and services were in some instances written in the light of technical developments as they were in 1930, 1940, or even 1950.

Today a substantial part of common carrier communications is accomplished by means of microwave facilities—a form of radio communications.

It is abundantly clear that such services and facilities are clearly within the purview of the Federal Communications Act, and the act should be amended accordingly.

Since the Communications Act of 1934 was enacted, increasing use has been made of point-to-point transmission as a substitute for wires in certain types of broadcasting—especially in network broadcasting.

Some common carriers are presently filing tariffs for the services of the type contemplated in this amending legislation.

In substance, S. 1740 takes a realistic look at technical developments and advances which have occurred since the enactment of the original language of this provision.

This legislation will make it very clear that the regulatory authority of the Commission extends to charges for the use of lines of communications which include use of radio facilities.

The language of the House amendment is clarifying language only. It does not change in any respect the purpose of the Senate bill. We believe that the House language clarifies the bill so as to more clearly reflect legislative intent.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

AMENDING FEDERAL AVIATION ACT OF 1958

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (S. 1545) to amend the Federal Aviation Act of 1958 so as to authorize elimination of a hearing in certain cases under section 408, with an amendment, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

Mr. YOUNGER. Mr. Speaker, reserving the right to object, may I ask the chairman for an explanation of the bill?

Mr. HARRIS. Mr. Speaker, I yield to the chairman of the subcommittee, the gentleman from Mississippi [Mr. WILLIAMS] who will give a brief explanation of the bill.

Mr. WILLIAMS. Mr. Speaker, the purpose of this legislation is to eliminate certain nonessential hearings presently required by the Federal Aviation Act of 1958. It is part of the legislative program of the Civil Aeronautics Board. The Committee knows of no opposition to the proposal.

Enactment of this legislation would permit the Civil Aeronautics Board to eliminate the mandatory requirement of a hearing under section 408(b) of the Federal Aviation Act of 1958 in cases involving relatively simple transactions which cannot affect the control of a direct air carrier or create a monopoly, or tend to restrain competition. The bill requires that in such cases the Board would first have to determine that the public interest does not require a hearing and that no person disclosing a substantial interest has requested a hearing. Furthermore, notice of its intention to act without a hearing would have to be given by the Board through publication in the Federal Register with a copy of such notice sent to the Attorney General.

The need for the legislation arises from the fact that under section 408(b) of the Federal Aviation Act of 1958, the Board may not grant its approval of certain acts without first conducting a hearing. The acts referred to in section 408(a) may be generally classified as those tending to bring about a consolidation or merger of properties or acquisition of control of any air carrier, by another air carrier, common carrier, or person engaged in any phase of aeronautics. Among other things, they relate to the purchase, lease, or contract to operate the properties, or any substantial part thereof, of any air carrier as well as other conduct to bring about a merger or consolidation of air-carrier properties. Since the chief purpose of this section of the act is to prohibit the acquisition of control of one air carrier by another carrier, without specific Board approval, which requires both an application and a formal hearing, the majority of cases coming within its purview involve transactions which substantially affect the public interest and the mandatory hearing requirement should be and is retained with respect to them.

However, experience has shown that in many other cases a hearing required under section 408(b) serves no useful purpose. These are cases involving relatively simple transactions which by reason of their limited nature, first, cannot conceivably affect the control of a direct air carrier or result in creating a monopoly, restrain competition, or jeopardize another air carrier not a party to the transactions; second, do not involve an objection by any party having a substantial interest in the transactions involved; and, third, where a hearing would provide no further significant information concerning the transactions.

One example of such a transaction is the purchase or lease of a limited number of aircraft—often only one aircraft and seldom more than three—where it appears that the transaction will prove beneficial to both parties and the public and where no person not a party to the transaction is concerned with it. Another example is a transaction directly affecting only a small airfreight forwarder, where the public interest in the case is insignificant.

In cases such as these where a hearing serves no useful purpose and no interested person requests a hearing, the committee feels the Board should have authority to act on the matter without a hearing. Congress has granted authority similar to that being here requested to the Interstate Commerce Commission—section 5 of the Interstate Commerce Act—and to the Federal Communications Commission—section 221 of the Communications Act of 1934, as amended by the act of August 2, 1956.

The Board's action would be subject to court review, so that interested parties would be protected against arbitrary action.

Mr. YOUNGER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 408(b) of the Federal Aviation Act of 1958 be amended by striking the period at the end thereof, inserting a colon in lieu thereof, and adding the following proviso: *"Provided*

further, That in cases involving relatively simple transactions which do not affect the control of a direct air carrier, or result in creating a monopoly, or tend to restrain competition and where no person disclosing a substantial interest requests a hearing, the Board, after notice published in the Federal Register, copy of which shall be forwarded to the Attorney General, may determine that a hearing is not required in the public interest and may by order approve or disapprove the transaction which is the subject of the application."

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Strike out all after the enacting clause and insert the following: "That section 408(b) of the Federal Aviation Act of 1958 (49 U.S.C., sec. 1378(b)) is amended by inserting immediately before the period at the end thereof a colon and the following: '*Provided further*, That in any case in which the Board determines that the transaction which is the subject of the application does not affect the control of an air carrier directly engaged in the operation of aircraft in air transportation, does not result in creating a monopoly, and does not tend to restrain competition, and determines that no person disclosing a substantial interest then currently is requesting a hearing, the Board, after publication in the Federal Register of notice of the Board's intention to dispose of such application without a hearing (a copy of which notice shall be furnished by the Board to the Attorney General not later than the day following the date of such publication), may determine that the public interest does not require a hearing and by order approve or disapprove such transaction.'

"SEC. 2. The amendment made by the first section of this Act shall apply only with respect to applications submitted to the Civil Aeronautics Board on or after the date of enactment of this Act."

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

AMENDING CERTAIN PROVISIONS OF INVESTMENT COMPANY ACT OF 1940

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 2481) to amend certain provisions of the Investment Company Act of 1940, as amended, with amendments thereto, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. YOUNGER. Mr. Speaker, reserving the right to object, I ask the chairman to give us an explanation of this bill.

Mr. HARRIS. Mr. Speaker, I yield to the gentleman from Illinois, the chairman of the subcommittee [Mr. MACK].

Mr. MACK. Mr. Speaker, these are amendments to the Investment Company Act which have been recommended by the Securities and Exchange Commission. This is part of the legislative program of the Securities and Exchange Commission. It is the first amendment since 1940. Briefly, the proposed amendment would require a statement of policy of a registered investment company, which cannot be changed without the consent or approval of the holders of a majority of the voting securities, to include its fundamental investment objectives and investment characteristics. It would also strengthened the statutory provisions requiring that at least 40 percent of the members of the board of directors be persons who have no pecuniary interest in the operations and management of the investment company and who are not part of its operating staff. It would require that if an investment company chooses to keep its securities and investments in the custody of a bank such custodianship shall include the cash assets of the investment company; impose limitations upon the proportion of common or preferred stock that may be acquired by face amount certificate companies issuing fixed obligations—face amount certificates—to prevent such obligations from becoming unduly speculative; clarify certain exceptions to the definition of an investment company; required to register under the act; and clarify the terms "depositor" and "share of stock" used in the statute by adding specific definitions of these terms.

Mr. YOUNGER. Is it not true that the main function of this piece of legislation is to strengthen the hands of the SEC in administering the act? It is a stronger act than it was before?

Mr. MACK. The gentleman is entirely correct. There was some opposition from the Investment Company Association to the provisions which strengthen the act to give more control over the operation of the investment company. As the gentleman knows, this has become a tremendous business in the last 4 or 5 years, and there are tremendous sums being invested by the public each year.

Mr. GROSS. Mr. Speaker, will the gentleman yield for a question?

Mr. MACK. I yield.

Mr. GROSS. Is it my understanding that all of these bills from your committee were unanimously approved by the committee?

Mr. MACK. I would like to say that they were all reported unanimously by my subcommittee, and the full committee.

Mr. HARRIS. This bill and other bills were reported by the full committee unanimously.

Mr. GROSS. I do not know whether I am an exception in the House or not, but I had no previous notice or I saw no previous notice that any of these bills were coming up. We are taking this list of bills on faith. I hope we have not made any mistakes along the way. I saw no previous notice that the gentleman was going to bring up a series of bills such as this. Perhaps it is all right.

Mr. HARRIS. I might say to the gentleman that these bills are all bills that have been before us a long time. They are needed and are necessary. There has been some difficulty in working them out satisfactorily to everybody, with full protection of the public interest. We had five bills that the SEC requested. We are bringing up three of them. We are not bringing up the other two because there are differences of opinion, but these will strengthen the hands of the Commission in the administration of these acts and in doing their duty and carrying out their responsibilities.

Mr. GROSS. I would hope that next year some prior notice be given to Members of the House that you are going to call up a series of bills such as you have, so that we might have some opportunity to look them over.

Mr. HARRIS. I might say to the gentleman I worked this out yesterday; we finally worked it out and both sides agreed yesterday afternoon. I did not have any further opportunity. The gentleman knows what the situation is around here with reference to adjournment. That is the reason for this action today. I appreciate the confidence the gentleman from Iowa has in our committee and I will try never to do anything to destroy the confidence the gentleman has reposed in us.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (1) of subsection (a) of section 2 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(1) 'Advisory board' means a board, committee, or group, whether elected or appointed, which is distinct from the board of directors or board of trustees, of an investment company, whether or not the functions of such board are such as to render its members 'directors' within the definition of that term, which board has advisory functions as to investments but has no power to determine that any security or other investment shall be purchased or sold by such company, but shall not include a board, committee, or group composed solely of directors, officers, and employees of such company and investment advisers and officers, directors, partners, or employees of any investment adviser of such company, or any of them."

SEC. 2. Paragraph (11) of subsection (a) of section 2 of the Investment Company Act of 1940, as amended, is amended by adding the following new paragraph:

"(11A) 'Depositor' means any person who has promoted or is promoting an investment company not having a board of directors, or his successor, or who has administrative functions relating to such company, including the power to eliminate or substitute portfolio securities under the instrument of organization of such company but does not include a person whose functions as a depositor have been assumed by a successor, or a trustee or custodian of such company designated in accordance with the provisions of Section 26 of this title."

SEC. 3. Paragraph (35) of subsection of section 2 of the Investment Company Act of 1940, as amended, is amended by adding the following new paragraph:

"(35A) 'Share of stock' means any security similar in nature to an equity security."

SEC. 4. Paragraph (37) of subsection (a) of section 2 of the Investment Company Act of 1940, as amended, is amended by striking out "Alaska," and "the Philippine Islands,".

SEC. 5. Paragraph (7) of subsection (c) of section 3 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(7) Any company substantially all of whose business, directly or through majority-owned subsidiaries, consists of one or

more of the businesses described in paragraphs (3), (5), and (6), or one or more of such businesses (from which not less than 25 per centum of such company's gross income during its last fiscal year was derived) together with an additional business or businesses other than investing, reinvesting, owning, holding, or trading in securities: *Provided,* That if such company or any majority-owned subsidiary is engaged in one or more of the businesses described in paragraph (6), such company or subsidiary is not engaged in the business of issuing face-amount certificates of the installment type or periodic payment plan certificates."

SEC. 6. Paragraph (8) of subsection (c) of section 3 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(8) Any company 90 per centum or more of the value of whose investment securities are represented by securities of a single issuer included within a class of persons enumerated in paragraphs (3), (5), (6), or (7), which issuer is controlled by such company within the meaning of section 2(a)(9)."

SEC. 7. Subsection (c)(9) of section 3 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(9) Any company (A) which is subject to regulation under the Interstate Commerce Act: *Provided,* That this exception shall not apply to a company which the Commission finds and by order declares to be primarily engaged, directly or indirectly, in the business of investing, reinvesting, owning, holding, or trading in securities; or (B) whose entire outstanding stock is owned or controlled by a company excepted under clause (A) hereof: *Provided,* That the assets of the controlled company consist substantially of securities issued by companies which are subject to regulation under the Interstate Commerce Act

SEC. 8. Paragraph (10) of subsection (c) of section 3 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(10) Any company with a registration in effect as a holding company under the Public Utility Holding Company Act of 1935: *Provided,* That such registered company has not been exempted pursuant to section 3 of that Act."

SEC. 9. Paragraph (13) of subsection (c) of section 3 of the Investment Company Act of 1940, as amended, is amended by striking out "conditions of section 165 of the Internal Revenue Code, as amended" and inserting in lieu thereof "requirements of section 401 of the Internal Revenue Code of 1954, as amended."

SEC. 10. Paragraph (1) of subsection (b) of section 5 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(1) 'Diversified company' means a management company which meets the following requirements: At least 75 per centum of the value of its total assets is represented by cash and cash items (including receivables), Government securities, securities of other diversified investment companies, and other securities for the purposes of this calculation limited in respect of any one issuer to an amount not greater in value than 5 per centum of the value of the total assets of such management company and to not more than 10 per centum of the outstanding voting securities of such issuer."

SEC. 11. Paragraph (1) of subsection (a) of section 6 of the Investment Company Act of 1940, as amended, is amended by striking out "Alaska," and "the Philippine Islands,".

SEC. 12. Paragraph (2) of subsection (b) of section 8 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(2) a recital of the investment policy of the registrant, which may, if it desires, make appropriate reservations of freedom of action for the protection of investors, in respect of (A) the extent to which it intends generally to invest in bonds or other obligations, preferred stocks, common stocks, or any one or more of any class or type of securities; (B) objectives as to income, preservation of capital or capital appreciation, if registrant represents that it will place emphasis on any one or more of such objectives; (C) the extent of investments to be made in issuers operating in particular geographical areas, if registrant represents that its investments will be so limited; (D) investment in companies for the purpose of exercising control or management; and (E) matters, not enumerated above or in paragraph (1), which the registrant deems matters of fundamental policy and elects to treat as such;".

SEC. 13. Subsection (a) of section 10 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"SEC. 10. (a) After one year from the effective date of this title, no registered investment company shall have a board of directors more than 60 per centum of the members of which are persons who are investment advisers of, affiliated persons or stockholders of any investment adviser of, or officers of employees of, such registered company or who are principal underwriters of, or persons controlling such registered company, investment adviser or underwriter, or affiliated persons of such underwriters or affiliated persons (other than solely as directors) of controlling or controlled persons of such registered company, investment adviser or underwriter, or shall have a board of directors more than 80 per centum of the members of which are the persons mentioned above and regular brokers of the company or affiliated persons of such brokers."

SEC. 14. Subsection (f) of section 10 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(f) No registered investment company shall knowingly purchase or otherwise acquire, during the existence of any underwriting or selling syndicate, any security (except a security of which such company is the issuer) a principal underwriter of which is an officer, director, member of an advisory board, investment adviser, or employee of such registered company, or is a person (other than a company of the character described in section 12(d)(3) (A) and (B), voting securities of which are owned by such registered company) of which any such officer, director, member of an advisory board, investment adviser, or employee is an affiliated person, unless in acquiring such security such registered company is itself acting as a principal underwriter for the issuer. The Commission, by rules and regulations upon its own motion or by order upon application may conditionally or unconditionally exempt any transaction or classes of transactions from any of the provisions of this subsection, if and to the extent that such exemption is consistent with the protection of investors."

SEC. 15. Subsection (h) of section 10 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(h) In the case of a registered management company which is an unincorporated company not having a board of directors, the provisions of this section shall apply as follows:

"(1) the provisions of subsection (a), as modified by subsection (e), shall apply to the board of directors of the depositor of such company: *Provided,* That where the depositor acts as investment adviser to such company, a person who is an affiliated person of the depositor only by reason of being a director thereof shall not thereby be considered to be an affiliated person of an investment adviser of such company for the purposes of this subsection;

"(2) the provisions of subsections (b) and (c), as modified by subsection (e), shall apply to the board of directors of the depositor and of every investment adviser of such company: *Provided,* That where the depositor acts as a principal underwriter of securities issued by such company, a person who is an affiliated person of the depositor only by reason of being a director thereof shall not thereby be considered to be an affiliated person of a principal underwriter of such company for the purposes of this subsection; and

"(3) the provisions of subsection (f) shall apply to purchases and other acquisitions for the account of such company of securities a principal underwriter of which is the depositor or an investment adviser of such company, or an affiliated person of such depositor or investment adviser."

SEC. 16. Paragraph (3) of subsection (a) of section 13 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(3) Deviate from its policy in respect of concentration of investments in any particular industry or group of industries as recited in its registration statement, or deviate from any investment policy or any other fundamental policy recited in its registration statement pursuant to section 8(b)(2); or"

SEC. 17. Subsection (a) of section 17 of the Investment Company Act of 1940, as amended, is amended by striking out the clause: "(other than a company of the character described in section 12(d)(3) (A) and (B))."

SEC. 18. Subsection (c) of section 17 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(c) Notwithstanding subsection (a)—

"(1) a person may, in the ordinary course of business sell to or purchase from any company merchandise or may enter into a lessor-lease relationship with any person and furnish the services incident thereto;

"(2) a company described in section 12(d)(3) (A) and (B) may purchase from and sell securities or other property to the registered investment company or companies which own its voting securities or may borrow money or other property from such registered company or companies."

SEC. 19. Subsection (d) of section 17 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(d) It shall be unlawful for any affiliated person of or principal underwriter for a registered investment company, or any affiliated person of such a person or principal underwriter, acting as principal to effect any transaction in which such registered company, or a company controlled by such registered company, is a joint or a joint and several participant with such person, principal underwriter, or affiliated person, in contravention of such rules and regulations as the Commission may prescribe for the purpose of limiting or preventing participation by such registered or controlled company on a basis different from or less advantageous than that of such other participant. Nothing contained in this subsection shall be deemed to preclude any affiliated person from acting as manager of any underwriting syndicate or other group in which such registered or controlled company is a participant and receiving compensation therefor; nor shall it preclude a company described in section 12(d)(3) (A) and (B) from effecting any transaction because of the joint or joint and several participation of the registered investment company or companies which own its voting securities."

SEC. 20. Subsection (f) of section 17 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(f) Every registered management company shall place and maintain its securities and similar investment in the custody of (1) a bank or banks having the qualifications prescribed in paragraph (1) of section 26(a) for the trustees of unit investment trusts; or (2) a company which is a member of a national securities exchange as defined

in the Securities Exchange Act of 1934, subject to such rules and regulations as the Commission may from time to time prescribe for the protection of investors; or (3) such registered company, but only in accordance with such rules and regulations or orders as the Commission may from time to time prescribe for the protection of investors. Rules, regulations, and orders of the Commission under this subsection, among other things, may make appropriate provision with respect to such matters as the earmarking, segregation, and hypothecation of such securities and investments, and may provide for or require periodic or other inspections by any or all of the following: Independent public accountants, employees, and agents of the Commission, and such other persons as the Commission may designate. *No* such member which trades in securities for its own account may act as custodian except in accordance with rules and regulations prescribed by the Commission for the protection of investors. If a registered company maintains its securities and similar investments in the custody of a qualified bank or banks, the cash proceeds from the sale of such securities and similar investments and other cash assets of the company shall likewise be kept in the custody of such a bank or banks: *Provided,* That such a registered company may maintain an operating account in a qualified bank or banks which the balance of such account or the aggregate balances of such accounts at no time in excess of the amount of the fidelity bond, pursuant to section 17(g) of the Act, covering the officers or employees authorized to draw on such account or accounts."

SEC. 21. Paragraph (2) of subsection (f) of section 18 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(2) 'Senior security' shall not, in the case of a registered open-end company, include a class or classes or a number of series of preferred or special stock each of which is preferred over all other classes or series in respect of assets specifically allocated to that class or series: *Provided,* (A) that such company has outstanding no class or series of stock which is not so preferred over all other classes or series; or (B) that the only other outstanding class of the issuer's stock consists of a common stock upon which no dividend (other than a liquidating dividend) is permitted to be paid and which in the aggregate represents not more than one-half of 1 per centum of the issuer's outstanding voting securities; and (C) that such company files a recital of policy in respect of each class or series in accordance with the provisions of section 8(b) (1) and (2) of this title. Notwithstanding the provisions of section 13(a), a change or deviation in policy in respect of any class or series of preferred or special stock shall be authorized solely by the vote of the holders of a majority of the stock of each such class or series."

SEC. 22. Subsection (d) of section 20 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(d) If on the effective date of this title cross-ownership or circular ownership exists between a registered investment company and any other company or companies, it shall be the duty of such registered company, within five years after such effective date, to eliminate such cross-ownership or circular ownership. If at any time after the effective date of this title cross-ownership or circular ownership between a registered investment company and any other company or companies comes into existence upon the purchase by a registered investment company of the securities of another company or upon the purchase by a company controlled by the registered investment company of the securities of such registered company or another company, it shall be the duty to such registered company, within one year after it first knows of the existence of such cross-ownership or circular ownership, to eliminate the same."

SEC. 23. Subsection (b) of section 23 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(b) No registered closed-end company shall sell any common stock of which it is the issuer at a price below the current net asset value of such stock, exclusive of any distributing commission or discount (which net asset value shall be determined as of a time within forty-eight hours, excluding Sundays and holidays, next preceding the time of such determination), except (1) in connection with an offering to the holders of one or more classes of its capital stock; (2) with the consent of the holders of a majority of its common stock; (3) upon conversion of a convertible security in accordance with its terms; (4) upon the exercise of any warrant outstanding on the date of enactment of this Act or issued in accordance with the provisions of section 18(d); or (5) under such other circumstances as the Commission may permit by rules and regulations or orders for the protection of investors."

SEC. 24. Subsection (b) of section 28 of the Investment Company Act of 1940, as amended, is amended to read as follows:

"(b)(1) It shall be unlawful for any registered face-amount certificate company to issue or sell any face-amount certificate, or to collect or accept any payment on any such certificate issued by such company on or after the effective date of this title, unless such company has, in cash or qualified investments, assets having a value not less than the aggregate amount of the capital stock requirement and certificate reserves as computed under the provisions of subsection (a) hereof. As used in this subsection, 'qualified investments' means investments of a kind which life insurance companies are permitted to invest in or hold under the provisions of the Code of the District of Columbia as heretofore or hereafter amended, and such other investments as the Commission shall by rule, regulation, or order authorize as qualified investments. Such investments shall be valued in accordance with the provisions of said code where such provisions are applicable. Investments to which such provisions do not apply shall be valued in accordance with such rules, regulations, or orders as the Commission shall prescribe for the protection of investors.

"(2) The assets which such company is required to have under paragraph (1) of this subsection in an amount equal to the certificate reserves required under subsection (a) hereof shall not include at any time:

"(A) preferred stocks, or similar senior securities which are stocks, in an amount more than 25 per centum of the certificate reserves; and

"(B) common stocks, or similar equity securities, in an amount more than the aggregate of

"(i) 10 per centum of the certificate reserves; plus

"(ii) an amount equal to 100 per centum of that portion of the stockholders' equity in the company which is represented by assets consisting of cash or qualified investments; plus

"(iii) an amount equal to 100 per centum of that portion of the stockholders' equity in the company which is represented by assets consisting of cash, or qualified investments other than common stocks or similar equity securities;

Provided, however, That where the company has outstanding separate series of certificates and the assets applicable to the reserve requirements of one or more of such series are maintained separately, then the limitations in (A) and (B)(i) above shall be computed separately on the basis of the required certificate reserves for the outstanding certificates in each series or group of series for which assets are maintained separately; and the permissible amounts computed pursuant to the limitations stated in (B)(ii) and (B)(iii) above shall be allocated in accordance with the company's discretion but in no event shall the aggregate amount of common stocks, or similar equity securities, exceed 30 per centum of the required assets for each series or group of series for which assets are maintained separately. There shall be no limitation as to the type of securities in which assets in an amount equal to the minimum capital stock requirement are invested, other than the requirement of paragraph (1) of this subsection as to qualified investments. As used in this subsection 'stockholders' equity' means the amount of the company's assets less the amount of the indebtedness of the company and its certificate and other reserves."

SEC. 25. Subsection (a) of section 43 of the Investment Company Act of 1940, as amended, is amended by striking out "sections 239 and 240 of the Judicial Code, as amended" and inserting in lieu thereof "section 1254 of title 28, United States Code."

SEC. 26. Section 44 of the Investment Company Act of 1940, as amended, is amended by striking out "sections 128 and 240 of the Judicial Code, as amended, and section 7, as amended, of the Act entitled 'An Act to establish a court of appeals for the District of Columbia', approved February 9, 1893", and inserting in lieu thereof "sections 1254, 1291, 1292, and 1293 of title 28, United States Code."

SEC. 27. This Act shall become effective upon its enactment: *Provided, however,* That, as to companies which were registered prior to that time, the effective date of the amendments to sections 5, 8(b)(2), and 18(f)(2) shall be six months thereafter. The provisions of section 28(b)(2) shall not apply to any series or group of series of face-amount certificates which were registered under the Securities Act of 1933 prior to the enactment of section 28(b)(2) in any case where the registered face-amount certificate company has outstanding separate series of face-amount certificates and the assets applicable to the reserve requirements of such series are maintained separately.

The SPEAKER. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: Page 1, strike out line 3 and all that follows down through line 7 on page 2.

Page 2, line 8, strike out "SEC. 2. Paragraph (11) of" and insert "That".

Page 2, line 10, strike out "adding" and insert: "inserting immediately after paragraph (11) thereof".

Page 2, line 21, strike out "3" and insert "2".

Page 2, line 21, strike out "Paragraph (35) of subsection" and insert "Subsection (a)".

Page 2, line 23, strike out "adding" and insert "inserting immediately after paragraph (35) thereof".

Page 3, line 1, strike out "4" and insert "3".

Page 3, line 5, strike out "5" and insert "4".

Page 3, line 21, strike out "6" and insert "5".

Page 4, strike out lines 5 to 18, inclusive.

Page 4, line 19, strike out "8" and insert "6".

Page 5, line 1, strike out "9" and insert "7".

Page 5, line 7, strike out "10" and insert "8".

Page 5, line 21, strike out "11" and insert "9".

Page 5, line 23, strike out "'Alaska,' and".

Page 5, line 25, strike out "12" and insert "10".

Page 6, line 20, strike out "13" and insert "11".

Page 7, line 13, strike out "14" and insert "12".

Page 8, line 19, strike out "15" and insert "13".

Page 9, line 19, strike out "16" and insert "14".

Page 9, strike out line 22 and all that follows down through line 5 on page 10, and insert the following:

"(3) deviate from its policy in respect of concentration of investments in any particular industry or group of industries as recited in its registration statement, or deviate from any investment policy or any other fundamental policy recited in its registration statement pursuant to section 8(b)(2); or".

Page 10, line 6, strike out "17" and insert "15".

Page 10, line 9, strike out "(B))." and insert "(B)),."

Page 10, line 10, strike out "18" and insert "16".

Page 10, line 17, after "thereto;" insert "and".

Page 10, line 24, strike out "19" and insert "17".

Page 11, line 24, strike out "20" and insert "18".

Page 13, line 12, strike out "21" and insert "19".

Page 14, line 9, insert quotation marks after "series."

Page 14, line 10, strike out "22" and insert "20".

Page 15, line 4, strike out "23" and insert "21".

Page 15, line 23, strike out "24" and insert "22".

Page 18, line 12, strike out "25" and insert "23".

Page 18, line 16, strike out "Code." and insert "Code'."

Page 18, line 17, strike out "26" and insert "24".

Page 18, line 23, strike out "Code." and insert "Code'."

Page 18, line 24, strike out "27" and insert "25".

Mr. WALTER. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALTER:

After line 20 insert the following new section and renumber sections 23, 24, and 25 as sections 24, 25, and 26, respectively:

"SEC. 23. Section 36 of the Investment Company Act of 1940, as amended, is amended to renumber section 36 as section 36(a) and to add the following new subsections as sections 36 (b), (c), and (d):

"'SEC. 36. (b) Whenever the board of directors of a registered investment company, or the investment adviser or principal underwriter for a registered investment company, so requests, any person who is or has been a director, officer, agent, or employee of said registered investment company or investment adviser shall file within 30 days after service of said request a written statement with the secretary for the board of directors making the request in which shall be set forth—

"'(1) the names, amounts, prices, and dates of acquisition, purchase, and sale of all securities and other investments directly and indirectly acquired or purchased by said director, officer, agent, and employee, including members of said person's family, and by any person controlled by said director, officer, agent, and employee, during the period of time said person was or has been a director, officer, agent, or employee;

"'(2) the dates of, and proceeds and consideration received from, the sale or other disposition of said securities and investments and, if not sold on a national securities exchange, the name and address of the person acquiring or purchasing the said securities and investments;

"'(3) a list of all loans and any other transaction and business deal by said director, officer, employee, and person with—

"'(a) each bank and broker that during said period has acted as a custodian, depository, bank, agent, or broker for said registered investment company; and

"'(b) any company in which said registered investment company owns or owned during said period any security.

Said statement and any supplement thereto filed within thirty days after said supplement has been requested shall include a statement of any material facts and a copy of any document, paper, and other writing respecting said loan, transaction, and deal that may be requested.

"'Said statement shall also have attached thereto an affidavit stating that it is a true and complete answer to the best of affiant's knowledge, information, and belief to the request in question.

"'(c) Whenever any director, officer, agent, or employee of a registered investment company has filed a statement pursuant to the above subsection, the board of directors of any registered investment company, or investment adviser, or principal underwriter for a registered invest-

possession relevant to the acts in question. Said bank, broker, agent, or other person shall comply with said request no later than thirty days after service upon it of said request in writing.

"'(d) Any court of competent jurisdiction in which is filed a complaint alleging a violation of any provision of this section or of sections 17, 21, 34, 37 or 48 of this title, or of sections 9, 10 or 16 of the Securities Exchange Act of 1934, or sections 10, 12 or 17 of the Securities Act of 1933, shall, if the facts alleged therein are shown to be supported by substantial evidence, preliminarily and permanently enjoin any director or officer or other person found to have violated any of the aforesaid provisions from serving as a director or officer or controlling person in his own right or in association with others of any registered investment company, investment adviser, or principal underwriter for a registered investment company, or of any company or other person controlling any registered investment company or any investment adviser or principal underwriter for a registered investment company and from performing any act, including voting for or electing any director or officer of such a company, in furtherance of the acquisition, exercise or maintenance of such control by any other person. Such court shall also, if requested, require said director or officer and any associated person to account to the registered investment company for all profits made by said director or officer, and for all losses incurred by said company resulting from any of the aforesaid acts.'"

Mr. WALTER (interrupting the reading). Mr. Speaker, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, this amendment is intended to give to the management of investment companies the power to put their own house in order. The amendment does this: It permits the directors of an investment company, after board action, to request any of the officers, directors, agents, or employees of the investment company to furnish the board of directors with a detailed account of their dealings.

There is provision for 30-day notice, and if there is failure to comply with this request, after the 30-day period, then the corporation is authorized to go into the appropriate court and seek an injunction restraining the member of the board or the officer of the corporation from continuing to function as a member of the board of directors or as an officer.

It certainly seems to me that the Securities and Exchange Commission ought not to oppose an amendment of this sort. Its sole purpose is to enable the board, which today is absolutely powerless to do anything about it, to compel people, if they believe those people are dealing improperly in securities, to make a full disclosure of what their financial transactions are; that is, any transactions which might be against the best interests of the company by which they are being employed.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Arkansas.

Mr. HARRIS. The gentleman has been very kind to discuss his amendments with me. As the gentleman knows, I have expressed a great deal of sympathy; certainly I am solicitous with what he is trying to do.

The thing that causes me to hesitate at this particular time in agreeing to an amendment of this kind is that I, as chairman of the committee, happen to know that had the gentleman's amendment been debated in the committee we would not have been able to get this bill up by unanimous consent, because there was some opposition within the committee. To now agree to the gentleman's amendment at this point, knowing that kind of situation, seems to me to be not the way to handle the situation. I recognize that from the gentleman's standpoint it is important that he get what he would like to have adopted, but I feel that as chairman I owe an obligation to the members of the committee in bringing up legislation under unanimous consent not to agree to amendments such as the gentleman offers when I know there would have been objection to it by some members of the committee. Therefore, reluctant as I am, I have to oppose the amendment offered by the gentleman from Pennsylvania.

Mr. WALTER. I cannot understand why anybody would object to this amendment, particularly in view of the fact that the Securities and Exchange Commission has hinted that there are serious abuses of trust by investment company managers in the administration of these huge funds.

As the gentleman knows, members of the board of directors may be more aware of improper conduct of other members or officers than the Securities and Exchange Commission could be. These abuses of trust are not brought to the attention of the Securities and Exchange Commission. Under existing law the members of the board of directors are powerless to require a person whom they have any reason to believe is not conducting himself properly, to make a full disclosure of his financial transactions.

Mr. HARRIS. I well understand what the gentleman is saying is an actual fact. As I say, I have great sympathy for the amendment and very likely under normal conditions I would be in support of it. But the gentleman introduced this bill about a week ago?

Mr. WALTER. I introduced it at about the time the gentleman indicated he was going to take up bills of this sort.

Mr. HARRIS. That is the first time we have had it called to our attention. We have been unable to hold hearings and develop a record on it. If the House wants to adopt it today, of course, that is the prerogative of the House, but, under the circumstances, I am going to have to oppose the amendment. The gentleman understands the reason for it. If it is not adopted, I assure the gentleman if I have anything to do with it early in the next session it will be taken up, hearings will be given the gentleman immediately and consideration had.

Mr. WALTER. May I ask whether or not hearings have been held on the bills we have been passing here by unanimous consent?

Mr. HARRIS. Yes; substantial hearings, and over a period of 3 years in some cases.

Mr. WALTER. Certainly this subject matter has been discussed by the committee at great length. As a matter of fact, the very bill that we seek to amend has as its objective the elimination of the abuses which my amendment deals with adequately and which the gentleman's bill does not deal with adequately. With my amendment abuses can and will be uncovered and an honest management enabled to regulate their own affairs.

Mr. MACK. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Illinois.

Mr. MACK. May I say that I have viewed the gentleman's amendment with some favor. I would like to have had the bill introduced by the gentleman from Pennsylvania before my subcommittee when I was holding hearings on this subject. I think that is the proper way to consider the gentleman's proposal. The bill was not introduced until after my subcommittee had completed all of the public hearings, consideration had in executive session, and the bill reported to the full committee. It was not until the executive sessions that it was possible to have the benefit of the gentleman's views in the consideration of this proposal. Because of certain opposition that was raised at the time, we decided not to include it in the bill this year. I do think it is a matter that needs to be dealt with and I am hoping that the next Congress will give considerable study to this proposition.

Mr. HOFFMAN of Michigan. Mr. Speaker, do I understand there is objection?

Mr. WALTER. I have not heard any objection; no. It has been indicated perhaps the amendment was offered at the wrong time, but I have heard no objection.

Mr. HOFFMAN of Michigan. I have heard no objection.

Mr. HARRIS. I tried to explain a moment ago the reason I felt compelled to oppose the amendment as it is presented here today. Had the amendment been offered and adopted——

Mr. HOFFMAN of Michigan. I understand all that.

Mr. HARRIS. We would not have gotten it up for consideration.

Mr. HOFFMAN of Michigan. Is the gentleman objecting on his own account or on behalf of somebody else?

Mr. HARRIS. I am objecting because of the procedure involved.

Mr. HOFFMAN of Michigan. The gentleman cannot object on the part of somebody who is not here. If he wants to object on his own responsibility, all right.

The SPEAKER pro tempore (Mr. ALBERT). The question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken; and on a division (demanded by Mr. WALTER) there were—ayes 51, noes 8.

So the amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. HARRIS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3772) to amend certain provisions of the Investment Company Act of 1940, as amended.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HARRIS. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Strike out all after the enacting clause and insert the provisions of H.R. 2481 as passed.

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The proceedings whereby a similar House bill (H.R. 2481) was passed were vacated and the House bill was laid on the table.

INVESTMENT ADVISERS ACT OF 1940, AS AMENDED

Mr. HARRIS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 2482) to amend certain provisions of the Investment Advisers Act of 1950, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (18) of section 202(a) of the Investment Advisers Act of 1940, as amended, is amended by striking out "Alaska," and "the Philippine Islands,".

SEC. 2. Clause (F) of paragraph (1) of section 203(c) of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(F) whether such investment adviser, any partner, officer, director, or person performing similar functions, or any person directly or indirectly controlling or controlled by such investment adviser, is subject to any disqualification which would be a basis for denial, suspension, or revocation of registration of such investment adviser under the provisions of subsection (d), and"

SEC. 3. Subsection (d) of section 203 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(d) The Commission shall, after appropriate notice and opportunity for hearing, by order deny registration or suspend for a period not exceeding twelve months or revoke the registration of an investment adviser, if it finds that such denial, suspension, or revocation is in the public interest and that (1) such investment adviser, whether prior or subsequent to becoming such, or (2) any partner, officer, or director (or any person performing similar functions), or any person directly or indirectly controlling or controlled by such investment adviser, whether prior or subsequent to becoming such (A) has willfully made or caused to be made in any application for registration or report filed with the Commission under this title, or in any proceeding before the Commission with respect to registration, any statement which was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, or who has omitted to state in any such application or report any material fact which is required to be stated therein; or (B) has been convicted within ten years preceding the filing of the application or at any time thereafter of any felony or misdemeanor which the Commission finds (i) involves the purchase or sale of any security, (ii) arises out of the conduct of the business of a broker, dealer, or investment adviser, (iii) involves embezzlement, fraudulent conversion, or misappropriation of funds or securities, or (iv) involves the violation of section 1341, 1342, or 1343 of title 18, United States Code, as heretofore or hereafter amended; or (C) is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction from acting as an investment adviser, underwriter, broker, or dealer, or as an affiliated person or employee of any investment company, bank, or insurance company, or from engaging in or continuing any conduct or practice in connection with any such activity, or in connection with the purchase or sale of any security; or (D) has willfully violated any provision of the Securities Act of 1933, or of the Securities Exchange Act of 1934, or of this title, as any of such statutes heretofore have been or hereafter may be amended, or of any rule or regulation under any of such statutes."

SEC. 4. Subsection (e) of section 203 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(e) The commencement of a proceeding to deny registration under this section shall operate to postpone the effective date of registration for a period of ninety days, or until final determination whether such registration shall be denied if that determination is made within such ninety-day period; but if, after appropriate notice and opportunity for hearing, it shall appear to the Commission to be necessary or appropriate in the public interest or for the protection of investors to postpone the effective date of such registration beyond such ninety-day period and until final determination of whether such registration shall be denied, the Commission shall so order."

SEC. 5. Subsection (g) of section 203 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(g) Any person registered under this section may, upon such terms and conditions as the Commission finds necessary in the public interest or for the protection of investors, withdraw from registration by filing

a written notice of withdrawal with the Commission. An application for registration under this section may be withdrawn only with the consent of the Commission if the request to withdraw such application is received by the Commission after it has commenced a proceeding to deny registration. If the Commission finds that any person registered under this section, or who has pending an application for registration filed under this section, is no longer in existence or is not engaged in business as an investment adviser, the Commission shall by order cancel the registration of such person."

SEC. 6. Section 204 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"SEC. 204. Every investment adviser who makes use of the mails or of any means or instrumentality of interstate commerce in connection with his or its business as an investment adviser (other than one specifically exempted from registration pursuant to section 203(h)), shall make, keep, and preserve for such periods, such accounts, correspondence, memorandums, papers, books, and other records, and make such reports, as the Commission by its rules and regulations may prescribe as necessary or appropriate in the public interest or for the protection of investors. Such accounts, correspondence, memorandums, papers, books, and other records shall be subject at any time or from time to time to such reasonable periodic, special, or other examinations by examiners or other representatives of the Commission as the Commission may deem necessary or appropriate in the public interest or for the protection of investors."

SEC. 7. The introductory paragraph of section 205 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"SEC. 205. No investment adviser, unless exempt from registration pursuant to section 203(b), shall make use of the mails or any means or instrumentality of interstate commerce, directly or indirectly, to enter into, extend, or renew any investment advisory contract, or in any way to perform any investment advisory contract entered into, extended, or renewed on or after the effective date of this title if such contract—".

SEC. 8. The introductory paragraph of section 206 of the Investment Advisers Act of 1940, as amended, is amended by striking out "registered under section 203".

SEC. 9. Section 206 of the Investment Advisers Act of 1940, as amended, is amended by adding the following new clause:

"(4) to engage in any act, practice, or course of business which is fraudulent, deceptive, or manipulative. The Commission shall, for the purposes of this paragraph (4) by rules and regulations define, and prescribe means reasonably designed to prevent, such acts, practices, and courses of business as are fraudulent, deceptive, or manipulative."

SEC. 10. The caption of section 208 of the Investment Advisers Act of 1940, as amended, is amended by striking out "UNLAWFUL REPRESENTATIONS" and inserting in lieu thereof "GENERAL PROHIBITIONS".

SEC. 11. Section 208 of the Investment Advisers Act of 1940, as amended, is amended by adding the following new subsection:

"(d) It shall be unlawful for any person indirectly, or through or by any other person, to do any act or thing which it would be unlawful for such person to do directly under the provisions of this title or any rule or regulation thereunder. It shall be unlawful for any person to aid, abet, counsel, command, induce, or procure the violation of any provision of this title or any rule or regulation thereunder by any other person. These provisions shall not constitute a limitation with respect to the applicability to this title of section 2 of title 18, United States Code."

SEC. 12. Subsection (e) of section 209 of the Investment Advisers Act of 1940, as amended, is amended by striking out "has engaged or is about to engage" in the first and in the second sentences and inserting in lieu thereof "has engaged, is engaged or is about to engage".

SEC. 13. Subsection (b) of section 210 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(b) Subject to the provisions of subsections (c) and (e), of section 209, the Commission, or any member, officer, or employee thereof, shall not make public the fact that any examination or investigation under this title is being conducted, or the results of or any facts ascertained during any such examination or investigation; and no member, officer, or employee of the Commission shall disclose to any person other than a member, officer, or employee of the Commission any information obtained as a result of any such examination or investigation except with the approval of the Commission. The provisions of this subsection shall not apply—

"(1) in the case of any hearing which is public under the provisions of section 212; or

"(2) in the case of a resolution or request from either House of Congress."

SEC. 14. Subsection (a) of section 211 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(a) The Commission shall have authority from time to time to make, issue, amend, and rescind such rules and regulations and such orders as are necessary or appropriate to the exercise of the functions and powers conferred upon the Commission elsewhere in this title. For the purpose of its rules or regulations the Commission may classify persons and matters within its jurisdiction and prescribe different requirements for different classes of persons or matters."

SEC. 15. Section 217 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"SEC. 217. Any person who willfully violates any provision of this title, or any rule, regulation, or order promulgated by the Commission under authority thereof, shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than two years, or both."

SEC. 16. The Investment Advisers Act of 1940, as amended, is amended by adding the following new section:

"STATE CONTROL OF INVESTMENT ADVISERS

"SEC. 222. Nothing in this title shall affect the jurisdiction of the securities commissioner (or any agency or officer performing like functions) of any State over any security or any person insofar as it does not conflict with the provisions of this title or the rules and regulations thereunder."

With the following committee amendments:

First page, line 3, strike out "Alaska,' ".

First page, strike out line 9 and all that follows down through line 5 on page 2, and insert the following:

"'(F) whether such investment adviser, any partner, officer, director, or person performing similar functions, or any person directly or indirectly controlling or controlled by such investment adviser, is subject to any disqualification which would be a basis for denial, suspension, or revocation of registration of such investment adviser under the provisions of subsection (d), and'.

"SEC. 3. Paragraph (2) of subsection (c) of section 203 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"'(2) a statement as to whether the principal business of such investment adviser consists or is to consist of acting as investment adviser and a statement as to whether a substantial part of the business of such investment adviser consists or is to consist of rendering investment supervisory services.' "

Page 2, line 6, strike out "3" and insert "4".

Page 4, line 1, strike out "4" and insert "5".

Page 4, line 16, strike out "5" and insert "6".

Page 5, line 9, strike out "6" and insert "7".

Page 5, line 15, strike out "(h)" and insert "(b)".

Page 6, line 4, strike out "7" and insert "8".

Page 6, line 15, strike out "8" and insert "9".

Page 6, line 18, strike out "9" and insert "10".

Page 6, line 19, after "is amended" insert "(1) by striking out the semicolons at the end of clauses (1) and (2) and inserting periods in lieu thereof, and (2)".

Page 6, strike out line 21 and all that follows down through line 2 on page 7, and insert the following:

"(4) to engage in any act, practice, or course of business which is fraudulent, deceptive, or manipulative. The Commission shall, for the purposes of this paragraph (4) by rules and regulations define, and prescribe means reasonably designed to prevent, such acts, practices, and courses of business as are fraudulent, deceptive, or manipulative."

Page 7, line 3, strike out "10" and insert "11".

Page 7, after line 6, insert the following:

"SEC. 12. (a) Subsection (c) of section 208 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

" '(c) It shall be unlawful for any person registered under section 203 of this title to represent that he is an investment counsel or to use the name investment counsel as descriptive of his business unless (1) his or its principal business consists of acting as investment adviser, and (2) a substantial part of his or its business consists of rendering investment supervisory services.' "

Page 7, line 7, strike out "11" and insert "13".

Page 7, line 20, strike out "12" and insert "14".

Page 7, line 24, strike out "engaged or" and insert "engaged, or".

Page 8, line 1, strike out "13" and insert "15".

Page 8, line 5, strike out "(e), of" and insert "(e) of".

Page 8, line 18, insert ", or any committee thereof" after "Congress".

Page 8, line 19, strike out "14" and insert "16".

Page 9, line 5, strike out "15" and insert "17".

Page 9, lines 9 and 10, strike out ", upon conviction,".

Page 9, line 10, strike out the comma after "$10,000" and insert "or".

Page 9, line 12, strike out "16" and insert "18".

Mr. HARRIS. I direct the attention of the Members of the House to the purpose of the bill, H.R. 2482, as set forth in the report:

PURPOSE OF THE BILL

The bill, H.R. 2482, here being reported amends the Investment Advisers Act of 1940 for the purpose of making the enforcement activities of the Securities and Exchange Commission more effective, by giving the Commission additional authority, and by providing additional remedies and eliminating or minimizing various problems which have come to light in the course of the Commission's enforcement of the act. The more significant of these proposals would, in brief: (1) expand the basis for disqualification of an applicant for

registration or a registrant because of misconduct; (2) revise the provisions relating to the postponement of effectiveness and the withdrawal of applications for registration; (3) authorize the Commission by rule to require the keeping of books and records and the filing of reports; (4) permit periodic examinations of a registrant's books and records; (5) empower the Commission by rule to define and prescribe means reasonably designed to prevent fraudulent practices; and (6) extend criminal liability to include a willful violation of a rule or order of the Commission.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to extend my remarks just prior to the adoption of the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

INVESTMENT ADVISERS ACT OF 1940, AS AMENDED

Mr. HARRIS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3773) to amend certain provisions of the Investment Advisers Act of 1940, as amended, and substitute it for the bill just passed, H.R. 2482.

The clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

The was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph 12 of subsection (a) of section 202 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(12) 'Investment company', affiliated person, and 'insurance company' have the same meanings as in the Investment Company Act of 1940. 'Control' means the power to exercise a controlling influence over the management or policies of a company, unless such power is solely the result of an official position with such company."

(b) Paragraph (18) of section 202(a) of the Investment Advisers Act of 1940, as amended, is amended by striking out "the Philippine Islands,".

SEC. 2. Clause (F) of paragraph (1) of section 203(c) of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(F) whether such investment adviser, or any partner, officer, director thereof, or any person performing similar functions, or any person directly or indirectly controlling or controlled by such investment adviser, is subject to any disqualification which would be a basis for denial, suspension, or revocation of registration of such investment adviser under the provisions of subsection (d), and".

SEC. 3. (a) Paragraph (2) of subsection (c) of section 203 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(2) a statement as to whether the principal business of such investment adviser consists or is to consist of acting as investment adviser and a statement as to whether a substantial part of the business of such investment adviser consists or is to consist of rendering investment supervisory services."

(b) Subsection (d) of section 203 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(d) The Commission shall, after appropriate notice and opportunity for hearing, by order deny registration to, or suspend for a period not exceeding twelve months or revoke the registration of, an investment adviser, if it finds that such denial, suspension, or revocation is in the public interest and that (1) such investment adviser, whether prior or subsequent to becoming such, or (2) any partner, officer, or director thereof, or any person performing similar functions, or (3) any person directly or indirectly controlling or controlled by such investment adviser, whether prior or subsequent to becoming such, (A) has willfully made or caused to be made in any application for registration or report filed with the Commission under this title, or in any proceeding before the Commission with respect to registration, any statement which was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, or who has omitted to state in any such application or report any material fact which is required to be stated therein; or (B) has been convicted within ten years preceding the filing of the application or at any time thereafter of any felony or misdemeanor which the Commission finds (i) involves the purchase or sale of any security, (ii) arises out of the conduct of the business of a broker, dealer, or investment adviser, (iii) involves embezzlement, fraudulent conversion, or misappropriation of funds or securities, or (iv) involves the violation of section 1341, 1342, or 1343 of title 18, United States Code, as heretofore or hereafter amended; or (C) is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction from acting as an investment adviser, underwriter, broker, or dealer, or as an affiliated person or employee of any investment company, bank, or insurance company, or from engaging in or continuing any conduct or practice in connection with any such activity, or in connection with the purchase or sale of any security; or (D) has willfully violated any provision of the Securities Act of 1933, or of the Securities Exchange Act of 1934, or of this title, as any of such statutes heretofore have been or hereafter may be amended, or of any rule or regulation under and of such statutes; or (E) has aided, abetted, counseled, commanded, induced, or procured the violation by any other person of the Securities Act of 1933, or the Securities Exchange Act of 1934, or of this title, as any of such statutes heretofore have been or hereafter may be amended, or of any rule or regulation under any of such statutes."

SEC. 4. Subsection (e) of section 203 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(e) The commencement of a proceeding to deny registration under this section shall operate to postpone the effective date of registration for a period of ninety days, or until final determination whether such registration shall be denied if that determination is made within such ninety-day period; but if, after appropriate notice and opportunity for hearing, it shall appear to the Commission to be necessary or appropriate in the public interest or for the protection of investors to postpone the effective date of such registration beyond such ninety-day period and until final determination of whether such registration shall be denied, the Commission shall so order. Upon request of any interested party, made more than ninety days after the effective date of such order, the Commission shall consider whether such postponement should continue, and shall take such action, if any, with respect thereto as in its discretion is necessary or appropriate in the public interest or for the protection of investors."

SEC. 5. Subsection (g) of section 203 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(g) Any person registered under this section may, upon such terms and conditions as the Commission finds necessary in the public interest or for the protection of investors, withdraw from registration by filing a written notice of withdrawal with the Commission. If the Commission finds that any person registered under this section, or who has pending an application for registration filed under this section, is no longer in existence or is not engaged in business as an investment adviser, the Commission shall by order cancel the registration of such person."

SEC. 6. Section 204 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"SEC. 204. Every investment adviser who makes use of the mails or of any means or instrumentality of interstate commerce in connection with his or its business as an investment adviser (other than one specifically exempted from registration pursuant to section 203(b)), shall make, keep, and preserve for such periods, such accounts, correspondence, memorandums, papers, books, and other records, and make such reports, as the Commission by its rules and regulations may prescribe as necessary or appropriate in the public interest or for the protection of investors. Such accounts, correspondence, memorandums, papers, books, and other records shall be subject at any time or from time to time to such reasonable periodic, special, or other examinations by examiners or other representatives of the Commission as the Commission may deem necessary or appropriate in the public interest or for the protection of investors."

SEC. 7. The introductory paragraph of section 205 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"SEC. 205. No investment adviser, unless exempt from registration pursuant to section 203(b), shall make use of the mails or any means or instrumentality of interstate commerce, directly or indirectly, to enter into, extend, or renew any investment advisory contract, or in any way to perform any investment advisory contract entered into, extended, or renewed on or after the effective date of this title, if such contract—".

SEC. 8. The introductory paragraph of section 206 of the Investment Advisers Act of 1940, as amended, is amended by striking out "registered under section 203".

SEC. 9. Section 206 of the Investment Advisers Act of 1940, as amended, is amended by changing the period at the end thereof to a semicolon and by adding the following new paragraph:

"(4) to engage in any act, practice, or course of business which is fraudulent, deceptive, or manipulative. The Commission shall, for the purposes of this paragraph (4) by rules and regulations define, and prescribe means reasonably designed to prevent, such acts, practices, and courses of business as are fraudulent, deceptive, or manipulative."

SEC. 10. The caption of section 208 of the Investment Advisers Act of 1940, as amended, is amended by striking out "UNLAWFUL REPRESENTATIONS" and inserting in lieu thereof "GENERAL PROHIBITIONS".

SEC. 11. (a) Subsection (c) of section 208 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(c) It shall be unlawful for any person registered under section 203 of this title to represent that he is an investment counsel or to use the name 'investment counsel' as descriptive of his business unless (1) his or its principal business consists of acting as

investment adviser, and (2) a substantial part of his or its business consists of rendering investment supervisory services."

(b) Section 208 of the Investment Advisers Act of 1940, as amended, is amended by adding the following new subsection:

"(d) It shall be unlawful for any person indirectly, or through or by any other person, to do any act or thing which it would be unlawful for such person to do directly under the provisions of this title or any rule or regulation thereunder."

SEC. 12. Subsection (e) of section 209 of the Investment Advisers Act of 1940, as amended, is amended by striking out "has engaged or is about to engage" in the first and in the second sentences and inserting in lieu thereof "has engaged, is engaged, or is about to engage"; by inserting in the first sentence after "any rule, regulation, or order hereunder," the first time that phrase appears, the following: "or that any person has aided, abetted, counseled, commanded, induced, or procured, is aiding, abetting, counseling, commanding, inducing, or procuring, or is about to aid, abet, counsel, command, induce, or procure such a violation,"; and by inserting in the second sentence, after "such act or practice,", the following: "or in aiding, abetting, counseling, commanding, inducing, or procuring any such act or practice,".

SEC. 13. Subsection (b) of section 210 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(b) Subject to the provisions of subsections (c) and (e) of section 209, the Commission, or any member, officer, or employee thereof, shall not make public the fact that any examination or investigation under this title is being conducted, or the results of or any facts ascertained during any such examination or investigation; and no member, officer, or employee of the Commission shall disclose to any person other than a member, officer, or employee of the Commission any information obtained as a result of any such examination or investigation except with the approval of the Commission. The provisions of this subsection shall not apply—

"(1) in the case of any hearing which is public under the provisions of section 212; or

"(2) in the case of a resolution or request from either House of Congress."

SEC. 14. Subsection (a) of section 211 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"(a) The Commission shall have authority from time to time to make, issue, amend, and rescind such rules and regulations and such orders as are necessary or appropriate to the exercise of the functions and powers conferred upon the Commission elsewhere in this title. For the purposes of its rules or regulations the Commission may classify persons and matters within its jurisdiction and prescribe different requirements for different classes of persons or matters."

SEC. 15. Section 217 of the Investment Advisers Act of 1940, as amended, is amended to read as follows:

"SEC. 217. Any person who willfully violates any provision of this title, or any rule, regulation, or order promulgated by the Commission under authority thereof, shall, upon conviction, be fined not more than $10,000, imprisoned for not more than two years, or both."

SEC. 16. The Investment Advisers Act of 1940, as amended, is amended by adding the following new section:

"STATE CONTROL OF INVESTMENT ADVISERS

"SEC. 222. Nothing in this title shall affect the jurisdiction of the securities commissioner (or any agency or officer performing like functions) of any State over any security or any person insofar as it does not conflict with the provisions of this title or the rules and regulations thereunder."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The proceedings whereby a similar House bill (H.R. 2482) was passed were vacated and the House bill was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Carrell, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10087) entitled "An act to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit."

The message also announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 2074. An act for the relief of Eric and Ida Mae Hjerpe;

H.R. 4428. An act for the relief of the legal guardian of John David Almeida, a minor;

H.R. 7618. An act for the relief of H. P. Lambert Co., Inc., and Southeastern Drilling Corp.; and

H.R. 7877. An act for the relief of Vladislav Fotich.

ELECTRON MICROSCOPE.

Mr. MILLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 11573) to provide for the free entry of an electron microscope for the use of William Marsh Rice University, of Houston, Tex., and an electron microscope for the use of the University of Colorado Medical Center, Denver, Colo., with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

After line 7, insert:

"SEC. 2. The Secretary of the Treasury is authorized and directed to admit free of duty grain milling equipment and appurtenances imported for the use of Kansas State University, Manhattan, Kansas, in the building now under construction for the department of flour and feed milling industries at such university.

"SEC. 3. Section 809(g) of the National Housing Act is amended to read as follows:

"'(g)(1) A mortgage secured by property which is intended to provide housing for a person (i) employed or assigned to duty at a research or development installation of the National Aeronautics and Space Administration and which is located at or near such installation, where such installation was a research or development installation of one of the military departments of the United States (on or after June 13, 1956) before its transfer to the jurisdiction of such Administration, or (ii) employed at the research and development installation of the Atomic Energy Commission in Los Alamos County, New Mexico, and which is located at or near such installation, may (if the mortgage otherwise meets the requirements of this section) be insured by the Commissioner under the provisions of this section. The Administrator of the National Aeronautics and Space Administration (or his designee), in the case of any mortgage secured by property intended to provide housing for any person employed or assigned to duty at any such installation of the National Aeronautics and Space Administration, or the Chairman of the Atomic Energy Commission (or his designee), in the case of any mortgage secured by property intended to provide housing for any person employed at such installation of the Atomic Energy Commission, is authorized to guarantee and indemnify the Armed Services Housing Mortgage Insurance Fund against loss to the extent required by the Commissioner, in accordance with the provisions of subsection (b) of this section.

"'(2) For purposes of this subsection—

"'(i) The terms "Armed Forces", "one of the military departments of the United States," "military department", "Secretary or his designee", and "Secretary", when used in subsections (a) and (b) of this section, shall be deemed to refer to the National Aeronautics and Space Administration (or the Administrator thereof), or the Atomic Energy Commission (or the Chairman thereof), as may be appropriate;

"'(ii) The term "Secretary of the Army, Navy, or Air Force", when used in section 805, shall be deemed to refer to the National Aeronautics and Space Administration or the Administrator thereof, as may be appropriate;

"'(iii) The terms "civilian employee", "civilians", and "civilian personnel", as used in this section, shall be deemed to refer to (A) employees of such Administration or a contractor thereof or to military personnel assigned to duty at an installation of such Administration, or (B) persons employed in connection with the Atomic Energy Commission's installation at Los Alamos, New Mexico, as the case may be; and

"'(iv) The term "military installation" when used in section 805 shall be deemed to refer to an installation of the National Aeronautics and Space Administration.'"

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. AVERY. Mr. Speaker, reserving the right to object, and I shall not object, of course, I make this reservation in order that I might inquire of the gentleman from Arkansas if the Senate amendment is what we might refer to as the Carlson amendment that extends a comparable privilege to Kansas State University as provided in the bill for institutions of higher learning in Texas.

Mr. MILLS. That is correct, with respect to one of the Senate amendments. There were two Senate amendments, and if the gentleman will reserve his right to object and if he wants me to, I will explain briefly the two amendments.

Mr. AVERY. Mr. Speaker, I further reserve the right to object, in order that the gentleman from Arkansas, Mr. MILLS, may explain both these amendments. I yield to the gentleman from Arkansas.

Mr. MILLS. The gentleman is correct in his observation with respect to the first amendment. The gentleman from Kansas [Mr. AVERY] had introduced a bill, H.R. 12103, which was referred to the Committee on Ways and Means, on which the committee received favorable reports from the Department of Commerce, the Department of Labor, the Department of State, as well as an informative report from the Tariff Commission, having to do with the free importation of

certain equipment desired by Kansas State University in connection with the construction of a mill, of a type not produced in the United States, to replace one that had been burned some years ago. That is the amendment the gentleman introduced.

There is a second amendment having to do with housing for a research and development installation of the Atomic Energy Commission, to accommodate some people who have been transferred to that facility from the Huntsville, Ala., facility. I have taken occasion to discuss this amendment with members of the Committee on Banking and Currency and those with whom I have discussed it all agreed to it, including the gentleman from California [Mr. McDONOUGH]; the gentleman from Kentucky [Mr. SPENCE]; and the gentleman from Alabama [Mr. RAINS].

Mr. AVERY. Mr. Speaker, in view of the explanation of the gentleman from Arkansas, I withdraw my reservation of objection.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. MILLS. I yield to the gentleman.

Mr. BAILEY. Does this proposed legislation involve the setting aside of import duties?

Mr. MILLS. Only with respect to certain articles that are being brought into the United States by Kansas State University in connection with the construction of a type of milling operation that they have, and which is not commercially produced domestically. It consists of the importation of articles, according to the report of the Senate Finance Committee, that are not competitive here in the United States.

Mr. BAILEY. Does the gentleman mean that the article is not produced in the United States?

Mr. MILLS. Not commercially produced; that is the information given us.

Mr. BAILEY. Over the past week I have patiently waited and have seen these standing committees clear all of their legislation that has accumulated throughout the year, including the gentleman's own committee, the Committee on Interstate and Foreign Commerce and the Committee on Agriculture. Yet most of the major legislation that I am interested in is resting quietly in the Committee on Rules. For some reason or other I have not been able to get consideration of them, without someone wanting to object. I have no intention of objecting to this particular piece of legislation but I hope the gentleman does not have any more to offer that has to do with bringing articles in on the free list.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLS. Mr. Speaker, as Members of the House will recall in the form in which H.R. 11573 passed the House of Representatives, its purpose was to permit the duty-free entry of an electron microscope for the use of William Marsh Rice University of Houston, Tex., and an electron microscope for the use of the University of Colorado Medical Center, Denver, Colo. It may be recalled that these universities had procured from abroad these highly specialized microscopes for use in connection with their highly technical research and educational activities.

The Senate added two amendments to the House bill, as follows:

First, a Senate Finance Committee amendment would authorize the Secretary of the Treasury to admit free of duty grain milling equipment and appurtenances imported for the use of Kansas State University in the building being constructed for the department of flour and feed milling industries at that university. As was the case with respect to the highly specialized electron microscopes covered under the House bill, it was felt that the burden of duty should not be added to the cost of the equipment in this instance. According to the report of the Senate Finance Committee, several foreign countries are supplying the various technical parts for the grain mill and a considerable portion is being donated free of charge thus making it possible for the university to embark on a research and educational program for the improvement of the milling industry.

I should point out that there was pending before the Committee on Ways and Means a bill on this subject by our colleague, the Honorable WILLIAM AVERY. The Committee on Ways and Means has received favorable reports on this House bill, H.R. 12103, from the Department of Commerce, the Department of Labor, and the Department of State, as well as an informative report from the U.S. Tariff Commission. It is pointed out in the report of the Department of Labor that the experimental flour mill at the Kansas State University was destroyed by fire several years ago and that the replacement contemplated by the university would be a mill of a type not produced commercially in the United States.

The second amendment added by the Senate was a floor amendment sponsored by Senator ANDERSON, which amends section 809(g) of the National Housing Act. As explained by the sponsor, the amendment is designed to afford housing at the research and development installation of the Atomic Energy Commission in Los Alamos County, N. Mex. It was stated that when the Huntsville, Ala., station was transferred to Los Alamos it was found that employees could not provide their own housing and that a survey and report indicated that additional housing should be provided in the same fashion that housing was provided in Huntsville, Ala.

Mr. Speaker, I recognize that it is unusual for an amendment to the National Housing Act to be added as an amendment to a tariff bill, since the tariff bill is of course within the jurisdiction of the Ways and Means Committee and the National Housing Act, of course, is within the jurisdiction of the Committee on Banking and Currency. I therefore took occasion to confer with the chairman and certain members of the Banking and Currency Committee of the House to insure that they would have no objection to handling this amendment in this manner.

Senator ANDERSON stated on the floor of the Senate that he had cleared the matter with the Senate Banking and Currency Committee before he offered the amendment.

Mr. MILLS. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. MASON] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MASON. Mr. Speaker, I have concurred in the request of the chairman of the Committee on Ways and Means that the House accept the Senate amendments to H.R. 11573.

It will be recalled that this legislation as it passed the House provided for the importation of highly specialized electron microscope equipment by two U.S. universities.

The Senate in approving this legislation added two amendments. The first of these amendments provides for the duty-free importation of certain equipment by Kansas State University for a pilot-plant grain and flour milling installation. The second Senate amendment is to the National Housing Act and affects the development for housing for certain employees at Los Alamos.

Mr. Speaker, both of these amendments are meritorious and it is appropriate that they should be approved by the House.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

JURISDICTION OF U.S. DISTRICT COURTS IN CERTAIN ACTIONS

Mr. FORRESTER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 12622) to amend chapter 85 of title 28 of the United States Code relating to the jurisdiction of the U.S. district courts, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 85 of title 28 of the United States Code is amended—

(a) By adding at the end thereof the following new section:

"§ 1361. ACTION TO COMPEL AN OFFICER OF THE UNITED STATES TO PERFORM HIS DUTY.

"The district courts shall have original jurisdiction of any action to compel an officer or employee of the United States or any agency thereof to perform his duty."

(b) By adding at the end of the table of sections for chapter 85 of title 28 of the United States Code the following:

"1361. Action to compel an officer of the United States to perform his duty."

SEC. 2. Section 1391 of title 28 of the United States Code is amended by adding at the end thereof the following new subsection:

"(e) A civil action in which each defendant is an officer or employee of the United States or any agency thereof acting in his official capacity or under color of legal authority, or an agency of the United States, may be brought in any judicial district where a plaintiff in the action resides, or in which the cause of the action arose, or in which any property involved in the action is situated.

"The summons and complaint in such an action shall be served as provided by the Federal Rules of Civil Procedure except that the delivery of the summons and complaint to the officer or agency as required by the rules may be made by certified mail beyond the territorial limits of the district in which the action is brought."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

House Resolution 584 was laid on the table.

PROTECT FARM AND RANCH OPERATORS MAKING CERTAIN LAND USE CHANGES

Mr. POAGE. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3533) to protect farm and ranch operators making certain land use changes under the Great Plains conservation program against loss of acreage allotments.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. POAGE. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. POAGE: Strike out all after the enacting clause and insert the provisions of H.R. 12849, as follows: "That section 16 of the Soil Conservation and Domestic Allotment Act of 1938, as amended, is amended as follows:

"(1) Paragraph (3) of subsection (b) is amended to read as follows:

"'(3) insofar as the acreage of cropland on any farm enters into the determination of acreage allotments and marketing quotas under the Agricultural Adjustment Act of 1938, as amended, the cropland acreage on the farm shall not be decreased during the period of any contract heretofore or hereafter entered into under this subsection by reason of any action taken for the purpose of carrying out such contract and, under regulations of the Secretary, shall not be decreased, for such period after the expiration of the contract as is equal to the period of the contract, by reason of the maintenance of any change in land use from cultivated cropland to permanent vegetation carried out under the contract;'.

"(2) Paragraph (4) of subsection (b) is amended to read as follows:

"'(4) the acreage on any farm which is determined under regulations of the Secretary to have been diverted from the production of any commodity subject to acreage allotments or marketing quotas in order to carry out any contract heretofore or hereafter entered into under the program or in order to maintain, for such period after the expiration of the contract as is equal to the period of the contract, any change in land use from cultivated cropland to permanent vegetation carried out under the contract shall be considered acreage devoted to the commodity for the purposes of establishing future State, county, and farm acreage allotments under the Agricultural Adjustment Act of 1938, as amended.'

"SEC. 2. Section 112 of the Soil Bank Act, as amended, is amended as follows:

"(1) Paragraph (1) is amended to read as follows:

"'(1) insofar as the acreage of cropland on any farm enters into the determination of acreage allotments and marketing quotas under the Agricultural Adjustment Act of 1938, as amended, the cropland acreage on the farm shall not be decreased during the period of any contract heretofore or hereafter entered into under this subtitle by reason of any action taken for the purpose of carrying out such contract and, under regulations of the Secretary, shall not be decreased, for such period after the expiration of the contract as is equal to the period of the contract, by reason of the maintenance of any change in land use from cultivated cropland to permanent vegetation carried out under the contract;'.

"(2) Paragraph (2) is amended to read as follows:

"'(2) the acreage on any farm which is determined under regulations of the Secretary to have been diverted from the production of any commodity subject to acreage allotments or marketing quotas in order to carry out any contract heretofore or hereafter entered into under this subtitle or in order to maintain, for such period after the expiration of the contract as is equal to the period of the contract, any change in land use from cultivated cropland to permanent vegetation carried out under the contract shall be considered acreage devoted to the commodity for the purposes of establishing future State, county, and farm acreage allotments under the Agricultural Adjustment Act of 1938, as amended.'"

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EMERGENCY CONSERVATION MEASURES

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 2761) to validate payments made for certain emergency conservation measures under the program authorized by the Third Supplemental Appropriation Act, 1957.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

Mr. McINTIRE. Reserving the right to object, Mr. Speaker, may I say that this is a bill passed by the other body, and reported out unanimously by the House Committee on Agriculture.

I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That payments which have heretofore been made under the program authorized by the Third Supplemental Appropriation Act, 1957, under the item entitled "Emergency Conservation Measures, Agricultural Conservation Program Service", for emergency conservation measures carried out between January 1, 1956, and June 21, 1957, shall, if otherwise proper, not be considered invalid by reason of the fact that they were made for measures carried out prior to the enactment of said Act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SUBCOMMITTEE NO. 3, HOUSE COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. DAVIS of Georgia. Mr. Speaker, I ask unanimous consent to extend my remarks in the CONGRESSIONAL RECORD and include a progress report made by Subcommittee No. 3 of the House Committee on the District of Columbia on the bill (S. 1456) to provide for the appointment of two additional judges for the juvenile court of the District of Columbia, and also to include the letter of transmittal accompanying it.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 30, 1960.

Hon. JOHN L. MCMILLAN,
Chairman, Committee on the District of Columbia, House of Representatives, Washington, D.C.

MY DEAR MR. CHAIRMAN: I submit to you herewith a progress report of Subcommittee No. 3 on Senate bill, S. 1456.

The subcommittee is planning to meet during the congressional recess for further consideration of this legislation and the information we have gathered.

Sincerely yours,

JAMES C. DAVIS,
Chairman.

PROGRESS REPORT OF SUBCOMMITTEE NO. 3 OF THE HOUSE COMMITTEE ON THE DISTRICT OF COLUMBIA ON S. 1456—A BILL TO PROVIDE THE APPOINTMENT OF TWO ADDITIONAL JUDGES FOR THE JUVENILE COURT OF THE DISTRICT OF COLUMBIA—AUGUST 28, 1960

During the 85th Congress H.R. 7785 was introduced providing for the appointment of one additional judge to the juvenile court of the District of Columbia. This bill was approved by the House Committee on the District of Columbia, passed by the House of Representatives, and was amended and passed by the Senate. The bill did not emerge from conference committee in time for final passage before adjournment of the 85th Congress.

Following the opening of the 86th Congress, S. 465, calling for the appointment of an additional judge to the juvenile court was introduced in the Senate. The Senate Committee on the District of Columbia held hearings on the bill in February 1959. Later, the committee favorably reported S. 1456 calling for the appointment of two additional judges of the juvenile court of the District of Columbia. The bill was thereafter passed by the Senate.

In July 1959, this subcommittee of the House Committee on the District of Columbia held hearings on S. 1456. Hearings for 2 additional days were held in December

1959. Evidence was received showing that the one-judge court had disposed of cases more rapidly than the rate of new cases filed and had reduced the court backlog by about 10 percent during fiscal year 1959. This fact, along with other information developed during the hearings, dictated the need for further study before any decision was reached on the two-judge bill. Committee staff was directed to develop more fully information on the past history of operation of the court, its caseload and organization, coupled with statistical data on at least part of the court's operation for fiscal year 1960.

Preliminary figures for fiscal year 1960 indicated a reversal in the trends shown by the court in 1959. With the very recent availability of final statistical information for fiscal year 1960, the subcommittee now has before it sufficient data, testimony, and evidence of record on which to reasonably gage the problems of the juvenile court, its needs, and what legislation may be necessary to assure an adequate, efficient, and effective juvenile court in the District of Columbia.

PART I—TESTIMONY AND STATISTICAL RECORDS

Extensive testimony on the operation and needs of the juvenile court of the District of Columbia is a matter of record, in hearings before the House Committee on the District of Columbia, the Senate Committee on the District of Columbia, the House and Senate Committees on Appropriations, and the Senate Judiciary Subcommittee on Juvenile Delinquency, in addition to statistical reports. Many prominent persons from District of Columbia courts, law enforcement agencies, and community organizations testified regarding S. 1456. Most witnesses expressed their sincere belief that the enactment of S. 1456 was the principal need of the juvenile court. Some witnesses urged other amendments to the Juvenile Court Act of the District of Columbia.

Testimony of record before this subcommittee and the Senate Committee on the District of Columbia indicates that the support for the appointment of two additional judges was premised mostly on the following: (1) The great volume of hearings in the juvenile court; (2) the heavy backlog of cases pending in the court; and (3) population comparison studies with other cities relating the number of sitting juvenile court judges in those cities to the population.

1. Volume of juvenile court hearings: Witnesses testifying before the Senate Committee on the District of Columbia in February 1959 on S. 465 expressed the view that the volume of court hearings alone was persuasive that two additional judges were needed and that "the single statistic of some 13,000 hearings" was sufficient to prove the point.[1]

In July 1959, following the passage of S. 1456 by the Senate, this subcommittee of the House Committee on the District of Columbia held public hearings on the two-judge proposal. Again principal witnesses referred to the number of hearings as being a most significant factor in support of the bill. However, the number of hearings was then placed at 10,000 for the previous year.[2]

In December 1959, for the 2 days of committee hearings, there was available to the subcommittee the first annual statistical report of the juvenile court which had been issued in October for the fiscal year 1959. Table 21 of this document reported that the total of all court hearings on juvenile and adult cases for the year was 5,192. Included in this figure were 149 court trials and 32 jury trials.

Thus within a period of about 10 months the reported hearing load of the court, as represented to congressional committees dropped successively from 13,000 to 10,000 to less than 5,200. This indicated the need for further study of the operation of the court.

2. Backlog of cases: Prior to the change in the judgeship in the juvenile court of the District of Columbia in May 1957, there had been no backlog of cases for several years, either as to juvenile or adult matters. During those years, when the court kept its docket free of any backlog, there was an average of 450 more cases filed with the court per year than during the fiscal years beginning in 1958. The court kept its caseload current.

No tabulation of the juvenile court backlog, which began accumulating in fiscal year 1958, is available prior to September 1, 1958, shortly after the end of the fiscal year. At that date, the backlog was 270 juvenile cases and 552 adult cases for a total of 822 cases.[3]

During fiscal year 1959, the juvenile court reduced its backlog by about 10 percent and ended the year with a backlog of 235 juvenile and 510 adult cases for a total of 745 cases.[4] During fiscal year 1960 the number of juvenile and adult cases filed with the court increased by 337 but the backlog rose to a total of 1,667.[5] The increase in the court's backlog exceeded the increase in cases filed by 585.

The relation between the backlog of cases in the juvenile court and the need for additional judges must be weighed in the light of the following: (1) That for fiscal years prior to and including 1957, with a substantially greater number of cases, the court had no backlog accumulation; (2) that during fiscal year 1958, with 500 fewer cases filed than for the average of the preceding fiscal years, the court suddenly accumulated a backlog of 822 cases; (3) that with 3 percent fewer cases filed in fiscal year 1959 than in 1958, the court reduced its backlog by about 10 percent; (4) that during fiscal year 1960 with an increase of approximately 350 in the number of cases filed, the backlog increased by more than 900 cases for a total of 1667.

3. Comparison of the District of Columbia with other juvenile court jurisdictions: Determining the need of judges in the juvenile court of the District of Columbia by comparing juvenile courts in other cities, brings into consideration many factors which cannot be accurately weighed for such purposes. The jurisdiction of courts in other cities may be broader or narrower; the age limit may be lower; in some cities juvenile problems are handled by family courts with similar or broader jurisdiction than that of the juvenile court in the District; in some cities, all juvenile complaints are transmitted directly to the juvenile court while in others, of which Washington is one, juvenile complaints are screened by a juvenile division of the police department and only those cases involving other than minor offenses or second time offenders are transmitted to the juvenile court; also, the number of offenders per thousand population may vary considerably in different cities.

In hearings before various committees of Congress, testimony is on record comparing the population of the District of Columbia with that of other cities and relating the population comparison factor to the number of judges in the particular cities to establish the basis for additional judges in the juvenile court of the District of Columbia.[6] Studies made by the subcommittee staff indicated that if a three-judge court proposed by S. 1456 were established in the District of Columbia, and the same formula applied to the other cities, it would be necessary to appoint additional judges in the cities used for comparison if they were to conform to the population-judge ratio proposed for the District in S. 1456. To illustrate, the juvenile court in Cleveland, Ohio, serves the metropolitan area within Cuyahoga County.[7] Placing the population of the District at 800,000 (the 1960 census shows substantially less) and applying the three-judge formula of S. 1456, the Cleveland court should have six judges since it has twice the population to serve. Cleveland has three judges, the third being appointed just about 2 years ago.

PART II—AUTONOMY AND MANAGEMENT OF THE COURT

Under the Juvenile Court Act of the District of Columbia, the juvenile court is autonomous. It operates solely under the authority of the sitting judge and there is no supervision of its functions or management by any other judicial official or administrative official in the District of Columbia.

Under these circumstances, the effective and efficient operation of the juvenile court calls for the application of multiple skills. In addition to an understanding of the responsibilities and duties placed upon the court by the Juvenile Court Act, an understanding of juvenile court law and procedures, and the exercise of judicial capability, the judge of this court must likewise have the capacity to cooperate closely with agencies whose functions may be related to the court, and the capacity for supervising and managing a considerable staff of employees.

The closest relationship the juvenile court has with any other body in the District of Columbia is with the municipal court of the District by reason of provisions of law calling for the assignment of judges from the municipal court bench to the juvenile court in the absence of the judge or the event a vacancy exists in the juvenile court.

Early in fiscal year 1958, management studies were started looking forward to the reorganization of the juvenile court.[8] The management office of the District of Columbia assisted the court in this work. Visits were made to juvenile courts in other cities to study their operations and discover methods which might be advantageously used. As a result of these management studies, the court procedures were streamlined. Duplicate operations eliminated where possible, recordkeeping mechanized and simplified, and other changes made to relieve the judge of burdens and to facilitate the smooth functioning of the court at staff levels. The court was given an administrative division, not found in the organizational structures of other courts in the District.

Appropriations were increased in excess of $250,000 between fiscal year 1957 and the

[5] Statistical Report of Juvenile Court, 4th quarter 1960, table 9.

[6] Hearings—House Committee on the District of Columbia, July 23, 1959, p. 18; hearings—House Committee on Appropriations, 1961, p. 416 (District of Columbia Appropriations—1961); hearing—Senate Committee on the District of Columbia, Feb. 4, 1959, pp. 44, 46, 65 (statement).

[7] Population comparisons in this instance used as a population figure of about 900,000 correct for metropolitan Cleveland. However, the Cleveland court serves the entire population of Cuyahoga County which is approximately 1,600,000. Hearings—House Committee on the District of Columbia, July 23, 1959, p. 19.

[8] Hearings—House Committee on Appropriations, District of Columbia Appropriations, 1961, pp. 408–419.

current fiscal year and 22 new positions were authorized. Despite these facts, and with a decrease in the average number of cases filed, the court backlog rose from zero at the beginning of fiscal year 1958 to 1,667 at the end of fiscal year 1960.

The Juvenile Court Act of the District of Columbia gives to the juvenile court the exclusive jurisdiction in determining the paternity of illegitimate children and concurrent jurisdiction with the U.S. district court in criminal nonsupport cases.[9] The handling of these adult cases, is not only directly related to the well-being of those for whom support is ordered by the court but also to the financial burdens of the Department of Public Welfare. The statutory function of the court is to determine legal obligation and necessity of the support and to enforce its judgments.

In connection with criminal nonsupport cases, the court at one time discontinued scheduling such cases for court action. The court has indicated that such cases are given lowest priority rating of all matters within its jurisdiction.[10]

Collections in adult cases involving support matters increased steadily through the end of fiscal year 1957, when court collections totaled $945,677. Beginning in fiscal 1958, and even with the reorganization of the court, collections declined each year to a point approaching $450,000 less than the amount collected in fiscal year 1957.

In connection with the justification of requests for appropriations for the court for fiscal year 1959 to provide additional positions, it was stated that certain additional employees might increase the court's collections by about $200,000 per year.[11] The new positions were authorized and within a few months thereafter the intake section handling support cases was abolished, the employees transferred, and the workload shifted to the Office of the Corporation Counsel who was compelled to request additional employees to assume the additional work. Collections thereafter continued to decline.

At Appropriations Committee hearings the following year, explanation of this action was requested.[12] Discussion was had concerning the transfer of adult cases from the juvenile court, and testimony was taken concerning the effect of court's action on the operations of the Office of the Corporation Counsel and the Department of Public Welfare. The court there and elsewhere expressed its "chafing" under the adult problem imposed by the Juvenile Court Act.[13]

The following tables present in summary form, the essence of statistical figures concerning the operation of the juvenile court in the years preceding and including fiscal year 1957, and the 3 succeeding fiscal years to the present. Table 1 deals with appropriations, personnel, caseload, backlog, and court collections. Table 2 relates the appropriations or cost of operation of the court to the amount of the court collections on a per case filed basis. The figures used are extracted from hearings before Committees on Appropriations of the House and Senate, hearings before the House Committee on the District of Columbia, and from the statistical reports of the juvenile court for fiscal 1959 and the quarterly reports for fiscal 1960, by quarter or cumulatively for the year.

CHART I

Statistics relating to cost of operation, cases filed, case backlog, and collections, District of Columbia juvenile court

Fiscal year	Appropriation	Number of authorized positions	Number of cases filed			Backlog of cases			Collections
			Juvenile	Adult	Total	Juvenile	Adult	Total	
1954	$327,000	72	2,057	1,407	3,464				
1955	347,000	74	1,757	1,516	3,273				
1956	407,000	80	1,877	1,797	3,674				$785,000
1957	428,000	81	1,846	1,578	3,424				945,677
(Present judge took office at this point)									
1958	$490,900	86	1,870	1,027	2,897	270	552	822	$626,415
1959	573,000	95	[1] 1,840	993	2,833	235	510	745	511,931
1960	620,000	97	1,685	1,485	3,170	502	1,165	1,667	506,040
1961	689,700	103							

[1] Comparison of the statistical reports of the court for fiscal years 1959 and 1960 indicates that the method of reporting was changed in 1960. There was no table in the 1959 statistical report showing new petitions filed with the court. The 1959 figure of 1,840 for juvenile petitions used in chart 1 may be slightly in excess of the total number of new juvenile petitions filed in the court. The figure of 1,685 new juvenile petitions filed for fiscal 1960 is a cumulative total taken from table 9 of the quarterly reports. However, the cumulative total of table 1 shows an intake of 3,243 individual juveniles. Table 7 shows disposition of 2,030 new juvenile petitions. As to new adult petitions, the cumulative total of the quarterly statistical reports of the court shows in table 9, 1,485 new adult petitions. Table 8 shows a total of 1,720 new adult petitions. The Assistant Corporation Counsel's Office indicates a total of 1,390 new adult petitions filed.

CHART II

Fiscal year	Net difference between court collections and court operating costs	Net difference per case filed	Backlog of cases
1956	+$378,000	+$102.88	None
1957	+517,677	+151.19	None
(Present judge took office at this point)			
1958	+$135,515	+$46.77	822
1959	−61,069	−21.55	745
1960	−113,960	−35.00	1,667

The essence of these charts is that through fiscal year 1957 the juvenile court, with a significantly great number of cases filed, operated on less money, had fewer employees, greatly increased collections, and had no backlog. From fiscal year 1957 to date this court has been reorganized, received increased appropriations, given additional personnel, had fewer filed cases, but collections have dropped precipitately and a large backlog has developed. All steps which might be expected to improve the operation of the court seem to have had the opposite result.

Related directly or indirectly to the autonomy and management of the court are the conflicts and confusions which have developed between the court and other District agencies. Mild to severe conflicts have been noted in the press and have been the subject of attention by House and Senate Appropriations Committees. Involved have been the Office of the Corporation Counsel, the Youth Aid Division of the Police Department, and the Department of Public Welfare. Conflicts related to the handling of adults charged with contributing to delinquency, handling of support cases, control over juveniles committed for rehabilitation, referral of juvenile first offenders involved in very minor infractions, and other problems. To minimize such incidents, clarifying amendments may be necessary.

PART III—AMENDMENTS TO THE JUVENILE COURT ACT

The subcommittees feels that the foregoing parts of this report indicate a court that is in genuine difficulty. In no other facet of the judicial system do delays have more far-reaching consequences to the community than in a juvenile court. The decision of the Congress must be such as to bring the caseload in the juvenile court to current status and insure that it be kept current. The loss of more than $400,000 per year in court collections must be corrected.

First considerations leading to legislative action to assure an efficient and effective court are: (1) Will additional judicial personnel alone provide efficient handling of the court load? (2) Should the juvenile court continue as an autonomous body? (3) If supervision is needed, should the juvenile court become a branch of the municipal court or a unit within the domestic relations branch of the municipal court of the District of Columbia?

Subordinate to the above major issues, but meriting attention, are other amendments suggested to the subcommittee or which have appeared as closely related to juvenile matters.

1. Referees: Referees are used in many juvenile courts. The referee usually handles less serious offenses and places his findings and recommendations before the judge for final action. Under procedure instituted by the court about 2 years ago, the Director of Social Work conducts hearings. This procedure closely parallels that used in courts served by referees. These director's hearings have reduced the caseload handled by the court since a substantial portion of juvenile cases have been disposed of at that level.

2. Waiver by the court: Under terms of the Juvenile Court Act, the judge may waive to the U.S. district court the case of any juvenile 16 years of age or older who has committed an offense which would constitute a felony. Pending court action or after disposition, the same juvenile may be brought before the juvenile court for another offense. If the offense is a misdemeanor, the case cannot be waived and the same juvenile has cases pending before both the juvenile and adult courts. Waiver of the child rather than the offense would prevent such a contradiction wherein the same person is a juvenile offender in one court and an adult criminal in the other court.

3. Determining sufficiency of complaints at intake: Complaints against juveniles referred to the juvenile court are not evaluated for their legal sufficiency at the time of referral. After a complaint has been investigated and a full social study made, a determination is reached as to whether the case shall be petitioned to the court. If it is to

[9] As a matter of practice, the juvenile court is exercising exclusive jurisdiction on criminal nonsupport cases since the U.S. district court has exercised no jurisdiction in such cases for several years. Municipal court for the District of Columbia enforces reciprocal nonsupport laws in the District and reports a growing volume of collections within the District. Funds so collected, however, accrue to the support of persons located outside the District of Columbia.

[10] Hearings—Senate District of Columbia Committee, Feb. 4, 1959, p. 12; Hearings—House Committee on Appropriations, District of Columbia Appropriations 1960, p. 515.

[11] Hearings—House Committee on Appropriations, District of Columbia Appropriations 1959, p. 395.

[12] Hearings—House Committee on Appropriations, District of Columbia Appropriations 1960, pp. 509–517.

[13] Hearings—House Committee on District of Columbia, July 23, 1959, p. 20.

be petitioned, the legal sufficiency of the complaint is determined by the Assistant Corporation Counsel. If there is inadequate legal basis for action, the case is dropped. Power in the hands of the Corporation Counsel to determine whether a complaint shall be petitioned to court before other disposition and determine the legal sufficiency of complaints at intake may better protect the interests of the public, the juvenile, and save staff time and effort.

4. Jury trials for juveniles: The juvenile court of the District of Columbia must grant a jury trial to a juvenile when request is made under terms of the Juvenile Court Act. This may be the only jurisdiction where such right is provided in law. The Judicial Conference of the District of Columbia recommends that the jury-trial provision for juveniles be repealed.

5. Waiver of incorrigible habitual offenders: The repeat offender, demonstrably not yielding to rehabilitative efforts, and whose offenses remain misdemeanors, is beyond the benefit of services offered by the juvenile court. Power to the juvenile court to waive such offenders for commission of misdemeanors to the municipal court would remove them from contact and association with other juveniles who might be influenced to their detriment.

6. Lowering of age limits: The present age limit for juveniles is 18. The great majority of repeat offenders and hardened young criminals are found between the ages of 16 and 18. Lowering the age limit below 18 for all offenders or only repeat offenders, for felonies or felonies and misdemeanors, would remove those beyond probable help by the juvenile court rehabilitation resources and minimize their potential of detrimental influence on other juveniles.

7. Opening court records: Present law closes the records on juvenile cases to the public and the press. In consequence the press refrains from printing names of juveniles involved in crime regardless of the source of information. Strong authority is found on both sides of the issue of secrecy of juvenile files. Whether secrecy has helped to promote increased delinquency or whether it has been a brake on an increase which would otherwise have been more rapid cannot be demonstrated by any proof. Opening records of juveniles 16 and over may merit examination in the light of present trends and beliefs of juvenile experts.

8. Juvenile traffic cases: The juvenile 16 years of age enjoys the status and privileges of an adult as to driving a car with the exception that he must go to the juvenile court for any violation of traffic regulations, including those minor violations for which an adult may post collateral. It is questioned if such minor violations constitute delinquency. Removal of such minor violations from the court's jurisdiction will lighten the court's load without increasing delinquency rates in the District of Columbia.

SPECIAL ORDER VACATED

Mr. PASSMAN. Mr. Speaker, I ask unanimous consent to vacate the special order granted me for today that I requested on yesterday.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

UNEMPLOYMENT

Mr. BAILEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. BAILEY. Mr. Speaker, I have asked this time today in order to call the attention of my colleagues to misleading information contained in an Associated Press dispatch of yesterday commenting on a campaign booklet issued by the Republican National Committee boasting about our great national prosperity.

I want to refer to the "Operations Voracity" group of Republican Members of Congress the following article, under a Charleston, W. Va., dateline, in which the Federal Department of Employment Security releases information to the effect that 6,800 jobs in West Virginia were lost between June 15 and July 15. These jobs were nonagricultural employment. This same report shows there are 10,700 less people employed in industry in my State than there were 1 year ago.

All of this talk about national prosperity is so much hooey to the better than 80,000 unemployed people in the State of West Virginia. I challenge the members of the "Operations Voracity" group individually and collectively to explain why this great general prosperity they boast about does not apply to West Virginia.

[From the Clarksburg Exponent, Aug. 27, 1960]

SIX THOUSAND EIGHT HUNDRED LOSE THEIR JOBS

CHARLESTON.—About 6,800 workers in West Virginia lost their jobs in the latest month reported on by the Department of Employment Security.

This was from mid-June to mid-July. The loss reduced nonagricultural employment in the State to 450,000 or 10,700 less than a year earlier.

Here are some of the details as presented in the Department's report, released Friday:

"Manufacturing, with a July work force of 127,900, was 2,100 below June's 130,000 and lagged July 1959 by 2,600. Nonmanufacturing industries reported over-the-month losses totaling 4,800 as employment dropped to an estimated 322,000. This indicated a cutback of 8,100 during the past year.

"The sharp drop in demand for steel, coupled with heavy imports of glass and vacation taking without pay, all combined to reduce mid-July employment in the durable goods industries. The 76,900 at work during the reporting period represented a drop of 2,200 over the month and 3,700 over the year."

TRANSFER OF CASES BETWEEN DISTRICT COURTS AND COURT OF CLAIMS

Mr. FORRESTER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5396) to amend title 28 of the United States Code to provide for transfer of cases between the district courts and the Court of Claims, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 8, strike out "unless the parties consent to dismissal" and insert "if it be in the interest of justice".

Page 1, line 9, after "Claims" insert ", where the case shall proceed as if it had been filed in the Court of Claims on the date it was filed in the district court".

Page 2, line 6, strike out "unless the parties consent to dismissal" and insert "if it be in the interest of justice".

Page 2, line 8, after "filed" insert ", where the case shall proceed as if it had been filed in the district court on the date it was filed in the Court of Claims".

Page 2, preceding line 12, insert:

"SEC. 3. The first sentence of section 2 of the Act of March 9, 1920 (title 46, U.S.C. 742), is amended to read as follows:

"'In cases where if such vessel were privately owned or operated, or if such cargo were privately owned or possessed, or if a private person or property were involved, a proceeding in admiralty could be maintained, any appropriate nonjury proceeding in personam may be brought against the United States or against any corporation mentioned in section 1 of this Act.'"

Page 2, line 12, strike out "3" and insert "4".

Page 2, line 12, after "by" insert "sections 1 and 2 of".

Page 2, line 15, after "Claims." insert "The amendment made by section 3 shall apply to any case or proceeding brought after the date of enactment of this Act."

Amend the title so as to read: "An act to amend title 28 of the United States Code to provide for transfer of cases between the district courts and the Court of Claims and for other purposes."

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

RESIGNATION FROM COMMITTEE

The SPEAKER laid before the House the following resignation from a committee:

AUGUST 29, 1960.

Hon. SAM RAYBURN,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the House Committee on Ways and Means, effective immediately.

Sincerely yours,

JOHN A. LAFORE, Jr.,
Thirteenth District, Pennsylvania.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

ELECTION TO COMMITTEE ON WAYS AND MEANS

Mr. HALLECK. Mr. Speaker, I offer a resolution, House Resolution 634, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That WALTER M. MUMMA, Pennsylvania, be and he is hereby, elected a member of the standing Committee of the House of Representatives on Ways and Means.

The resolution was agreed to.

A motion to reconsider was laid on the table.

OVERALL LIMITATION ON FOREIGN TAX CREDIT

Mr. MILLS. Mr. Speaker, I call up the conference report on the bill (H.R.

10087) to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2199)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10087) to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit, having met after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 11, 12, 13, 14, 15, and 16, and agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 2. Section 1503 of the Internal Revenue Code of 1954 (relating to computation and payment of tax in case of consolidated returns) is amended by adding at the end thereof the following new subsection:

"'(d) SPECIAL RULE FOR APPLICATION OF FOREIGN TAX CREDIT WHEN OVERALL LIMITATION APPLIES.—

"'(1) IN GENERAL.—If the affiliated group includes one or more Western Hemisphere trade corporations (as defined in section 921), and if for the taxable year an election under section 904(b)(1) (relating to election of overall limitation on foreign tax credit) is in effect, then the amount of taxes paid or accrued to foreign countries and possessions of the United States by such Western Hemisphere trade corporations which may be taken into account for purposes of section 901 shall be reduced by the amount (if any) by which—

"'(A) the amount of such taxes (or, if smaller, the amount of the tax which would be computed under subsection (a), if such corporations were not Western Hemisphere trade corporations, with respect to the portion of the consolidated taxable income attributable to such corporations), exceeds

"'(B) the amount of the tax computed under subsection (a) with respect to the portion of the consolidated taxable income attributable to such corporations.

"'(2) ADJUSTMENT IN CASE OF CERTAIN PUBLIC UTILITIES.—So much of any reduction under paragraph (1) as is attributable to taxes paid or accrued to foreign countries and possessions of the United States by one or more corporations which are both Western Hemisphere trade corporations and regulated public utilities shall be decreased by the excess of—

"'(A) the amount of tax computed under subsection (a) with respect to the portion of the consolidated taxable income attributable to income derived, by the corporations in the affiliated group which are not Western Hemisphere trade corporations, from sources within the foreign countries referred to in paragraph (3)(B), over

"'(B) the amount of taxes paid or accrued to such foreign countries by the corporations referred to in subparagraph (A). This paragraph shall apply only if the corporations described in subparagraph (A) derive 80 percent or more, of the gross income (computed without regard to capital gains and losses) which they derive from sources within the foreign countries described in paragraph (3)(B), from regulated public utilities and from operations as regulated public utilities.

"'(3) SPECIAL RULES.—

"'(A) For purposes of paragraph (2), a corporation is a regulated public utility only if it is a regulated public utility within the meaning of subparagraph (A) (other than clauses (ii) and (iii) thereof) or (D) of subsection (c)(1). For purposes of the preceding sentence, subsection (c)(2) shall be applied as if subsection (c)(1) were limited to subparagraphs (A)(i) and (D) thereof.

"'(B) For purposes of paragraph (2), the foreign countries referred to in this subparagraph include only any country from which any public utility referred to in the first sentence of paragraph (2) derives the principal part of its income.

"'(C) For purposes of paragraph (1)(A), the amount of tax which would be computed with respect to the portion of the consolidated taxable income attributable to any corporation or corporations shall be determined without regard to the increase of 2 percent provided in subsection (a).'"

And the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with the following amendments:

On page 4 of the Senate engrossed amendments, strike out line 5 and "any" on line 6, and insert "SEC. 5. Any".

On page 4 of the Senate engrossed amendments, line 7, strike out "the date of the enactment of this Act" and insert the following: "October 1, 1955,".

On page 4 of the Senate engrossed amendments, line 22, strike out "unless" and insert "if".

On page 5 of the Senate engrossed amendments, line 1, strike out "would be" and insert "would not be"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 6. (a) Subpart A of part III of subchapter A of chapter 61 of the Internal Revenue Code of 1954 (relating to information concerning persons subject to special provisions) is amended by renumbering section 6038 as 6039, and by inserting after section 6037 the following new section:

"'SEC. 6038. INFORMATION WITH RESPECT TO CERTAIN FOREIGN CORPORATIONS.

"'(a) REQUIREMENT.—

"'(1) IN GENERAL.—A domestic corporation shall furnish, with respect to any foreign corporation which it controls (within the meaning of subsection (c)(1)) and with respect to any foreign subsidiary of any such foreign corporation (within the meaning of subsection (c)(2)), such information as the Secretary or his delegate may prescribe by regulations relating to—

"'(A) the name, the principal place of business, and the nature of business of such foreign corporation or foreign subsidiary, and the country under whose laws incorporated;

"'(B) the accumulated profits (as defined in section 902(c)) of such foreign corporation or foreign subsidiary, including the items of income (whether or not included in gross income under chapter 1), deductions (whether or not allowed in computing taxable income under chapter 1), and any other items taken into account in computing such accumulated profits;

"'(C) a balance sheet for such foreign corporation or foreign subsidiary, listing assets, liabilities, and capital;

"'(D) transactions between such foreign corporation or foreign subsidiary and—

"'(i) any foreign corporation controlled by the domestic corporation,

"'(ii) any foreign subsidiary of a foreign corporation controlled by the domestic corporation, and

"'(iii) the domestic corporation or any shareholder of the domestic corporation owning at the time of the transaction takes place 10 percent or more of the value of any class of stock outstanding of the domestic corporation; and

"'(E) a description of the various classes of stock outstanding, and a list showing the name and address of, and number of shares held by, each citizen or resident of the United States and each domestic corporation who is a shareholder of record owning at any time during the annual accounting period 5 percent or more in value of any class of stock outstanding of such foreign corporation or foreign subsidiary.

"'(2) PERIOD FOR WHICH INFORMATION IS TO BE FURNISHED, ETC.—The information required under paragraph (1) shall be furnished—

"'(A) in the case of a foreign corporation, for its annual accounting period ending with or within the domestic corporation's taxable year, and

"'(B) in the case of any foreign subsidiary of such foreign corporation, for such subsidiary's annual accounting period ending with or within such foreign corporation's annual accounting period described in subparagraph (A).

The information required under this subsection shall be furnished at such time and in such manner as the Secretary or his delegate shall by regulations prescribe.

"'(3) LIMITATION.—No information shall be required to be furnished under this subsection with respect to any foreign corporation or foreign subsidiary for any annual accounting period unles such information was required to be furnished under regulations in effect on the first day of such annual accounting period.

"'(b) EFFECT OF FAILURE TO FURNISH INFORMATION.—If a domestic corporation fails to furnish, within the time prescribed under paragraph (2) of subsection (a), any information with respect to any foreign corporation or foreign subsidiary required under paragraph (1) of subsection (a), then, in applying section 902 (relating to foreign tax credit for corporate stockholder in foreign corporation) to such domestic corporation (or to any person who acquires from any person any portion of the interest of such domestic corporation in any such foreign corporation or foreign subsidiary, but only to the extent of such portion) for any taxable year, the amount of taxes paid or deemed paid by each foreign corporation and foreign subsidiary with respect to which the domestic corporation is required to furnish information during the annual accounting period or periods with respect to which such information is required under such paragraph (2) of subsection (a) shall be reduced by 10 percent. If such failure continues 90 days or more after notice by the Secretary or his delegate to the domestic corporation, then the amount of the reduction under this subsection shall be 10 percent plus an additional 5 percent for each 3-month period, or fraction thereof, during which such failure to furnish information continues after the expiration of such 90-day period. No taxes shall be reduced under this subsection more than once for the same failure. For purposes of this subsection, the time prescribed under paragraph (2) of subsection (a) to furnish information (and the beginning of

the 90-day period after notice by the Secretary) shall be treated as being not earlier than the last day on which (as shown to the satisfaction of the Secretary or his delegate) reasonable cause existed for failure to furnish such information.

"'(c) CONTROL, ETC.—For purposes of this section—

"'(1) If at any time during its taxable year a domestic corporation owns more than 50 percent of the voting stock of a foreign corporation, it shall be deemed to be in control of such foreign corporation.

"'(2) If at any time during its annual accounting period a foreign corporation owns more than 50 percent of the voting stock of another foreign corporation, such other corporation shall be considered a foreign subsidiary of the corporation owning such stock.

"'(d) ANNUAL ACCOUNTING PERIOD.—For purposes of this section, the annual accounting period of a foreign corporation or of a foreign subsidiary is the annual period on the basis of which such foreign corporation or such foreign subsidiary regularly computes its income in keeping its books.

"'(e) CROSS REFERENCE.—

"'For provisions relating to penalties for violations of this section, see section 7203.'

"(b)(1) The table of sections for such subpart is amended by striking out the last item and inserting in lieu thereof the following:

"'SEC. 6038. Information with respect to certain foreign corporations.

"'SEC. 6039. Cross references.'

"(2) Section 902 of the Internal Revenue Code of 1954 (relating to credit for corporate stockholder in foreign corporation) is amended by adding at the end thereof of the following new subsection:

"'(e) CROSS REFERENCE.—

"'For reduction of credit with respect to dividends paid out of accumulated profits for years for which certain information is not furnished, see section 6038.'

"(c) The amendments made by subsections (a) and (b) shall apply to taxable years of domestic corporations beginning after December 31, 1960, with respect to information relating to a foreign corporation or a foreign subsidiary described in section 6038(a) of the Internal Revenue Code of 1954 (as added by subsection (a)) for its annual accounting periods beginning after December 31, 1960."

And the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with the following amendments:

On page 8 of the Senate engrossed amendments, strike out lines 5 and 6 and in lieu thereof insert the following:

"SEC. 7. (a) Section 6046 of the Internal Revenue Code of 1954 (relating to information returns as to formation or reorganization of foreign corporations) is amended to read as follows:"

On page 10 of the Senate engrossed amendments, line 2, strike out the closing quotation marks, and after line 2 insert the following:

"(d) CROSS REFERENCE.—

"For provisions relating to penalties for violations of this section, see section 7203."

"(b) The table of sections for subpart B of part III of chapter 61 of the Internal Revenue Code of 1954 is amended by striking out the last item and inserting in lieu thereof the following:

"'Sec. 6046. Returns as to creation or organization, or reorganization, of foreign corporations."

And the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment as follows:

On page 10 of the Senate engrossed amendments, line 4, strike out "amendment" and insert "amendments"; and the Senate agree to the same.

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10087) to amend the Internal Revenue Code of 1954 to permit taxpayers to elect an overall limitation on the foreign tax credit, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

Amendments Nos. 1, 2, 3, and 4: Under present law (subpart A of part III of subchapter N of chapter 1 of the Internal Revenue Code of 1954) income taxes paid to a foreign country or a possession of the United States may be taken as a credit against income taxes otherwise due the United States. However, under section 904 of such Code, the taxes of each foreign country which may be taken as a credit are limited to the same proportion of the United States income tax (before the credit) which the taxable income from that foreign country is of the taxpayer's total taxable income. This is known as the "per-country" limitation.

The bill as passed by both the House and the Senate provides an alternative limitation, to be applied at the election of the taxpayer. This alternative limitation, known as the "overall limitation", applies to the amount of taxes paid to all foreign countries taken together, and allows as a credit against the United States income tax the same proportion of the United States tax (before the credit) which the taxable income from sources without the United States is of the total taxable income.

Under the bill as passed by the House, taxpayers could make their initial shift from the per-country limitation to the overall limitation at any time. Once under the overall limitation they could of their own volition shift back to the per-country limitation after an interval of 5 years (or after a shorter period if they had the permission of the Treasury Department). After having shifted back to the per-country limitation they could of their own volition again return to the overall limitation after a 5-year interval (or lesser time with the consent of the Treasury Department). Senate amendments Nos. 1, 2, 3, and 4 provide that taxpayers may at their own volition elect to make an initial shift from the per-country to the overall limitation at any time, but thereafter they can change from the overall limitation to the per-country limitation, or vice versa, only with the consent of the Treasury Department.

The House recedes.

Amendments Nos. 5 and 6: These are clerical amendments. The House recedes.

Amendments Nos. 7 and 8: Under the bill as it passed the House, the amount of income taxes paid to foreign countries which was in excess of the amount which could be credited against the United States income tax for the current year could be carried back or forward from a year in which the per-country limitation was used to a year in which either the per-country limitation or the overall limitation was used, but could not be carried from an overall limitation year to a per-country limitation year. Under Senate amendments Nos. 7 and 8, such excess cannot be carried either from a per-country limitation year to an overall limitation year, or from an overall limitation year to a per-country limitation year (but may, as under the bill as passed by the House, be carried from one per-country limitation year to another per-country limitation year, or from one overall limitation year to another overall limitation year).

The House recedes.

Amendment No. 9: This is a technical amendment. The House recedes.

Amendment No. 10: Senate amendment No. 10 adds a new subsection (d) to section 1503 of the Internal Revenue Code of 1954, relating to computation and payment of tax in case of consolidated returns. This new subsection provides that in the case of a consolidated return by an affiliated group of corporations which includes one or more Western Hemisphere trade corporations in a year in which the new overall limitation applies, the amount of taxes paid to foreign countries or United States possessions with respect to the income of Western Hemisphere trade corporations (which are taxed at a 38 percent rate instead of the regular corporate 52 percent rate) in excess of a 38 percent rate, but not in excess of a 52 percent rate, should not be taken into account in computing the foreign tax credit of the affiliated group. The bill as passed the House contained no comparable provision.

The House recedes with an amendment. The conference agreement retains the substance of the Senate amendment as a general rule which appears in paragraph (1) of the new subsection (d). As under the Senate amendment, the rule provided in this paragraph denies, where the overall limitation is used, the right to credit certain foreign taxes[1] paid by the Western Hemisphere trade corporations against the United States taxes on income attributable to corporations in the same affiliated group which are not Western Hemisphere trade corporations. The taxes which may not be credited are those in excess of what the United States taxes are for these Western Hemisphere trade corporations (generally resulting in an effective tax rate slightly under 38 percent), but only to the extent these foreign taxes do not exceed the United States taxes which would be imposed on these corporations if they were not Western Hemisphere trade corporations (generally resulting in an effective tax rate slightly under 52 percent).[2] Thus if all the Western Hemisphere trade corporations in a consolidated group in the aggregate pay foreign taxes which, in terms of United States methods of computing income, result in a tax at the effective rate of, say, 32 percent then paragraph (1) would not come into operation. However, if the effective rate of the tax exceeds 38 percent,[3] then paragraph (1) denies the use of such excess foreign taxes as credits against the United States taxes on other foreign income in the consolidated group. However, once this effective rate reaches 52 percent,[4] to the extent of any taxes over this effective rate the taxes

[1] All references to foreign taxes are intended to also include taxes of United States possessions.

[2] This is determined without regard to the additional 2 percent tax on consolidated returns

[3] This is an approximation since it does not take into account the surtax exemption.

[4] This is an approximation since it does not take into account the surtax exemption.

are eligible for crediting. The omission in this paragraph of any reference to the computation of the United States taxes involved as being before allowance of the foreign tax credit does not have any substantive effect but merely conforms with the general references in the Code to income taxes as those before the allowance of credits.

Under the conference agreement, the reduction in the taxes of Western Hemisphere trade corporations which may be credited in the case of taxes on other incomes, i.e., the general rule provided by paragraph (1), may itself be reduced where the Western Hemisphere trade corporations are also regulated public utilities. An adjustment is provided for in a new paragraph (2) of the subsection (d). This paragraph (2) makes the reduction provided by paragraph (1) inapplicable in the case of excess foreign taxes of Western Hemisphere trade corporations which are also public utilities (the excess referred to is the taxes which, under paragraph (1) of the new subsection (d), may not be credited against U.S. taxes on the income of corporations other than Western Hemisphere trade corporations) but only to the extent of the excess of U.S. taxes over the foreign taxes paid by corporations in the same affiliated group which are other than Western Hemisphere trade corporations, with respect to income derived from these same foreign countries.

The adjustment provided by paragraph (2) is to be available only when the corporations involved, which are not Western Hemisphere trade corporations, receive 80 percent or more of the gross income (from the foreign countries specified in the conference agreement) from regulated public utilities and from their own operations (where they are regulated public utilities). Income from regulated public utilities for this purpose is intended to include dividend and interest income received from regulated public utilities as well as commissions, fees, etc., received from such utilities as payments for the rendition of technical and management services. Capital gains and losses are not taken into account for the purposes of this computation. Moreover, it is not intended, in the computation of gross income for this purpose, that any amount be taken into account more than once.

A new paragraph (3) in subsection (d) specifies in subparagraph (A) that the regulated public utility referred to is one which is described in section 1503(c)(1)(A) (other than clauses (ii) and (iii) thereof) or (D). Thus, it must be a corporation engaged in the furnishing or sale of electric energy, gas, water or sewerage disposal services or telephone or telegraph services and 80 percent or more of its income must be derived from some combination of these sources. The rates must be established or approved by the agencies specified in the law or the requirements of the last sentence of section 1503(c)(2) (relating to treatment of unregulated rates) must be satisfied.

Subparagraph (B) of paragraph (3) provides that the foreign countries referred to in paragraph (2) are those from which the public utility referred to in the first sentence of paragraph (2) derives the principal part of its income. Where more than two countries are involved this means the country from which the utility derives more income than it derives from any other country.

Subparagraph (C) of paragraph (3) provides that, for purposes of the computation of United States tax required by paragraph (1)(A), the 2 percent additional tax provided by section 1503(a) is to be omitted.

The adjustment provided in paragraph (2) can be illustrated by the following example: Assume that four Western Hemisphere trade corporations, which are regulated public utilities, operate in four different Latin American countries and have an aggregate consolidated taxable income of $100,000 on which they paid foreign taxes of $45,000. The United States tax in such a case (ignoring the surtax exemption) would be $38,000. Assuming the overall limitation is used, only $38,000 of the $45,000 could be claimed as a foreign tax credit as the result of the application of subsection (d)(1). However, assume also that the other two corporations in the same consolidated group (which are not Western Hemisphere trade corporations and which meet the 80 percent gross income test of the new section 1503(d)(2)) receive $50,000 of consolidated taxable income from the same four countries on which they pay taxes to those countries of $22,000. The United States tax in this case (again ignoring the surtax exemption but including the additional 2 percent tax on certain consolidated income) would be $27,000. Paragraph (2) provides in such a case that $7,000 of excess foreign taxes paid by the four Western Hemisphere trade corporations ($45,000 less $38,000) is available to be claimed as a credit to the extent the United States taxes on the other income in the consolidated group from the same foreign countries ($27,000) exceeds the taxes paid these foreign countries with respect to this income ($22,000). Thus $5,000 of $7,000 in this case could be claimed as a credit.

Amendments Nos. 11, 12, 13, 14, 15, and 16: These are clerical amendments. The House recedes.

Amendment No. 17: Senate amendment No. 17 added a new section to the bill as it passed the House. Under this new section, any amount received after 1949 and before the enactment of the bill from a corporation (1) formed exclusively for the purpose of, and engaged exclusively in, operating without profit a scientific laboratory for the Atomic Energy Commission, and (2) operated solely on funds appropriated to the Commission, by an individual as reimbursement for moving himself and his immediate family, his household goods, and his personal effects to a new place of residence in order to accept employment with such corporation, is to be treated (for Federal income tax purposes) as an amount not includible in gross income to the extent such amount did not exceed the expenses actually paid or incurred for such purposes. This provision was to apply unless the individual was advised at the time of his employment by an authorized officer, employee, or agent of the corporation that the amount of reimbursement would be includible in gross income. In any case in which a refund or credit of an overpayment resulting from the application of this provision is prevented by the operation of any law or rule of law (other than ch. 74 of the Internal Revenue Code of 1954, relating to closing agreements and compromises, and the corresponding provisions of prior law), such refund or credit may be made or allowed if claim is filed within six months from the enactment of the bill, but no interest is payable or allowable on any refund or credit payable by reason of the application of this waiver.

The House recedes with amendments. Under the conference agreement, the new section added by the Senate amendment No. 17 is retained but applies only to amounts received before October 1, 1955 (rather than before the date of the enactment of the bill). In addition, this provision applies only to cases where the individual involved was advised (either expressly or by clear implication) at the time of his employment by an authorized official of the corporation that the amount of the reimbursement would not be includible in gross income.

It is the understanding of the conferees that prior to about September 1, 1955, the officials of a corporation engaged exclusively in operating without profit a scientific laboratory for the Atomic Energy Commission had assumed that such expense reimbursement was not taxable income. It is further understood that professional and skilled employees who were hired by the corporation before that date were either expressly told or given the clear impression that their reimbursed traveling or moving expenses were not taxable income to them. For example, the conferees have been advised that in many cases new employees were told all of their expenses of moving would be paid by the corporation, with no mention made as to the taxable nature of such reimbursed expenses. Under such circumstances it is the view of the conferees that prior to September 1955, corporate officials of the corporation were, in effect, advising newly hired employees that they would not be taxable with respect to such expense reimbursement.

Amendment No. 18: Senate amendment No. 18 adds a new section to the bill as it passed the House redesignating section 6038 of the Internal Revenue Code of 1954 as section 6039 and inserting a new section 6038. Under the Senate amendment, the new section 6038 provides that, if a domestic corporation controls any foreign corporation, it must furnish such information with respect to such foreign corporation (and with respect to any foreign subsidiary of such foreign corporation) as the Secretary of the Treasury or his delegate prescribes by forms and regulation as necessary to carry out the provisions of the income tax laws. If such information is not furnished at the time required by the Secretary or his delegate, no credit is allowable to any person under section 902 (relating to foreign tax credit for corporate stockholder in foreign corporation) for taxes paid by such foreign corporation or its subsidiaries for their taxable years for which the domestic corporation failed to furnish information.

The House recedes with an amendment substantially revising the new section 6038. Under the conference agreement section 6038 specifies the information required to be furnished by the domestic corporation, concerning any foreign corporation it controls and any of such foreign corporation's subsidiaries, as such information as the Secretary or his delegate prescribes by regulations relating to specific listed items. In general, these include corporation name; country of incorporation; nature and place of business; profits, deductions, foreign taxes, and any other items taken into account to determine accumulated profits; a balance sheet showing assets, liabilities, and capital; transactions with certain related persons; and certain shareholders who are citizens or residents of the United States or who are domestic corporations.

Such information must be furnished as to the foreign corporation for its annual accounting period ending with or without the domestic corporation's taxable year and as to the subsidiary for its annual accounting period ending with or within the foreign corporation's annual accounting period. The information must be furnished at such time and in such manner as the Secretary or his delegate prescribes by regulations, but only such information shall be required for any annual accounting period as is required to be furnished under regulations in effect on the first day of the period.

Subsection (b) provides that, if the domestic corporation fails, by the time prescribed by regulations for a taxable year, to furnish any information concerning any one or more of the foreign corporations or subsidiaries, then in applying section 902 (relating to foreign tax credit for corporate shareholder in foreign corporation) to such domestic corporation (or to any person who acquires from any person any portion of the interest of such domestic corporation in any such foreign corporation or subsidiary, but only to the extent of such portion) for any taxable year, the amount of taxes paid

or deemed paid by each foreign corporation and subsidiary during the accounting period or periods for which the domestic corporation was required to furnish information for the taxable year of the failure shall be reduced by 10 percent. If the failure continues 90 days or more after notice by the Secretary or his delegate, the reduction is 10 percent plus 5 percent for each 3 month period or part thereof during which the failure continues after the 90-day period. No taxes, however, shall be reduced more than once for the same failure. For purposes of the new section 6038(b), the time to furnish information, and the beginning of the 90-day period is treated as delayed, however, until the last day (as shown to the satisfaction of the Secretary or his delegate) that reasonable cause exists for the failure.

Under subsection (c) the domestic corporation is deemed to control a foreign corporation 50 percent of whose voting stock it owns, and the foreign corporation is deemed to have as a subsidiary another foreign corporation 50 percent of whose voting stock it owns.

Subsection (d), adapting the definition contained in section 441 of the Internal Revenue Code of 1954, defines "annual accounting period" of a foreign corporation or its foreign subsidiary as the annual period on the basis of which such corporation keeps its books. The term may refer to an accounting period of less than 1 years, however, where for example the foreign income, war profits, and excess profits taxes are determined on the basis of an accounting period of less than 1 year as described in section 902(c)(2).

The new section 6038 applies to taxable years of a domestic corporation beginning after December 31, 1960, with respect to information as to a foreign corporation or foreign subsidiary for annual accounting periods beginning after December 31, 1960.

Amendment Nos. 19 and 20: Senate amendment No. 19 adds a new section to the bill as it passed the House. The amendment would modify section 6046 of the Internal Revenue Code of 1954. Present section 6046 requires every attorney, accountant, fiduciary, bank, trust company, financial institution, or other person, who advises as to the formation or reorganization of a foreign corporation, to file a return in accordance with regulations prescribed by the Secretary of the Treasury or his delegate. The regulations under this section provide that an attorney need not furnish any information which he has obtained by virtue of the attorney-client relationship. As a result, existing section 6046 has had little practical effect. Attorneys are not free to furnish information which is the subject of privileged communications, and in most cases those not entitled to invoke the privilege contend that they have merely given general advice or performed clerical services and therefore possess no substantive information.

In order to obtain more comprehensive information concerning a greater number of foreign corporate organizations and reorganizations than is available under the present section 6046, the section is amended to require returns relating to the creation, organization, or reorganization of foreign corporations to be made by every citizen or resident of the United States who was an officer or director of the corporation at any time within 60 days after its creation, organization, or reorganization, and by every U.S. shareholder of the corporation owning at least 5 percent of its outstanding stock at any time within such 60 days. This amendment eliminates from the section the problem resulting from privileged communications and places the responsibility for making returns on those persons who are most likely to have within their possession the information desired.

Senate amendment No. 20 adds a new section to the bill providing that the amendment to section 6046 is to apply only with respect to foreign corporations created or organized, or reorganized, after the date of the enactment of the bill.

Under the conference agreement, the House recedes on Senate amendments Nos. 19 and 20 with technical amendments.

W. D. MILLS,
AIME J. FORAND,
CECIL R. KING,
N. M. MASON,
JOHN W. BYRNES,
Managers on the Part of the House.

Mr. MILLS (during the reading of the statement). Mr. Speaker, in view of the fact that the statement of the managers on the part of the House is rather lengthy and since it is the result of unanimous agreement among the managers on the part of the House, I ask unanimous consent that the further reading of the statement be dispensed with since it is printed in the RECORD.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. MILLS. Mr. Speaker, your House conferees have reached agreement with the conferees of the other body on the bill, H.R. 10087, which, you will recall, deals with the limitation on the credit allowable against U.S. income taxes for taxes paid to foreign countries and U.S. possessions.

As passed by the House, H.R. 10087 gave taxpayers the privilege of electing to compute the foreign tax credit to which they were entitled under an overall limitation rather than under the per-country limitation provided under present law. The bill provided that once such an election had been made it could be changed only with the consent of the Treasury, except that after 5 years taxpayers were permitted to shift their election without Treasury consent. In addition, the House bill provided that any unused foreign tax credits arising in a per-country limitation year could be carried over and used in either another per-country limitation year or in an overall limitation year, but that any such credits arising in an overall limitation year could only be carried over to another year in which the overall limitation applied.

The other body made three substantive amendments that related to the bill in the form in which it was passed by the House and which operated to restrict its application.

The first of these amendments provided that with the exception of an initial election to use the overall limitation, any shift from one limitation to the other could only be made with the approval of the Treasury Department. This amendment was designated to preclude the changing of the applicable limitation after 5-year intervals for tax reasons alone. It is expected, however, that the Treasury will permit changes where business conditions change.

The second restrictive amendment made by the other body provided that unused foreign tax credits from a per-country limitation year or from an overall limitation year may be carried over and used only in another year in which the same limitation was applicable. Your House conferees were advised that this amendment precluded an initial nonrecurring revenue loss of some $30 million which would result from a windfall gain to taxpayers who have large accumulated but unused tax credits under the present per-country limitation.

Under the conference agreement, both of these restrictive amendments were retained.

The third restrictive amendment made by the other body to the provisions of H.R. 10087 as passed by the House related to the application of the overall limitation on the foreign tax credit where a consolidated tax return is filed by an affiliated group of corporations which includes one or more Western Hemisphere trade corporations. Under the House bill any unused tax credits of a Western Hemisphere trade corporation which was a member of an affiliated group which elected the overall limitation could be applied to offset the U.S. tax on the foreign source income of other members of the group which were not Western Hemisphere corporations.

The other body, however, amended the House bill to provide that where the unused tax credits of the Western Hemisphere trade corporations in the group were attributable solely to the fact that such corporations are taxed at only a rate of about 38 percent rather than the generally applicable U.S. corporate rate of about 52 percent, such credits could not be used to offset any U.S. tax on the foreign source income of other non-Western Hemisphere trade corporation members of the group.

Under the conference agreement the substance of the amendment made by the other body is retained as a general rule. However, your conferees were of the opinion that the offsetting of the unused tax credits of the Western Hemisphere trade corporation members of an affiliated group was warranted where they were applied against U.S. tax on income realized by the non-Western Hemisphere trade corporation members of the group from sources within the same countries in which the Western Hemisphere corporations realized the principal part of their income. This seemed to be particularly true where the Western Hemisphere trade corporations producing the income were regulated public utilities and therefore not competitive with domestic enterprises.

Accordingly, under the conference agreement, any unused tax credits of the Western Hemisphere trade corporation members of the group, if they are regulated public utilities, are permitted to offset the U.S. tax on the income of other group members who are not Western Hemisphere trade corporations provided the income realized by the non-Western Hemisphere trade corporation group members is derived from sources within the countries in which the Western Hemisphere trade corporation members of the group, which are public utilities, realize the principal part of their income. However, to further restrict the application of this provision to public utility-type income, 80 percent or more of the

gross income of the non-Western Hemisphere trade corporation members, against which the excess taxes are credited, must be derived from or by regulated public utilities.

The other body also made three substantive amendments to H.R. 10087 which were not related to the general effect of that bill as it was passed by the House.

The first of these amendments added a new provision under which the gross income of certain employees of nonprofit corporations formed by the Atomic Energy Commission to operate scientific laboratories would not include any reimbursed moving expenses incurred after 1949 and before enactment of this bill unless such employees were advised that such reimbursed expenses would be includible on their gross incomes. This amendment also provided that a refund or credit of an overpayment resulting from the application of this provision would not be barred by any rule of law—with certain exceptions as to closing agreements and compromises—if an appropriate claim therefor was filed within 6 months after enactment. However, no interest would be allowable with respect to any such credit or refund.

Under the conference agreement, the provision added by amendment made by the other body is generally retained but only applies to amounts received before October 1, 1955—rather than before the date of enactment. Furthermore, it only applies where the employees were advised—either expressly or by direct implication—at the time of employment by an authorized official that such reimbursed moving expenses would not be includible in the gross income.

The second amendment made by the other body which was not related to the bill in the form in which it was passed by the House added a new section 6038 to the Internal Revenue Code which required domestic corporations that have 50-percent control of a foreign corporation to file certain information required by forms and regulations of the Treasury. This also applies to a subsidiary of such a foreign corporation where the foreign corporation has a 50-percent interest in the subsidiary. The failure to file this information within the prescribed time would preclude any person from obtaining a tax credit for foreign taxes paid by such foreign corporation—or foreign subsidiary—for years for which the domestic corporation failed to furnish the required information.

Under the conference agreement, the new section 6038 was substantially revised. As revised, this section specifies in more detail the information which the Treasury may by regulation require to be furnished by the domestic corporation, concerning any foreign corporation it controls—or any of such foreign corporation's subsidiaries. The information required with respect to the annual accounting period of the foreign corporation or its foreign subsidiaries must be furnished in the time and manner prescribed by Treasury regulations but only if such regulations were in effect on the first day of such annual accounting period.

If the domestic corporation in control of the foreign corporation—or its subsidiary—fails to timely file the required information without reasonable cause, then in applying the foreign tax credit provisions to such corporations—or its successors in interest to the particular stock involved—the amount of the taxes paid or deemed paid by each foreign corporation—and subsidiary—during the accounting period or periods for which the domestic corporation was required to furnish information for the taxable year of the failure is to be reduced by 10 percent. If the failure continues 90 days or more after notice by the Secretary or his delegate, the reduction is 10 percent plus 5 percent for each 3-month period or part thereof during which this failure continues after the 90-day period. However, no taxes shall be reduced more than once for the same failure. This reduction of the foreign tax credit by 10 percent—with subsequent reductions of 5 percent—is in lieu of the other body's penalty which would have denied the credit altogether in such cases. Moreover, the conference agreement applies the penalty only to those who failed to file the return, and not to minority stockholders not required to supply the new information.

The new section 6038 applies with respect to taxable years beginning after December 31, 1960, with respect to information for the annual accounting period of a foreign corporation—or foreign subsidiary—beginning after that date.

The third amendment made by the other body which was not related to the provisions of the House bill, would modify section 6046 of the Internal Revenue Code of 1954, which at present requires the filing of certain information returns by attorneys, accountants, and other persons who render assistance or advice in the formation or reorganization of foreign corporations. This section has had little practical effect today in obtaining the information required on these returns. In part this is because the attorneys, accountants, and other professional aids consider this information to be privileged communications with clients which could not be disclosed without violating a confidential professional relationship. Also, the section now has little practical effect because the persons required to file the returns disclaim any knowledge of the substantive information required.

As amended by the other body, section 6046 is designed to achieve greater success in obtaining the information sought as to foreign corporate organizations or reorganizations by requiring returns by citizens and residents of the United States who are officers or directors of the organizations within 60 days after their creation or organization. Reporting is also required by every U.S. shareholder who owns at least 5 percent of the stock within such period. These persons are the ones who are most likely to have the required information at hand and they have no professional reasons for not disclosing it. This amendment was retained and is to be effective with respect to foreign corporations created, organized, or reorganized after enactment.

Mr. MASON. Mr. Speaker, I join my distinguished committee chairman and esteemed friend from Arkansas [Mr. MILLS] in urging the House adoption of the conference report on H.R. 10087. This legislation pertains to the taxation of income derived from abroad.

Under existing law income taxes paid to a foreign country may be taken as a credit against income taxes otherwise due the United States. This credit for income taxes paid abroad dates from 1918 in our Federal tax structure and was designed to eliminate double taxation of income. Prior to 1918 a deduction from gross income had been allowed for foreign income taxes. Under the existing law provisions a so-called per country limitation is applicable so that the taxes paid in each foreign country which may be taken as a credit against U.S. tax are limited to the same proportion of the U.S. tax before the credit which the income from that foreign country is of the taxpayer's total taxable income.

The first limitation on the foreign tax credit which was adopted in 1921, was an overall limitation in effect permitting the aggregation of foreign income and the aggregation of foreign tax credits in making the computation. Under the overall limitation the foreign taxes were put in one combined tax-basket and the domestic taxes were put in another tax-basket and the one was offset against the other. The 1932 Revenue Act added the per-country limitation whereunder a separate tax-basket is provided with respect to foreign income from each foreign country. It is the purpose of the overall limitation and the per-country limitation to prevent U.S. tax on domestic income from being reduced by foreign tax rates which are higher than U.S. tax rates. The 1954 code eliminated the overall limitation so that since the enactment of the 1954 law only the per-country limitation has been available.

By making the overall limitation available as provided in H.R. 10087 we will be allowing a U.S. taxpayer to treat his domestic business as one operation and his foreign business as another operation and to average together the high and low taxes of the various countries in which he may be operating by using the overall limitation. To an extent we will through the adoption of the overall limitation be equalizing the tax on foreign operations generally with the tax treatment which is already available in the case of the so-called foreign-base corporation or foreign subsidiary serving as a holding company.

H.R. 10087 in its House-passed form allowed a taxpayer to shift initially from the per-country limitation to the overall limitation at any time. After the initial shift a new election would be available after a 5-year interval or at an earlier date if the taxpayer had permission from the Treasury Department. The Senate modified this election privilege to provide that the taxpayer has discretion to make the initial shift from

one basis to the other basis but a change, once the initial election is made, can be made only with the consent of the Treasury Department. The House conferees accepted this Senate amendment.

The House and Senate versions also differed with respect to the carryover provisions affecting the treatment of excess credits. The House and Senate versions differed in the way in which such excess credits could be carried back or forward from a year in which the per-country limitation was used to a year in which the overall limitation was used. The House conferees agreed to the Senate version.

The House conferees as a general rule accepted a Senate amendment having to do with the allowance of foreign tax credits in the case of consolidated returns. This rule would deny, where the overall limitation is used, the right to credit foreign taxes paid by a Western Hemisphere trade corporation against U.S. taxes on income attributable to corporations in the same affiliated group which are not Western Hemisphere trade corporations. This restriction applies only with respect to the special 14-point tax differential available to these Western Hemisphere trade corporations. The House conferees provided an exception to this general rule where income is earned by members of the consolidated group which are not Western Hemisphere trade corporations in the same countries from which the Western Hemisphere trade corporations derive their principal income. However, this is provided only if the Western Hemisphere trade corporations are also regulated public utilities. Moreover, the income of the other companies against which the excess Western Hemisphere trade corporation taxes are applied must be derived to the extent of 80 percent from public utility sources. It is intended that all income derived from a non-utility company in an affiliated group from scientific, technical, engineering, management, and other similar services rendered to regulated public utilities shall qualify as income derived from the regulated public utilities for purposes of the 80-percent rule.

The effect of this amendment to H.R. 10087, as agreed to by the conferees, is to permit the separate aggregation of all income and all tax credits in countries, taken together in one group, in which affiliated companies have Western Hemisphere trade corporations included in a consolidated tax return, provided such Western Hemisphere trade corporations are public utilities in accordance with certain parts of section 1503 of the code.

Thus this amendment allows affiliated companies filing a consolidated tax return to aggregate the income and tax credits earned in the countries wherein Western Hemisphere trade corporations, which are also regulated public utilities, derive the principal part of their income. This grouping would include all income from sources in countries in which there are Western Hemisphere trade corporations if the tests of this bill are met. However, none of these excess credits within the range of 38 percent to 52 percent could offset the U.S. tax on income from other countries either inside or outside the Western Hemisphere. Thus the income and tax credits from countries in which the affiliated companies do not have Western Hemisphere trade corporations would be aggregated separately. The total of the tax credits allowable under the two groupings would not exceed the amount of credits allowable under the overall limitation under section 904(a)(2).

Another Senate amendment which was accepted by the House conferees with modification concerned new information returns to be required of foreign corporations and the subsidiaries which are controlled by domestic corporations.

The Senate also provided that where individuals are reimbursed for moving expenses in certain cases involving scientific laboratories established on a nonprofit basis to work with the Atomic Energy Commission, the reimbursement need not be included in income for tax purposes. Your conferees accepted this amendment with modification.

Mr. Speaker, I urge my colleagues to support the conference agreement.

Mr. MILLS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

TRIBUTE TO HON. WINT SMITH

Mr. McINTIRE. Mr. Speaker, I ask unanimous consent to proceed for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Maine?

There was no objection.

Mr. McINTIRE. Mr. Speaker, I rise to pay tribute to one of our Members who will not, because of his decision to retire, be with the Members of Congress who meet in the 87th Congress—our colleague and good friend, WINT SMITH of the Sixth District of Kansas.

Farewells always harbor a certain sense of sadness, but there is also a brightness associated with reflections, and so I am quickly led to think of my associations with WINT in the House of Representatives and on the House Committee on Agriculture on which we both serve.

The first impression that one gets of WINT is that he is a big man, big of physical being. The second impression is even more profound—and this is gained only after one gets to know him through daily association—and it is that he is big not only physically but mentally and spiritually as well.

WINT, I think we will all agree, epitomizes the true conservative legislator, adhering, as he does, to those time-tested principles which have withstood the acid of the ages.

One quickly finds that there is something of the Kansas plains in WINT SMITH, for he has a ruggedness of character about him that permits him to stand unflinching and unyielding. A man of firm conviction, he is not easily swayed from his course of thought nor ever led to surrender up principle on the altar of expediency. Consistency is WINT SMITH's trademark, and one can always be certain just where he will stand on any particular issue.

Coming from a great wheat-producing section, WINT has an intimate familiarity with the problems of the wheat farmer. Equipped with such an understanding, he is never hesitant to champion the cause of the wheat farmer either in the House Committee on Agriculture or on the floor of the House of Representatives.

WINT SMITH preceded me in the Congress, having been elected to the 80th Congress on November 5, 1946. Subsequently, he was reelected to the 81st, 82d, 83d, 84th, 85th, and 86th Congresses.

During my association with him I have grown to know him and to respect him, holding high the value of his counsel and advice. I quickly found him to be the strong, silent type of individual, but discovered that he is not without words when something need be said. And as one gets to know him, he finds this out swiftly, so when he speaks one listens, and when one listens he learns.

As WINT SMITH leaves these Legislative Chambers, the Sixth District of Kansas loses an able, a sound, and a vigorous Representative in the Congress. But, as a consoling feature the district also gains an eminently solid citizen.

As WINT leaves the House of Representatives, he will be missed by his colleagues, for both Republicans and Democrats alike will freely admit that he has made a real contribution to our legislative body, a contribution that will become all the more apparent in his absence.

As the curtain fast falls on the 86th Congress and on WINT SMITH's career in the House of Representatives, WINT must be touched with at least a tinge of regret, for it is not easy to break a cord so well and strongly tied.

But as he leaves he takes with him a rich store of memories from which he can generously draw in the future. So fortified, he can look to tomorrow with hope and into yesterday with pure pleasure.

This wish I extend WINT as he leaves us: May the harvest of your future years be filled with the rich fruits that always spring from the productive seed of honest and earnest effort.

Mr. CHENOWETH. Mr. Speaker, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Colorado.

Mr. CHENOWETH. I want to commend the gentleman for taking this time this afternoon to pay tribute to WINT SMITH. I want to join in this expression of our affection for our colleague from Kansas, and of our sincere regret over his retirement from the House. I was very disappointed when I learned that WINT SMITH had decided to leave Congress. His retirement is a distinct loss, not alone to his district and to the State of Kansas,

but to the entire Nation. Men of the type of WINT SMITH are needed in public life today as never before.

Mr. Speaker, I greatly enjoyed and appreciated the friendship of WINT SMITH. I admired his sterling qualities and his rugged individualism. I found him to be a true and a loyal friend, and I shall always be grateful to him for his many acts of kindness.

WINT SMITH was independent in thought and action. He voted his convictions and followed the course that he thought was for the best interests of our Nation. I always enjoyed a visit with him, whether in his office, on the floor, or at a baseball game. He was a fine companion and we spent many happy hours together.

I take this opportunity to wish WINT SMITH much happiness in the years ahead, and success in all of his plans for the future. I hope that our paths cross frequently. Mrs. Chenoweth joins me in extending our very best wishes to both Mrs. Smith and WINT.

Mr. AVERY. Mr. Speaker, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Kansas.

Mr. AVERY. I certainly want to be associated with the tributes that are being paid to my colleague from Kansas, who is retiring from the Sixth District, Mr. WINT SMITH.

I have been faced with a rather serious problem in the last few days, since I am the remaining Member from Kansas on the Republican side who will be a candidate for reelection, and I wanted to have proper time to pay tribute to my retiring collegues from Kansas, Mr. REES, from the Fourth District, and Mr. WINT SMITH. I had hoped that Mr. SMITH could have been present in order to hear the remarks that are to be made this afternoon in his behalf. I do not know of anyone who has been a Member of this body since I have been a Member who has stood more solidly for the principles in which he believes than has the gentleman from Kansas [Mr. SMITH].

Although I was not always in agreement with him—very frankly, of course, I was frequently in disagreement with him—nevertheless, I always respected WINT for the position he took. I knew it was taken only after full consideration of all the points and arguments that had been presented. Certainly anybody who knew WINT at all would know that he was not swayed by any influence of any special interest group in the conclusions he came to. They were developed entirely within his own mind upon the facts that had been presented to him or knowledge he may have had of the subject.

So. Mr. Speaker, he will certainly be missed from this body in the succeeding Congresses. I know his district well. I feel that his successor will reflect the same philosophic view, although probably not in complete agreement with him.

While WINT served recently on the Committee on Agriculture, yet during the first part of his congressional service he worked in the field of labor and education. Any Member who has served on that committee with WINT certainly knows to be true what I have said, that when he took a position it was based strictly upon facts as he knew them; and after his position was taken he remained immovable, oblivious of any pressure that might be applied.

Mr. McINTIRE. Mr. Speaker, I am pleased now to yield to the gentleman from Georgia [Mr. DAVIS].

Mr. DAVIS of Georgia. Mr. Speaker, I am glad to have the opportunity to express my appreciation of and respect for our colleague, the gentleman from Kansas, [Mr. WINT SMITH.] I have had the privilege of serving with him on the Committee on the District of Columbia. I have found him to be one of the foundation stones of good legislation in this body. He is a tower of strength. He is a man who not only has served his country honorably, well, and with great distinction in time of war, but his contribution in this legislative body has been one of the greatest that has come within my acquaintance during the time I have been here. I regard him as a great man and a great American. I deeply regret to see him leave this body, and my best wishes go with him.

Mr. McINTIRE. Mr. Speaker, I now yield to the gentleman from Ohio [Mr. BROWN].

Mr. BROWN of Ohio. Mr. Speaker, I am happy to be able to join with the gentleman from Maine and others in paying tribute to one of the stoutest Americans I have ever known in the Congress of the United States, WINT SMITH. He is a man of character; he is a man of conviction. He has served his country well in many fields. He will be missed in the years ahead, I am sure.

I also want to take this opportunity, if I may, Mr. Speaker, to join with those who yesterday paid tribute to another great Kansan, who is leaving this body, the Honorable ED REES. I have never known a finer Christian gentleman or finer legislator in all the years I have been here, than ED REES. He, too, will be missed. With these two great individuals, these two great Americans from Kansas leaving this body, there will be indeed created here a great vacancy that will be hard and difficult to fill.

Mr. McINTIRE. Mr. Speaker, I am happy to yield to the gentleman from Colorado [Mr. ROGERS].

Mr. ROGERS of Colorado. Mr. Speaker, it is a privilege to join with the rest of the Members in paying tribute to WINT SMITH and ED REES. It has been my pleasure to know both these gentleman since I came to Congress, and I know the outstanding service WINT SMITH has rendered to the Nation in both World War I and World War II. Not only that, but he also has an outstanding record in the State of Kansas.

While I did not serve on a committee with WINT SMITH I recognize that he studied each problem and arrived at the conclusion he felt best and that he had the nerve and the courage to stand up and cast his vote as he analyzed each particular piece of legislation submitted to him. I know we shall miss him in the future.

I hope both he and Mr. REES enjoy their retirement to the great State of Kansas and continue their great interests in that State.

Mr. McINTIRE. Mr. Speaker, I am pleased to recognize the gentleman from Pennsylvania [Mr. KEARNS].

Mr. KEARNS. Mr. Speaker, I would like to join with my colleagues in recognition of the work of this great statesman, WINT SMITH of Kansas. I had the privilege of serving with him on the Labor Committee during those trying days when we were writing the Taft-Hartley law. He was one of the mainstays of good sound labor legislation all during his stay here.

We regretted it when he left our committee to go to the Committee on Agriculture. We were the losers, the other committee gained a great statesman.

At this time I would like to pay great tribute to ED REES, who has been a neighbor of mine on the same floor during all of the years I have been here. He has served his country well and deserves the fine retirement he will enjoy in the years to come.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, as this session of Congress draws to a close, I find it increasingly difficult to become reconciled to the fact that my good friend, WINT SMITH, is voluntarily leaving the House of Representatives.

I know of no man in public life more endowed with those great virtues of personal integrity and courage. Once convinced of the proper course to pursue he never wavered, even though that course was sometimes unpopular in the view of certain people.

WINT SMITH has a long and enviable record of military service and I am sure that from this service to his country has stemmed, in part, his resolute determination that this constitutional government be preserved at all cost.

WINT SMITH is a great American, a true patriot, and a splendid public servant. Even though I deeply regret his decision to retire, I am confident he will continue to give of his talents to his State and Nation.

May both Mr. and Mrs. Smith find a full measure of health and happiness in the days to come.

Mr. FORRESTER. Mr. Speaker, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Georgia.

Mr. FORRESTER. Mr. Speaker, I have received much inspiration from the gentleman from Kansas [Mr. SMITH]. He is a great statesman, he exemplifies everything that is fine. Every action of his has been in the interest of his State and country. No wonder we are going to miss him. I wish for him and his family the very best always.

Mr. RHODES of Arizona. Mr. Speaker, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Arizona.

Mr. RHODES of Arizona. Mr. Speaker, I thank the gentleman and also

thank him for taking this time so that we may pay tribute to our fine colleague, WINT SMITH, of Kansas.

I have known WINT SMITH since my young manhood. This is the second day in a row that I have had the privilege of paying tribute to two Members of Congress who have been friends of my father. WINT SMITH, when I first knew him, was head of the Kansas Highway Patrol. My father was in politics in Kansas at the time. My father and WINT were friends and associates.

Since coming to the Congress I have had many occasions to be grateful to WINT for the help he has given to me so freely. As a matter of fact, the reason I became a member of the Committee on Education and Labor of the House was because WINT SMITH one day asked me if I would be willing to do so. I said I would, and have never regretted that.

This is a man who has integrity that is almost beyond depth. I do not know any way that you could express in words the type of integrity which is possessed by WINT. Suffice it to say, whenever he said he would be in a certain position you always knew that he would be there. You never had to look for him.

To me it will be a great loss to the House of Representatives and the country to have WINT SMITH retire to private life. But I do wish for WINT and Mrs. Smith on behalf of my family and myself the best of everything in the years to come in the full knowledge that they have contributed tremendously to the welfare of their country, their State, and their district.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Illinois.

Mr. ARENDS. Mr. Speaker, I, too, would like to say a few words on behalf of WINT SMITH, who is voluntarily leaving the House of Representatives. It has been a real pleasure not only to know him but to work with him. I would interpret WINT SMITH as being one of those individuals we might refer to as a rugged individual. For that he has had my wholesome respect at all times. He is a man of great ability, a man of character, a man of determination and conviction. He is the type of individual we do not like to see leave the public service which he so ably rendered in this House.

Not only was he a credit to the people of his own State but certainly to the Nation. He will be sorely missed here. But, those of us who have known him for so many years hope that he will have a most wonderful life in retirement and do the things he would like to do and enjoy both health and prosperity as the days go by. His district will always remember him as a man who served his country ably and well.

Mr. McINTIRE. Mr. Speaker, I yield to the gentleman from Ohio [Mr. McCULLOCH].

Mr. McCULLOCH. Mr. Speaker, I, too, am sorry that WINT SMITH has decided to voluntarily retire from the Congress. Both his State and his Nation will miss him. In my opinion, WINT SMITH was a great conservative in accordance with the best traditions of America. And, I am sure that every vote that WINT SMITH cast on the floor of the House or in the committees on which he served was in defense of the spirit and substance of American liberty. I repeat, he will be missed by his State and by his Nation.

Mr. Speaker, I would like to join, too, in paying tribute to ED REES, who was, when I came here, chairman of that great Committee on Post Office and Civil Service. In those intricate subjects he was a master; he was my expert. All the time that I have been here I turned to him for advice in those fields. He was a good legislator, as well as an effective legislator. His State and the Nation will miss him, too.

Mr. McINTIRE. Mr. Speaker, I yield to the gentleman from Oklahoma [Mr. ALBERT].

Mr. ALBERT. Mr. Speaker, I desire to join the gentleman from Maine [Mr. McINTIRE], and other colleagues, particularly those on the Committee on Agriculture, in this tribute to a great American and a distinguished and fine member of our committee and of this House and a personal friend of mine. Congressman WINT SMITH is, as many have already said, a rugged, real American in every sense of the term. He is a man whose word is as good as his bond. He has contributed much to this House. He is a person who pays tremendous attention to duty. I had the pleasure of going to Bogotá, Colombia, last year with WINT to a hearing conducted by our agricultural attachés from Latin America. It was a long and tiresome meeting, lasting several days, all day long every day I recall that WINT spent every minute and every hour of every day on the job on what some might term a junket. He put his heart into everything he did.

Mr. Speaker, I was not on the floor yesterday, and if the gentleman will indulge me just a moment, I would like also to say in wishing WINT well that I wish the distinguished gentleman from Kansas [Mr. REES], a long and useful life in retirement. It was my honor and privilege to serve on his committee in the 80th Congress when he was chairman of the Committee on Post Office and Civil Service. He was an able, distinguished, and fair chairman. He has been of great service to this House and to this country.

Mr. McINTIRE. Mr. Speaker, I yield to the gentleman from Utah [Mr. DIXON].

Mr. DIXON. Mr. Speaker, for 2 years I have had the honor of sitting immediately next to General SMITH on the Committee on Agriculture. He has taught me much about American principles. He has taught me more of unswerving allegiance to those principles. He has one question, Is that an American principle? And, if it is, he stands for it regardless of consequences. I have a great affection for this wonderful gentleman, soldier, and Representative, WINT SMITH, and shall always retain my affection and respect for him.

Mr. HOFFMAN of Michigan. Mr. Speaker will the gentleman yield?

Mr. McINTIRE. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. Mr. Speaker, courage is at least of two kinds. There is that courage which inspires one to meet physical combat. WINT'S war record is ample proof that he possessed that in immeasurable degree.

Then there is the moral courage which enables a man to stand up when criticized, when it comes thick and fast, untrue and without reason. And WINT had that. Though grievously hurt, he never faltered.

It was my privilege to serve with him as a member of the Committee on Education and Labor at the same time when it was my privilege to be chairman of the Committee on Government Operations. At that time the question of the need of an investigation of the activities of labor union leaders and racketeers came up. Extortionists were raising "heck" with our constitutional liberties. There was the question at that time as to which committee of the Congress had jurisdiction to make investigations, hold hearings. The Committee on Government Operations has jurisdiction over everything. Its jurisdiction runs across that of every other House committee, something which perhaps should not be permitted to continue.

Our committee appointed a three-man committee to investigate the question of whether the racketeers were in control of labor organizations. It was my privilege to be chairman of the committee. We induced the chairman of the Committee on Education and Labor, the gentleman from Pennsylvania, Mr. McConnell, to appoint a like committee of three members, which gave us five members, because it happened that it was my privilege to be a member of both committees. In that way we avoided the question of jurisdiction which had caused so much trouble in the other body and which finally ended there by the creation of the McClelland committee which has done a remarkable job.

At my request, WINT was named chairman of the joint committee and he began investigations in Detroit and elsewhere which, had they been permitted to continue, would have given us a much earlier light on the necessity for legislation disassociating the racketeers from the labor movement.

However, the author of "The Enemy Within," Bob Kennedy, took occasion in the very first pages of that publication to charge that WINT SMITH ended those hearings. There was absolutely no foundation for that statement. I know what I am talking about. This is not hearsay. There was no foundation whatever for that statement which was a vicious and a wicked one. The reason I know is because the chairman of the Committee on Education and Labor limited and gave WINT his orders. WINT was forced to obey his chairman. The statement that was carried in that book that WINT came back from a telephone conversation at Detroit and then closed those hearings on his own is absolutely false. He did not do it on his own volition. He did it because he was told that the authority of the committee would be taken

from him if he did not limit those hearings at that particular point. Other witnesses had been subpenaed but were not permitted to testify. I say that that was a vicious and unjust charge made against WINT. It could not help but hurt. WINT did not complain. Like the soldier that he was, he took it.

As to its effect, it had none among those who knew WINT, as we all did. He was a man of unequaled courage, dignity, and patriotism.

Mr. Speaker, I was not here yesterday when tribute was paid to our colleague, ED REES, of the Fourth District of Kansas.

When it was my privilege to come here 25 years ago, our colleague was a distinguished Member of this body. His office was on the east side of the New House Office Building, and the striking thing I soon observed was that, late at night, there was a light in his window, and our colleague, long after he should have been resting, was at work.

My hope, never attained, was to equal—I knew I could not excel—his record for able, continuous patriotic service to his people and the country. His friendship and encouragement were invaluable. He was an encyclopedia of information, and he never lacked courage to express his views.

I join, too, in the tribute paid to him a few days ago.

Mr. BOW. Mr. Speaker, I join with those who have spoken of the stature of WINT SMITH, of Kansas.

A great soldier, legislator, statesman, and most of all a wonderful friend. My service in the House has been made more enjoyable by WINT SMITH.

Most of all, Mr. Speaker, WINT SMITH has been a fine American; his country is better today because of him.

I wish him well and trust he shall visit with us often so that we may be able to have his sound judgment and sage advice.

Mr. TUCK. Mr. Speaker, I regret that our distinguished colleague from Kansas, the Honorable WINT SMITH, has seen fit to retire and thus terminate his service in the House of Representatives, but I am glad to join with my other colleagues in paying tribute to him in testimony of the high type of public service which he has rendered to the people of his State and Nation. I have known Congressman SMITH ever since I became a Member of this body and knew him beforehand by reputation. He is a patriotic American citizen, whose heart is attuned to the highest public good. He has the capacity to know the right from the wrong and, what is more, he has the courage to do the right even though at the time it may seem unpopular. WINT SMITH enjoys and is thoroughly established in the confidence and the esteem of his colleagues because of his sturdiness of character, his dependability, and his firm determination to keep our Government and our country on a sound basis. Too many of our public men of the present generation are more concerned with their own political preferment rather than the best interest of the country. We need more men of the type of WINT SMITH and I am saddened that he is leaving the Congress. I do hope that the judgment and the wisdom of the people of the great district which he represents will be such as to cause them to send a worthy successor as Representative of that district.

I have served for the past several years as Vice Chairman of the Civil War Centennial Commission and during that time WINT SMITH has served as chairman of the executive committee. I have watched him as he goes about the performance of his public duties with great interest and admiration. He is high minded and fearless, but gentle in his approach so that he never needlessly offends or wounds the feelings of others.

The ties of friendship existing between the gentleman from Kansas and myself are closing and binding. I shall ever cherish the memory of my associations with him, and the patriotic manner in which he has discharged his duties as a Representative in the Congress is of such a nature as to be of an inspiration to me. I wish him and his family all happiness in his retirement.

GENERAL LEAVE TO EXTEND

Mr. McINTIRE. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to extend their remarks on the life and services of Congressman WINT SMITH.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. WEAVER. Mr. Speaker, it is with great pride that I join my colleagues in honoring the Honorable WINT SMITH, of Kansas, my good friend and neighbor, who is leaving Washington but not his life of service to his fellow men.

I have known and admired WINT SMITH ever since coming to Washington. I have admired his devotion to duty and his devotion to principles. But, Mr. Speaker, our association has not always been solely in the realm of legislative and political friendship. WINT SMITH and I have shared a love of sports and particularly baseball. In fact, on occasions he and I have joined at lunch with the star outfielder for the Washington Senators, Bob Allison. Those were indeed memorable events.

WINT SMITH is a man highly regarded by his colleagues. Those who were of the opposite political faith admired him for his devotion to principle. Those of us who felt as he did on many issues admire him as a dogged and determined fighter for those principles. He could not be and would not be swayed from the course if he felt he was steering a proper course based on principle.

Those principles were simple and fundamental to America or to any democracy.

One was freedom.

He feels that all Americans should be free to choose their own way of life. He does not feel that the Government should step in to guide them in the long course from cradle to grave, to counsel them at every turn and to dictate their every move.

He believes, too, that a bankrupt nation can do nothing for its people. A bankrupt nation, he feels, could neither protect itself nor stand as a bulwark against the aggression of world communism.

For that reason, WINT SMITH has always voted for the sound dollar. He has always voted against wasteful programs which fritter away the national resources.

He does not believe that as a nation we can spend ourselves rich. He does not feel that as a nation we can get something for nothing. He does not feel that the Government can give anything to anybody which it first has not taken from somebody.

For these reasons he scrutinized carefully every spending bill that came before the Congress. He looked painstakingly and with a skeptical eye at every new program which was offered to give somebody something. Somebody, he knew, had to pay for it. And all too often the somebody who was supposed to be getting something was the very same person who wound up paying for what he got—only a little more that somehow managed to wind up in the Washington bureaucracy.

In another area WINT SMITH has fought hard.

And that is for the American farmers.

WINT has told me many times that too many of the farm ideas generated here in Washington were conceived by people who did not know anything about farming. And WINT SMITH is a man who knows. He is a farmer and rancher. He is a good one, too. He has made farming pay and feels that, given a proper break, all farmers can make a good, honest and prideful living from the soil.

Mr. Speaker, WINT SMITH has decided not to seek reelection to the House of Representatives. This was his own decision and one which we, his friends tried to persuade him not to make. However, the decision has been made and he will not be here next year.

WINT SMITH will be sorely missed in the House. His words of caution will be missed by all of those serving here. And I, for one, will very much miss his wise counsel and advice and his helping hand. I also will miss the presence of a good and valued friend.

Mr. DORN of South Carolina. Mr. Speaker, WINT SMITH is one of the truly outstanding soldier-statesmen of our time. WINT SMITH as a soldier served his Nation and the free world with honor and distinction. The climax of his military contribution was reached when, with a handful of men, he stopped the German Ardennes drive cold in his sector in December 1944. WINT SMITH by superior ability, determination, and courage rose to the high rank of brigadier general. As a military man, WINT SMITH was a great admirer and believer in the strategy and policies of Douglas MacArthur, Al Wedemeyer, and the late Gen. George Patton. I remember visiting Gen. Douglas MacArthur in New York City with WINT SMITH. I remember well the affection, respect, and admiration General MacArthur held for WINT SMITH not only as a Congressman but as a soldier.

As a Congressman, WINT SMITH is a statesman always putting the welfare of the United States ahead of party and personal consideration. He is an Ameri-

can whose courage and foresight are reminiscent of the Founding Fathers of the Republic. WINT SMITH has always been absolutely fearless. He would not compromise principle. He fought here in the Congress untiringly and unceasingly for the Constitution, for the free enterprise system, for States rights, for his farm people, and to preserve the individual liberties of all of our people. He expressed confidence in the people's ability to govern at the local level. In his deliberations here he emphasized frugality, thrift, and independence for the individual as well as for the Federal Government. WINT SMITH was not afraid to stand alone. He would not hesitate to oppose his party when he thought the party wrong. He was not sectional but fought endlessly for the whole Nation. As a Congressman, he ranks with the very best in history; and in my 12 years in this body, I have never known or associated with a more patriotic, forthright, and able individual.

WINT SMITH has always fought communism above and beyond the call of duty. He could be found in his office Saturday afternoons and holidays thinking and working against this growing menace to our civilization. WINT SMITH realized early that appeasement and coexistence is the road to destruction. Many years ago he foresaw that this evil would even surpass the menace of fascism and nazism. He realized its worldwide revolutionary intent and its utter ruthlessness. WINT SMITH was never duped and hoodwinked by the liberals and pinks who so often advanced the cause of communism.

WINT SMITH'S efforts have been and are an inspiration to me. WINT SMITH will never retire from the arena. He will always fight for oldtime Americanism. He will fight communism, atheism, and centralization of our Government. I rank him in a very special category with Douglas MacArthur and the late Bob Taft as one of the very greatest men I have ever known. While I am going to miss him here in Congress, I know he will be standing up for freedom, liberty, and justice in his beloved Kansas.

Mrs. Dorn and my family join me in wishing for WINT SMITH and Mrs. Smith every future success and much happiness.

Mr. HOEVEN. Mr. Speaker, I deeply regret that my dear friend and colleague, WINT SMITH, is retiring from the Congress at the end of this session. I have enjoyed my close association with him as a member of the Committee on Agriculture of the House of Representatives. He was most faithful in attendance at committee meetings and he contributed much to committee discussion and in the enactment of farm legislation.

WINT SMITH is a rugged individualist who thoroughly believes in the Constitution and the free enterprise system. Honest, sincere, and firm in his convictions, he is the kind of a Congressman whom we hate to lose. Now that he voluntarily seeks retirement, he has my best wishes for good health, happiness, and success in the days that lie ahead.

Mr. GEORGE. Mr. Speaker, a number of years ago the gentleman from Kansas [Mr. SMITH] was my football coach and I have known him for many years.

At one time, Congressman SMITH resided in my home city of Kansas City, where he practiced law with the Honorable C. Clyde Myers, now a city judge.

When I first came to Congress, the gentleman from Kansas did not hesitate to advise and counsel with me, for which I was very grateful.

Although of the opposite political faith, frequently we agree on fundamental issues and I have never known of one instance where the gentleman from Kansas failed to take a stand, regardless of the consequences.

To this soldier-statesman goes my admiration and esteem and I join with his colleagues on both sides of the aisle in wishing he and Mrs. Smith a grand and glorious future.

Mr. JOHANSEN. Mr. Speaker, I share the deep regard of my colleagues who have spoken in tribute to WINT SMITH over his decision voluntarily to retire from this House.

Both as a military officer and as a Member of this House, WINT SMITH had occasion many times to take the oath of office in which he swore to "defend the Constitution against all enemies, foreign and domestic."

No man ever took that oath with greater sincerity and integrity of purpose, and no man was ever more diligent and dedicated in his devotion to that solemn commitment.

Defense of the Constitution of the United States was and is a very real and compelling obligation in the mind and heart of WINT SMITH.

I recall, as I am sure many of my colleagues do, occasions on which a discussion of some constitutional point arose in personal conversation with WINT SMITH. Invariably he would reach into his pocket and pull therefrom a small vest pocket edition of the Constitution which gave evidence of being often and well used.

In his brilliant service as an army officer, in his steadfast dedication to basic constitutional principles in this House, and most particularly in his persistent and unrelenting hostility to the vicious forces of international and domestic communism, WINT SMITH demonstrated over and over again his unqualified devotion to the Constitution and its defense.

For the privilege of his friendship and of service with him in this House, I shall always be deeply grateful.

Mrs. Johansen joins me in every good wish to Congressman and Mrs. Smith in the years ahead.

COMMITTEE ON RULES

Mr. McCORMACK. I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain reports.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

COMMITTEE ON MERCHANT MARINE AND FISHERIES

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until midnight tonight to file a report on the bill S. 3018.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

COMMUTER SERVICE ON THE LONG ISLAND RAIL ROAD

Mr. DEROUNIAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DEROUNIAN. Mr. Speaker, the Long Island commuter has not yet recovered from the 25-day strike by the employees of the Long Island Rail Road and he is threatened again, this time by a strike which not only will tie up the Long Island Rail Road but the entire Pennsylvania system.

The American people are sick and tired of the arrogance and public-be-damned attitude portrayed by Michael J. Quill, of the Transport Workers Union.

The excessive and unjustified financial burden, tremendous loss of time, expenditure of effort, harassment, and untold personal losses threaten again to be the lot of the hapless, helpless commuter. In the strike threatened for September 1, once again the commuter is in no way involved in the conflict between the carrier and Mike Quill, but he, the commuter, will be the one who will suffer most and profit nothing. And in the end, he will be the one who is going to pay out of his own pocket, whatever the cost of a strike may be. Whether he can afford it or not, he will foot the bill.

The gentleman from New York [Mr. BECKER] and I have introduced legislation offering help to the commuter. It proposes a sound, sensible solution. If the Congress will act on it, strikes such as that Long Island has just suffered, and that now threatened, will no longer be necessary and the railroad worker will be helped immeasurably—labor negotiations will have taken a long step forward.

With our proposal enacted into law, the commuter will be served, the railroad worker will be on his job, enjoying the full benefits of effective negotiation as well as his full salary.

Our proposal encourages voluntary arbitration and adjustment of dispute between carrier and employee. If such effort should prove unsuccessful, it provides for the creation of an impartial presidential board to investigate and decide the factors of the dispute. This decision will be binding.

In addition, protection is given both carrier and employee if it is indicated that the report does not conform to the requirements laid down by the Railway Labor Act, or if it does not conform to

the issues of the controversy, or if any member of the board is guilty of corruption or fraud.

Assistance to the people has been long delayed. The time to act is now.

CONGRESSMAN BECKER SPEAKS ON COMPULSORY ARBITRATION

Mr. BECKER. Mr. Speaker, I ask unanimous consent to extend my remarks in two instances at this point in the RECORD and include extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BECKER. Mr. Speaker, I have been reading the newspapers and am shocked to learn of a possibility of a strike of employees of the Pennsylvania Railroad. While the Pennsylvania Railroad does not operate within my Congressional District of Long Island, it is connected very vitally with the Long Island Rail Road, particularly in that the Long Island Rail Road trains must use the Pennsylvania terminal in New York City. On checking this matter, I am informed that the Pennsylvania Station would be closed to Long Island trains and, therefore, a strike of the Pennsylvania Railroad would cause the shutting down of the Long Island Rail Road.

Mr. Speaker, only a short while ago, we had a most devastating Long Island Rail Road strike that was in effect for 25 days. This forced some 200,000 commuters to reach their places of business in New York City and elsewhere by overcrowded buses and subways and driving their own cars each day. This method of transportation took tens of thousands of people sometimes 2 and 3 hours to reach their destination, either to business or coming home. The physical and mental torture suffered by Long Islanders, caused by the strike, can never be fully evaluated.

Therefore, a possible strike that would shut down the Long Island Rail Road again, indirectly through a strike of the Pennsylvania Railroad, is almost unthinkable. For this reason, my colleague from Nassau County, Congressman STEVEN B. DEROUNIAN from the Second District, and I introduced H.R. 13063 and H.R. 13061, respectively, on August 22, 1960, providing legislation calling for compulsory arbitration of railway disputes.

The bills would remedy present faults of the existing Railway Labor Act: First, they would set up machinery to get a decision on a dispute relative to wages and conditions; second, provide for a special Presidential Board to be appointed if dispute is not settled in 15 days and its report to be enforcible against both the railroad and the employees; third, the report may be impeached in the district courts in 30 days if found to be faulty; fourth, the proposals outlaw all strikes and lockouts under the Railway Labor Act with penalties for persons guilty of such activity; fifth, they authorize the district courts to issue injunctions against violations and threatened violations.

When a railroad strike occurs, it is not just between labor and management, the people are the ones most seriously injured. No employer or employee has the right to bring essential transportation to a halt. The bills will not interfere with the agreements between labor and management on wages or working conditions. Rather, they would set up an orderly method for arbitration and mediation, and promote speedy and just settlements.

Under this legislation, there would be no hindrance to labor or management in the exercise of their rights. No one can contend that there is any attempt in this legislation to restrict the rights of labor or management. It is designed only to preserve the rights of the public who find it necessary to use the railroads and thereby support the people who run them.

Mr. Speaker, I realize it is late in the session, but I urge that emergency action be taken to prevent another railway strike such as that of the recent Long Island Rail Road 25-day strike.

APPOINTMENTS TO MILITARY ACADEMIES

Mr. BECKER. Mr. Speaker, as have other Members of Congress, I had the privilege of selecting the highest caliber of young men for appointment to our various military academies. All of them have made good and are not only a credit to their country but to themselves and their families.

One of the finest young men I appointed to the Air Force Academy, in 1956, unfortunately, was honorably discharged due to physical condition that arose in his first year, something entirely out of his control. Having met with him after he returned home, I know how badly he felt, as if the world had dropped out from under him. Then I lost contact for awhile.

A few weeks ago I received a letter from him, datelined Israel, July 17, 1960, and I thought it was one of the finest things I had ever read. Not only does he deal with his appointment to the Air Force Academy, with his illness and eventual honorable discharge, but with the years that have transpired since that date. As he talks of trying to "find himself," he unfolds the story of how eventually he went to Israel. He paints a realistic picture of Israel, what he has found there in the past year, and expresses feelings that have generated in him for his own country, the United States. What it has taught him and how it has prepared him to meet the future.

I thought this was such a remarkable letter that I wrote and asked his permission to insert this in the CONGRESSIONAL RECORD so that people all over this Nation, young and old alike, could read the expressions of this very wonderful young man. I have made it a practice with all the young men I have appointed to the Academies to correspond with them during their years of cadetship. They have in turn corresponded with me and let me know how they are getting along. I have felt it part of my responsibility to keep in contact with them, and so on their holidays when they are home, they always visit me at my office.

I think anyone can see from reading this letter that he would have made a great officer and one of the future leaders of our U.S. Air Force. I regret that we have lost him in this capacity, but I know that he will make his mark in some field and a great citizen of this wonderful country of ours.

DEAR CONGRESSMAN BECKER: The coming and going of the 9th of July 1960, carried little significance in itself, but it was enough to exhume the memory of a July 9 of another year. July 9, 1956, saw my arrival in Denver, Colo., for the beginning of what I thought was to be a promising career with an exceptionally bright future. On that day, as one of your nominees, I entered the U.S. Air Force Academy.

That career died in its infancy, aborted by a perhaps unavoidable medical difficulty. The once bright future clouded over, and the sudden blow with its attendant shock set me adrift on a sea of aimlessness. Once, I had intensely wanted to serve my country in its skies and in the vanguard of its future space frontiers. Now I have been relegated to the realm of those who must walk the earth.

Yet, despite what has transpired, I nevertheless feel I owe you a debt of gratitude; a debt of gratitude for the priceless opportunity of service with the elite, that you once placed within my reach by nomination to the Air Force Academy; and a debt of gratitude for enabling me to receive the intensive, mind-building, body-building training—truncated though it may have been—afforded by this springboard of the space age. Because of this debt of gratitude, I feel that I owe it to you to let you know what became of one of your erstwhile "Academy Boys."

Permit me to backtrack a bit into the past. Officially, you knew what had happened. First, "Cadet Sternberg was granted 1 year's leave of absence," and then, last, "Cadet Sternberg, Alan L., has been honorably discharged from the U.S. Air Force Academy." But what did these staid official communiques mean in terms of personal feeling?

A series of unexplained, somewhat mysterious medical disorders dictated that the flight surgeon recommend a year's leave of absence, during which time further medical examination could be conducted by a specialist. I came home in September 1957. From September to May, my future as a cadet and as an air officer hung in the balance. Nine months of not knowing whether one's aspirations will be brought to a halt or will be allowed to continue causes no little below-the-surface strain, believe me.

On May 22, 1958, I received an honorable discharge from the Air Force Academy, for medical reasons. Although half-expected and vaguely prepared for, the blow was swift, sure, and sudden. It rocked me to my roots. It was as if a flash flood had washed out the road ahead of me and had carried with it half the soil from beneath my feet. I returned to my civilian studies, not knowing in which direction my path to the future lay. A year later, still a bit dazed and with motivation at low ebb, I suspended my studies. I needed time to regroup my wandering ambitions and energies.

I went to work as a U.S. postal employee. One day, I sorted from the incoming mail a brochure describing a work-study program, in Israel, for American students. This program, of a year's duration, located in a communal settlement on the border, would involve working half a day and studying the other half. The educational program ran

4 hours a day, 6 days a week, and devoted itself to intensive studies of the Hebrew language, and studies of Israeli history, culture, and geography. This program was to be supplemented with lectures by prominent people from economic, political, sociological, educational, governmental, and journalistic circles, as well as with extensive tours of the country, its cultural centers, its landmarks and historical sites, its agricultural and technical achievements. I became interested in the program, world travel, a brief vacation from the American scene, and a short stay in a historical land which has achieved and is achieving the near impossible, could be what was needed to revive and recharge motivation and drive. I applied to the appropriate agency, underwent the requisite examination, and was accepted. In mid-September of 1959, with a group of 20 American youths, I sailed for Israel.

I have been in Israel for 10 months now, and if I may, I shall digress to give a quick picture of what I have found.

In 10 months, I have traveled from the Negev in the South to the Galilee in the North, from the Judean Mountains in the East to the Plain of Sharon in the West. I have hiked over desert, mountain, and plain, into canyon, cave, and wadi; have stood at the borders of Jordan, Syria, Egypt, Lebanon, and Gaza; and have swum in the Mediterranean, the Dead, and the Red Seas. I have suffered the sticky heat of metropolitan Haifa and Tel Aviv; stumbled along the narrow streets of Holy Jerusalem and Nazareth; and looked across the border towns of Eilat and Metula. I have poked through ruins of ancient Jewish, Arabic, Roman, and Byzantine cultures; have listened to lectures on Jewish history; and have talked to people instrumental in making some of that history. These, then, are my impressions of Israel.

Israel is a tiny, rock-strewn plot of land that has the nerve to call itself a nation and the determination to back up the claim. The country is comparable in size to New Jersey, with a good half of it comparable to some of our coastal beaches. The population numbers little better than 2 million. There are probably more people on the street, on a Sunday, on New York City's East Side. But the experiences of the Israeli people are unlike that of any other similar group their size.

The Israelis have taken a harsh, barren, eroded land, neglected for centuries, and have forced it to support them and their aspirations. Land has been cleared, soil reclaimed, and swamps drained. Bare, rocky mountains have been covered with trees, crops for export raised in impossible places, and substantial villages, towns, and cities built where once existed wasteland (the thriving city of Tel Aviv was once a series of sand dunes). Miles of road and track have been forged through impossible desert and mountain; harbors have been built where none existed; and airfields have been put down where wild camels roam. The Israeli has had to pull his belt tight to accomplish these semimiracles.

Little Israel, the size of New Jersey, with some 2 million people, stocks her tables with an abundance of bread, many vegetables, plenty of eggs, and little meat. She stocks her stores with high-priced luxury items, high-priced clothing, high-priced household goods, and little that is low priced. Chocolate is a treat, french fries a delicacy, and ice cream a watered-down version of an American commodity. Hot water is sometimes, toilet paper scarce, and television nonexistent. In-city telephone communications is fair, between-city is worse, and oversea calls are impossible. Private cars are hard to come by, trains drag along, and buses double as freight trucks. (A bus will pick up anything from the passenger to his household goods and/or his flocks. Live chickens are common, and once someone managed to take on two sheep).

Surrounded by the hostile Arab League bent on her destruction, Israel is run by and lives on nerve. Her spirit is tough, unyielding, and seemingly boundless. Her citizens are a standing militia, and her 18–21-year-old boys and girls are her standing army. Her borders are fenced with barbed wire, mined with high explosives, and staked out with army and border police patrols. Her skies are crisscrossed by her air force of French-, British-, Canadian-, and American-make fighters, while the ground below rumbles to the practice maneuvers of her armored force of American, British, French, and captured Russian and Egyptian tanks and vehicles. Her communal settlements have their own armories, bomb shelters, and field fortifications. Yet, despite the necessity—as the saying goes—for every Israeli citizen to be a soldier on 11 months leave, these people go about their daily routine unworried by the threat poised at their borders.

Israel's population is a conglomeration of immigrants from some 75 countries, topped by a sprinkling of the native born. Her language is Hebrew, spoken with 20 to 30 different foreign accents. Her people work hard, live simply, read much, and think more.

A one sentence summary? Israel is a tough nation run by tough Jews—a new breed who refuse to retreat.

On September 26, I sail from Israel. I do not regret having decided to come, for it has been a year well spent. I have traveled, I have seen, I have questioned, I have listened, and I have learned. Perhaps for the first time, I have fully awakened to what you and your congressional colleagues have known of and have warned us about for years. From my forward observation post in Israel has come the awareness of some of the very real dangers confronting us of the West, the real dangers threatening our very security and freedom—the security and freedom we take so much for granted. Israel is a hotspot in the seething Mideast, the power plays of West versus East cause crises to erupt with volcanic force at a moment's notice. Middle East tensions are like tangible lines of force—pulling, pushing, twisting, tearing, warping, with never more than a moment of uneasy peace granted to relax the pressure.

Removed from the womblike security of vast America, with its great resources and superior, far-reaching technological achievements and advancements, the full threat to what we of America believe and stand for has been brought home to me with stunning force. Somehow this threat must be counteracted. Whatever it is within my limited power as an individual to do to help counteract that threat, I will do. My interest has always been in science—perhaps my path lies in that direction.

I shall arrive home with considerably more motivation than when I left. A tangible road lies before me, a direction in which to throw my energies. In the beginning, it will be a difficult road to walk. With two brothers in college, it will mean working a bit more than studying. But this is no more than what many of my contemporaries have had to face. I am sure that I shall succeed. I must succeed if I am to be ready with the rest of my generation to inherit the reins of leadership.

Sir, I have taken up enough of your valuable time. I hope I have been able to adequately sketch what has transpired with one of "your boys." The Academy and the Air Force as a doorway to service has been closed to me. But possibly this happened for the best, for now another perhaps more important door has been opened.

If just possibly there might be something I can do for you before I leave this part of the world, please do not hesitate to call on me.

With best wishes to your family, I am,

Sincerely yours,

ALAN L. STERNBERG.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12326) entitled "An act making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to Senate amendment No. 20 to the above-entitled bill.

OPERATION VERACITY

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Arizona [Mr. RHODES] is recognized for 2 hours.

Mr. RHODES of Arizona. Mr. Speaker, this is the second day of Operation Veracity. I have had people ask me if we are attacking the Democratic Party. The answer is, We are not attacking the Democratic Party. I have had people ask me if we are attacking the veracity of the delegates to the Democratic convention. The answer is no, we are not attacking the veracity of the delegates to the Democratic convention. We are saying there are certain statements contained in the Democratic platform which are misstatements and which, whether intended to deceive or not, do in fact deceive the American people as to certain alleged facts.

As far as the delegates to the Democratic convention are concerned, those people had every right to believe that the platform committee had gone through the platform and pulled out any misstatements. Therefore, the delegates were not at fault if misstatements have occurred.

The Republican committee had a 6-man panel which, before the platform was taken before the convention, had gone through the platform and taken out any statements which could not absolutely be proved. If the Democratic platform committee had had such a panel, then this particular exercise would not be necessary. We regret that it is necessary, but in order to keep the record straight it is necessary.

For the information of the gentlemen of the House, I intend to yield to certain Members to cover certain statements which appear in the Democratic platform. I have 2 hours. I estimate

that the prepared statements will take 45 or 50 minutes to deliver. It will be my purpose to yield only to those persons who have prepared statements to give, but after that I will be most happy to yield to all Members of the House on both sides of the aisle, and there will be ample time to discuss all of the matters we intend to bring up today.

It is now my pleasure, Mr. Speaker, to yield to the gentleman from Minnesota [Mr. NELSEN], a former Administrator of the Rural Electrification Administration.

Mr. NELSEN. Two statements made in the Democratic platform directly attack the last 7½ years of Republican administration of the rural electrification and rural telephone programs. Those two statements are:

The Democratic Congress has successfully fought the efforts of the Republican administration to cut off REA loans.

It [the Republican administration] has sought to cripple rural electrification.

Regarding such statements, I suggest we look at the record of Republican administration of REA for the last 7½ years, compare that record with prior Democratic years and let the people draw their own conclusions. For 3½ years of the Republican administration it was my privilege to serve as Administrator of this REA program. The record is as follows:

MORE PEOPLE SERVED

About a million new consumers have been added to REA lines—an increase of 23 percent. Total consumers served are 4,653,502, compared with 3,769,426 on June 30, 1952.

REA now serves 97 percent of all the farmers in America, compared with about 90 percent when this administration took office.

The rural telephone program which is under the Rural Electrification Administration has boomed—more than a million telephone users have been added during this administration, whereas only 7,500 subscribers had been connected from the time the Rural Telephone Act went into effect in 1949 until the Republicans took over in 1953.

Does this sound like the Republicans are crippling the operations of the Rural Electrification Administration?

FARMERS PAY LESS FOR REA

By fostering a climate of cooperation in the power industry, this administration has reduced the average cost of REA power to 2.68 cents per kilowatt-hour, compared with 3.43 cents in 1952—a 21-percent slash in cost.

Federal power supplied to REA consumers has increased by nearly 5 times—going from 2.7 billion kilowatt-hours in 1952 to 9.1 billion kilowatt-hours last year.

Per farm consumption of REA electricity has almost doubled during this administration. By June 1959, consumption had risen to 317 kilowatt-hours, compared with 184 kilowatt-hours per month in 1952.

MORE "GENERATION AND TRANSMISSION" LOANS

In the last 7½ years, REA generation and transmission loans have more than matched the capacity authorized in the previous 17½ years of Democratic administration of REA. Of the total of 2,419,530 kilowatts of generated capacity approved under REA, 1,274,530 kilowatts of capacity have been approved under this administration.

REA CO-OPS IN BETTER SHAPE

Under the Republican administration, REA borrowers have achieved the soundest financial position in their history. The backlog of over $200 million loan applications pending when I became Administrator in 1953, was speedily cut to practically nothing. Today, more than $500 million in unadvanced funds are available for the asking. The delinquency rate among borrowers is lowest in the history of the REA program, and advanced payments on REA loans—payments ahead of schedule—are the highest ever.

CONCLUSION

More people served at a cheaper cost, lower cost of administering the program, and at the same time better service to the REA borrowers who are in the soundest financial position in their history, this is the record of the Republican administration of REA. This is the record not only to be presented now at election time, Mr. Speaker, but it is the record of solid administrative accomplishment brought about by continuous hard work in REA these last 7½ years.

As former Administrator of that great program, I feel confident that America's REA consumers are not now deceived by such misleading and false statements as those found in the Democratic platform.

Mr. McCORMACK. While I understand that our colleague, the gentleman from Arizona [Mr. RHODES] has stated that he would prefer not to yield until the conclusion of all remarks, perhaps the gentleman might yield at that point following a particular subject since I would like to ask one or two questions with reference to the REA, which the gentleman from Minnesota [Mr. NELSEN] has been discussing.

Mr. RHODES of Arizona. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. The gentleman will admit, will he not, that the REA legislation was passed by Congresses controlled by the Democrats; is that not a fact?

Mr. NELSEN. The act was passed under President Roosevelt in 1936, but I will also suggest to the gentleman that the greatest and highest appropriation ever given to the REA was under the Republican 80th Congress which followed.

Mr. McCORMACK. But, the fact is that the REA was created by legislation sponsored by the Democratic Party and it is Democrat-sponsored legislation; is that not a fact?

Mr. NELSEN. I think it must be said, if one wishes to be accurate, that the REA program has bipartisan support in the Congress of the United States, and I do not think anyone can truthfully deny that.

Mr. McCORMACK. What does the gentleman from Minnesota have to say about the action of Secretary Benson in issuing orders that his subordinate shall pass upon all applications for loans, as I remember, over $500,000? What is the gentleman's answer to that situation?

Mr. NELSEN. I served as administrator of this program and I can say that no one ever interfered with the making of loans and no one has ever interfered with the administration of the making of loans under the succeeding administrator in this program, and the administrator so stated before committees on Capitol Hill. If it were true, as the gentleman from Massachusetts wishes to imply, that the administrator of this program has been curtailed in this connection, certainly, the record of accomplishment that I have set forth in my previous remarks would not exist today.

Mr. McCORMACK. Then why did the Secretary do that?

Mr. NELSEN. Under the act the Secretary is responsible for the program. Certainly anyone in an administrative position would never wish to fail to discuss the problems that the Secretary is responsible for.

There has never been any curtailment of loan applications of any kind, and there is no proof to that effect.

Mr. McCORMACK. We had proof before the committee that there was withheld for a long time applications, in order to impose conditions.

Mr. NELSEN. I do not think the interpretation that the gentleman advances is correct. I think the gentleman is misstating the facts as they appeared in committee.

Mr. McCORMACK. The gentleman happens to have been a member of the committee at the time, so the gentleman is relying on his memory. I think I have enough confidence in my memory of what took place before the subcommittee of which I was a member in the Government Operations Committee. The gentleman is aware that all REA organizations were much disturbed by the action of Secretary Benson.

Mr. NELSEN. That is not correct.

Mr. McCORMACK. The gentleman says that none of them were disturbed?

Mr. NELSEN. Some were led to be disturbed by some propaganda that came out of Washington, but the REA cooperatives throughout the country have been well served, and the record so indicates.

Mr. McCORMACK. The record before the committee was such as to justify a bill that was reported out which passed both branches of the Congress and which President Eisenhower vetoed. The gentleman is aware of that bill, is he not?

Mr. NELSEN. Very much so.

Mr. McCORMACK. So the committee found evidence that through administrative action Secretary Benson was attempting to hamstring applications of that kind; and, as I remember, over

$500,000 in applications, and through administrative action was attempting to circumscribe the intent of Congress as provided in the law. For that reason we reported out a bill and the President vetoed it.

Mr. NELSEN. The gentleman is making assumptions as to the evidence that was submitted before the committee. The performance of the REA does not substantiate the charge that the gentleman wishes to make.

Mr. McCORMACK. What the gentleman says after the hearing, after the bill was reported out and after the President vetoed it, administratively there was a relaxation, but as a request of Secretary Benson's action there was a limitation on the number of REA applications over a certain amount, over $500,000, as I remember. We had hearings in order to subscribe what Secretary Benson had done and in order to carry out the intent of Congress.

Mr. NELSEN. I do not agree there has been some relaxation since that act; there has never been a curtailment, but the Secretary has been carrying out the intent of Congress.

Mr. McCORMACK. As originally intended, but if it had not been for committee action that would not have happened; but prior to that there was.

Mr. NELSEN. The majority leader says there has been relaxation of that rule. That is not true, as the loans that have been approved by REA have increased. The charge that is presently being made is one that has been politically developed. The performance does not coincide with the charge.

Mr. PRICE. Mr. Speaker, will the gentleman yield?

Mr. NELSEN. I yield to the gentleman from Illinois.

Mr. PRICE. As the sponsor of the bill to which the majority leader referred and which was passed by both the House and Senate and then vetoed, and which failed by 4 votes to be passed over the veto, the idea for that legislation resulted from a desire to correct the situation in the REA caused by the Secretary of Agriculture. It had the result of direct interference with application for a loan in Indiana.

Mr. NELSEN. The gentleman wishes to imply that there has been interference regarding a loan in Indiana. There have been many loans that have been considered in REA that have been carefully examined. That is no pertinent point as far as I can see in the discussion.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I shall have to return again to my former announcement of my plan for yielding. I relaxed it in order to accommodate the majority leader. I will yield to other gentleman after I have proceeded as I had planned.

Mr. SMITH of Iowa. This is on that point.

Mr. RHODES of Arizona. I will be compelled to yield to the gentleman from Iowa who himself was so gracious in the matter of yielding yesterday. I yield to the gentleman.

Mr. SMITH of Iowa. I am sure the gentleman will admit that in speaking of appropriations they were made in circumstances which put them over and above what the administration requested and were in fact even resisted by the administration at times including a veto last year.

Mr. LAIRD. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. LAIRD. That is incorrect. There has been no veto of any REA appropriation. There has been an increase in contingency funds carried in this year's bill. There was no increase carried by the Congress in the regular appropriations for REA.

The point we want to keep in mind here is that there has been a charge made in the Democratic platform as to the cutoff of REA loans. The record itself will show that in 7½ years, although REA has been in existence 25 years, 45 percent of all the loans have been made in the last 7½ years.

Mr. SMITH of Iowa. The record however shows that appropriations made last year for public works carried several millions for REA and that the bill was vetoed and passed over the President's veto.

Mr. LAIRD. The gentleman and I are speaking of different things.

Mr. SANTANGELO. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I am sorry I cannot yield. When I have concluded my speech there will be ample time and I will gladly yield then.

Mr. SANTANGELO. That would be too late, for my question deals with this very matter that is being touched on now.

Mr. RHODES of Arizona. I yield to the gentleman from New York.

Mr. SANTANGELO. The charge at times is made that the Republicans have sought to cripple the REA. Is it not a fact that Mr. Benson, Secretary of Agriculture, proposed that interest rates for cooperatives be increased from 2 percent to a higher figure?

Mr. RHODES of Arizona. The facts are that the Secretary of Agriculture wanted to impose an interest rate paid by certain REA's more nearly in line with the interest rate which the Government itself has to pay on borrowed money.

Mr. SANTANGELO. I have no REA's in my district, but I do know that the Secretary appearing before a Subcommittee on Agriculture proposed to increase the rate of interest to 5 percent. Do you deny that the Republican Party through Mr. Benson proposed to increase the rate of interest to 5 percent on REA cooperatives?

Mr. RHODES of Arizona. I do deny that. It is not the situation.

Mr. Speaker, I now yield to the gentleman from New York [Mr. DEROUNIAN].

Mr. DEROUNIAN. Mr. Speaker, I rise today to join with my colleagues on this side of the aisle in condemning some of the many inaccuracies which appear in the 1960 Democrat platform.

We have already dealt with several of these fallacies. Now, I should like to quote another incredible misstatement of fact which blindly distorts the labor policies of the Republican administration:

> Under Democratic leadership a sound national policy was developed, expressed particularly by the Wagner National Labor Relations Act, which guaranteed the rights of workers to organize and to bargain collectively. But the Republican administration has replaced this sound policy with a national antilabor policy.

Mr. Speaker, I cannot believe that any sizable number of my Democratic colleagues in this body subscribes to this falsehood.

Certainly they realize that the record of the Republican administration in this field has exhibited the greatest respect for the rights of the American worker.

Last year, Vice President NIXON and Secretary of Labor Mitchell brought about a settlement of the disastrous steel strike. Was this a manifestation of the administration's antilabor policy? If it was, that was lost on the president of the United Steel Workers who publicly stated his extreme satisfaction with the terms of the settlement.

Mr. Speaker, I challenge those who were responsible for this plank in the Democratic platform to cite one single antilabor act by this administration.

I challenge them to call the Landrum-Griffin bill an antilabor measure. This bipartisan legislation was framed for a single purpose—to protect the American worker and the American people from the greedy excesses of power-hungry labor bosses whose activities in the past few years have become an unbearable burden to all workers—to all Americans.

The 1960 Democratic platform recognizes this fact, for it states:

> Organized criminals have even infiltrated into legitimate business enterprises and labor unions.

It then launches into another fantastic charge by claiming that the administration has failed lamentably to deal with this problem.

Mr. Speaker, may I point out to the authors of the Democratic platform that they just cannot have it both ways. The administration acts against these evils and is called antilabor, or it does not and is accused of failing lamentably to deal with the problem.

Mr. Speaker, I wish to read into the RECORD achievements under the Eisenhower-Nixon administration—achievements which have brought a better life to the working men and women of America through high levels of employment, the highest standard of living with highest real wages, protection of rights of working men and women, strong enforcement of fair labor standards, wider unemployment insurance coverage, increased benefits in social security, and promotion of free collective bargaining.

First. Minimum wage raised; extension of coverage to several million additional workers repeatedly recommended.

In 1960, administration recommended increase in minimum wage.

Second. Average weekly wages in manufacturing up from $67.97 in 1952 to $91.60—an increase of 35 percent.

Third. Labor income raised 43 percent; as national income rose by $106.1 billion, compensation of employees rose by $82.4 billion.

Fourth. Unemployment insurance permanent coverage extended to 2.6 million ex-servicemen, 2.4 million Federal employees, and 1.2 million employees of small businesses.

Fifth. Temporary additional benefits granted to those whose payments had been exhausted during periods of higher unemployment.

Sixth. States stimulated to improve unemployment compensation benefits; since 1953 all States have made improvements in their laws.

Seventh. Railroad Unemployment Insurance Act strengthened by increasing benefits and extending periods of coverage.

Eighth. Improvement in industrial peace with 27.5 percent fewer strikes in 1959 than in 1952 involving 46.9 percent fewer workers (despite prolonged steel strike). The percentage of man-days lost from work stoppages cut in half compared to 7 years of last Democratic administration—1946–52, 8 percent; 1953–59, 4 percent.

Ninth. Safety standards for longshoremen and ship repair workers made by Labor Department.

Tenth. Comparisons of existing State safety services to assist States in improving their safety regulations and promote greater uniformity established by Labor Department.

Eleventh. Employment of older workers encouraged to meet crucial deficit in our human resources during the coming decade: 1.2 million older workers placed last year by public employment service.

Twelfth. Migratory farm workers' conditions improved by Federal stimulus to housing, transportation, child labor and crew leader legislation.

Thirteenth. Labor pension and welfare funds safeguarded through financial reporting to Secretary of Labor; legislation essential to make act effective and enforcible urged by Labor Department.

Fourteenth. Fair Labor Standards Act vigorously enforced—in 1959 had largest number of cases litigated in history—some 1,360.

Fifteenth. Employers violating minimum wage standards required to pay $60 million in back wages—20 percent more than comparable period under the previous Democratic administration.

Sixteenth. 300 firms and individuals ruled ineligible to bid on Government contracts for violating the Davis-Bacon Act and related legislation, contrasted to only 4 in the 17-year history of this law from 1935 through 1952.

Seventeenth. Landrum-Griffin Act enacted which guaranteed union members: (a) greater participation in determining their own affairs; (b) freedom of speech in union meeting; (c) protection against arbitrary dues increases; (d) free and fair union elections; (e) elimination of racketeers from labor-management relations; (f) protection of union funds.

Mr. DEROUNIAN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield?

Mr. DEROUNIAN. I yield to the gentleman from Illinois.

Mr. PUCINSKI. The conferees are meeting now on a minimum wage bill. The Republicans have three members on that committee. They could very well bring this conference report back here and let the Congress act on a minimum wage extension, an extension that your own President asked for. Are these men in opposing this compromise measure working for the best interests of the workingmen of America?

Mr. DEROUNIAN. I will say to the gentleman that Mr. KENNEDY, of Massachusetts, loudly proclaimed when he got back to this special session he was going to do all he could to bring the bill out. The House has already expressed its will on this legislation. The gentleman's party has a majority of the conferees. Does the gentleman want to tell me that before his party can control a majority of his party he must have a total Democratic membership in the House of Representatives? It would seem to me that with a majority of 127 Members, if you cannot control your own party it is a sorry spectacle for leadership.

Mr. RHODES of Arizona. Mr. Speaker, I yield to the gentleman from Wyoming [Mr. THOMSON].

Mr. THOMSON of Wyoming. Mr. Speaker, Operation Veracity seems to discover more and more misstatements of fact in the Democrat platform as our examination continues. Apparently the limit is that of time.

Let us consider this statement of the Democrat platform:

> We will erase the Republican slogan of "no new starts" and will begin again to build multiple-purpose dams, hydroelectric facilities, flood control works, navigation facilities, and reclamation projects to meet mounting and urgent needs.

It is flagrantly untrue to say that there is a Republican program or slogan of "No New Starts."

By the Bureau of Reclamation alone, there have been at least 24 new starts launched which were requested in the President's budget since 1953.

The Colorado River storage project passed in 1956 was the largest reclamation project approved in a single piece of legislation. The Republican administration requested it and gave it all-out support. The present Democrat candidate for President voted against it. I guess the Democrat platform writers, in their enthusiasm about the new frontier, forgot that fact, too.

Examples of "new starts" requested by and commenced under the Eisenhower Republican administration include the Little Wood River project, Idaho; Crooked River project, Oregon; Wapinitia project, Oregon; Yellowtail unit, Montana and Wyoming; Curecanti unit of the Colorado River storage project; Florida participating project in Colorado; Glendo unit in Wyoming; Hanover Bluff in Wyoming; Helena Valley project in Montana; Sargent unit, Nebraska; Ventura River in California; Collbran project, Colorado; Washita project in Oklahoma; Glen Canyon unit of the Upper Colorado River storage project; Flaming Gorge unit of Upper Colorado in Utah and Wyoming; Navaho unit, New Mexico; and Trinity division of the Central Valley project in California.

Now that we have shown the error in the first part of this platform statement, let us consider the second part, which says they would "begin again to build multiple-purpose dams, hydroelectric facilities" and so forth.

Virtually all of the projects authorized today are multiple purpose in nature. But there was not, Mr. Speaker, a single basinwide multiple-purpose project in the United States undertaken in the 8 years previous to the Eisenhower-Nixon administration.

Now, just how do the Democrat platform writers explain such errors of their pens? It does indeed seem that their "New Frontiersmanship" is merely a juvenile attempt at "Boyish Gamesmanship" of fact juggling.

Now the Democrat platform says they will begin to build again hydroelectric facilities.

With just a minimum of checking, they would have known that since 1953 this administration has placed in service 75 dams, providing 60 million acre-feet of storage capacity, and 18 powerplants having over 950,000 kilowatts of power capacity.

This is a fine record, but just as important, if not even more important to the taxpayers and to the users of electricity, private industry has been permitted to move forward with confidence, to furnish its full share of the new requirements for electricity.

The "brown-outs" of the previous Democrat administrations have been ended by the Eisenhower-Nixon administration.

Here is another fact that the Democrat platform fiction writers of course ignored:

Total acreage that can be supplied with irrigation water by reclamation projects increased from 6.9 million acres in 1952 to 8 million acres in 1959. The 53 projects authorized during this administration's tenure in office will provide an irrigation water supply for 1,330,000 acres of land in the 17 Western States.

Another milestone of the Eisenhower administration progress which the Democrat platform writers nicely ignored in regard to reclamation was the passage of Public Law 85–47, known as "The Small Reclamation Projects Act of 1956."

Mr. Speaker, I have principally dwelt on reclamation, because that is the area with which I am most familiar. A similar story might be told as to flood control projects. In the area of navigation facilities, I need only mention the St. Lawrence Seaway, which was, under the Eisenhower administration, made a reality instead of a political promise.

Mr. Speaker, I am indeed proud to be a member of a political party whose political philosophy, whose platform, and whose candidates take pride and pleasure in the great achievements of America and Americans everywhere. I am sure—indeed, I hope—that it is only a small minority in the other party who really subscribe to the desperation approach of the Democrat platform. Obviously, the Democrat platform writers are still searching desperately for an issue to cause American citizens to vote against their better judgment. Even that cannot be an excuse for such statements, that are so obviously without basis in fact, being found in a platform of one of our major political parties.

The American public will not be misled by such tactics.

Mr. RHODES of Arizona. Mr. Speaker, I now yield to the gentleman from New Hampshire [Mr. BASS].

Mr. BASS of New Hampshire. Mr. Speaker, a group of my Republican colleagues in this body are taking part in Operation Veracity—the project to explore some outright untruths in the 1960 Democratic platform.

Several of these untruths have already been discussed, and I must say, Mr. Speaker, that they constitute a serious indictment of those who took part in the preparation of the Democratic platform.

The untruth which I plan to explore as my part in Operation Veracity is, in my opinion, the worst falsehood of all—that which claims:

> They [the Republicans] have admitted that the Soviet Union leads in the space race—and that they have no plans to catch up.

This is not only a falsehood, Mr. Speaker, it is a shameful reflection on those dedicated Americans who have achieved so much in space exploration in so short a time.

In my opening remarks, Mr. Speaker, I referred to this sentence as an untruth. Actually, the framers of the Democratic platform managed to accomplish a somewhat difficult feat—two falsehoods in one brief sentence.

Let my Democratic friends cite one single statement by an administration spokesman in which it is claimed that the Soviet Union leads in the space race.

Dr. T. Keith Glennan and others concerned with space exploration have repeatedly stated that the United States leads in all fields of space exploration and concede to the Soviet's superiority in only one limited field—rocket thrust.

As Vice President NIXON stated on January 16, 1960:

> The reason we are behind in developing the very large size rockets * * * is that we did little to begin our ballistic missile program until after President Eisenhower assumed the Presidency, whereas the Russians began in 1946.

In one day, Mr. Speaker, the United States accomplished the following feats in the space and missile field:

First. Sent into orbit the largest man-made object ever put into space;

Second. Achieved, at 25 miles up, the highest altitude ever reached by a piloted craft;

Third. Recovered, for the first time anywhere, an instrumented capsule sent into space;

Fourth. Shot a missile 5,000 miles dead to target;

Fifth. Launched a Polaris missile, designed for underwater firing, on a successful 1,100-mile test run.

In the light of these accomplishments, can anyone honestly say that the Soviet Union leads the United States in space exploration? Of course, they cannot.

Here is what a few foreign newspapers have to say about the subject:

> London Daily Telegraph: "The Americans may have found the way to control with precision the return of a weapon launched into space whereas the Russians have not."
>
> De Telegraaf (Amsterdam): "As far as the total of successfully-launched space objects goes, America has finally taken over the lead. * * * America's space successes mean Russia has been overtaken in the technical race."
>
> Die Welt (Hamburg): "This marks a decisive step toward manned flight in space."

Mr. Speaker, American accomplishments in space exploration have produced hard data that have proven invaluable in both the military and scientific fields. In contrast to this realistic effort, most of the Soviet accomplishments lacked scientific depth, providing mainly propoganda.

Here are some of the hard and impressive accomplishments of this administration, which have kept us ahead of Russia.

First. Twenty-six earth and solar satellites successfully launched by the United States compared to eight by the Soviet Union—as of August 1960.

Second. Fourteen U.S. satellites still in orbit—12 around the earth, 2 around the sun—Russia has just one each.

Third. Spectacular U.S. space firsts include:

First to land and measure the Van Allen radiation belts—the most important scientific discovery of the IGY.

First to photograph the earth from 300 miles out in space;

First to discover the pear shape of the earth;

First to recover an object intact from outer space;

First to orbit a communications satellite;

First to orbit two instrumented satellites at the same time;

First vehicle to start, shut down, and restart in space.

Fourth. Thousands of pictures of cloud formation have been photographed successfully by meteorological satellite Tiros I—a major step in observations of major storms and frontal systems.

Fifth. Pioneer V—one of the great scientific and engineering successes in history—set record for radio communications, 22.5 million miles.

The second part of this untruthful sentence, Mr. Speaker, in which the administration is charged with having "no plans to catch up" with the Soviets is also a false and irresponsible statement. Obviously it cannot stand up if the first part is false, which we have shown. But let me also point out that NASA has developed a well planned, well balanced, ambitious 10-year program calling for 260 shots—designed to insure that we remain ahead in the field of space exploration. This 10-year plan has been well publicized, and of course the Democratic authors of this untruthful statement must have been aware of it.

Time does not permit, but here are a few of the steps already taken under this 10-year plan:

First. National Aeronautics and Space Administration established to centralize space exploration administration.

Second. Project Mercury, the first step in manned space flight, moving at accelerated goal of successful completion in 1961.

Third. A new family of space launch vehicles, including the Thor, Atlas, Centaur, and the Saturn system, inaugurated—design, development, and testing under way.

Fourth. Worldwide tracking and data acquisition network developed to facilitate and coordinate space exploration efforts.

Fifth. New launching facilities constructed—more being built to enable United States to utilize at the earliest possible date heavier thrust vehicles and spacecraft planned.

Mr. Speaker, I believe that more is required, in the case of these specific untruths, than my exposé. I believe that the authors of this sentence owe an apology to those Americans whose dedication and perseverance have put us first in space.

I do not think I am asking too much in demanding an apology, Mr. Speaker. Those who wrote these sentences should be only too aware of the need to apologize when proven wrong.

Mr. WINSTEAD. Mr. Speaker, will the gentleman yield at this time?

Mr. RHODES of Arizona. Mr. Speaker, I have yielded to the gentleman from New Hampshire [Mr. BASS].

Mr. BASS of New Hampshire. Mr. Speaker, I believe that more is required in the case of these specific untruths than my exposé today. I believe the authors of this sentence owe an apology to those Americans whose dedication and perseverance have put us first in space. I do not think, Mr. Speaker, that I am asking too much in demanding an apology. Those who wrote these sentences should be only too aware of the need to apologize when proven wrong.

Mr. WINSTEAD. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. Mr. Speaker, the gentleman from Mississippi was not on the floor when I explained a few minutes ago that it is not my purpose to yield until all the Members have made their prepared talks. There are two more Members, and after about 10 minutes, we will have plenty of time to yield to all Members.

Mr. PRICE. The gentleman from New Hampshire asked a direct question. Two of the members of the space committee were present at the time, but could not remain on the floor. They have asked me to reply to the direct question asked by the gentleman.

Mr. RHODES of Arizona. I presume then that the gentleman from Illinois

will remain for about 10 more minutes so that that can be done.

Mr. PRICE. Mr. Speaker, will the gentleman yield to me for a unanimous-consent request?

Mr. RHODES of Arizona. I yield to the gentleman for a unanimous-consent request.

Mr. PRICE. Mr. Speaker, I ask unanimous consent to extend my own remarks at this point in the RECORD.

The SPEAKER pro tempore (Mr. BASS of Tennessee). Without objection, it is so ordered.

There was no objection.

Mr. PRICE. Mr. Speaker, in my years of service in this House I have never heard so much political hokum in one sitting. The fiction writers at the Republican National Committee must indeed be working overtime these days. The Republican Operation Veracity is distinguished by the its lack of veracity.

But let me address myself to the challenge of the gentleman from New Hampshire [Mr. BASS] and furnish him with the names of two outstanding leaders of the present administration who had something to say about the way our defense and space programs were and are being run. There have been others who have made similar statements before congressional committees, but since these two men, Trevor Gardner, Assistant Secretary of the Air Force under this Republican administration, and Lt. Gen. James M. Gavin, a member of the weapons systems, Department of the Army, were so disturbed by budgetary interference in research and development that they left their high positions to fight on the outside for recognition of the fact our Government should work to remove serious roadblocks to our scientific advancement.

The plain truth is there is no veracity in the Republican National Committee's Operation Veracity. In the prepared speeches of the few speakers who have so far appeared, untruth after untruth have been parroted, and have been successfully challenged by Members on the floor.

I quote from Trevor Gardner—until February 8, 1956, Assistant Secretary of the Air Force—in Life magazine for November 4, 1957:

> We have been running second best in the race with Russia for ballistic missiles because (1) we have refused to admit that national security is more important than balancing the budget, and (2) former Secretary of Defense Charles Wilson and Deputy Secretary Donald Quarles permitted the continuance of a hopeless administrative jungle. * * * This has strangled scientific thinking and performance. We have suffered a temporary defeat not because of the inadequacy of our scientists but because of the incredible ineptness with which we have managed our scientific resources.
>
> By the use of large injections of sedation, the American public was lulled into the happy dream that all was well with our American scientific and military effort and that there was no reason to fear that Russia could really ever overtake us. For those who prefer dreaming, the sedatives are again ready and available. We can all count upon an avalanche of science fiction stories, photos, releases, speeches, press conferences, diagrams, news releases and predictions—all designed to create the comforting illusion of American scientific and military supremacy. The formerly tight lid of censorship on ballistic missile firings has already been removed and series on series of quickly generated progress announcements by newly minted "missiles experts" are being rushed to the press.
>
> But what we really need is flying hardware doing our bidding in outer space. Sooner, not later. In the final analysis a beleaguered administration cannot change unhappy facts with happy words. Clear and concise action, taken with a minimum of delay, is the only answer.
>
> For those who prefer staying awake to dreaming it will be useful to know how our country was trapped into the present situation and how we can get out of it.
>
> Mr. Wilson and Mr. Quarles unquestionably served their private employers in American industry well and faithfully. But when they arrived in Washington, they were lacking in the imagination, the skill and the daring to lead American science and scientists to victory over the Russians. If, when in private business, they had allowed Russian telephones and automobiles to invade their markets, they would have been fired. It is hard to believe that President Eisenhower was ignorant of missile progress within the U.S.S.R. and of the stupendous and daring nature of the Soviet programs. It is equally inconceivable for him to have been unaware that our own ballistic missile program was being "managed" into intolerable delays by a dinosaur of an administrative system.

A quote from Lt. Gen. James M. Gavin, who for 10 years was closely associated with the development of national defense policy, as a member of the Weapons Systems Evaluation Group, Department of the Army staff, and in the search for tactical innovations in field commands.

The quote is taken from his book "War and Peace in the Space Age," copyrighted 1958 by Harper & Bros., New York, N.Y.:

> Immediately following Hiroshima and for a number of years thereafter our nuclear weapons program was well ahead of that of the Soviets. But this advantage is now disappearing, both in weapons and in their associated delivery systems. The New York Times on April 13, 1958, in reporting a talk given by H. Rowan Gaither [1] at the California Institute of Technology, reported him as saying: "The relative strength of the United States in comparison with the Soviet Union and Red China is ebbing." And while our strength is ebbing our obligations are increasing. Since Korea we have made numerous treaty arrangements, NATO and SEATO for example, that imply a responsibility to come to the aid of our allies in case of trouble. The skimpy forces that we do have are scattered worldwide—in the frontlines. We have no geographically placed reserves of the type that could deal with limited conflagrations to back up Korea, southeast Asia, the Middle East, or Europe. So far the talk about a fire brigade is just that—talk.
>
> Until our position improves, limited wars, if we were to be favored with them, would result in limited defeats—limited defeats that we would rationalize at the time but that would ultimately lead to general defeat, or to general war. Thus, by failing to provide adequately for something less than general war, by failing to provide for limited wars, we invite general wars, and such a war is one that no one will win. This is the great danger of the missile lag.

[1] H. Rowan Gaither is Chairman of the Security Resources Panel of President Eisenhower's Science Advisory Committee.

Mr. RHODES of Arizona. Mr. Speaker, I now yield to the gentleman from Kansas [Mr. AVERY].

Mr. AVERY. Mr. Speaker, I am privileged to associate myself today with my colleagues in support of what we describe as Operation Veracity. I might add parenthetically that I am pleased to note the presence on the floor today of many of our Democratic friends, more than we had yesterday, so at least we may be inspiring some interest on the Democratic side of the aisle. Also I want to say we appreciate our colleagues from our own side of the aisle remaining today to participate in this scrutiny that we are directing toward the platform written by the Democratic Party in Los Angeles.

Mr. Speaker, I feel further constrained to comment upon the fact that the chairman of the Democratic platform committee was advised nearly a week ago of the fact that this analysis of the Democratic platform was going to be made and made on a factual basis. We recognize that each party will disagree in respect to philosophy and ideals and we welcome this exchange of views to sharpen the views for the electorate.

By the chairman of the platform committee, Mr. BOWLES' absence yesterday, and again by his absence today, we can only conclude that he will not attempt to defend the platform written by the Democratic Party.

Mr. PRICE. Mr. Speaker, that is obviously an unfair statement. Many of us have been here and are here wishing to defend the platform, but we have not been permitted to have an opportunity to defend it since the gentleman has refused to yield at any point.

Mr. RHODES of Arizona. Mr. Speaker, I decline to yield to the gentleman from Illinois.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield for a parliamentary inquiry?

Mr. RHODES of Arizona. Mr. Speaker, I do not yield.

Mr. AVERY. Mr. Speaker, responsibility, veracity, and maturity will indeed be key words in the forthcoming presidential campaign. It is only natural that the American public will scrutinize both the party candidates and platforms to find an abundance or a dearth of these qualities. I think that is probably more so because of the colloquy we have had on the floor today and the one we had yesterday. We invite such scrutiny of the Republican platform. More particularly the facts that may be recited in it. Meanwhile, Operation Veracity will continue, not only on the floor of this House but throughout the fall months of the campaign. As its initial mission, our operation will continue to expose some of the untruths that, as we see it, are in the Democratic platform.

I would like to direct my remarks to this particular statement:

> Over the past 7 years we have watched the steady weakening of the Nation's transportation system.

This statement makes me wonder where the authors of the Democratic platform, the so-called "new frontiersmen" have been looking in the last 7 years.

I further note that there is present on the floor of the House today on my right, the chairman of the Transportation Subcommittee of the Committee on Interstate and Foreign Commerce. I have served on that committee for 4 years under the gentleman from Arkansas [Mr. HARRIS] and the gentleman from Mississippi [Mr. WILLIAMS], as chairman of the Subcommittee on Transportation, and frankly I thought our committee had done a pretty good job in a continued examination of our Nation's transportation system and had recommended to the Congress such laws as had been necessary and were deemed expedient not only to sustain but to guarantee additional expansion commensurate with our growth and our national needs. I think it is somewhat of a reflection on our Committee on Interstate and Foreign Commerce to say that the Congress or the administration has stood idly by to witness and preside over a weakening of our Nation's transportation.

To be completely honest, and I want to be honest, because we are expecting our friends to be honest with us, there is I think perhaps one particular area in which our transportation has deteriorated. There are fewer horses and mules in the country today than there were 10 years ago. In that area there has been some deterioration in our transportation. It may have been to that area that the Democratic platform was directing the Nation's attention.

I think there is some reason to come to that conclusion, because as I watched our friends' convention in Los Angeles they were still running on the so-called depression that existed under the Hoover administration, as though that were going to be one of the issues in the 1960 campaign. So if we are still going to use that particular issue in the 1960 campaign, perhaps it is reasonable to assume that the deterioration in the number of horses and buggies might also be another issue this fall, although I think there are probably other directions, where we should more profitably direct our attention this afternoon.

In every other area except the one just mentioned there has been a phenomenal growth in transportation since 1952. Following me, I understand will be by colleague from Illinois [Mr. DERWINSKI], who will discuss the development of the St. Lawrence Seaway, which I would classify as a very definite step in the growth of our transportation system.

I would like to remind my colleagues also that upon the Eisenhower administration's recommendation and under a Democratic-controlled Congress we authorized 41,000 miles of an interstate highway system, which very definitely augments our rail transportation system.

In the way of rail transportation I want to suggest that there has been spent since 1953 over $7 billion to improve the railroads of America. This sum was spent to modernize equipment and for further improvements of roadways and structures in addition to installing new signaling systems to improve the safety measures of the various systems. The same railroads added 360,000 new freight cars during this 7-year period as well as 2,000 passenger train cars and over 8,000 new locomotive units.

Railroad labor has also shared in the general improvement of the railroad industry. Admittedly due to automation and some readjustment in the rail systems the number of employees is somewhat lower. However, the wage scale for employees now working has advanced from an average wage of $1.76 per hour in 1953 to $2.59 in 1960. In addition to the present employees of the railroad system, the annuities of former employees have also been advanced in keeping with the increased standard of living. Whereas in 1959 the maximum monthly annuity for a retired railroad employee was $165 today it is $206.

There are many other areas I could recite for you but I do not want to impose at length on the time of the House. But just let me make a few brief statements showing the progress that has been made.

Let us take aircraft operations. Aircraft operations at the Nation's airports set a new record in 1959 for the sixth consecutive year. 1959 was the eighth consecutive year that the Nation's airlines maintained a safety rate of less than one fatality per 100,000,000 passenger miles.

There has been a 75-percent growth in overall revenue ton-miles in scheduled air service and an increase in total revenue passenger-miles from 15.06 billion in 1952 to 36.4 billion in 1959.

Mr. Speaker, I ask unanimous consent to extend in the RECORD these other accomplishments in the field of transportation since 1953.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. AVERY. The largest U.S.-flag tanker, SS *National Defender*, launched.

Panama Canal enlargement is under way with deepening and widening of the canal.

Seagoing vessels are being replaced at a cost of $4½ billion.

Changes in the Interstate Commerce Act concerning ratemaking, filing of offers of rates, authorization of ICC to review the discontinuance of passenger train service, and elimination of procedural detail given impetus by 1955 Report of the President's Committee on Transport Policy and Organization.

Aviation weather research has been put on a substantial scale through cooperative of composite Federal agencies.

Computer program instituted to provide automation in air traffic control under way.

A program for forecasting air passenger and cargo traffic and capacity has been developed.

Low-fare, transatlantic "economy" air passenger service, was introduced on the North Atlantic in April, 1958, which by the end of 1959 had virtually replaced coach service.

There has been a 75 percent growth in overall revenue ton-miles in scheduled air service and an increase in total revenue passenger miles from 15.6 billion in 1952 to 36.4 billion in 1959 occurred.

Neutrality in policy between competing modes of transportation promoted to help maintain conditions and provide regulations for competitive equality for railroads and common carriers industries.

Federal Aviation Agency, established 1958, has made great contributions to air service—medical investigations now made in all significant accidents, training and proficiency requirements in flight instruments introduced for private pilots, new improved medical standards for airmen established.

Airport expansion and improvement has been pursued under the Federal-aid airport program—$380 million spent, obligated, or programed between fiscal 1953 and fiscal 1961.

Aircraft operations at the Nation's airports set a new record in 1959 for the sixth consecutive year, or that 1959 was the eighth consecutive year that the Nation's airlines maintained a safety rate of less than one fatality per 100 million passenger-miles.

The statement of the Democratic platform, then, reflects either that the new frontiersmen are blind to air, sea, and land transportation progress, and apparently think in terms of horse travel only. Or else, the platform writers do know these things and were intentionally being inaccurate. Either way, I think that most of the American public has had enough of the immaturity of these new frontiersmen.

I want to make one other observation: The Democratic platform in regard to transportation makes this one final conclusion:

> We will establish a national transportation policy designed to coordinate and modernize our facilities for transportation by road, rail, water, and air.

Mr. Speaker, I am glad that the Democratic platform writers belatedly subscribe to the measures that the Republican President of the United States undertook long ago. A year ago, in his budget message, President Eisenhower requested the Secretary of Commerce to make a comprehensive study of transportation to identify emerging problems, redefine the appropriate Federal role, and make such recommendations as are necessary to insure the balanced development of our transportation system.

This report was submitted to this Congress and it was too bad that the writers of the Democratic platform were unfamiliar with it.

Mr. RHODES of Arizona. I thank the gentleman from Kansas.

Mr. Speaker, I now yield to the very able Member from the State of Illinois [Mr. DERWINSKI].

Mr. DERWINSKI. Mr. Speaker, before I direct by remarks to the subject assigned to me I will say that the gentleman from Arizona [Mr. RHODES] should be heartily applauded by our good friends in the Democratic Party, for even though he was not invited to attend their convention in Los Angeles he has done them a great service by pointing out serious discrepancies in their platform through this Operation Veracity.

Mr. Speaker, I also join with my colleagues in support of Operation Veracity and in stern disapproval over the inclusion of numerous untruths in the Democrat platform.

The hearty, courageous Americans of the frontier days possessed above all, faith and hope in America. They were proud, not ashamed or ignorant, of the great achievements of their country.

At the Democrat Convention where their platform was written, there was much talk of a new frontier. But it was all mixed up with calling America second rate, with downgrading truly great progress.

This was not just true of their downgrading our great progress in space, where today we are far ahead of Russia, for example, in the number of earth satellites successfully launched, or in the military field, where Russia has no weapon which can compare with the capabilities of the Polaris. They did not stop here. They downgraded our economic progress in the very year we achieved a gross national product of over $500 billion.

No, they did not stop here.

They even had to downgrade the efforts of a truly great American, the President of the United States, in the field of inland waterways.

Here is one of the inaccurate, untrue statements of fact written into the Democrat platform:

> Development of our inland waterways, our harbors, and Great Lakes commerce has been held back by the Republican President.

They had the gall to make this statement a little over a year after our President, with the Queen of England, had formally opened the St. Lawrence Seaway.

They had the gall to make this statement after their presidential candidate had lined up against the St. Lawrence Seaway in his 1952 campaign.

All our Presidents since World War I had urged development of the St. Lawrence Seaway project, but may I emphasize that it was President Eisenhower's personal interest and the imagination of the Republican administration that finally brought about U.S. participation in this vital development.

To further refute their platform misstatement:

There has been an 80-percent increase in water commerce from 1952 to 1958;

The Eisenhower-Nixon team is having a study conducted to provide for 50 new harbors on the Great Lakes;

The total inland waterways commerce was four times as much in 1957 as, for example, in 1946;

Typical progress in Duluth, Minn., opening a $40 million public cargo terminal to world commerce;

Typical of progress was the intergovernmental shipping conference on U.S. shipping policies held in 1959.

Mr. Speaker, of special interest to me, representing as I do a midwestern district, may I point out that the Cal-Sag Channel project authorized in 1930, had its construction start in 1955. Just another example of the farsightedness of the Eisenhower administration's program.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Did I understand the gentleman from Illinois to say that the Democratic Party presidential candidate had voted against the St. Lawrence Seaway?

Mr. DERWINSKI. My statement reads "had lined up against the St. Lawrence Seaway in his 1952 campaign."

Mr. McCORMACK. May I suggest to my friend that he look over the rollcall vote again? He stated on two occasions. I do not know about that. I am talking about the time the bill passed, which was only a few years ago. My recollection is that the gentleman might be mistaken in that respect.

Mr. DERWINSKI. May I advise the majority leader that I will be glad to check the accuracy of my statement. In addition, so there will not be any misunderstanding, I think we should both recollect that the St. Lawrence Seaway project was the subject of congressional controversy for many years.

Mr. McCORMACK. I voted against it myself, but I think my friend ought to check in connection with his statement that the Democratic candidate voted against that bill.

Mr. DERWINSKI. For the benefit of the majority leader and for the sake of the record I will check it, and if my statement is incorrect I will correct it.

Mr. PRICE. May I ask the gentleman where he received his information?

Mr. DERWINSKI. From statements on the subject involved.

Mr. PRICE. It has been guaranteed by the Republican National Committee that they would furnish you with an accurate statement?

Mr. DERWINSKI. The gentleman's implication is incorrect.

I think it is reassuring to see so many indications that the Democrat platform, filled with promises which cannot be kept, and filled with these grossly degrading, inaccurate statements of fact, was not well received by the American public.

I sympathize with my many fine colleagues in the other party in their disgust over this sort of performance. We all endorse the goals of peace with justice, prosperity, and progress. And I am sure that almost all of us really believe the means to achieve the goals is not to be found in degrading American achievements, or utilizing untrue statements of facts in hopes of a bit of political benefit.

Mr. Speaker, the plain truth is that due to the excellent record of the Eisenhower administration in the development of our inland waterways, and the tremendous impact that the St. Lawrence Seaway has on the Great Lakes region, Americans in the Middle West, and for that matter in the entire country, will benefit over the years by greater employment opportunities, with the corresponding increase in living standards that come with great commercial development.

Mr. RHODES of Arizona. Mr. Speaker, I yield to the gentleman from Florida [Mr. CRAMER].

Mr. CRAMER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter and tables.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. CRAMER. Mr. Speaker, in an effort to set the record straight, in the light of certain false charges in the Democratic platform that deal with a subject with which I have specific knowledge as a member of the Committee on Public Works, it involves the question of the interstate highway program. And, I quote from the platform:

> The Republican administration has slowed down, stretched out, and greatly increased the costs of the interstate highway program.
>
> The Democratic Party supports the highway program embodied in the acts of 1956 and 1958 and the principle of Federal-State partnership in highway construction.
>
> We commend the Democratic Congress for establishing a special committee which has launched an extensive investigation of this highway program. Continued scrutiny of this multi-billion dollar highway program can prevent waste, inefficiency, and graft and maintain the public's confidence.

Briefly, I want to touch on the latter first. I happen to be the second ranking minority member on the Special Subcommittee of the Federal Aid Highway Program. There are only 6 minority members as compared to 13 on the majority side—an almost unheard of majority on any special investigating committee, having also been denied as a minority member the right to have counsel from the period of 1959 when this committee was established until early in March of 1960—any right at all to minority committee counsel or staff; and further, after this special subcommittee was established with this 13 to 6 lopsided majority membership the majority leadership in effect deposed the rightful chairman of the subcommittee, the chairman on roads, who knew the highway program and knew all about it and had been involved in litigation concerning highways for years and years, the gentleman from Maryland, the great Congressman, GEORGE FALLON.

Instead of appointing him, they appointed the gentleman from Minnesota as chairman of the subcommittee. Then we got into the so-called investigation which the platform had said itself indicates was intended to "prevent waste, inefficiency, and graft and maintain the public's confidence."

What actually happened? What great crusade was there to try to ferret out—and I for one readily admit there exist and I am apprehensive about these wrongdoings and loose practices in this $25 billion program. There are bound to be some, and it is our job to find out where they are, to uncover them and where necessary, see that the parties involved are prosecuted and otherwise to make certain that laws are amended to tighten up the loose practices in the highway program in order to maintain the public's confidence in it.

But, what has this subcommittee done? What is this great crusade for which this subcommittee was set up? Shortly after the passage of the Interstate Defense Highway Act, I was one of the first, along with the ranking minority member, the gentleman from Ohio [Mr. SCHERER], and along with the gentleman from Iowa [Mr. SCHWENGEL], in requesting that a surveillance committee be set up to keep track of what was going on in this program. What has happened with this great crusading subcommittee which was not set up until 1959 and which the Democratic platform says should be used for the purpose of maintaining the public's confidence in the highway program? They have had two investigations. And, I see the gentleman from Iowa [Mr. SCHWENGEL] on the floor, and I am delighted to see him here, and I would like to ask him to correct any remarks I make if they are incorrect. There have been two investigations. One of them was directed at the Bureau of Public Roads. It was an effort to try to show that a decision was made in regard to bridge clearance, that instead of a 17-foot bridge clearance, as the Department of Defense had recommended—and some of the majority apparently were in favor of it—they established a 16-foot bridge clearance.

Hearings were held. The committee never made recommendations to the contrary. That was one of the big exposes that had been previously announced that this committee was going into.

The second great expose dealt with the State of Oklahoma. And apparently some internal, largely political, problems were involved there. I must admit that there was considerable uncovered in Oklahoma that made me quite concerned. The Bureau of Public Roads took immediate action to do something about it, including withdrawing funds from Oklahoma, interstate funds, until employees who had not only been retained on the payroll after they had admitted to the local prosecutor that they were guilty of falsifying records, but as a matter of fact were given salary increases and were blanketed in under the merit system. This was subsequently brought to the attention of the local administration by the Bureau of Public Roads and the funds were withheld until those persons were fired, as they should have been in the first place. Those are the two exposes that have taken place.

I, for one, have been quite concerned about the fact that this committee has not been more active and has not been more effective in this field, and have so stated on a number of occasions.

We recently had an executive session, which I am not at liberty to discuss at this time, as it was an executive session. But I will say this, that despite the fact that our subcommittee at that time took action and voted that the staff should go ahead with investigations in some 6 States throughout the country where they had "substantial reason to believe" that there were wrongdoings—and I see the gentleman from Texas [Mr. WRIGHT] standing and I believe he will corroborate that this was the tenor of our action, asking that those investigations continue and that our committee be advised with regard to them and that hearings would be called as those investigations were completed. But let me say this at this time. We were advised by the chairman of the subcommittee—and I can only interpret this as resulting in the handcuffing of our committee and throwing a coldwater blanket on the investigating staff from now until election time—we were advised that the chairman was going to be busy campaigning and he did not feel he would be available for these investigations during this period. And my only interpretation of that is that apparently the committee and its staff will be handcuffed between now and November although, in my opinion, there are some things that deserve committee hearings.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. If the gentleman will permit, I would like to have this statement finished first and then yield to the gentleman on the floor. This is the policy that has been followed.

Mr. CRAMER. Now with regard to the question of the Interstate Defense Highway System, with regard to the administration's attitude toward the highway program, it is a matter of public record, no one has to guess about it and there is no reason for anyone to misrepresent that record, because it is a matter of record.

I insert for the RECORD the official documents of the Bureau of Public Roads stating progress under the 1956 National System of Interstate and Defense Highways Act which disproves conclusively in and of itself the fallacious statement contained in that platform.

The quarterly report on the Federal aid highway program issued August 9, together with the remarks of Ellis Armstrong, Commissioner of Public Roads, of April 29, state factually the very gratifying and substantial progress being made on this greatest of public works programs in the history of the world. These documents show, for instance—this is a matter of record and I wish the gentleman from Texas would address himself to these points so far as the administration and its attitude concerning this program is concerned, when he gets the floor—these documents show, for instance, that in the 4-year period following the 1956 act, construction is underway or advertised on 5,394 miles on the Interstate System; that is, of the 41,000-mile system; 25,509 miles on the A–B–C system; and 172 miles under the D program, as provided for in the 1958 Accelerated Highway Program Act. This is a total of 31,075 miles under construction since 1956.

In addition, the record of construction completed throughout the country is substantial, realizing that there is approximately a 2½-year lead time required for actual construction and the records show that on the Interstate System 6,615 miles have been completed; from the A–B–C system, 89,686 miles; 11,938 on the D system; for a total of 108,239 miles.

A full summary of the progress of the Federal-aid highway program follows in table A.

It is further to be noted that the Eisenhower Republican administration has given the leadership an impetus to the accelerated program starting with the 1954 McGregor Act, which provided for approximately $1 billion a year for Federal-aid funds, the largest total ever authorized, and commenced the basic approach of pay-as-you-go highway users taxes, which became the foundation of the $25 billion 14-year program in the 1956 act. The appointment by the President, on the suggestion of Republican Congressional leaders, of the Clay committee, formed a basis for analyzing highway needs throughout the Nation and evolved the 41,000 mile Interstate System approach, while accepting the McGregor pay-as-you-go road user taxes concept. The McGregor bill was passed during a Republican Congress on the request of the Republican President. The President followed with recommendations resulting from the Clay committee report to the 84th Congress, and gave strong leadership and backing which resulted in the 1956 act. It was largely because of the President's strong leadership and the support he had among Republicans in Congress that the program enacted was a responsible one, providing adequate funds for construction, and the establishment of a trust fund, to be replenished with earmarked road user taxes, although there was tremendous Democrat pressure to finance the program out of the general fund.

If the gentleman from Texas has any remarks on that, I would be glad to hear them, because we discussed this in committee.

Mr. WRIGHT. May I inquire of the gentleman who has the floor at approximately what hour he anticipates he might yield to me? Otherwise I might want to make a point of order.

Mr. CRAMER. I would suggest to the gentleman that he just walked into the Chamber. I will be glad to yield in about a minute, if the gentleman from Arizona is agreeable to that. There are plenty of Members on my right who have been here much longer than the gentleman from Texas.

Mr. WRIGHT. The gentleman from Florida has been asking all these questions of me, and he gives me no opportunity to answer. I am afraid I am going to forget some of them before I get time to answer.

Mr. CRAMER. I notice the gentleman has been marking them down.

Mr. WRIGHT. I might have trouble reading my writing.

Mr. CRAMER. Again, in the 1959 and 1960 sessions of the 86th Congress, the President requested additional road user taxes to supplement the trust fund which had been depleted with the 1958 act increasing the authorizations as a special antirecession measure. With an additional $400 million on the A–B–C program, on a two-thirds Federal one-third State matching basis—this became the Democrat program—and a similar amount for the Interstate System without providing any funds for financing this accelerated program, the obvious result was the depletion of the trust fund and Congress has never, despite the President's repeated requests, accepted its responsibility and provided funds to replenish the depleted trust funds. Likewise, Congress added the Byrd amendment in the 1956 act which prevents the Bureau from apportioning funds that are not foreseeably available in the trust fund, which, together with the trust fund depletion, resulted in reimbursement planning and contract control.

Thus, as the following documents provide on the record, the Republican administration has been successfully pressing for the passage of the most successful and largest public works highway building program in the history of the world and, through the Bureau of Public Roads management, it is actually ahead of schedule, with the limited funds that Congress has made available and certainly if there is any program of which the Republicans can be proud from a standpoint of substantial accomplishment it is the national highway program, under the McGregor Act of 1954, and the Interstate and Defense Highway Act of 1956.

THE PROGRESS OF THE NATIONAL HIGHWAY PROGRAM

(Remarks of Ellis L. Armstrong, Commissioner of Public Roads, U.S. Department of Commerce, at chamber of commerce central highway committee luncheon meeting, Adolphus Hotel, Dallas, Tex., April 29, 1960)

This is my third visit to Dallas and my wonder as your amazing, dynamic, growing city continues to increase. Your accomplishments in Dallas are continuing to show the way to all of America. You have shown what can be done in our cities with wise, enthusiastic, energetic, farsighted leadership. I congratulate you.

We outsiders never cease to wonder at the vast scale of things in all of Texas. As Commissioner of Public Roads, I am particularly impressed. When the National System of Interstate and Defense Highways is completed, for example, you will have within your borders more than 3,000 of its 41,000 miles. You already have more mileage completed to full or acceptable Interstate standards, more open to traffic, and more under construction than any other State.

Since our greatly expanded highway program was inauguarted in 1956, construction contracts totaling about $185 million have been completed on the Texas segments of the Interstate System. In what we call the ABC program which started in a small way in 1916 and concerns improvement of the primary and secondary (or farm-to-market) roads, and their extensions into urban areas, $350 million in construction has been completed since 1956.

As you know, the Federal share of Interstate costs is 90 percent, and 50 percent in the case of the ABC program. It may be useful, in considering where our highway programs stand today, to review the evolution of American roadbuilding policies, and especially the terms of the partnership between the Federal Government and the States.

In the early days of the Republic, many roads were operated by turnpike companies chartered to relieve the States and localities of the burden of building and maintaining highways. The operators collected tolls from travelers. Although the roads are publicly owned, tolls are still a source of revenue over many stretches of modern highway, some of them on the Interstate System.

Since the Federal Government took a hand with highways, its policies have made almost a complete cycle. In the early years the National Government participated directly in the work. A provision of the 1802 act admitting Ohio to statehood set apart 5 percent of the net proceeds from the sale of public lands in the State for the construction of public roads leading from the navigable waters emptying into the Atlantic to and through Ohio. Of this, 3 percent was for roadmaking within the State and 2 percent for highways outside. The chief result was the famous Cumberland Road, which was constructed largely under the direction of Army engineers, and for which by 1838 a total of $7 million had been appropriated. A number of other highways were built by the Federal Government, many of them also financed through the sale of public lands.

Even before the final appropriation for the Cumberland Road was made in 1838, the Federal Government had begun to surrender sections of the road to States through which it passed. Gradually, Washington retired from roadbuilding, handing the job over to the States. They in turn left it increasingly to the counties or other local authorities, in whose charge it remained for years. One factor in the trend away from broad-scale highway planning was the rise of the railroads, which were relied on for long-distance transportation.

In 1891, another turn of policy was made when New Jersey enacted a State aid law under which the State, if prescribed conditions were met, aided the county and the property owners along the road by paying part of the cost. The policy found favor elsewhere, and many other States adopted similar systems.

In the days when counties, towns, and townships built and maintained public highways, they were used almost entirely for local traffic. The road supervisors were amateurs and the road crews were manned with statute labor, that is, men working out the road tax by contributing their own labor for 1 day or more during the year.

As a youngster in Utah, I remember riding on a road drag with my father as he worked out his yearly road tax. Actually the roads involved were used primarily by the farmers of the valley. Occasionally a brave soul from distant parts ventured through on the dusty, washboard, main highway, if you could call it that, but most of the traffic was local—and was financed by the local users, mainly by work supplied.

In 1916 the Federal Government again took an active part in highway building by helping the States. What is now the Bureau of Public Roads in the Department of Commerce had begun as the Office of Road Inquiry, a small unit established in the Department of Agriculture in 1893. For a score of years its activities were educational, and its only construction jobs comprised short object-lesson roads in various parts of the country. In 1912, Congress also authorized an experimental program of rural post-road construction.

By the time the Federal Aid Road Act of 1916 became effective, Federal highway policy had in a sense come full circle. Nationally, we were again building roads. In the 44 years that have passed since that time, the Federal Government's roadbuilding activities have increasingly centered in the Federal aid systems where we are the working partners with the State highway departments. Of course, we still do direct highway design and construction work in national forests, national parks, and other Federal lands.

The 1916 act authorized cooperation with the States, through their highway departments, in the construction of rural post roads, which it defined as "any public road over which the U.S. mails now are or may hereafter be transported, excluding every street and road in a place having a population, as shown by the latest available Federal census, of 2,500 or more, except that portion of any such street or road along which the houses average more than 200 feet apart." Although the kinds of highways built with Federal aid have greatly changed over the years, the 50–50 cost-sharing arrangement fixed in 1916 still obtains for the ABC program.

It was not until 1944 that the Interstate System was authorized. Congress then decreed, "There shall be designated within the continental United States a National System of Interstate Highways not exceeding 40,000 miles in extent so located as to connect by routes, as direct as practicable, the principal metropolitan areas, cities, and industrial centers, to serve the national defense, and to connect at suitable border points with routes of continental importance in the Dominion of Canada and the Republic of Mexico." The interstate routes were added to the Federal-aid system, but no special financing was provided.

The Department of Defense cooperated in the designation of the Interstate System, which includes the strategic routes of greatest importance to defense needs of the United States. In the 1954 act, Congress recognized that it was in the Federal interest to build the system to a high standard, and authorized the matching of funds on a 60 percent Federal, 10 percent State basis, with an additional allowance for States including large areas of Federal land from which they derived no taxes.

Congress and the executive branch and all of us all across America, increasingly recognized that highways were of national concern.

"There are two basic facts which are recognized and agreed upon by all concerned," said a House committee report on the Federal-Aid Highway Act of 1956. "First, the whole economy of the United States is directly dependent upon motor vehicle transportation. Secondly, we are failing to keep our highway systems adequate to meet our needs and the backlog of deficiencies required to be overcome has been and is constantly piling up at an alarming degree. Unless drastic steps are taken immediately we will fall farther and farther behind and traffic jams will soon stagnate our growing economy."

It was also realized that good highways were a necessity for defense. In 1955 President Eisenhower said in his message on the highway program, "In case of an atomic attack on our key cities, the road net must permit quick evacuation of target areas, mobilization of defense forces, and maintenance of every essential economic function. But the present system in critical areas would be the breeder of a deadly congestion within hours of an attack."

Accordingly, the 1956 act not only amended the name of the Interstate System to include "Defense" but increased the Federal share to 90 percent. As a practical matter, it

was recognized that projects on the Interstate System were, by their very nature, costly, and that it was of vital concern to all of us clear across America that they be completed as soon as possible.

There have been other evolutionary changes in the Federal-State partnership since the early joint building of rural post roads. We now grant aid to the States for construction on a system of principal secondary and feeder roads. We carry Federal-aid highways into and through the urban areas.

In the early days, State highway departments were prohibited from building or maintaining highways within incorporated cities, as was also the case with Federal-aid highway construction. The cities had for many years financed their street improvements out of benefit assessments and ad valorem property taxes. As motor-vehicle use increased, the State income from license fees and fuel taxes also increased, and a high proportion of the total tax income came from urban residents. There naturally arose a demand in the cities for a share in road-user taxes.

The States moved slowly in this direction. Maryland, in allocating 20 percent of the license fee revenue to Baltimore, was one of the first States to grant substantial urban aid. New York State made a similar grant to New York City as a part of the distribution of license fee receipts to counties. Several other States made concessions in the 1920's and 1930's.

The building of urban extensions of State highways in larger places also developed slowly. Major changes came in the National Industrial Recovery Act of 1933, which provided emergency funds for use on extensions of Federal-aid highways into and through cities, and in the Hayden-Cartwright Act of 1934, which permanently removed the restriction on urban projects.

The changes in State and Federal law and practice have brought a very great increase in the amount of money spent on urban connections of Federal-aid and other State highways. The policy of Federal and State responsibility for urban connections of primary highways has become firmly established. It has also been firmly fixed in law and practice for Federal-aid funds to be used on projects carrying Federal-aid secondary highways through cities.

This shift in emphasis toward the urban is quite in accord with the changes in our national life. Our cities contain about 100 million people, and the percentage is steadily increasing. About half of the total travel is within urban areas, and thus about half our highway user funds come from those sections.

As you know, most Federal funds are not expended directly, but are paid to States as Federal aid in reimbursement for work performed. The States also transfer to local governments about one-fourth of all State road-user tax revenues as State aid for local roads and streets. Taking into account these intergovernmental transfers, the States in 1960 will administer $7.2 billion of highway funds, or about two-thirds of the total.

Capital outlay (expenditures for right-of-way and construction) is estimated to reach $6.7 billion in 1960, slightly less than in 1959.

Highway construction expenditures (excluding right-of-way and preliminary engineering cost), are estimated to exceed $5.6 billion in 1960, a decline of about $140 million from 1959. Construction expenditures on the Interstate System will account for one-third of the total in 1960, and nearly three-fourths of the total will be expended on the various Federal-aid systems.

Before 1956, Federal appropriations for highway purposes were made from the general funds of the Treasury. The Federal-Aid Highway Act passed that year established the Highway Trust Fund from which highway payments are made. The law increased most automotive taxes and earmarked for the Trust Fund all those on gasoline, diesel and special fuels, tires and tubes, and motor vehicle use, and half the tax on new trucks, buses, and trailers.

A pay-as-you-go clause in the 1956 act limited apportionments that the Federal Government could make to the States to amounts that the Trust Fund could support. In 1958 Congress suspended this limit, increased the authorizations for Interstate and ABC, and as a special antirecession measure provided $400 million on a two-thirds Federal, one-third State matching basis for immediate road improvements.

The result was that we were forced to live beyond our income. When the pay-as-you-go clause came back into effect last year, the Interstate program was threatened with a halt as far as any new work was concerned unless additional funds were provided. President Eisenhower recommended a 1½-cent increase in the Federal motor-fuel tax for 5 years. In a compromise, Congress voted a 1-cent increase through the fiscal year 1961, to be succeeded by the earmarking of additional sums from motor-vehicle excise taxes through the fiscal year 1964. This legislation made it possible to keep up the Federal-aid programs without too serious a slowdown, but demanded some careful planning on reimbursements to the States. In effect, the situation limited the amount each State could obligate from its available apportionment and still be sure of payment of the vouchers when they came due.

Public Roads was able to apportion $1.8 billion to the States for the Interstate program in the fiscal year 1961, and expects to be able to apportion $2 billion for 1962 on the basis of present revenues.

In his budget message this year, President Eisenhower renewed his recommendation of the full 1½-cent fuel tax increase through 1964. He said this would permit the Interstate construction program to proceed at a higher and more desirable level. No action has been taken on this recommendation.

In the first 3½ years of the new program we have completed over 102,000 miles of construction work on our Federal-aid systems, including nearly 21,000 bridges, at a construction cost of over $8 billion. This road-building record includes almost 6,000 miles of construction on the Interstate System. We have construction underway on 25,000 additional miles of which 4,600 miles are on the Interstate System. During this 3½-year period contracts were let for approximately $14 billion on Federal-aid highways.

These improvements already have made a significant contribution to highway safety and efficiency in America. More than 7,570 miles of the 41,000-mile Interstate System are now open to traffic, including toll and free roads incorporated into the System.

We now have over 10,000 Federal-aid construction contracts underway involving nearly $6 billion.

It is natural that among all the people involved in one way or another there are a few who try to chisel, to make a fast highway buck. But it does not seem to me that the very few real instances of shenanigans justify the broad allegations that have been published about the Interstate System being in "trouble" or "a mess." It is most unfortunate that relatively trivial incidents have been magnified from molehills to mountains and that some wild reports have been interpreted as facts, while the great accomplishments have been overlooked.

In the Federal-State road partnership the State carries the responsibility for initiating the projects, programing the work, doing the detail design, and supervising the construction, subject to approval of each step by the Bureau of Public Roads. The States pay the contractors and then submit vouchers to the Bureau of Public Roads for reimbursement of the Federal share. The relationship is a partnership to assure construction to high standards and protection of public moneys. Actually, the large number of checks and counterchecks that are built into the program assure a good measure of protection.

Each State, of course, has regular inspection and auditing machinery of its own to keep tight rein on the expenditures of the various State departments. Then the regular inspection and auditing machinery of the Bureau of Public Roads has served as additional safeguard for many years.

Nearly every project receives engineering inspections during construction and all projects undergo a final engineering inspection and a final audit which are completed before the States get full reimbursement for the Federal share. The Bureau engineers' progress reports of interim inspections guide the auditors in approving progress payments.

The audits are prepared in the division offices that the Bureau of Public Roads maintains in all the States. They are forwarded to the regional offices (each region comprising four or more States) for review before amounts due the States are certified to the U.S. Treasury disbursing officers for payment.

In view of the magnitude of the Interstate program and the 90-percent Federal share, an additional safeguard was set up by the Federal Highway Administrator, Bertram D. Tallamy, shortly after he took office in 1957. This is the Project Examination Division of the Bureau of Public Roads. Since 1957 the Bureau has referred to the Department of Justice a dozen or more cases of irregularity investigated by the Project Examination Division.

The division is headed by a staff man of long experience, who is an accountant and a member of the bar. It has conducted general reviews of the Bureau's own field offices and the State highway departments in 44 States, and expects by July 1 to have examined all 50.

In a general review of State operations, a team of about six persons samples financial records that bear on the use of Federal funds, spot checking contracts and arrangements with consulting engineers. Three of the men who head these teams are former special agents of the FBI. In addition to the director, a team may include an engineer, two accountants or investigators, and a real property specialist.

If there is any indication of fraud, the team director has his men investigate the matter on the spot or he may bring in other specialists.

The Bureau of Public Roads often receives tips from independent sources on alleged wrongdoing. It makes a special review in such a case, sending one or more engineers or other specialists, their selection depending on the nature of the suspected irregularity.

Believe me, the Bureau of Public Roads is not indifferent to the loss of any tax dollar, whether it is State or Federal. But we must not forget that this is a cooperative Federal-State program. Complete domination of every aspect of the program by the Federal Government would amount to duplication of effort, would endanger the historic partnership and would be wasteful of public funds—both Federal and State.

A special subcommittee of the House Committee on Public Works, headed by Representative JOHN A. BLATNIK, of Minnesota, was appointed last November to investigate the Federal-aid highway program. The announcement of its appointment mentioned "information received by the committee alleging deficiencies, wasteful extravagance," and other matters. The Blatnik group can perform a valuable service to the highway program if, through its power of subpena and independent review, it points out areas where State and Federal controls should be strengthened.

We fully expect that instances of human error and attempted profiteering will be turned up by the committee, as well as by the Bureau's own forces. It would be naive to expect a multibillion-dollar program involving probably 1½ million people in various capacities—to proceed without such instances.

It is a credit to the Bureau and the States that the program has been so free of wrongdoing. Both the Bureau of Public Roads and the State highway departments are staffed by hard-working, dedicated people whose careers are bound up with the success of their joint undertaking. Their record of advancement in a very difficult and trying job is one of which all Americans can well be proud. It would be a sad commentary indeed in our America if they should become victims of irresponsible gossip and misleading headlines.

Besides the allegations of dishonesty, there has been some talk about carelessness, laxity, and waste. When charges of extravagance are specific, I have yet to see any that have stood up under examination.

It must be remembered that Congress has ordered the Interstate System to be built to carry the kinds and volumes of traffic expected for 1975. And it is good economy and good sense to build for the days ahead. Real waste and extravagance would be to build something that became obsolescent the day the opening ribbon was cut. Surely we are thinking enough and farsighted enough to plan and build adequately for our dynamic, growing America.

The interstate network, which is to carry 20 percent of the country's traffic on its 41,000 miles, is bound to be costly. It averages nearly $1 million a mile.

The real cost of highways is measured by the cost of highways per vehicle mile of travel. On our urban interstate routes, which cost the most per mile of construction, the returns are the greatest. Here actual travel is the most economical as the vehicle mile cost of the highway will be about a half cent. This compares with about three-fourths of a cent on the Federal-aid primary system, other than interstate, an overall average of all roads of nearly 1 cent and a cost of 1½ cents per vehicle-mile on the farm-to-market roads.

A dirt road would be cheaper than a four-lane surfaced highway, but in an area of high traffic volume it would be a waste of anybody's taxes. What may seem extravagant from one point of view is true economy from another. Perhaps a heavy car is wasteful for one purpose, but not for others. Perhaps taking a toll road and also paying gasoline taxes is wasteful for a traveler on a leisurely vacation trip, but not to a businessman who wants to get to an appointment quickly and without fatigue.

The Interstate System is to be a permanent national asset, and must be built for the future, to the high standards Congress prescribed. While watching quality, the Bureau of Public Roads at the same time looks for chances to stretch the highway dollar. The Bureau's annual report for 1959, which was published recently, recounts estimated savings of nearly $55 million achieved in that year through modifying conventional highway design in the interest of economy at no expense to the safety, comfort, and convenience of the traveling public. Bureau engineers worked out the modifications with State engineers during the design stages of Federal-aid projects.

In all the criticism of the vast highway undertaking, I have heard no serious demand that it be stopped. There is agreement on all sides that the Interstate System must be completed. The sea of trucks and passenger cars bears down on our inadequate highway channels in ever greater waves.

We have the engineers, the contractors, the machines, and the materials. The chief need is a permanent solution of the question of finance, on a basis that is fair to those who use the highways directly and those who do not. The present revenues of the highway trust fund have caused a moderate slowdown in construction. Next year, Congress plans to review the whole picture.

There will then be available a wealth of basic background information on which the Bureau of Public Roads and the State highway departments are working. An up-to-date estimate of the cost of completing the Interstate System will have been just completed. Other extensive studies will present benefits that highways bring to the various classes of users, as well as nonusers, so that Congress can consider the best and most equitable distribution of the cost of the long-range program. Extensive data will show the incremental costs due to different users of the highway system.

This I believe: The development of the Federal highway policy in the long partnership with the States is sound and is the best way possible to obtain our objectives of an integrated, high-standard, optimum, highway system to meet our evermounting traffic demands. The present program is geared to meeting the needs of a dynamic, growing America and is making great strides. I have great faith in the integrity and ability of the thousands of dedicated men and women who are carrying out the program. There are great days ahead.

QUARTERLY REPORT ON THE FEDERAL-AID HIGHWAY PROGRAM, JUNE 30, 1960

More than 9,100 miles of the 41,000-mile National System of Interstate and Defense Highways are now open to traffic and construction is underway on another 4,700 miles, Federal Highway Administrator Bertram D. Tallamy announced today.

Information as of June 30, 1960, compiled by the Bureau of Public Roads, U.S. Department of Commerce, showed that 250 miles of the system were completed to final standards during the last 3 months.

"The actual mileage in use by passenger and commercial vehicles rose from 8,855 as of March 31, the date of the last survey, to 9,107 as of June 30," Mr. Tallamy said. "Thus, well over one-fifth of the Interstate System is now open to traffic and new mileage is being completed rapidly as the construction season nears its peak."

The Interstate System will be the Nation's key highway network, serving both civilian and defense requirements, and carrying about 20 percent of the total traffic. The Federal-Aid Highway Act of 1956 required the system to be designed to accommodate the traffic needs of 1975 and assumed completion of the system by 1972.

Of the 9,107 miles of the Interstate System now in use by motorists, 3,693 miles were completed to standards adequate for 1975 traffic, and 3,140 miles were improved to adequacy for present traffic but will need additional improvement to bring them up to the standards for 1975. Toll roads, bridges, and tunnels incorporated in the system, as permitted by law, totaled 2,274 miles.

Almost half of the mileage open to traffic, 4,386 miles, has been built or improved under the Federal-aid interstate program, most of it on the 90-percent Federal, 10-percent State sharing program launched in 1956. Work on the remaining 2,447 miles (other than toll facilities) was financed by the States and localities, mostly before 1956, under other programs—in many cases with Federal aid.

In addition to the sections open to traffic, 4,690 miles were under construction with interstate funds as of June 30, and engineering or right-of-way acquisition was in progress on another 10,093 miles. Thus some form of work was underway or completed on 23,890 miles of the 41,000-mile system—over half of the total.

Under the controlling Federal legislation, each State receives a yearly apportionment of Federal Interstate funds for work on approved Interstate System routes. The apportionment of $2.2 billion for fiscal year 1962 was announced on July 26. The scheduling of preliminary steps and actual construction on the interstate routes is the responsibility of the States, subject to approval by the Bureau of Public Roads.

The status of the Interstate System as of June 30 is shown on the accompanying map, and in detail by States in table I. In summary, the status is as follows:

Mileage improved and open to traffic:	
Completed to full or acceptable standards:	
With interstate funds	3,141
With other public funds	552
Total	3,693
Improved to standards adequate for present traffic but additional improvement needed to meet full standards:	
With interstate funds	1,245
With other public funds	1,895
Total	3,140
Toll facilities	2,274
Total mileage improved and open to traffic	9,107
Mileage under construction with interstate funds	4,690
Preliminary engineering or right-of-way acquisition under way	10,093
Total mileage improved or work underway	23,890

Nearly $9 billion has been put to work on the Federal-aid interstate program since the accelerated program began, 4 years ago. Work completed since July 1, 1956, has cost $3.61 billion, of which $2.76 billion was for construction and $853 million for engineering and right-of-way acquisition. As of June 30, 1960, work estimated to cost $5.09 billion was underway or authorized, including $3.33 billion of construction and $1.76 billion of engineering and right-of-way acquisition. Interstate financing data, by States, are reported in table II.

The continuing program of Federal assistance for the improvement of the Federal-aid primary and secondary highway systems and their urban extensions (the ABC program) has also shown remarkable accomplishment, with more than $9½ billion worth of work involving over 126,000 miles of construction contracts completed or underway.

Construction contracts involving 100,100 miles in the ABC program have been completed since July 1, 1956, at a cost of $6.14 billion; and contracts involving 25,912 miles at a cost of $2.70 billion were underway on June 30, 1960. In addition, $427 million of engineering and right-of-way acquisition work had been completed and $275 million worth of such work was underway. The ABC program is financed by the Federal Government and the States on an equal-share basis. Data are reported by States in table III.

The highway trust fund, source of Federal funds for the Federal-aid highway program, received over $683 million of tax revenue income during the 3 months ended June 30, 1960, about four-fifths of it from the taxes on motor fuel. Disbursements for highways during the period amounted to nearly $552 million. For the entire fiscal year 1960, the total trust fund excise tax revenue was more than $2.5 billion, and disbursements for highways were over $2.9 billion. The status of the trust fund is shown in table IV.

TABLE I.—*National System of Interstate and Defense Highways—Status of improvement as of June 30, 1960*

State	Open to traffic								Work in progress with interstate funds			Remaining mileage	Total designated system mileage
	Completed to full or acceptable standards			Improved to standards adequate for present traffic			Toll facilities	Total open to traffic	Under construction	Engineering or right-of-way	Total underway		
	With interstate funds	With other public funds	Total	With interstate funds	With other public funds	Total							
Alabama	8.0		8.0	19.4	32.1	51.5		59.5	237.5	123.1	360.6	453.8	873.9

Status of highway trust fund

[Thousands of dollars]

	3 months ended June 30, 1960	Fiscal year 1960
Balance at beginning of period	[1] 184,905	523,657
Income:		
Tax revenue (net, after refunds):		
Motor-fuel taxes	549,689	2,043,764
Trucks, buses and trailers	46,810	141,944
Tires, tubes and tread rubber	82,896	315,607
Vehicle use	3,945	37,712
Total excise revenue	683,340	2,539,027
Advances from general fund	----------	359,000
Interest earned	857	1,855
Total income	684,197	2,899,882
Disbursements:		
For highways	551,715	2,940,583
Interest on advances from general fund	3,498	5,067
Repayments to general fund	195,000	359,000
Total disbursements	750,213	3,304,650
Balance at end of period	118,889	118,889

[1] This balance would be $10,095,000, if adjusted for the $195,000,000 net advance from the general fund to the trust fund.

TABLE A.—*Progress of Federal-aid highway program to Aug. 1, 1960*

[Dollars in millions]

1. TOTAL CONTRACTS ADVERTISED AND FUNDS OBLIGATED, JULY 1, 1956, TO DATE

	Program			Total
	Interstate	ABC	D	
Miles	10,983	91,377	12,110	114,470
Total cost	$8,583	$6,926	$621	$16,130
Federal funds:				
Construction	5,235	3,281	399.4	8,915
Right-of-way	1,624	225	.5	1,850
Preliminary engineering	481	88	.1	569
Subtotal	7,340	3,594	400.0	11,334
Administration	44	52	0	96
Total	7,384	3,646	400.0	11,430
Percent of funds obligated:				
Fiscal year	1960	1961	1959	--------
Percent obligated	93	22	100	--------

2. CONSTRUCTION UNDER WAY OR ADVERTISED, AS OF AUG. 1, 1960

Total cost	$3,373	$2,676	$22	$6,071
Federal funds	$2,992	$1,389	$13	$4,394
Miles	5,394	25,509	172	31,075

3. CONSTRUCTION COMPLETED, JULY 1, 1956, TO DATE (INCLUDES COMPLETED CONTRACTS ADVERTISED PRIOR TO JULY 1, 1956)

Total cost	$2,835	$5,651	$598	$9,084
Federal funds	$2,398	$2,900	$386	$5,684
Miles	6,615	89,686	11,938	108,239

4. STATUS OF HIGHWAY TRUST FUNDS AS OF JULY 1, 1960

	Receipts	Expenditures	Balance
Fiscal year 1957	$1,482	$966	$516
Fiscal year 1958	2,044	1,511	1,049
Fiscal year 1959	2,088	2,613	524
Fiscal year 1960	2,541	2,946	119
Total to July 1, 1960	8,155	8,036	119

Mr. RHODES of Arizona. With all due respect to the gentleman from Texas, the gentleman from Illinois deserves to be the first to be yielded to. I yield to him, and I congratulate him on his attendance here on the floor. As always, the gentleman from Illinois is a fine Member of the House, and I am sure we will enjoy his remarks.

Mr. PRICE. Mr. Speaker, I thank the gentleman from Arizona. It is sometimes amusing in this type of performance to hear these well delivered speeches where many questions are asked, and you would think the Member asking the question was going to faint if someone looked like he was going to attempt to answer the questions. But, I appreciate the courtesy of the gentleman in giving me at least a moment to reply and, particularly, to reply to the gentleman from New Hampshire [Mr. BASS] because he asked a direct question which most certainly can be answered. Some names could be given now in reply to the question and there are many others whose names could be given, if I had a chance to check the congressional hearings because frequently I have sat through congressional hearings in which our top scientists and top leaders in the administration have conceded certain edges to the Soviet Union—and I do not consider this to be such a terrible thing because we are all in the same fight. We want to overcome our shortcomings. I think if we learn something from these debates, maybe we will overcome our shortcomings and vote for sufficient appropriations to overcome our shortcomings and be more interested in overcoming these shortcomings than we are in balancing the budget and making a good record on economy. But to my mind, there come the names of two distinguished leaders of this administration who would refute the statement made by the gentleman from New Hampshire. One is the name of Trevor Gardner, Asssistant Secretary of the Air Force, in the Eisenhower administration. Another is Lieutenant General Gavin, a member of the Weapons System Evaluation Committee of the Department of the Army. These men have spoken out forcefully on this subject. They have even resigned their positions in the Government so that they could carry their battle directly to the people and so that they could speak more frankly. I do not think there is any secret about that. I think many names could be supplied to the gentleman from New Hampshire in answer to the question contained in the early part of his statement.

Mr. RHODES of Arizona. If the gentleman will permit me to make one statement, I hope the gentleman from Illinois is not confusing the space program with the accomplishments of the military.

Mr. PRICE. I am thinking both of space and the accomplishments of the military. I am very fortunate to serve on two committees, the Joint Committee on Atomic Energy which had original jurisdiction at the inception of the space program. We hear the same witnesses that the Space Committee hears. We also hear the same witnesses that the Committee on Armed Services hears. I also have the good fortune to serve on the Committee on Armed Services so I know whereof I speak and I am not speaking on the basis of secondhand information or from hearsay.

Mr. RHODES of Arizona. In order to put this in the proper context, may I repeat the statement in the platform to which we objected. The quote is:

> They had admitted that the Soviet Union leads in the space race and they have no plan to catch up.

Now I yield to the gentleman from New Hampshire.

Mr. PRICE. If the gentleman will permit me, I have heard that statement made before congressional committees. They made almost the same statement. I would not even say it is taken out of context. But, I have heard that statement made by responsible leaders in our defense picture and the space picture before congressional committees.

Mr. THOMSON of Wyoming. May I say to the gentleman, just let us know who that high official in the Republican administration is and quote him.

Mr. BASS of New Hampshire. May I answer the gentleman's statement?

Mr. PRICE. Let us take one question at a time. Let us answer the gentleman. I will now quote from the Assistant Secretary of the Air Force. Assistant Secretary of the Air Force Trevor Gardner said:

> We have been running second best in the race with Russia for ballistic missiles because (1) we have refused to admit that national security is more important than balancing the budget, and (2) former Secretary of Defense Charles Wilson and Deputy Secretary Donald Quarles permitted the continuance of a hopeless administrative jungle. This has strangled scientific thinking and performance. We have suffered a temporary defeat not because of the inadequacy of our scientists but because of the incredible ineptness with which we have managed our scientific resources.

Mr. BASS of New Hampshire. I would like to remind the gentleman that he is quoting from a statement made in 1956. I am a member of the Space Committee, and I have had the privilege of hearing most of the witnesses that my distinguished friend has heard, and I did not hear a single administration spokesman say what the Democrats have said in this platform—that the Republicans have admitted that the Soviets lead in the space race—not one.

I would like to ask the gentleman, Does he think the Republicans have no program in this exploration of outer space?

Mr. PRICE. No; I do not think that at all. I think, however, that there have been delays in the space program and in our defense program because of the restricted budget procedure and methods.

Mr. BASS of New Hampshire. I am glad the gentleman agrees with me that part of this is wrong; namely, that the Republicans do have a plan, the administration does have a plan for the exploration of outer space.

Mr. PRICE. I would like to refer to the gentleman's statement about the Polaris. Does the gentleman know that on the eve of the sputnik there were officials testifying before the committee that they could not push forward the

Polaris program; that no amount of additional funds would speed up the program and increase the day when we would have a missile? Yet 2 months after the sputnik funds were available. Because they were available, they did accomplish a great deal in expediting the Polaris program. Those are things that the platform refers to.

Mr. LAIRD. Mr. Speaker, will the gentleman yield?

Mr. BASS of New Hampshire. I yield to the gentleman from Wisconsin.

Mr. LAIRD. The Polaris program has never been lacking for funds. As a member of the House Appropriations Committee for Defense, we have never been in a position where the Polaris program has lacked for funds at any time during this administration.

I would like to make one further comment in regard to the gentleman's statement and the authority he used. I would like to comment that the statement we take exception to is the statement of fact quoting certain Republican administration officials as to certain conditions that exist with regard to the space program. The authority you used is not the authority the Democrats were using in Los Angeles. If he is not a Republican spokesman he could not be considered one in July 1960. If you will look at the picture in the outer lobby you will find that this particular gentleman today in Los Angeles opened Democratic headquarters for JOHN KENNEDY for President of the United States.

Mr. RHODES of Arizona. I yield to the gentleman from Missouri.

Mr. WINSTEAD. I cannot make much contribution to this argument, but the late Secretary of War, just before he died, testified before the Armed Services Committee and said, "We are not short of money. We are not short of time. We are not short of anything. We are just short of decisions to do something." I just do not want to let all these statements go by unchallenged. That is all I want to say.

Mr. RHODES of Arizona. I thank the gentleman for his contribution. And now may I yield to the gentleman from Wyoming?

Mr. THOMSON of Wyoming. The gentleman from Illinois [Mr. PRICE] again speaks of the missile and space programs in almost the same vein as did the Democrat majority leader on yesterday during Operation Veracity. Yesterday when the same subject came up and I pointed out to the majority leader that between 1946 and 1952 the Truman administration had spent only $6.6 million on research and development of ballistic missiles including both intermediate range and intercontinental.

This represented 8 long years of research and development lost under their stewardship. I have the tables prepared by the Department of Defense with me today.

Mr. Speaker, I ask unanimous consent to insert these tables at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

(The matter referred to follows:)

BALLISTIC MISSILE FUNDING

Mr. THOMSON. Then with regard to missiles, Mr. Secretary, I wish that you would state for the record, because I do not believe it is in the record, separately for both the IRBM's and the ICBM's for the fiscal years 1945 through 1960 the amount that was requested, the amount appropriated, and the amount that was released for expenditure and the amount expended.

Mr. LINCOLN. We will be happy to do that. (The information requested follows:)

History of IRBM and ICBM funding, fiscal years 1946–61

[Millions of dollars]

Fiscal year	IRBM			ICBM			Total		
	Budget request	Appropriated	Current program	Budget request	Appropriated	Current program	Budget request	Appropriated	Current program
1946				1.9	1.9	1.9	1.9	1.9	1.9
1947									
1948				.3	.3	.3	.3	.3	.3
1949				.1	.1	.1	.1	.1	.1
1950									
1951				.5	.5	.5	.5	.5	.5
1952				.8	.8	.8	.8	.8	.8
1953				3.0	3.0	3.0	3.0	3.0	3.0
1954				13.9	13.9	13.9	13.9	13.9	13.9
1955				40.9	40.9	158.9	40.9	40.9	158.9
1956 [1]	4.4	4.4	107.5	154.9	154.9	418.8	159.3	159.3	526.3
1957 [1]	276.0	276.0	501.9	582.9	582.9	899.0	858.9	858.9	1,400.9
1958 [1]	892.5	892.5	1,151.2	1,044.8	1,044.8	998.6	1,937.3	1,937.3	2,149.8

1960 [2]	839.8	839.8	1,189.5	1,683.0	1,855.0	2,113.8	2,522.8	2,694.8	[3] 3,303.3
1961	952.2			2,471.8			3,424.0		

[1] No funds appropriated to Army P. & P.; unobligated balances utilized.
[2] $300,300,000 fiscal year 1959 funds utilized in fiscal year 1960 for Polaris submarines.
[3] Fiscal year 1960 estimates refined from those used in tentative table dated Jan. 7, 1960.

NOTE.—Estimates are subject to minor revision due to program adjustments.

Program data reflected in this table cover the development and capital costs involved in missile programs; i.e., the cost of bringing missile systems to operational status plus the costs of procuring missiles and related equipment for operational purposes. These data include all procurement, construction, and research and development programs directly associated with missile programs. These figures do not include military pay, operation and maintenance costs for operational missile units and sites and include only those shipbuilding and aircraft costs directly associated with providing missile capability.

Mr. THOMSON of Wyoming. Mr. Speaker, let the record speak for itself. This table, and my question, are taken from part 3 of the hearings of the Department of Defense appropriations for 1961, released February 23, 1960, and appears at page 133 thereof.

May I further point out that this table would not reflect the additional effort made in space programs during the last years, as that is the subject of a separate appropriation. Separate budget requests submitted this year for space exploration and flight technology exceed $600 million.

It is perfectly obvious from looking at this table that we did not seriously commence on a missile research and development program until fiscal year 1954, commencing on July 1, 1953. This has allowed us only 7 years of real effort. There is no doubt in my mind that we could have been farther ahead in all phases of missilry, both military and space, had we not virtually wasted the 8 years of the Democrat Truman regime.

That time lost in research and development can never be purchased.

The remarkable thing, to me, is that after giving up this time in research and development, we are, militarily speaking, equal to or ahead of the Soviet. In this short period of time, we have successfully developed intermediate range ballistic missiles and placed them in operation. Both the Jupiter and the Thor are deployed or are being deployed in oversea bases where, with their limited range, they can be effective.

Even more significant is the fact that we have performed the research and development to have operationally effective and completely successful the Atlas intercontinental ballistic missile. From bases in this country, it will deliver, any place in the world, an adequate warhead to effectively destroy any known possible military target, whether now or in the future.

Sure, we are not quitting. It will be further improved. There will be follow-on missiles, the Minuteman and others which, in certain respects, will constitute a technological advance.

Let us not be misled by confusing space capability and military capability. As a military weapon, by any standards, it is as good or better than anything the Russians have. It will carry all the load we want to carry or have any military reason to carry, any place we want to carry it. There is every reason to believe that it is superior in reliability and accuracy to what the Soviet has now. With us having achieved that in such a short period of time, it is obvious to anyone that continuing with a responsible effort, we will stay out in front and go farther out in front.

Even in the space field, there is no reason to hang our heads or to take a back seat. These weapons were never intended for space vehicles, but when that became important, with makeshift modifications we have demonstrated our ability and scientific know-how. Their principal space limitation is that of thrust. They were developed as military weapons, and their thrust is completely adequate for that purpose. To be available soon, and progressing on schedule, will be vehicles intended for space which will have the thrust and other capabilities to far exceed anything that the Rus-

sians have done yet or will, I predict, do in that time, as concerns the size of payload or anything else.

This is truly a remarkable achievement to have been gained in such a short period of time. It is a great tribute to our scientists, both in and out of the Government, to our military, to those responsible for our production facilities, to the free enterprise system, and to our American way. It simply says that once we set out to do it, we can accomplish more than the Soviet in less than half the time. We should all join, not in bragging about this, but in forcefully pointing out the facts to the whole world. It should not be the subject of misrepresentation in a political platform.

Our sole objective is to preserve the security of this country and our way of life, while maintaining the peace. We now fully appreciate that to preserve our own security, we must join in preserving the security of other free nations of the world. For the moment, we accomplish this through military strength. Simultaneously, we sincerely and steadfastly pursue other means. Concurrently, we must exercise judgment, which will adequately provide for the security and the peace, but thwart the plans of those who would lead us into spending our way into a foreign ideology by destroying our system economically. America is not second rate and will not be if we follow the guidelines of this Republican—Eisenhower-Nixon—administration.

Mr. RHODES of Arizona. Mr. Speaker, I now yield to the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. I thank the gentleman from Arizona for his graciousness in yielding to me. I want to allude to the remarks made a moment ago by the gentleman from Florida [Mr. CRAMER]. The gentleman from Florida left the distinct impression on me that he was attacking the special subcommittee investigating the interstate highway program, and he left the distinct implication that the committee was conducting a political investigation. He accused the chairman of that committee of handcuffing and throwing a cold blanket upon an investigation between now and November, with the further implication that the distinguished chairman of the committee, the gentleman from Minnesota [Mr. BLATNIK] had something to hide.

Let me make one point abundantly clear as a member of that subcommittee: We are proceeding in the most nonpartisan way possible. Let me remind the gentleman from Florida that had we wanted to make a partisan investigation there were plenty of States involving allegations—I do not say truths, but allegations—that could have been investigated in open hearings regarding Republican administrations of those States. Had we wished to make a political investigation of it that is precisely what we would have done by holding investigations between now and November in such States as Illinois, in such States as Indiana, in such States as West Virginia, out of each of which reports have come to our investigative staff of irregularities.

It was precisely because we did not wish to make a political investigation that we have not scheduled any hearings between now and November. We thought we were doing the decent thing, we thought we were doing the objective thing, we thought we were doing the bipartisan or nonpartisan thing.

If we had wished to make a political investigation out of this, or to direct the investigative force of the subcommittee on a political path, we certainly would not have made our first investigation in a Democratic State; and that is exactly what we did. The very first investigation involved the State of Oklahoma, a Democratic State, where the Governor of the State happened to be a brother of one of the members of the subcommittee.

When the subject was broached to that member of the subcommittee he said, "Let the chips fall where they may."

That has been the theme of the investigation, not that it would be a whitewash, not that it would be a witch hunt, but it would be an objective and clear appraisal and would let the chips fall where they may.

Let me say further, the gentleman has cast some innuendo over the Oklahoma investigation by referring to it as an investigation into "internal political problems." Let me ask the gentleman if he regards the falsifying of samples to be sent to the State laboratory and the admission of those deliberate falsifications as internal political problems? Let me ask if he regards the testimony of improper weighing without inspection as an internal political problem. Let me ask if he regards the secret partnership of a member of the highway commission in a contracting firm as an internal political problem. Let me ask if he regards it as an internal political problem when the independent appraisers say the contractors were overpaid by some $500,000, and when most of this was Federal money? Was it an internal political problem that the Bureau of Public Roads inspectors failed utterly to detect any of these irregularities?

I get carried away, I expect, but it pains me very deeply for somebody to get up on the floor of the House and say this investigating committee has not done its work. It pains me particularly for that to come from a member of the minority with the inference that we have been conducting a political investigation, when the truth is that we have not been conducting a political investigation.

The gentleman indicated that our initial investigation into the matter of bridge clearances was aimed at the Bureau of Public Roads. Let me clarify that point by saying most emphatically that that investigation was aimed at getting the facts, and I think we did get the facts.

Let me ask the gentleman or any Member of the House if this is privileged information that should not be exposed when it can be proven that for 3 long years the members of the administration team in the Bureau of Public Roads and in the Defense Department could not get together and decide just how high the minimum bridge clearances should be, and that during that time some 2,200 new bridges were approved at lower levels than they now believe should be required at a total cost of some $374 million, and that we produce military hardware which must be moved from one end of the country to the other at rapid notice which cannot clear those bridges that were built during these 3 long years in which these administrative people were trying to make up their minds? I do not say that bureaucratic indecision is an exclusive domain of the Republican Party, but neither is it an exclusive domain of the Democratic Party.

If there need be any further proof of the value of these investigations, it can be found in the very fact that those charged with making this determination of minimum vertical clearances floundered on indecision for 3 long years, and shortly after we began our investigation, they got busy for the first time and finally made a decision.

I want to say simply that any criticisms of this subcommittee which are designed to imply that this subcommittee has conducted itself in any way other than as an objective subcommittee aimed at getting the facts, regardless of whom they may hurt, is not a valid criticism.

I want to say that those who level this criticism have not been conspicuous among those who supported the initial creation of the committee, they have not been conspicuous among those who asked for and supported requests for funds with which to conduct the committee hearings. They have tried in every way they could to discredit the committee and to obstruct its work, but they have not succeeded in either.

I want to say that this committee under the able leadership of the gentleman from Minnesota [Mr. BLATNIK] has bent over backward to be fair. This committee is dedicated to getting the truth out on the table, not to blame anybody, not to punish anybody, not to criticize anybody or any party but simply to see how this program can be improved to the end that the American public will be getting its full dollar's worth of road for every dollar of taxes it pays.

The gentleman may rest assured that these investigations by the committee staff are proceeding. They are proceeding, not helter-skelter, but in an orderly way. They are preparing their cases carefully. Hearings on each of the substantive cases will be held. Of that you may be sure. They will be public hearings. They will be held when the facts have been adequately developed. They will be objective hearings, and they will be designed to serve the specific interests of no particular political party, but those of the taxpaying public.

Anything that attempts to bring this committee and its work into a political arena is an unworthy allegation. This is a committee designed to get the facts, to let the chips fall where they may. It will not be a witch hunt but, by the same token, it will not be a coverup.

Mr. CRAMER. I will just take a minute in reply, and I will just reiterate the statements I made at the outset, none of which have been disproved by the gentleman from Texas. Of course, what he

says here today is a repetition of statements he has been issuing to the press, and it is a statement of his position on the subcommittee. So far as I am concerned, I just happen to disagree with him in regard to some of the facts of what happened and in regard to the road this subcommittee should take in pursuing for full, fair, and effective hearings on all matters. I particularly disagree with the Democratic platform and its statement in regard to this committee when it says that the committee has launched an extensive investigation of this highway program. The gentleman, in my opinion, proved the point I was trying to make when he stated that they had uncovered all of these things in these States, and I repeat that all of these things have been uncovered in all of these States, which all of us are concerned about and feel something must be done about it, and what this subcommittee was set up to do something about. Despite this admission, there has been only one investigation in one State which I said at the time I mentioned it uncovered things that made me very unhappy, and action was taken immediately to do something about them. And, I am sure the gentleman will agree with that statement of fact.

Let me say further that so far as I am concerned the gentleman knows full well, that the gentleman from Iowa [Mr. SCHWENGEL], who was one of the first to request the establishment of such a committee, along with myself and along with the gentleman from Ohio [Mr. SCHERER], who has been constantly criticized—and with the gentleman from Texas, too—we have been constantly criticized because we made such demands. When the subcommittee was finally set up, we were not even permitted to have a staff member and we were given a worse than 2 to 1 minority position. The chairman came in one day when the session started and said, without justifications and plans for committee action, "I want $300,000 to run this committee this year." I think that was the greatest amount any special committee has received, including the House Committee on Un-American Activities, with a staff of 40 people, and at that time we had a proposal for a staff of 6 people. Regardless, the minority asked for adequate funds, not funds that could not be justified, not funds to be squandered. We were not consulted on the makeup of the staff. These are legitimate complaints, and they still are legitimate complaints. We now have one minority counsel. Our counsel asked for information on these investigations, and that information was denied on the instructions of the chairman. I ask the gentleman from Texas if he does not feel that this is just a little bit unfair treatment of the minority, even though we are a 2 to 1 minority, and if we are not entitled to some of this information, some of these facts? And, my position in this matter, and in full support of the objectives of the committee is a matter of record. The gentleman has stated, that despite all the allegations of wrongdoing there has been only one investigation, which proves the point I made conclusively.

Mr. RHODES of Arizona. A gentleman who has been on the floor all afternoon and who has asked to make a statement certainly is entitled to be heard. I now yield to the gentleman from Illinois [Mr. PUCINSKI].

Mr. PUCINSKI. I want to congratulate the gentleman from Arizona [Mr. RHODES] for taking this additional time today for this discussion. I was on the floor yesterday when the gentleman asked unanimous consent for this additional time. I did not object simply because I felt that a give-and-take of this type was healthy. There will be those, of course, who will charge that this is a political discussion. After all, this House of Representatives is the greatest forum in the world today. If, perhaps, in the last few years there had been more of this give-and-take on major legislation we would perhaps have gotten better legislation out of the Congress.

I also want to thank the gentleman for taking this time, and I particularly want to thank the Republican congressional committee for doing an excellent job on research on all this great progress that has been made in this administration, because it is no question, no mystery or secret that the Democrats control the majority of this Congress, and we know that not one of these things that have been explained today in such glowing terms and attributed to the Republican Party could have been accomplished without some support from the Democrats.

We know that in every instance the Democrats have supported those things we thought were good. And I am happy to note that today a great deal of time has been saved for me and many other Members, time that normally we would have had to use for research to find out what the effects have been of the legislation that we have been supporting. Let us not make any mistake. Any way you want to chop this up, the fact remains that this administration would have been in a hopeless box if they had not received the cooperation and support of the Democrats who conducted themselves as statesmen in this House. The fact of the matter is that right now, at this moment, the gentleman recited many things that the administration had accomplished, but just a few moments ago the conferees broke up on the minimum wage bill. The President had told us that he was ready to recall Congress if we did not come up with a minimum wage bill. But just a moment ago the conferees broke up and three members of the Republican Party refused to go along with a compromise that would have given us a minimum wage bill in this session. Certainly the situation now looks rather hopeless.

I have been here through this great debate. I was very much surprised to hear that the speakers were perfectly willing to claim credit for all the good things but very conveniently were sweeping under the rug the shortcomings. I would have been much more impressed with this presentation if it had been in fact a factual presentation. But just a moment ago the statement was made on this floor that the Democratic candidate for President had voted against the St. Lawrence Seaway. The fact of the matter is that in 1953 on final passage the Senator from Massachusetts [Mr. KENNEDY] did vote for this project. Now, if you were as wrong in all your other presentations as you were on this, we cannot take it with a great deal of confidence.

I would have preferred if we had discussed fully the failures in foreign policy. But here again we Democrats are immediately accused, whenever we want to discuss foreign policy, that this is the untouchable thing; you cannot touch this because it might jeopardize the world situation, that foreign policy must be nonpartisan. We are supposed to sit by while 90 miles from the Miami beaches we have today a Communist satellite.

Of course, on the matter of defense, despite the fact that the Rockefeller report, the Gaither report, and the Hopkins report have all stated conclusively and clearly that while we are strong today—and there is no question about it, we are strong today—if we do not make the changes that have been recommended, in 3 years the Soviet Union may well issue an ultimatum to this country to surrender or face a nuclear war that we could very well lose. These are things which, when we want to discuss them, we are accused of undermining the confidence of our allies in America's ability to defend itself.

These are the inequities in this one-sided debate conducted by the Republicans who do not want to stand up and accept the challenge from those of us who want to challenge their statements.

I thank the gentleman for yielding.

Mr. RHODES of Arizona. Mr. Speaker, I am sure the gentleman knows exactly how to obtain a special order for himself on the floor of the House. You just make the request of the Speaker for permission to speak. And if the gentleman wants to conduct a debate on foreign affairs, there is nobody who can keep him from doing it. Whether he feels the Republicans have done this, or the Republicans have not done that, is beside the point. He knows that he can get whatever time he wants to make his statements, and if he will let me know, I will be very happy to join him, as will many others.

Mr. PUCINSKI. The only way is to do as I did last night, by not objecting to the gentleman's unanimous request for an extension of time, because I thought we would be doing much better if both sides were here.

Mr. RHODES of Arizona. I am very grateful to the gentleman for that, I assure him.

Mr. KING of Utah. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Utah.

Mr. KING of Utah. Mr. Speaker, I would like to say a word or two about space in answer to the remarks of the gentleman from New Hampshire [Mr. BASS]. I, too, am a member of the Committee on Science and Astronautics. My attendance has been good, I believe; I think I have done my homework and can speak with some authority.

A few months ago the chairman of the Republican congressional campaign committee was in my home city of Salt Lake making a keynote address at a Republican gathering. In referring to me indirectly he tried to think of the most opprobrious thing he could say. Finally he came up with this remark, that the Congressman from the Second Congressional District of Utah is a member of the Space Committee, flipping around in outer space instead of attending to his business here in Utah.

That is exactly the trouble. The Republican Party has not taken this matter of space seriously, as is evident from the statement I have just made. For that reason, I feel, and the evidence that has come before our committee has conclusively demonstrated, that we have fallen perilously behind the Russians and that there has been manifested a gap that we have no assurance can be closed up during the years to come.

I cannot remember any witness coming before our committee and stating categorically that we were ahead of the Russians in any field. I have heard several of them suggest that our progress in telemetering and in miniaturization was satisfactory and that there was a likelihood that we were ahead of the Russians in that field, but none of them have been able to state categorically that that is true. All of them have agreed the Russians are way ahead of us in the matter of the booster, the large rocket or missile that carries the machinery, the equipment, into space. They are up into 800,000 and 900,000 pounds of thrust while we are still in the 350,000-pound thrust area.

Mr. RHODES of Arizona. Before the gentleman leaves that point, may I say I am a member of the House Appropriations Committee and the Independent Offices Subcommittee. We appropriate money for the National Aeronautics and Space Agency. Certainly my recollection is that Dr. Glennan when he has come before us has said that we are behind the Russians in rocketry but we are not behind them in anything else. If the gentleman has any other quotes from Dr. Glennan I would certainly like to have him put them in the RECORD.

Mr. KING of Utah. Allow me to pursue this thought for a minute.

In 1954, as was testified before our committee, the Russians made a great decision. That was the year in which they decided to put most of their defense eggs in the missile basket, if I may use the phrase. That was the year in which they decided to give their space program the green light, to go all out to develop a superbooster. By a strange coincidence, that was the same year we made just the reverse decision. We decided we would specialize in a smaller rocket instead of a larger rocket, that we would specialize in miniaturization. By 1957 our own error had caught up with us. Sputnik I was launched. We realized that the decision of 1954 was a grave error. Then we reversed ourselves and tried to catch up. Now in 1960 we have still not caught up with where the Russians were in 1957.

This is the appalling fact of the matter. We have no evidence—and this comes back to the Democratic platform—we have no evidence that we are catching up with the Russians in the matter of the thrust of our missiles. We are doing our best now, of course, and we have an ambitious program, but we have every reason to believe that the Russians are also doing their best, that they have a program that is just as ambitious as ours, and every indication is that they will remain that much ahead of us.

Mr. RHODES of Arizona. If the gentleman has no evidence, then he probably has not read most of the testimony that has come from the National Aeronautics and Space Agency. I have evidence from having heard the testimony in my own subcommittee that we are catching up and that we will catch up. I am sorry the gentleman does not feel that way.

Mr. KING of Utah. To round out my point, let me make two other points. Then I will not trespass further on the time of the gentleman.

Edward Teller, the father of the hydrogen bomb, has stated repeatedly that we have fallen so far behind in the education of our potential scientists and in coming along to replenish the reservoir of scientists, we have fallen so far behind in the tempo of our education, remembering that the Russians are turning out three engineers to our one and two general scientists to our one, that there is nothing we can do, even if we try now, no matter what we do, to keep the Russians from overtaking us. Admittedly, we are still ahead of them. I do not think anyone questions that. The point is that their tempo, their acceleration is so rapid and they are taking this thing so seriously and are putting such a tremendous amount of their natural resources into educating scientists to take their place in the Russian space program that there is nothing we can do now to stop them. Those are the things that worry me and those are the things that I believe are at the base of the statement made in the Democratic platform. We have no assurance now that we are catching up with the Russians—and on that statement I will stand.

Mr. BASS of New Hampshire. Mr. Speaker, I want to say first of all that I had the privilege of serving on the Space Committee with my very good friend, the gentleman from Utah. I would corroborate what you say. You have done your homework well and you have served conscientiously. But you have made many statements with which I disagree. We do not have the time to go into that now, but I know my friend even if he is a Democrat is fairminded and I would just like to ask him this question. Going back to the original point that I am making and which I will repeat again, the Democratic statement in the platform and I am going to repeat it again to you and ask you if you think that that corresponds with the facts—the statement in the Democratic platform that—

> They [the Republicans] have admitted that the Soviet Union leads in the space race and they have no plan to catch up.

I would ask my friend if he believes that is a fact?

Mr. KING of Utah. If the gentleman from Arizona will yield so that I may answer. Naturally, the statement is not to be construed as meaning that all Republicans admit that the Russians are ahead of us. The statement is to be construed as meaning simply that there are responsible Republicans on record who have so stated. The gentleman from Illinois [Mr. PRICE] has given their names for the record. As to the second part of the statement, neither you nor I nor any other living American can state categorically whether we are or are not catching up with the Russians. If there is a gap—and I realize you challenge that—we do not know what the Russians are doing. We do not know the pace of their progress. That was testified to again and again and all we can do is to surmise. But, I would say, based upon the testimony that has come before our committee, I have every reason to believe that the Russians are travelling as fast as we are and since in 1957 they produced a rocket that we are not able to duplicate 3 years later in 1960, and if they are travelling as fast as we are, then it stands to reason that we are not catching up with them.

Mr. BASS of New Hampshire. The point I am trying to make to my good friend is, and I refer to the statement, "That the Republicans have no plans to catch up." That is not true; is it?

Mr. KING of Utah. My point is that there is nothing to show we have a concrete plan designed to develop a thrust equal to what the Russians will, presumably, have by the time we come out with what we are developing. We are now working on Project Saturn and other projects as well. We know that. I commend Dr. Glennan for what he is doing. But we have no evidence to show that when Project Saturn finally materializes that that will be equal to what the Russians have accomplished by the time we come out with Project Saturn. In fact, all of the testimony seems to be that they will have paced us and since they are at least 3 years ahead of us and very likely more, when we come out with Project Saturn, they will still be 3 years ahead of us.

Mr. RHODES of Arizona. The gentleman knows, of course, that Saturn is not the last word so far as our plans are concerned.

Mr. KING of Utah. That is correct. There is the project Nova and what I said about project Saturn would apply to project Nova or any other project as long as it is assumed that the Russians are traveling as fast as we are and we have every reason to believe that they are.

Mr. RHODES of Arizona. Of course, I have to disagree with the gentleman. I think we have every reason to believe that they are not, but the gentleman cannot prove his statement any better than I can prove my statement so we will have to leave it as a disagreement between friends.

Mr. THOMSON of Wyoming. If I understand the gentleman correctly, it does not quite jibe with the testimony I have heard as a member of the Defense Appropriation Subcommittee. We spent about 5 hours a day for about 5 months

listening to this type of thing. If I understand the gentleman correctly, he stated the Russians did not start on any research program for large propulsion rocket meteors until 1954. This differs from my understanding and I think I must have misunderstood the gentleman from Utah. The testimony I heard was that the Russians, using the German experts that were captured, started right after World War II. The other thing I heard was that we did not have any program because we—that was during the Truman administration—said, "No, we cannot develop this big propulsion system." Then with a defeatist attitude, we decided to do nothing, and the table that I included in the RECORD today will show that we did nothing. The Truman administration decided to wait until they got a breakthrough on a smaller warhead or as we might say "bomb load."

Mr. KING of Utah. Nothing I have said is to be construed as meaning that we were not in the missile field in 1954. My point was that at that time we had a decision to make. The decision was whether we concentrate on a smaller missile or go all out with a super missile. My point is that we made a fatal error by choosing the smaller instead of the larger.

Mr. THOMSON of Wyoming. But actually in fiscal 1946 the first money was appropriated in this country for a ballistic missile program. That was $1.9 million. Then World War II was over, and not a dime was requested or appropriated in fiscal year 1947. Then in 1948 only $300,000 was requested by the Truman administration because they thought they could not develop this big propulsion. In fiscal 1949 only $100,000 was requested in the budget, and in the next year, 1950, nothing. In 1951, $500,000; in fiscal 1952, $800,000. In other words, you had no program because they accepted this defeatist attitude. Then this breakthrough was made to the smaller weapons, and we went ahead with the smaller payload. We went ahead with the smaller thrust system, which was all we needed, but the Russians started right away on greater propulsion and now they have got a bigger motor. Militarily speaking, ours is just as good as theirs. We will soon have the bigger motors, greater propulsion for space because this administration also has gone to work on that.

Mr. PRICE. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I yield briefly.

Mr. PRICE. The figures the gentleman has been referring to was money actually expended on rockets. However, at that time there were under order the Snark project and the Regulus project.

I see the gentleman shaking his head. I happened to be on the committee that handled this in 1947. I would remind the gentleman that it was during those years that they originated and developed the inertial guidance system and most of the gadgetry in the rockets of today. This research and development was not charged to the Space Administration or charged to the rocketry program but was charged to the Air Force and the Navy. If it were not for the discoveries made in that research and development as far back as 1947 and 1948 you would not have the guts of the present missiles.

Mr. WINSTEAD. Mr. Speaker, will the gentleman yield?

Mr. RHODES of Arizona. I decline to yield.

The Snark, as the gentleman knows, is an air breather, so is Regulus. Those are not true rockets.

Mr. Speaker, I cannot yield further. I want to button this up, if I may.

Operation Veracity has charged that there have been certain misstatements in the Democratic platform. We have had a debate. Members from both sides have participated, and I think it has been a very beneficial sort of thing. I would like to remark that at least—I say, at least—three-quarters of the statements which we stated were false have been unchallenged as false statements.

The gentleman from Ohio's statement that the statement of the Democratic platform—"The quality of medical care furnished to the disabled veterans has deteriorated under the Republican administration"—was untrue went unchallenged; no one challenged that fact.

Mr. WINSTEAD. Mr. Speaker, will the gentleman yield right at that point?

Mr. RHODES of Arizona. I am sorry; I cannot yield.

The gentleman from Wyoming [Mr. THOMSON] stated that the Democratic platform statement that "the Republicans discouraged this research"—referring to salt and brackish water conversion—was an untrue statement. His challenge stands alone. There has been no attempt to justify the statement in the platform.

THOMAS CURTIS from Missouri charged that the Democratic statement—"the Republican failure in the economic field has been virtually complete"—was untrue. His charge remains unchallenged except for some very fine cliches and renovation of old campaign speeches.

The statement by the Democratic administration—"the Republican administration has allowed the Food and Drug Administration to be weakened"—was challenged by the gentleman from New York [Mr. DEROUNIAN], and I do not remember any Member on either side stating that Mr. DEROUNIAN's challenge was incorrect.

The gentleman from California [Mr. HOSMER], challenged the statement in the Democratic platform—"it has stalled the atomic energy development." His challenge was not accepted by any Member of the other side.

The Democratic platform stated "but the Republican administration has replaced this sound policy with a national antilabor policy."

The gentleman from New York [Mr. DEROUNIAN] challenged this statement and no Member on the other side has disputed his challenge.

Neither has any Member on the other side disputed the challenges of the gentleman from Illinois [Mr. DERWINSKI] concerning the development of inland waterways; of the gentleman from Wyoming [Mr. THOMSON] concerning the allegation that the Republicans had had "no new starts," nor the challenge of the gentleman from Kansas [Mr. AVERY] to the statement concerning the weakening of the Nation's transportation system.

Certainly there was no successful contradiction of the challenge by Congressman NELSEN, of Minnesota, of the statement that the Republicans had "sought to cripple rural electrification."

In the items of defense, the farm policy, and space, there has been much debate. However, I submit to any fair-minded person that the statements made in the Democratic platform on these points which were challenged by the Republican Members have been proved to be misstatements.

I must also comment on the fact that at no time during Operation Veracity did the gentleman from Connecticut [Mr. BOWLES], the chairman of the 1960 Democratic platform committee, make an appearance on the floor of the House, even though he was specifically invited to be present.

The SPEAKER. The time of the gentleman from Arizona has expired.

HON. HENRY ALDOUS DIXON

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Iowa [Mr. SCHWENGEL] is recognized for 30 minutes.

Mr. SCHWENGEL. Mr. Speaker, I have listened with a great deal of interest to the debate on the House floor in which we have attempted to set the record straight. It has engendered some debate. The subject I am going to talk about I am sure will not engender debate; it is on the life and public work of HENRY DIXON, a colleague of ours who is planning to retire this year.

The gentleman from Utah, Congressman DIXON, as might be expected from his own unique, interesting, and genial personality, comes from a colorful family background. For example, his father was elected to be Utah's State treasurer on the Republican ticket and became concerned about the lack of revenue in this sparsely populated State. The senior Dixon heard of a new idea that had been tried by three States of taxing inheritances. Consequently he took a trip to the States which had enacted the law to find out how it worked and how much revenue was raised from it. He brought back his information and by diligent efforts lobbied an inheritance tax law through a reluctant Utah Legislature. The legislature even refused to reimburse his travel expenses yet within a few months after the law was enacted Averell Harriman's father died, and since Union Pacific was incorporated in Utah he left a small fortune to the new State. Almost simultaneously David Eccles, the father of Marriner Eccles who became Chairman of the Federal Reserve Board, died and left another small fortune to the State. With this money Utah built its attractive State capitol which it had long wanted to construct.

While his father was State treasurer, HENRY DIXON was a young boy growing up in Salt Lake City. He was adventuresome as were many of the other boys

in the area, and one day was caught by local police officers on a very minor juvenile offense. Although the offense was minor, that of climbing under a fence to see a ball game, ALDOUS DIXON'S father was horrified, particularly since the newspapers wrote up the story and listed his son's name, this being before the time that newspapers refused to print the names of juveniles who got into trouble.

Consequently, John Dixon went down and bought a large plot of land north of Provo, Utah, sent his son, HENRY, down there to convert this raw earth into a thriving orchard, thinking that keeping his son busy in this kind of endeavor would keep him out of mischief. Young HENRY succeeded and developed one of the most beautiful orchards in Utah County. This experience gave ALDOUS DIXON a life-long love of farm youth, since they particularly learn the value of work. The city hall in Orem today stands on ALDOUS DIXON'S former orchard.

Seeing the disadvantage that the farmers had marketing their produce, he subsequently organized and became the first president of the Timpanogos Fruit Marketing Cooperative.

He married gracious and attractive Lucile Knowlden whose father had been an honest-to-goodness western sheriff's deputy and had helped capture a number of real desperados from "Robber's Roost," but who retired into safer business activities.

HENRY DIXON later became the managing vice president of the Farmers and Merchants Bank in Provo, but after a certain length of time in this position, he decided that the real opportunity for service was in the field of education. He accepted a position as superintendent of schools in Provo—a position for which the board of education told him he would not need any further education himself. However, in his typical conscientious manner he decided that if he were going to be involved in educational administration, he should learn everything that could be learned about it. So he began the very arduous task of moving his family away to school every summer in order to gradually work to fulfill the requirements for a doctor's degree in educational administration.

Frequently when we see people who have made outstanding achievements we can look back to an earlier period of their lives and see the sacrifice that they made which laid the basis for the building of character and knowledge which contributed to their later achievements.

In writing his doctor's dissertation HENRY DIXON decided to write on the investment of permanent school funds in Utah. The people who managed the permanent school funds in the State were extremely uncooperative with his efforts to make the study. However, through assiduous perseverance he finally initiated and got well into the study. He uncovered so much corruption in the use of the permanent school funds that the legislature gave him a team of six persons full time to help him complete the study. Thus those who know Dr. DIXON'S remarkable combination of educational idealism and practicality will not be surprised to know that he is probably the only man in history who wrote a doctor's dissertation which was so practical that it put two men in jail.

In this combination of practicality and idealism HENRY DIXON is an outstanding exemplification of the Mormon people from which he was produced.

It is also typical of his perseverance that once he undertook to get his doctor's degree he did not give up even though the slow summer-by-summer process took him until he was 47 years old and had six children before he received that doctor's degree.

Incidently, Dr. DIXON'S doctoral dissertation was published by the University of Southern California Press where he received his degree, and I have been advised that to this day the school of education recommends that doctoral candidates study the Dixon book as a masterpiece of organization and clarity.

Another interesting characteristic about Dr. DIXON'S employment was that he had such a friendly personality that he was able to reconcile intense conflicts and bring order out of troubled situations. This had been the case when he took over as superintendent of the Provo schools and it was also the case in his next move. He was called to become president of Weber College in Ogden where they had been having some difficulty. He took the position and soon unified the faculty and the community toward the goal of building an outstanding junior college.

One of his first accomplishments at Weber College was also typical of his practical nature. He realized that so much college work had been traditionally theoretical and difficult for many individuals to profit from. Consequently, one of his first efforts was to secure funds from the State legislature to build a vocational education building to help upgrade peoples' skills during the depression and train them for jobs—particularly those who normally would find little of value in a college education. His foresight turned out to be prophetic in that World War II began not long after the vocational education program had been fully launched. As president of the college he cooperated closely with the Armed Forces which established major depots in the Ogden area, which is even today the biggest railroad freight reloading point west of Chicago. DIXON kept the vocational education building going in three 8-hour shifts daily so that the lights and machines and building were operating at full capacity day and night to produce airplane mechanics, welders, and various other semiskilled and skilled employees. He also honored these laboring men with the highest dignity. For example, he brought union leaders from each of the crafts in to serve as advisory committees for the various technical educational programs. He also set up what were the only known graduation ceremonies for participants in the vocational education programs.

Weber College has been ranked as having one of the best vocational education programs in the Nation. The program expanded and included training for policemen and an amazing number of other types of positions.

With the terrific community support that he generated for the college he made an agreement with the State legislature that the community would raise $50,000 if the State legislature would match the amount to buy land for a new campus at the base of the beautiful Wasatch Mountains in the southeast part of Ogden. Those were hard days to collect volunteer contributions amounting to $50,000, but Dr. DIXON succeeded. Incidentally one of his biggest contributions came from a former student body president of Dr. DIXON'S at Weber College, Willard Marriott, a name that we have all come to know here in Washington as an outstanding civic leader and president of the Hot Shoppes, Inc.

Dr. DIXON once more became a troubleshooter when after Utah State University, then called Utah State Agricultural College, called on him to come and be president of Utah's Land-Grant College. There had been a rapid turnover of presidents and here once more Dr. DIXON soothed the troubled waters and brought harmony between the faculty and board members, the Governor, the alumni, and the community.

After being at the helm at Utah State University for a year and a half, Dr. DIXON, a lifelong Republican, was brought to his current post in Congress by one of the most amazing routes that any Member of Congress has taken to get here.

Scarcely 2 weeks before the final election Utah was embarrassed at the revelation that one of its Representatives had greatly exaggerated his war record. A Republican Convention for the First Congressional District was called, accepted the incumbent's resignation of candidacy for reelection, and literally drafted Dr. DIXON to run for the spot. Some political scientists have written that there has never been a genuine political draft—that every apparent draft is manipulated by the candidate. Perhaps that rule is proved by the Dixon exception. This may be the only genuine draft in political history.

Dr. DIXON had every reason to want to stay at Utah State University. He had a higher salary than Congressmen received at that time, and he was truly interested in dedicating his efforts to continuing to build up the agricultural college. But the party convention literally drafted him with the apparent belief that there was no other man in the State who was so loved by all that had a chance of defeating an ex-Congressman with only about 10 days to campaign.

Dr. DIXON accepted the challenge and fulfilled every expectation of this supporters even though many of his good friends voted against him because they wanted to keep him in the State. In fact the night that the returns came in his family divided up into two rooms—those who were cheering for DIXON because they wanted him to win and those who were cheering for his opponent because they wanted him to remain in Utah.

Of course his victory was so spectacular that many House Members were intrigued to get to know him, which gave

him a very good start in his 6-year congressional career.

In his second election he won by 61 percent of the vote which tied for the highest percentage of the vote ever won by a Republican congressional candidate in the State of Utah.

Although he is now retiring from Congress, he never plans to retire from his constant life of service. He will teach two classes at Brigham Young University. Although he has worked with education much of the past 46 years it has been to a great extent heavy administrative work, and he wants now to return to his first love—teaching students directly in the classroom. In closing may I observe that our loss is your State and communities gain. Good luck and God bless you as you continue to serve humankind.

Mr. Speaker, today as we take this opportunity to pay tribute to a great American with whom all of us have had the pleasure to serve during the past six years, we are again reminded how important it is to have men and women who are able, knowledgeable, and dedicated to the great ideals left us by our forebears.

The story of this man's life is a part of the great American story of success through unselfish service to his fellow men, to his community, his State, and his Nation.

HENRY DIXON whom we honor today has served with us for 6 years now and he has chosen to retire and to turn the responsibilities of this office over to his successor and to return to his native State and former professional interest. To those of us who came here with him and came to know him so well, we hasten to point out that these past 6 years have been rewarding and pleasant years for all who have worked and served with him. These have been worthwhile years, too, for his district, his State, and his Nation. He gave to them generously and unselfishly the best from his own vast and varied storehouse of experience and knowledge.

Mr. Speaker, I now yield to the gentleman from California [Mr. BALDWIN].

Mr. BALDWIN. Mr. Speaker, let me say that I think it has been an inspiration to all of us who have served in Congress during the 6 years that HENRY DIXON has been here just simply to serve with him in the House of Representatives. It was my privilege to become a Member of the House in the 84th Congress, the same year that HENRY DIXON came in as House Member, and one of the greatest inspirations to me during the 6-year period has been the service of HENRY DIXON. He was elected as president of the 84th Republican Club because all of us who served with him respected him so highly. He has the most laudable and admirable personality, I think, of anyone that I have ever met. In short, he has the ability to speak his convictions, and I think in the two fields of agriculture and education all of us recognize today that he is one of the most thoroughly grounded and most familiar with the subjects of anyone in the House. I think that all of us feel that we have been given something that will lift us further than we would otherwise be lifted just because we were associated with HENRY DIXON during the past few years. It has been my privilege to meet his wife and the members of his family on a number of occasions, and they were truly an inspiration to me. In his retirement I know he will be busy, because it is in the nature of HENRY DIXON to be so. I wish for HENRY DIXON all of the happiness and success that all of us could wish him in the days to come.

Mr. SCHWENGEL. Mr. Speaker, I yield to the gentleman from Utah [Mr. KING].

Mr. KING of Utah. Mr. Speaker, I rise willingly and agreeably to add my tribute to those already given to my distinguished colleague, HENRY ALDOUS DIXON. The broad aisle separating the east half from the west half of this historic Chamber has a tendency to block the free interchange of friendship and personal confidence among its Members. But, in the case of Dr. DIXON and myself this has not been so, and I give full credit for that fact to Dr. DIXON. I am not suggesting that he has not played his part aggressively and courageously as a member of his party, and I am certain that his fellow party members are proud of his record. What I am saying is that Dr. DIXON is a Christian gentleman, a loyal American, a true friend, and that he does not allow partisanship to destroy fellowship.

When I first came to the Congress Dr. DIXON opened up his office and his heart to me. He gave me sound counsel on a number of points; suggested ways in which I could avoid some of the aches and heartaches and pitfalls that always accompany a freshman in this great body. I was glad to follow his counsel. He was as an elder brother to me.

I became very close, and I am now; and with all my heart I hope that that closeness of fellowship may continue through the years to come.

Dr. DIXON, I might add, is a member of the General Board of the Deseret Sunday School Union of the Church of Jesus Christ of Latter-day Saints, known generally as the Mormon Church. He has served in this capacity along with his many other responsibilities for many years.

His conduct has been exemplary. Always he has lived up to the high standards and ideals which he professes.

I think Dr. DIXON has an earthy quality; and I use the term "earthy" in its highest and most exalted sense. He has his feet firmly planted in reality.

He is approachable, in spite of the many honors which have been heaped upon him, politically, academically, religiously. Always he is approachable, always friendly, always filled with good humor, sage advice, sound philosophy.

I have enjoyed so much knowing his wonderful wife who has backed him up in so many ways and helped to create an exemplary family in every way. I deem Dr. DIXON to be one of the finest, closest friends I have. I wish him Godspeed in his new assignments.

Mr. AVERY. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield to the gentleman from Kansas.

Mr. AVERY. Mr. Speaker, I certainly want to pay tribute to one of the distinguished Members of the House who on his own volition is retiring from our midst. I cannot help but note as I look around, particularly on our side of the aisle, all Members present in the immediate area of the Speaker at least, came to Congress, as did the gentleman in the well addressing the House, in the same year as did our good friend from Utah, Dr. DIXON. Several of the Members at least who are here today, were here yesterday, possibly, when I had a special order to pay tribute to a retiring Member of the House from my native State of Kansas, Mr. REES. As I sat here listening to the tributes that are being paid to Dr. DIXON today, the thought occurred to me how much alike is my colleague from Kansas, characterwise at at least, and personalitywise, if you please, and the Member to whom we are paying tribute here this afternoon, the gentleman from Utah [Mr. DIXON].

Their legislative and professional careers, of course, are at variance. However, when you stop to think of the many things they do have in common—they are both very kindly persons; they are both extremely tolerant; they both have a very fine and delicate sense of humor; they have both raised very fine families; they are both living examples of the very principles which they espouse, that of honor, integrity, loyalty and devotion to duty and also, a might add, fear of God. I know that HENRY DIXON has had a very definite impact on my life, Mr. Speaker, not only as a Member of Congress, but also as an individual and as the titular head of my family. I shall certainly miss not only his wise counsel on the floor of the House of Representatives and in committees, as a committee member and as a witness, but I shall also miss my association with him as a tried and true friend and also, I think, as an inspiration.

So in summary I want to associate myself with everything that has been said in tribute to HENRY DIXON and to his fine wife and family.

I think if we could at this point inject a little different note, had I heard the recitation of the event about the offense committed by the gentleman from Utah [Mr. DIXON] in his youth from any other source than from the gentleman addressing the House from the well, I would have discounted it, because as I have known Mr. DIXON I can hardly conceive that he would have done anything in the slightest degree irregular. But I must accept it as being true in fact, coming from no less a source than the gentleman from Iowa. Nevertheless, I think that only makes him more human. It does not in any way detract from the high respect and dignity with which I regard him.

I thank the gentleman from Iowa for yielding to me that I might pay my personal tribute to Dr. DIXON.

Mr. SCHWENGEL. I recited this only to point out a lesson from which we could all learn, that it was a part of his life and it ended in fine fashion. It had a salutary effect on his whole experience, on his life. It made him the personality that he is and made it pos-

sible for us in a way to share some of his experiences.

Mr. THOMSON of Wyoming. Mr. Speaker, will the gentleman yield?

Mr. SCHWENGEL. I yield.

Mr. THOMSON of Wyoming. Mr. Speaker, I know of no man, not only in this Congress but in this life of mine, that I have had the opportunity to meet and come to know for whom I have a more profound respect, high regard, and deep affection than to the gentleman from our neighboring State of Utah, who will be leaving the Halls of Congress by his own choice at the expiration of this term—Congressman DIXON, affectionately known to all of us as Dr. DIXON.

Dr. DIXON and I came to Congress in January 1955 at the same time. Because of our community of interests, coming from the same area, we have worked closely together. I have come to know him in ways that few Members of Congress can, because whenever I am traveling in the western part of Wyoming along the Utah border, particularly when I am campaigning and shaking hands, and I run into somebody from Utah I say, "How is my good friend Dr. DIXON over there?" I can pay no greater tribute to him than to say that whether it be Republican or Democrat, whether it be a workingman, a salesman, or a banker, and we have many people from Utah coming into Wyoming at that time of year for recreation, never have I had anyone respond with anything but high words of tribute to this really fine man. I know that they spoke from their hearts, and in spontaneous terms.

That is the way we, too, feel about him who are familiar with the services he has rendered to his community, his State, and his Nation. The people in Utah are grateful, we here are grateful, and the people of the Nation are grateful and fortunate that he has performed that service. I think about his dedicated support of the upper Colorado River storage project. I know that throughout his life he has dedicated himself to the service of youth. I think his service in Congress could be characterized as the carrying forward of that dedication. With respect to the upper Colorado and reclamation, I know his great concern was to make Utah and that part of the United States a better place for youth to grow up in and find a better way of life. I think of his dedication to a sound agricultural program and the guidance that he as a member of the Committee on Agriculture has given to us through his service here in Congress. I also am quite familiar with his stand on other issues of our time. I think all of this is a living memorial to his unselfishness and his dedication to the youth of our country. Throughout his life his service has been characterized by an effort to make this country a better place for young people to live and to provide for them an ever higher standard of living and more opportunities.

I do not believe in the city of Washington, Dr. DIXON has three greater admirers or three stancher friends than my three boys. If they could speak here in this Hall of the House of Representatives, even though they are but 8, 14, and 17 years old, they would speak from their hearts, and they could say this better than I, because he has touched them as he has touched every Member of the Congress. He is dedicated to the work of the Lord whether it be in his church or in the Halls of the Congress. In everything he has ever done, as I have observed him, he has been dedicated to the proposition to search for that which was right and then to champion that cause with everything he has.

My wife Thyra and I have come to know and to love his lovely wife, Lucille. I know they are planning to return to their State of Utah, to their home not far from the borders of Wyoming.

Mr. Speaker, I take pleasure in this one thought at this time of the departure of Dr. DIXON from the Congress of the United States and that is I hope and trust we will have occasion to be associated together back in our home States over a long period of time. I wish for him and his family many, many years of real happiness with a little more leisure to go hunting and fishing, which I know he enjoys so much. Mr. Speaker, I hope we will see him often.

Mr. SCHWENGEL. Mr. Speaker, I yield to the gentleman from Arizona [Mr. RHODES].

Mr. RHODES of Arizona. Mr. Speaker, I thank my colleague, the gentleman from Iowa not only for yielding to me but for making it possible for me as well as other Members of the Congress to pay tribute to our very good friend and respected colleague, the gentleman from Utah [Mr. DIXON]. The Congress will be a poorer place because of his decision to retire voluntarily. The people with whom he will come in contact in his future life will be the richer because of that decision which he now makes. Dr. DIXON is the type of person who is best characterized by the words "sterling integrity." Not only because he is a man who believes deeply in his religion and in his God, but because he also believes in his fellow man and in the inherent goodness of his fellow man. I am sure that no Member of the House of Representatives, in fact, no person who has ever known Dr. DIXON can say that he has ever been guilty of a mean thing or of anything that is unworthy of the highest standards of manhood and of the profession which he has chosen, that of teaching young people. Although his contributions in the Congress have been great, probably his greatest contributions have been and will in the future be in the field of education. His church is establishing a new university in my district. I mentioned this to Dr. DIXON once and suggested that, perhaps, he could tear himself away from his native State of Utah and come on down and let those of us who live in Arizona have the benefit of his wisdom and the benefit of the fine company he affords to all of his friends.

I repeat that invitation and do so with all my heart. I am sure that he would make a fine citizen of any State, and I am more than sure that he would find he has more friends in the State of Arizona than even he can realize. I have come to know Dr. DIXON not only personally, but by reputation because he has many friends living in my hometown of Mesa and in the city of Phoenix—not only friends but relatives. I know of no person who has not the highest regard for him as a person, as an educator and as a legislator. It is my great privilege to wish Dr. DIXON and his wife the best of everything in the days to come and to assure him that he has made friends in the Congress, friends that he will never be without. I hope our paths will cross frequently in the days to come and that I may be privileged in some way to be of service to him in any manner that he may choose as time goes on.

Mr. SCHWENGEL. Mr. Speaker, I yield to the gentleman from Nebraska [Mr. WEAVER].

Mr. WEAVER. Mr. Speaker, I, too, want to join with my colleagues on the floor in paying my respects to the distinguished gentleman from Utah, my friend and colleague, Dr. DIXON.

Along with most of my colleagues who are now on the floor it was my privilege to have first met and become acquainted with Dr. DIXON at the beginning of the 84th Congress. Since that time I have found no finer friend in the Halls of Congress than Dr. DIXON.

Dr. DIXON is a very kindly man, a man of great talent, a man of great ability, and a man who has been completely devoted to the task of doing his job properly for the people of Utah as well as our country as a whole.

My service in Congress, I feel, has been the better because of my friendship with Dr. DIXON. I certainly join with my colleagues and wish him and his splendid family well in the days ahead, and I hope that in those days ahead he will take time to come back and say "hello" to all of us.

GENERAL LEAVE TO EXTEND

Mr. SCHWENGEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the public service of HENRY DIXON.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. PIRNIE. Mr. Speaker, it was with deepest regret that his colleagues in the House learned of Dr. DIXON'S decision to retire from the Congress upon the completion of his present term. Those of us who have been privileged to be closely associated with him have appreciated and admired his quiet efficiency, his deep understanding, and his gentle firmness. To his tasks he has brought a truly dedicated spirit and in the performance of his duties he has displayed sound judgment and keen perception. He has gained our complete respect and won our enduring affection.

Dr. DIXON has achieved a record of service seldom equaled. The problems of his constituents have received his careful and skillful attention. He has been proud to represent them and has evidenced this pride by loyalty to their needs and proper interests. Absorbed as he has been with these countless personal services, he has encompassed

with his study and advocacy all the great problems and issues, domestic and foreign, which have highlighted his years of service. He has sought to guide this country along paths of progress and real service to mankind.

With dignity and skill he has represented faithfully the people of his district and the welfare of his Nation. He has earned retirement status but we understand he will return to the halls of learning which have claimed a major portion of his life. In leaving this Congress, he takes with him the very best wishes of the Members of this House and the gratitude of the people he has served so well. He will be blessed with all the happy memories loyal and unselfish service to his country inspire.

Mr. HOEVEN. Mr. Speaker, Dr. DIXON is one of the most beloved and one of the most highly respected Members of the House of Representatives. He is a unique person, having all of the qualities of a kind, gentle, and considerate individual. In short, he is an outstanding Christian gentleman.

Dr. DIXON by reason of his training and experience has been closely associated with the problems of American agriculture. He has been intensely interested in agricultural research and in that particular field he has contributed much to the writing and presentation of research legislation. His fine services will be solely missed by the Committee on Agriculture.

Dr. DIXON has been a conscientious Representatives and his retirement gives us a keen sense of loss. My best wishes go out to Dr. DIXON for good health, happiness, and success in all of his future undertakings.

Mr. THOMPSON of Texas. Mr. Speaker, ever since I heard of the coming retirement of the Honorable HENRY A. DIXON, I have had a constant feeling of regret that the Congress must lose the services of this able and genial Member. From the first time I met him, HENRY and I have always "clicked." We have worked side by side in the Committee on Agriculture and I cannot recall a single instance when we differed on fundamentals. On minor political matters, maybe yes. But on fundamentals, definitely no.

HENRY combines an unusually fine and analytical mind, with a lovable and warm personality. I can easily understand why he was such an outstanding success in his former profession of teaching prior to his coming to Congress. We shall all miss him.

I, for one, take comfort in the fact that he is not retiring from all activity and that his home country out in Utah will again claim him, after the close of the present Congress.

HENRY is and has always been one of our very best. May his successor be half as good.

Mr. McINTIRE. Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to say that it is with a certain sense of sadness that I avail myself the privilege of paying tribute to a Member who will not—because of a decision to retire—be with those Members who meet at the inception of the 87th Congress: the distinguished Member from Utah, Mr. ALDOUS DIXON.

Mr. DIXON has given outstanding service to his constituency, displayed dedication, devotion, and love for his country, and exhibited great compassion and understanding for his fellow man. He is a man possessed of the highest of ideals, applying these in his everyday living, and these are supported by a deep religious conviction. In him do we truly find a personification of real character, and through him do we really see the operation of those principles upon which America was built.

"Doc" DIXON came to the Congress after distinguishing himself in Utah as a leading educator, and he was, in fact, the president of the land-grant college in his State. His intelligence and broad experience combined to make a very valuable contribution to the function of the Congress, and in serving with him on the House Committee on Agriculture I have had the opportunity of availing myself of his sound counsel.

I have had an additional pleasure, for it has been Mrs. McIntire's and my privilege to have a personal acquaintanceship with Dr. and Mrs. Dixon, as well as members of their family. We have found all of them to be truly wonderful persons.

These fine folks will certainly be very much missed in the environs of Washington, but the harsh aspect of their absence can in some respects be tempered by the realization that these vigorous persons have earned their just due of a less strenuous life. I would, however, venture to say that the luster of activity will never depart from their future lives, for their love of and interest in their fellow man will continue to lead them into the dynamic current of social service.

Mrs. McIntire joins with me in extending to "Doc" and Mrs. Dixon our very best wishes for the years that lie ahead, and it is our fervent hope that these will be replete with good health and great happiness. We would also like to say that our lives—having touched theirs—have become fuller, richer, and deeper.

Mr. REES of Kansas. Mr. Speaker, before leaving the House of Representatives, I want to join with my other colleagues in paying respects to a distinguished American who is retiring from Congress this year.

The Honorable HENRY A. DIXON is one of the finest characters I have known. He is an educator. He is a scholar. He ranks high as a legislator. Dr. DIXON has contributed much to legislation during the time he has been in Congress. His views and his influence have meant much to other Members. The Congress and the country are better because of the services of Dr. HENRY A. DIXON.

Mr. BUDGE. Mr. Speaker, it is with sincere regret that I join other Members of the House in bidding farewell to Dr. HENRY ALDOUS DIXON. Dr. DIXON, in addition to being a neighbor of mine in political districts, is a close personal friend and one for whom I have the highest regard. Since he represents Idaho's neighboring State of Utah, we have had many things in common, due to the similarity in natural resources and the interests of our constituents. We have found ourselves on the same side of most, if not all, political questions and particularly those involving the basic rights of the individual and the development of our natural resources. It has been a pleasure to join with him in championing the supremacy of States rights in the matter of control and use of perhaps the greatest resources within our States, that of water, and of sponsoring legislation to authorize projects which provide for the growth and development of our area.

As I recall, Dr. DIXON was drafted by the citizens of the Second Congressional District of Utah late in the campaign of the year 1954, and with reluctance on his part, since he had never before sought public office. He was at that time president of the fine Utah State Agricultural College at Logan, Utah, which is now known as the Utah State University. Prior to that time he had served for many years as president of Weber Junior College in Ogden and had served in numerous other assignments in the educational field.

I know from personal discussion with my colleague of his great love for these United States and for the Constitution of this great Nation. We share similar basic beliefs that this Constitution was divinely inspired. I am sure it was because of this strong conviction that he agreed to become the Republican candidate which resulted in his election to the 84th Congress. This was his first attempt at either a State or National political office, and I am sure he is a member of a rather select group who can claim the distinction of being elected on the very first try, of having served in successive Congresses without defeat, and of retiring through his choice.

His devoted service in the House is known to all of us, and more particularly to the members of the Agricultural Committee on which he has been an active member. Dr. DIXON is a man with high ideals and yet he has the common, sympathetic approach to all problems of society. As I have indicated, he left the rather quiet atmosphere of the college campus and the classroom to respond to the call of his party and enter the hectic activities of a political campaign. He has continued as a campaigner here and proven himself to be not only an unusually well qualified legislator, but a most courageous one as well.

It is with deepest respect that I pay tribute to his service as a distinguished Member of the Congress, a great defender of Republican ideals and a man with great religious faith. As he leaves the Washington scene to join the faculty at Brigham Young University, I know we will miss him, but I also know that he will be an inspiration to the many students who come under his striking personality. I can only hope they measure up to him.

RUIN FOR THE DAIRY FARMER

Mr. STRATTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. STRATTON. Mr. Speaker, the other day the gentleman from Pennsylvania [Mr. CURTIN] took the floor of the House to discuss at some length a situation that has developed in his district in northeastern Pennsylvania along the border of New Jersey which affects certain dairy farmers in his area who ship and have traditionally shipped some of their bottled or packaged fluid milk across the Delaware River for sale in New Jersey.

Under the present Federal Milk Marketing Order No. 27, which applies to New Jersey as well as to a substantial portion of New York State, including, I might add, a sizable portion of the 32d Congressional District of New York, which I have the honor to represent, anyone who sells the fluid milk within the limits of the order area is required to pay into a common pool a certain portion of his receipts for this milk for the purpose of establishing a certain fixed and fair price both for fluid milk and for manufactured milk applicable to all producers selling within the designated area.

I am sure it is not necessary to dwell at length with the Members of this House on the details of this milk order procedure, which are already familiar to most of you, especially those who represent dairy areas. Similarly, it is not necessary to dwell at length either on the reasons behind these milk orders, even though they are somewhat different from procedures usually followed by manufacturer or businessman.

Briefly, the State and Federal orders to which the gentleman from Pennsylvania referred were originally set up in New York State back in 1938 under President Roosevelt and Governor Lehman and a companion order was subsequently established for the State of New Jersey in 1957. The purpose of the orders, of course, was to prevent the economic disaster that had hit the dairy farmer in the past as a result of drastic shifts in the supply and demand for fluid milk and which had upon occasion led not only, as you will recall, to milk strikes with fluid milk running away into the ditch, but even to outright violence. These orders have succeeded remarkably well in eliminating that kind of disaster and they have brought a high degree of stability to the milk marketing areas they affect.

They do this by creating what are known as market pools under which all producers of fluid milk selling in a given area share in the benefits of the high prices that are paid for milk used for fluid consumption and by the same token also share in the burdens of the lower prices that are paid for milk which falls into the extra reserve or cushion part of total production used for lower-priced manufacturing purposes. Without this kind of pooling or sharing arrangement all milk producers would be scrambling for the higher price outlets and the result, of course, as has occurred so often in the past, would be a break in the price structure and disaster for all the milk producers involved. The bigger the market area the more the producers who are damaged.

The New York and New Jersey milk marketing orders for example, which have been supplemented by a Federal order which was expanded in 1957 to take in an even larger zone, now cover some 50,000 producers and one and a third million dollars worth of milk a day is being distributed and sold in the area of these orders.

To make a pool arrangement like this work there must, of course, be a careful definition of the milk which is to be included in the pool. And such rules must be spelled out by regulation and designed so carefully as to be enforceable against violation. Without drawing a careful line as to the area affected, each pool could easily cover the whole country and then, of course, the effectiveness of the order would be lost.

Naturally, any definition of such an area involves the exclusion of areas as well as the inclusion of other areas. Fringe, periphery, and borderline situations are bound to develop and these, of course, have to be dealt with, too.

Now while this order No. 27 has not been perfect in all respects, as nothing produced by mere mortals can ever be perfect, it has indeed introduced an element of much-needed stability into a situation which was not only unstable but fraught with economic and even political disaster. As a result, even though the farmers and cooperative groups which represent them may disagree from time to time with regard to some of the provisions or price levels that are established by the milk marketing administrator under the order, I think it is fair to say that all of them are united in believing that the existence of the order is essential to their own economic stability and they would naturally view with great alarm any attempt to destroy this piece of governmental action which has over the years brought so much to them in the way of economic benefit.

Now, Mr. Speaker, as I understand the situation, the case to which the gentleman from Pennsylvania [Mr. CURTIN] referred had to do with producers of milk whose plant was physically located, as I have said, outside the specific area delineated by the New York-New Jersey Federal Milk Marketing Order No. 27, specifically the Lehigh and Suncrest concerns. Over the years these producers had, however, sold a portion of their milk across the river in the State of New Jersey, within the boundaries of the order. In an effort to deal with the various fringe situations to which I referred a moment ago, the order provided that those who sell all or a portion of their milk within the order's area, like the gentleman's constituents, must be prepared to play according to the rules. They are permitted to pool either a portion of their milk returns based on the percentage of milk which they sell in the marketing order area, or to pool all of their returns, whichever they prefer.

Frankly, the arrangement strikes me as being eminently fair. No one has to play the game, but if he does play the game certainly he should expect to play it according to the rules. No one has to sell milk within the area of a marketing order, but if he desires to take advantage of the area affected by the order, then he should be expected to abide by the rules which set it up. Yet the gentleman from Pennsylvania has objected to the requirement that his constituents should be required to pay even a portion of their funds into an arrangement designed to be of benefit to all of the farmers of the area.

Because his constituents live outside the geographical boundaries he believes that they should therefore be exempt from the provisions of the law, even though in fact they are one of the group of producers selling within the zone covered by the law. And so vigorously do his constituents feel about this matter, Mr. Speaker, that they have taken the matter to court, as the gentleman explained in his remarks the other day, and are seeking a judicial determination that the order, which has these provisions with which they disagree, should be thrown out and wiped from the books.

Now let us make no mistake about this, Mr. Speaker. This would certainly be the result of the suit by the gentleman's clients, Lehigh and Suncrest, if they were successful—to destroy the whole order. Because if one producer can move into the order area and can ignore the provisions of the order with impunity, then, of course, any other producer can do the same thing and thus provisions and controls which have been built up carefully over the years in an effort to avoid the economic chaos and violence that occurred to the dairy farmer in the thirties would be eliminated.

This problem of the more remotely distant occasional bulk shipper not regularly associated with a particular milk market who might like to unload unmanageable surpluses upon the market, Mr. Speaker, was met way back in 1945 by providing that they pay into the pool on the amount they shipped at a rate sufficient to represent their effect on the pool in displacing regular pool milk. This provision was put in in 1945 after several amendment hearings.

The problem, which the gentleman's constituents face, of a fringe distributor selling principally outside the market but with some sales coming into the area in his own packages and vehicles, did not arise, I am informed, until 1957 when the order was extended to include milk produced for northern New Jersey and the southeast portion of upstate New York. There were no such periphery operators previously, because the original marketing area—New York City and Nassau, Suffolk, and Westchester Counties—did not have adjacent land areas except sparsely settled northern Westchester. However, when the area was extended, some actual and much potential distribution on both sides of the market bounds had to be considered.

Therefore, the rule now being attacked was provided. The remote bulk non-pool shipper had been allowed to pool, that is to pay in, only on the amount he shipped; but when the area was extended, the fringe distributor

with a small percentage of his business inside the area was given the privilege of total pooling, in case he did not like to pay in on only the amount sold inside the area. The two concerns in eastern Pennsylvania who reside in the gentleman's district do not want either to pool fully or make this partial payment.

Regular pool handlers with whom these two compete in distribution all have to make payments to the pool for the benefit of all pool producers on this high priced fluid utilization, but these two concerns desire to keep such moneys solely for the benefit of their own producers. Many regular pool producers who have all fluid sales could get much apparent benefit by the same treatment, but they realize that to do so would break down the whole principle of marketwide pool equalization, force a fight for fluid markets at cut prices, and break the entire price structure to ruinous levels.

I might say that all the producer organizations of New York, New Jersey, and Pennsylvania, except Lehigh, are in this case on the side of the Government as friends of the court. These number 130 all of which, except 2 operate on a much smaller scale than Lehigh. It is the third largest in the area.

Of the 29 country milk plants that receive milk from about 3,000 producers in my district, 5 are owned and run by 1 single plant operating cooperatives, 6 by a multiplant operating cooperative, and the other 18 by dealers at each of which the producers are members of one or another of 4 cooperatives which represent them in bargaining for the sale of their milk. All of these cooperatives have entered this case as friends of the court on the side of the Government.

These cooperative groups frequently disagree with determination of the USDA on provisions or price levels in the regulatory orders. They are firm, however, on their insistence on the provision being attacked by these two Pennsylvania concerns because they know that the orders cannot exist without it and the orders have proven to be their only method of price stabilization needed to keep their farms financially sound.

The States of New York and New Jersey have also come into this case, along with the largest cooperative in New England, as friends of the court on the side of the Federal Government.

In fact, if the New York and New Jersey order is stricken down, then 50 other similar orders across the Nation would also be stricken down, with ruinously low prices to the milk producers affected as the result.

In addition, the gentleman from Pennsylvania has also introduced a resolution, House Resolution 625, calling for a congressional investigation of the operation of this order in the light of the gentleman's contention that the order is not in the public interest.

Now I have no desire, Mr. Speaker, to take issue with the gentleman from Pennsylvania in his very proper desire to represent his constituents. All of us here are trying as best we can, of course, to do precisely that. But I am concerned, Mr. Speaker, that in representing his constituents in Pennsylvania the gentleman is proposing to destroy an economic arrangement under which thousands of dairy farmers in my district of New York have been living and doing business for years and which all of them regard as being absolutely vital to their own economic health and well-being.

I think it would be most unfortunate, Mr. Speaker, if the gentleman's remarks about the operation of the order were to go unchallenged on this floor or if the impression were to be gained, particularly now that this case is currently pending in the courts, that this House by tacit consent supports the gentleman's contention or his desire to upset those arrangements of law which have brought peace and stability into so much of the dairy industry. I think it is important, Mr. Speaker, that since this matter is pending in the courts, we take no action here that would appear to be forcing the hand of the judiciary.

I, for one, believe that it would be disastrous if this order were to be upset. The result would be ruin for the dairy farmer and we would be back again in the dark days of milk strikes and dairy truck violence. I hope and pray that day will never come again. So let us stand firm behind the dairy farmers of our Nation. Let us support them in their efforts to live their lives and conduct their business with security and stability and dignity. Let us continue to adhere to the American principle that he who desires to play the game must play it under the same rules as are followed by everyone else. And let us not even unwittingly act to stir up controversy and dissension within the dairy industry but rather work to promote and extend the kind of economic stability which has been such an important byproduct of the milk orders set up so many years ago.

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. VAN ZANDT] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. VAN ZANDT. Mr. Speaker, I rise to agree most earnestly with the remarks of the gentleman from the 32d New York District, Mr. SAMUEL S. STRATTON.

The gentleman from New York has said everything that needs statement at this time in this matter, that is, that the Congress should not interfere with the orderly procedure of the court cases testing the legality of the compensatory payment provisions of the New York and New Jersey State and Federal milk producer price orders.

I have three such order plants in my district with approximately 600 producers delivering to these plants. These producers, through their cooperative organizations, have come into this case as friends of the court on the side of the Government.

The principal point I want to make is that this is not a partisan matter between States or political parties. It is true that the Lehigh Cooperative is a Pennsylvania concern, but it is the only one of the 130 cooperatives affected by the price orders in question, which is not in this case on the side of maintaining the provision of the orders attacked by Lehigh.

Pennsylvania dairy farmers have a most important stake in the maintenance of the New York-New Jersey Federal milk order as it now stands. Some 12,000 of our dairymen are producing milk for this New York-New Jersey market. This is more than the combined totals of our Pennsylvania dairymen serving the two largest markets within the State—Philadelphia and Pittsburgh.

A majority of these 12,000 dairymen are members of some 36 cooperatives operating in Pennsylvania who are on the side of the Government in support of the milk order and the contested provision.

Let the interests of all these dairy farmers, including those of the Lehigh Cooperative, be adjudicated by the orderly processes of the courts which presently have jurisdiction.

FARM POLICY AND FARM PROBLEMS

The SPEAKER pro tempore (Mr. KING of Utah). Under the previous order of the House the gentleman from Missouri [Mr. RANDALL] is recognized for 15 minutes.

Mr. RANDALL. Mr. Speaker, before this short session adjourns, I feel it is appropriate to attempt to round up a not too elongated résumé of some of the thoughts or thinking of several different groups or viewpoints which seek to analyze our farm problem.

I wish to make it very clear and plain that I do not profess any claim to authorship to these ideas, nor do I suggest they are new or original, or exclusive to all other approaches. Instead my objective is to simply restate some of these thoughts as a sort of recapitulation, or as an outline of suggestions dropped into the hopper, with some possible value as a stimulant to further thought on this most complex problem.

If I may be permitted to do so, I would like to present these thoughts in outline form:

I. IMPACT OF THE FARM PROBLEM ON THE REST OF THE ECONOMY

I read where steel production is operating only at a little over 50 percent of its capacity. Certainly steel is one of the keys to our industrial well-being. We must hasten then to note that farms are still steel's largest civilian customer. Steel followed the same pattern in the 1955–56 farm recession, and if we have any hope of stabilizing our entire national economy, and in particular in the steel industry, then one of the first and most important steps must be the stabilization of prices in agriculture, which is our largest basic industry.

The low per capita income of agriculture States has even resulted in shifts of population to industrial areas. What happens? There are no new jobs in these latter areas and yet an effort must be made to make room for this new labor supply. One suggested solution is the shortening of the work week. But

in the event of a depression, large urban population represents a real threat to our economy. Certainly it is preferable that the population be not so falsely and suddenly concentrated, but remain distributed in a balanced pattern throughout our vast agricultural areas.

Another facet to this problem is that the reverse of such a trend can sometimes be observed. An area low in agricultural income will be forced to offer tax-free industrial sites, and enact such legislation as right-to-work laws—in a desperate last-ditch effort to attract industry from other States. A careful observance of this sort of thing will lead to the conclusion that the farm problem—if it remains unsolved as to one State—represents a direct threat to neighboring States.

II. THE PROBLEM ITSELF

At the base of the pyramid, as one of the major elements in this problem, is overproduction. Technological strides in agriculture have been almost beyond imagination. One of the great changes is from horse and mule power to tractors. This power source in years past consumed a lot of the grains produced. The iron horse consumes only gas and oil. In years gone by, the horse and mule consumed the product of about 80 million acres of land. But those remaining today consume the product of only 10 million acres of land. In the last 25 years, we have seen the switch from old varieties to hybrid corn, improved strains of wheat and other grains, plus the widespread use of commercial fertilizer. It appears unlikely that in the future, progress in technical improvement will continue at the same rate of pace that it has in the past. This fact taken alone should be helpful to the surplus problem and cause the production curve to flatten. But one thing we must all remember is that as the production curve rounds out, there is another curve to reckon with. Apparently there is but one way for the population curve to be plotted on the graph and that is upward. These two trends going in diverse directions should accomplish a permanent solution to the surplus problem within the years ahead. But our problem is now—this year and the next few years, which leads us to an analysis of another phase of the problem itself, and this is our marketing system.

True, great strides have been made in production, but then we must ask ourselves if we can equally well apply our intelligence and wisdom in an equally efficient manner to the marketing of this production. Here again is one of the basic blocks at the foot of the pyramid and one of the most important factors to be included in building a solid foundation for a solution to the problem. It starts with the recognition that most of the world is hungry, that actually there is no food surplus—in terms of supplies over total human needs. Rather there is only a surplus which our present marketing system cannot dispose of with a reasonable return to the producer. Stripped bare, our marketing system is not much more than an auction, but with one advantage and that is its ability to move an almost unlimited amount at some price. But let's underscore the words, "Some price," which certainly holds no hope for the producer, the American farmer. Any incentives in this present marketing system are ordinarily set up by the processor, and one must remember that the incentives are usually set up for the benefit of only the processor. As to these incentives, no consideration is given to such things that might aid producers in leveling out livestock cycles.

Our domestic marketing system is not geared to the opening up of secondary markets at home or abroad and is not well coordinated with Public Law 480. In the marketing system itself, there are no mechanics at all to adjust supply to effective demand, other than Government legislation—which enforces this adjustment part way.

III. ABSENCE OF BARGAINING POSITION

A good part of the trouble comes from the farmers' inability to bargain. He walks into the marketplace with hat in hand and says "What will you give me?" Then, later when he goes to make his own purchases he is told what the price will be, on a take-it-or-leave-it basis.

On the one hand, there are millions of producers who are dealing with the processing industry, which is dominated by a few giants who set prices and market policies. These processors are the ones who have been most critical of price supports, but it is these selfsame price supports that have given the millions of producers the only bargaining ability that they today possess.

IV. FUTURE FARM PROBLEMS

It might be unwise and even impractical to detail with great particularity the specifics in a new farm problem, but certainly it is possible to set down broad guidelines for such a program.

First. Any solution should recognize the necessity of maintaining agricultural price structure in balance with the industrial price structure. It is suggested this can be done in the following two ways: Price supports and deficiency payments.

Certainly the first has the advantage because it need not involve large Government appropriations.

Second. There should be a recognition of two paramount problems: The present low price-surplus emergency; and long-range market developments.

In my opinion, any current land withdrawal program should, because of present huge surpluses, be financed by payment-in-kind. This would accomplish a good result in that less feed grain would be fed back into the livestock economy than would be normally produced. Further, such a proposition would serve a dual purpose. It would cut storage costs and at the same time reduce the otherwise large appropriation necessary for land withdrawal. Such a land withdrawal program should be approved only after the necessary food reserves have been carefully determined, allowing for hostilities, disaster, and drought, and only after being carefully keyed to the plan for "food for peace," when these plans have been fully explored.

An alternative to land withdrawal plan, financed by a payment-in-kind, would be the mandatory allotment program, very similar to the old allotment program but with much tighter controls and cross-compliance. For my part, I would favor such mandatory or forced allotments only after a referendum vote by farmers, bearing in mind this mandatory allotment and the land withdrawal supported by payment-in-kind are all the time to be classified as emergency measures.

After the emergency period is past, it is time to pursue a marketing expansion program with the ultimate and eventual goal to be full production for American agriculture, limited only by sound soil conservation practices.

It is my opinion that in this entire effort, farmers should have not simply the right which should certainly exist in a democracy, to have a referendum to vote for the particular program, but should be given substantial responsibility in setting up, administering and financing these programs. Bargaining position can be improved through Federal marketing orders. This bargaining should be aided and improved by granting authority to certain commodity crops, to limit production, after national needs are satisfied. Not only farmer responsibility must be encouraged, but also there must be farmer realization that he must share in the cost of surplus disposal. Producers—farmers—should be given the tools to maintain price levels that will return the cost of production, plus a reasonable profit, but it must also be brought home to these producers that surplus production beyond market needs is his own responsibility and the farmer must either not produce an excess, or if he does, be willing to share in the cost of disposal of the excess.

I think most farmers as individuals realize the problems and are willing to cooperate to solve them. It is the place of the Government to provide the legal means necessary to implement corrective group action.

In a final word, the program which provides the most lasting benefit and solution will be that program which gives farmers the tools to help himself and to be financed by these farmer producers.

WE NEED A MORAL AND SENSIBLE FOREIGN POLICY

The SPEAKER pro tempore. Under the previous order of the House the Chair now recognizes the gentleman from Oregon [Mr. PORTER] for 60 minutes.

Mr. PORTER. Mr. Speaker, we need a moral and sensible foreign policy. We do not have one today. A Johnson-Kennedy victory on November 8 will give us such a policy. A Nixon-Lodge victory will not.

Our foreign policy has not been moral. The Republican administration has treated tyrants as though they were respectable and worthy of our friendship. Our foreign policy has not been sensible in other respects. The Republican administration endorses disarmament but refuses to invite China to the conferences where the agreements must be negotiated and to which China must

be a party. The Republican administration repeatedly stresses the pressing necessity for disarmament and a world under law, yet its actual efforts in these directions are puny and without conviction.

It is not surprising that our prestige has declined alarmingly among the freedom-loving peoples of the world. We appear, with some reason, to be both hypocritical and ignorant. Actually, as a nation, we are neither. We truly hate tyranny. We deplore governments based on cruelty and corruption. We truly want a world where disputes among nations will be settled by law, not force. We truly wish to share our resources, our know-how and compassion with the hungry, the miserable, and the oppressed of the world.

DISCARD REPUBLICAN POLICIES

For a moral and sensible foreign policy we must discard the Republican administration's immoral and senseless policies which have led us to chaos and discord. Persisting on the present course can only lead to disaster—complete, irrevocable disaster for all mankind.

Last month in Chicago our colleague, the distinguished gentleman from Minnesota [Mr. JUDD], took a somewhat different view in his keynote speech at the Republican Convention. I shall refer to his remarks as I discuss three recommendations for a moral and sensible foreign policy. I notified him yesterday of my intention. At the conclusion of these remarks I shall be glad to hear his comments as well as those of other Members.

There is a wide area of agreement as to foreign policies. We all agree that our Nation, born as it was out of a revolution against tyranny, opposes slavery and endorses freedom. We all agree that we must remain strong and that any disarmament must be accompanied by appropriate safeguards.

We all agree that our terrible weapons, atomic, biological, and chemical, not only burden our people with tremendous taxes but offer an increasing threat to the survival of mankind. We know that the possibility of war by accident increases daily and will be as universally lethal as intentional war.

It is right and sensible that we promote freedom. It is sensible that we seek a strengthened United Nations, an end to the deadly and expensive arms race, and a beginning of a massive and far better use of our ingenuity and resources in the conquest of poverty, of the ocean depths, of outer space, of the many other frontiers where men can collaborate constructively instead of fighting each other in fear, hatred, and despair.

FREEDOM VERSUS SLAVERY

The Republican keynoter said in Chicago that, "The gravest issue of our century" is human slavery—"masses of men enslaved by governments." He asserted that the Republican Party stands for freedom and against slavery. No doubt he is correct but the fact is that the Republican administration has not demonstrated its adherence to that stand. This brings me to my first recommendation.

ACTS, NOT JUST WORDS

First. Honor by acts, not just words, our belief in freedom. The late Secretary of State, Mr. Dulles, a sincere and able man, set up our standards of friendship with other nations; namely, are you with us against the Soviet Union? It didn't matter that a nation's government was a tyranny. All that mattered was its anticommunism or purported anticommunism.

I found this out joltingly when I first came to Washington as a Member of Congress nearly 4 years ago. Gerry Murphy, a constituent of mine from my hometown, Eugene, Oreg., disappeared in the Dominican Republic under circumstances that strongly suggested murder at the order of Dictator Trujillo.

When I demanded appropriate action, the State Department tried to persuade me to join them in forgetting about the event. Gerry was just an adventurer, they told me, and besides Trujillo votes with us in the United Nations and we have important military installations there.

DISTRESS AMONG OUR FRIENDS

I quickly found out that the democratic leaders in Latin America were deeply hurt and distressed by the way we courted Trujillo, Batista of Cuba, Stroessner of Paraguay, Perez Jimenez of Venezuela, Somoza of Nicaragua, and, earlier before their fall, Peron of Argentina and Rojas Penilla of Colombia, all tyrants, most of whom worked together to persecute democratic leaders in the hemisphere, even when they were in other countries, including the United States.

The bitter fruit of these immoral policies is being harvested today in Cuba and elsewhere in Latin America.

The Republican keynoter called upon the Nation to support our principles and the first principle he named was human freedom. The truth is that the Republican administration, except by glowing words, has not supported human freedom in Latin America or elsewhere in the world. It has supported allies regardless of their crimes against their own peoples.

Adlai Stevenson last January said:

> Our present combination of complacency and apprehension, of little aims and larger fears, has within itself the seed of destruction, first for our own community, and then for the larger hope that freedom, not tyranny, will be the organizing principle of the society of man.

EISENHOWER'S VISIT TO FRANCO AND CHIANG

This Republican administration was not only immoral in its unholy friendship with tyrannies in Latin America. On his trip to Europe the President last December went out of his way to honor Franco, an unrepentant tyrant who was allied ideologically and by his sympathies with Hitler and Mussolini in World War II.

A few months ago the President visited Taiwan and as he departed he referred to Chiang Kai-shek's tight little tyranny as "a thriving democracy." What do you suppose the Japanese students thought of that? I can tell you what they thought of that. They thought that our President was either ignorant about democracy or Chiang's government or that he was a hypocrite.

When Vice President NIXON went to Latin America in 1958 he was often asked why the United States supported dictators. He gave the usual State Department evasive answer:

> We do not interfere in the internal affairs of sister nations.

When he stopped off in Puerto Rico, able and democratic Governor Luis Munoz Marin convinced him that our policy should be to give a formal handshake to dictators and a warm embrace to democratic leaders.

Dr. Milton Eisenhower included this recommendation in the Latin American report which he gave to the President in January 1959. The President endorsed the entire report but no actions followed these words until the Organization of American States began to take united action against Trujillo and the administration began to worry about Soviet influence in Cuba.

Now the Secretary of State publicly calls Trujillo a "dictator." Under Secretary of State Dillon goes further. He told a Senate committee the other day that Trujillo was a murderer, a torturer, and a tyrant.

The news here is who is saying these things, not what is being said. Trujillo has been all these things and more for a long time on a large and notorious scale. This is not news in the Western Hemisphere nor indeed in the Eastern Hemisphere. The Republican administration began to move against him only as it seemed we had to do so in order to persuade our fellow Americans to side with us against Castro, as Castro's policies appeared to bring the cold war to our very shores.

TRUJILLO TURNS TO THE COMMUNISTS

The administration was very reluctant to call Trujillo the criminal enemy of freedom which he is and has been for many years. Hailed by his erstwhile defenders as a great anti-Communist and a devout Catholic, Trujillo now actively courts Soviet support. The Catholic bishops in the Dominican Republic are now firmly and publicly opposed to him and his policies. Ramfis, his oldest son, even now is in Moscow as Papa's emissary and Trujillo is permitting Communists once again to operate within the Dominican Republic.

Along with others who rejoiced when Batista fell I once had high hopes that Fidel Castro would keep his promise to hold free elections and to maintain individual freedoms. Instead, and in spite of the efforts of many of his former friends, Castro established a dictatorship in Cuba, a policy of extreme abuse of the United States, and a close relationship to the Soviet Union and the Communist Party.

If the Republican administration had shown by its actions, not just by empty words, our preference for freedom when Batista ruled by murder, torture and corruption, instead of giving Batista arms and friendly Ambassadors, we would be better able to help the cause

of freedom today in Cuba. As it is, we must admit our errors and not make them worse. I am confident that freedom can win over Soviet communism in Cuba as elsewhere in the world, but first we must ourselves pledge anew our belief in the principles on which our Nation was founded and then conduct ourselves accordingly.

How can we lead the free world against communism if we fail to speak out against all tyranny, of both the left and the right, and for freedom through honest elections everywhere? We have a duty to argue the case for democracy versus communism, for freedom versus tyranny, in our relations with other nations.

Is it too simple, too naive, to believe that our foreign policy should be moral? That it should reflect our deepest feelings about right and wrong? That our actions should correspond with our words supporting freedom? Lip service to freedom is not enough. The warm embrace of friendship for democratic leaders must be accompanied by the helping hand. Actions speak louder than words.

SENATOR KENNEDY CALLS FOR NEW ATTITUDES

In June Senator KENNEDY in a Senate speech said:

> A return to the good neighbor policy is not enough. Dollar diplomacy is not enough. A patronizing attitude, taking for granted their dedication to an anti-Communist crusade is not enough. We will need a whole new set of attitudes and emphasis to make the nations of Latin America full partners in the rapid development of the Western Hemisphere.

The Democratic nominee for President is right. It is plain that we need a whole new set of attitudes and emphasis to achieve this partnership.

The junior Senator from Massachusetts in that speech also pointed out with reference to Africa, although the application is worldwide, that if our policies are to be effective we must give our aid in terms of America's desire to bring freedom and prosperity to Africa—not in terms of a narrow self-interest which seeks only to use African nations as pawns in the cold war.

It is right to help democratic leaders and embrace them warmly. It is wrong to help enemies of freedom and to warmly embrace tyrants. These are elementary but neglected truisms. My friend from Minnesota [Mr. JUDD] declared in his keynote speech that—

> Men will find ways to bring down today's tyrants, if only we don't build up tyrants.

I agree, but I do not agree that increased communication with China would build China up. My second recommendation for a chance in our foreign policy is:

INCREASED COMMUNICATION WITH CHINA

Second. Bring China into international negotiations for disarmament and peace. This means first, exchange of newsmen and other citizens; second, trade in nonstrategic items; and third, eventual, not immediate, admission to the United Nations and recognition by the United States along the lines recommended last November in the Conlon Report to the Senate Foreign Relations Committee at its request.

"Recognition and admission," according to the Republican keynoter, "would needlessly present it with smashing victories." This is a remarkable defense of the long obsolete containment by isolation policy. The Republicans insist that the Democrats, Mr. Acheson in particular, "lost" China to the Communists. Mr. NIXON used this false charge again in the 1952 campaign. The truth is that Chiang's corruption and lack of constructive social and economic policies lost China. General Wedemeyer testified that the battles were lost to the Communists because of the poor morale of Chiang's troops, not lack of arms.

No one suggests that Taiwan be surrendered, but it is in order to suggest that we stop propping up a tyrant like Chiang Kai-shek and allowing the 8 million Taiwanese—as compared to the 2 million mainland Chinese now on the island—a proper voice in their government. We believe in self-determination so why not make our conduct conform accordingly? It would appear sensible and moral to do so.

By identifying ourselves so closely with Chiang we provide exactly the fearsome foreign devil that the Chinese Communist leaders require in order to keep their people apprehensive and thus amenable to harsh measures and hard work.

Senator KENNEDY has recommended withdrawal of troops from the Matsu and Quemoy Islands. This accords with the congressional resolution on this subject but not with the Republican administration's foreign and military policies.

CHINA AT THE CONFERENCE TABLE

Senator KENNEDY has also suggested that China be invited to participate in the Geneva negotiations for stopping the testing of nuclear weapons. Here is the imperative reasons why we must generally increase our lines of communication with China.

Secretary Herter last spring publicly conceded that China would have to agree or nuclear tests could not be stopped. This is obvious. The other nations will not stop testing if China can go ahead. We will not stop unless we can be assured that all other nations will stop. This means that there must be inspection stations in China as well as in the Soviet Union, a matter on which both nations must agree.

Mr. Herter's publicly expressed thought was that China be asked after the agreement was drafted. I hope that his private opinion favored the more practical suggestion which Senator KENNEDY made, namely to invite China to participate in the negotiations.

"Jaw, jaw, jaw," said Winston Churchill, "is better than war, war, war."

I have no illusions about such negotiations. They are frustrating, infuriating, exhausting—but is there a better alternative? These negotiations are a challenge to our statesmen, our diplomats, our lawyers, our political scientists, to all men who want to see their children grow up and who want a world unharassed by the dread of catastrophic war.

This brings me to my final recommendation for a moral and sensible foreign policy.

MOBILIZE FOR PEACE THROUGH LAW

Third. Mobilize powerfully to preserve peace with freedom. This administration is on record, repeatedly and emphatically, in favor of disarmament and a world under law. Just yesterday the President told the American Bar Association here in Washington that there was the "mighty force" of "world opinion" behind the rule of law among nations and that "world opinion is not lightly to be discarded."

Is it sensible to spend $46 billion this year for arms and only a few dollars mobilizing for safely escaping this burden? Our present leadership says that world rule of law and disarmament offer the only alternatives to disaster. But do these leaders believe it? It does not seem that they do if you judge by what they do, not what they say.

In the State Department there is a Special Assistant for Disarmament and Atomic Energy. He also handles outer space. He has 12 assistants. The Congress just authorized five more assistants and $400,000 for research. Over in the Defense Department an Assistant Secretary has another half-dozen men in an office for disarmament. The Atomic Energy Commission has two disarmament specialists and the Science Advisory Committee two or three.

A total of less than 30 men are working on disarmament in the whole executive branch. This is an incredibly puny response to the challenge of figuring out how to turn back from the arms race without endangering our security and the security of the free world. I agree with Prof. Louis Sohn of Harvard Law School. He recommends a Manhattan Project for disarmament, a mobilization of our best spiritual and intellectual resources on a scale more in proportion to the challenge. Senator KENNEDY and the Democratic Party have proposed a Peace Agency to accomplish this. The Republican administration again has generally employed the right words but has initiated practically no action to put them into effect.

A U.S. DELEGATE WITH NO EXPERIENCE

Frederick Eaton, appointed by the President to represent the United States in Geneva, is an outstanding corporation lawyer but a man with no experience in disarmament, none at all. Furthermore, he told some of us here on Capitol Hill shortly before he left for Geneva that he did not intend to study disarmament. He said that the President would give him his instructions.

With due respect for Mr. Eaton's efforts at Geneva, I say that we cannot hope to progress affirmatively if we send such men as delegates to disarmament conferences.

Grenville Clark, in the introduction to the second edition of "World Peace Through World Law," by Clark and Sohn, Harvard University Press, 1960, states both the challenge and the alternatives in these well-chosen words:

> The proposition no peace without law also embodies the conception that peace

cannot be insured by a continued arms race, nor by an indefinite balance of terror, nor by diplomatic maneuver, but only by universal and complete national disarmament together with the establishment of institutions corresponding in the world field to those which maintain law and order within local communities and nations.

On the cover of the booklet reprinting the Republican keynote speech is this quotation from Dr. JUDD'S address:

We must develop a strategy for victory * * * save freedom. Freedom everywhere.

With this we all agree. Our strategy can be no gimmick. It cannot be based on hate and fear. It must be based on our love for freedom and our hatred of tyranny.

DISAPPROVE ALL TYRANTS

It means that we must show our disapproval for all tyrants, Communist and non-Communist alike. It means that we must not back away from communication, with formal handshakes, not warm embraces with nations like China. It means we must mobilize our resources for peace and turn the concentrated and united power of our minds and spirits to the problem of surviving our terrible weapons.

If we do these simple, obvious but much neglected things we will have a foreign policy that is both moral and sensible. It does not, however, seem likely that RICHARD NIXON as President would make the necessary changes. Nothing in his conduct to date, and he has had ample opportunity, supports any hope that he as our Chief Executive would express in word and action our opposition to all tyrants; that he would attempt to increase communication with China; and that he would mobilize appropriately for disarmament and the rule of law in the world.

Instead we see him in speech after speech demogogically misrepresenting Senator KENNEDY'S proposal that the United States express regret to the Soviet Union for the effect of the U–2 flight on the summit conference. NIXON wants the voters to believe that KENNEDY wanted to apologize to Khrushchev for sending such flights. This is a well-recognized, typical NIXON twisting of the facts in order to reflect on the motives or good sense of his adversary.

Senator KENNEDY believes we have to deal with the Soviet Union and with China if we are to turn back from nuclear disaster. He believes that the small nations should not be regarded as pawns in the cold war. Senator KENNEDY'S election will assure this Nation a new, vitally necessary, and far more effective foreign policy, a policy that is both moral and sensible.

FIDEL CASTRO FROM LIBERATOR TO INFIDEL

The SPEAKER pro tempore (Mr. KING of Utah). Under previous order of the House, the gentleman from New York [Mr. SANTANGELO] is recognized for 20 minutes.

Mr. SANTANGELO. Mr. Speaker, Fidel Castro, the liberator of Cuba, has become an infidel and the tool of Communists. Recent tirades demonstrate that he is a pawn in the Russian game of power politics and that he is a psychotic without religion and without scruples.

On July 26, 1958, the words "Batista has fled" electrified the world. On that day a bearded giant in army fatigues marched down with his loyal freedom fighters from the hills of Oriente Province into Santiago de Cuba. Tyranny fell and democracy under the banner of an inspirational leader marched on toward victory and liberty.

For years the Cuban nation has been stirred—stirred by a solemn passion, of ideals lost, of a government debauched and too often made the instrument of evil. A tyrant had fallen and hopes of liberty soared. With the flight of the tyrant had come liberation and an opportunity for a new life. As the bearded soldier marched on to victory among waving flags and cheering throngs, the people of the pan-American world felt as did the people of the Near East 1,960 years ago, when another bearded man walked on the face of the earth bringing salvation and peace. To some Cubans, he was the new messiah. The people of this wartorn Carribean island rejoiced; dictators to the south trembled; the world awaited expectantly for oncoming events and bloodless revolutions. Within a fortnight the world recoiled and shrank back in horror. Instead of peace, Cuba had blood baths; instead of justice, circus trials; instead of guillotines, the firing squad; instead of binding the nation's wounds, Castro ordered reprisals, retaliation, and revenge. This new government conceived in liberty was weaned on blood and nurtured in hate.

As the Four Horsemen of the Apocalypse ran wild in Cuba, trampling upon hundreds of so-called traitors, the friends of Castro sheepishly apologized, paused, and declared that the end justified the means, and that traitors must be exterminated for the sake of the new order. The press was divided in its condemnation and in its praise. Certain writers saw some justification, others expressed their disgust and dismay. Some Members of our own Congress asked forbearance, understanding, and pointed out the significant silence of the critics in the face of 18 years of barbarous treatment of the Cuban people by the predecessor regime. I, too, advised that continuous and senseless killings would alienate friends of liberty and of the cause of Castro.

This man, Castro, who had been pardoned by the ruthless Batista, found no compassion in his heart for his enemies. This liberator, who lived in the wilds immune to the wind and rain, was sensitive to society's barbs of criticism. He remonstrated. He raved. He ranted. Even the words "The gringos will die," sputtered from his lips above the din of oral condemnation.

After the fall of Batista, Fidel Castro acted fast. He took over the reins of government and solemnly declared that within a year free elections would be held. That solemn promise, he broke. Two years and more have slipped by without elections, and none are foreseeable in the near future. It appears that he does not intend to keep his promise. Men in government throughout the world waited and the people asked themselves: "What manner of man is this Fidel Castro? A hero or an infidel? Is he another modern George Washington or is he an impetuous George Jacques Danton, of French Revolutionary days, who lived and died in violence." Events have answered part of the inquiry, and in the meantime, have given certain characters to compare.

George Washington stabilized his government, renounced power, and recommended no entangling alliances with foreign powers. George Washington attracted to himself men of wisdom, experience, and financial knowledge who could revive the corpse of national credit and who could administer an economic program. Castro is the son of a rich landowner. Like George Washington at Valley Forge, Castro has the capacity to withstand the rigors of winter in the mountains of Oriente Province. Like George Washington, Castro can inspire his men to withstand cold, privation, and hunger. Like George Washington, Castro had an abiding faith in himself and his cause. Both were fierce fighters, one fiery, the other calm. Both were symbols and legends, and each inspired foreign troops to fight side by side with him for liberty. But there the similarity ends. Whereas George Washington sought peace and rehabilitation, Castro sought vengeance and more worlds to conquer. Castro encourages foreign revolution in Latin America, and particularly in the Dominican Republic and in Panama. Washington, in his newly formed government, guaranteed the freedom of the press and freedom of speech. After the government was organized there was quickly enacted a Bill of Rights, whereas Castro suppressed the press and took over the media of communication, the radio and the television. General Washington guaranteed freedom of religion, where Castro, who was ostensibly religious, raved at the criticisms by the Catholic Church and ranted at the so-called interference by the men of God. Washington guaranteed the owners, yea, even the Tories, the right to own their property, whereas Castro confiscated properties, expropriated businesses running into the millions, and vowed further acquisitions with no compensation or with illusory compensation. Under the shibboleth of agrarian reform, Castro took from the landed gentry and the businessmen the fruits of their labor and turned them over to his followers and the rabble. Castro sought entangling alliances and called upon communistic nations, namely, Russia and Red China, to support Castro's fight for economic stability and oppose "Yanqui imperialism." Cut off by an aroused United States of the opportunity to unload his sugar products, Castro made agreements with Soviet Russia and its satellites. He called upon Soviet Russia and Red China for military and economic aid. He violated the sphere of the Western Hemisphere as enunciated by the Monroe Doctrine which guaranteed American solidarity against foreign interference. He subordinated his country to the

saber-rattling communistic nations who spoke of retaliation with rockets and missiles.

Castro, instead of turning over the government to the civilian authority, placed the hands of government with the military. He attracted to himself nondescript warriors. He designated Ernesto Che Guevara, a 31-year-old man with strong communistic leanings, as the czar of industry. He appointed Antonio Nunez Jimenez as economic dictator. He appointed Raul Castro, a younger brother, age 28, commander of the armed forces. To him, a man with strong communistic ideas, he entrusted the youth of Cuba and the system of education.

While Castro orally and vehemently disavowed communism, he gave comfort to the Communist surge and then embraced its principles wholeheartedly. He has an urge for personal power which Washington abjured. In self-appraisal, he hoarsely shouts "History will absolve me."

The people of the American Revolutionary days considered George Washington a father who could do no wrong. The people of Cuba view Castro as the small child of the family who does wrong, but must be defended under any circumstances.

More than 2 years have passed since the great liberation and history has written indelibly its words of condemnation of Castro. Castro in the eyes of the free world is no longer a liberator, but a psychotic thirsting for power. He is no longer an inspiration for good, but a force for evil and a potential threat to world disturbance. Some of his former admirers have fled from him and have turned their backs to him. Even nations which joined with him in his fight for liberty have recoiled. Puerto Rico, which gave so many sons to Castro and Cuba for liberty in the spirit of Jose Marti, has recognized that Castro has betrayed their confidence, hopes, and principles. Castro has lost their sympathy and admiration, which at one time, accompanied him among all the democratic peoples of the Western Hemisphere.

This week in the Organization of American States, Cuba fought a losing battle against the resolution to censure Cuba's acceptance of Soviet military protection. The resolution, passed by the Organization of American States, known as the Declaration of San José, indirectly censured Cuba by condemning the threats of intervention by foreign powers in American affairs and disapproved and rejected the acceptance of such intervention. Communism must not take root in America. History has demonstrated that Castro, despite his education and military success, is no George Washington.

Infidel Castro is more like the French revolutionist, George Jacques Danton, who stormed the Bastille to destroy tyranny and reveled at the beheading of French emigrés. Like Danton, the so-called liberator of Cuba must destroy his enemies and his friends suspected to be consorting with the enemy. To survive, he, like Faustus, must pledge his soul to Mephistopheles. He shall receive his sugar quotas from the almighty demon and enjoy his free additional hours of glory and false power. However, the day of reckoning is not too distant.

Those in America who helped Cuba gain freedom, who helped Cuba develop its economic resources, who purchased her sugar products at bonus prices, and who nurtured the new government, regret the aberrations of a leader who might have been great, but who lost his stability. We can only ask Cuban peoples and the Latin Americans to communicate with their Latin brethren on this island 100 miles off our Florida coast to point out Castro's misdeeds, mistakes, and misdirections. We urge the Puerto Rican and Latin American media of communication to convey the message that in America, we seek not domination, but peace, and those who listen to the siren call of missiles and rockets will be lured to destruction on the rocks between Scylla and Charybdis. Violence begets violence, and he who gave so much promise for the free world will perish as an infidel without friends, without glory, and without faith.

DICK ARENS—AN UNCOMPROMISING AMERICAN PATRIOT

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio [Mr. SCHERER] is recognized for 10 minutes.

Mr. SCHERER. Mr. Speaker, I rise for the purpose of mourning the departure of a dedicated servant of the Congress of the United States. I mourn not his death, but the fact that he is today leaving a position in which he has rendered such valuable and unselfish service.

As I rise to mourn his departure, those individuals and organizations who are dedicated to the ultimate destruction of this Republic are breaking out with brass bands in celebration of the same event. The brass bands will be loud and their notes will be held long, thereby giving the impression that the music celebrates an event in which all should rejoice.

However, these brass bands deceive, just as the Communists and their dupes deceive. It is the exposure of this deceit which has made the man about whom I speak valuable, not only to the Congress, but to all who are dedicated to the cause of freedom from Communist slavery.

I rise, Mr. Speaker, to praise the contribution which Richard Arens has made to the security of the United States during the last 12½ years as a staff member of the Judiciary Committee of the Senate, and our own Committee on Un-American Activities.

Dick Arens was born in Kansas City, Mo. He worked his way through college and law school, graduating at the head of his class from Baker University. He was awarded a scholarship from the Washington University School of Law. While in college his leadership ability was recognized and he was elected president of the student YMCA and later president of Delta Theta Phi, a law fraternity.

After several years of private practice, he was called upon by the Governor of Missouri to take up a career of public service. Dick served as legal secretary to the Governor of Missouri from 1941 to 1945. The Governor appointed him to membership on the Missouri Public Service Commission, which position he vacated to serve the Missouri Legislature as director for the reorganization of the executive department of that great State.

In 1947, Dick Arens came to Washington as a member of the staff of the Judiciary Committee of the Senate. Until 1956, he served that committee in various capacities. He directed the work on war decontrol legislation. He directed a 4-year study by that committee of the immigration and naturalization system, which study resulted in the Immigration and Nationality Act of 1952. It was his study of the immigration and naturalization system that first brought Dick Arens to grips with communism, and the knowledge that it was an international conspiracy designed to enslave the world. Through his studies in the field of immigration and naturalization, he learned that international Communist agents were being filtered into the United States and other countries of the free world under the disguise of legitimate immigrants. He learned that agents of Moscow, such as Arthur Adams, the man who directed Soviet atomic espionage in the United States during World War II, came into this country as an immigrant from Canada, using fraudulent Canadian citizenship papers. He likewise learned the facts relating to other outstanding Soviet agents, Gerhart Eisler, Bill Giebert, and others.

Thus armed with the knowledge of how communism conspired against the United States and all free countries, Dick Arens dedicated himself to its destruction. He was sought after to head studies of various phases of Communist activities in the United States. He was made staff director of the Senate Internal Security Subcommittee, which dealt largely with the Communist threat to the security of the United States.

His devotion to duty was quickly recognized. The certificate of merit awarded him in 1953 by the National Camp, Patriotic Order, Sons of America, reads,, "For great and inspiring public service."

In 1954 he was one of six persons in the history of the American Legion to receive its citation of merit and commendation.

Confronted with the need of a person to direct the staff functions of the Committee on Un-American Activities, our great chairman, the gentleman from Pennsylvania, FRANCIS WALTER, in 1956 asked Dick Arens to become the committee's staff director.

Within a month Arens was questioning witnesses who had been using U.S. passports for the purpose of working with the Communist Party of Russia and Red China in condemnation of the United States. During the interrogation of these witnesses, Arens disclosed how these Communists had falsely accused the United States of acts of germ warfare and of slaughtering innocent women and children during the Korean conflict.

Mr. Speaker, during the next 4 years, the staff of the committee under Arens'

direction conducted an investigation into many areas where Communists had infiltrated. Through hearings, the committee attempted to learn the extent of each infiltration effort from the persons whom the investigation disclosed possessed the knowledge. These efforts to obtain the facts by which to guide the Congress in its legislative deliberations were not met with truthful revelations, but by slanderous attacks, not only on the committee, but on Arens as the committee's staff director. As each committee hearing touched upon an activity in which the Communists were seeking a privileged sanctuary, the Communist attack on the committee and Arens increased.

Not only did the Communists distort Arens' conduct of interrogation during committee hearings, but they distorted what he had to say during speeches made at the invitation of those seeking the truth about communism. The latest of these distortions occurred only last month during a speech Arens made at the time he accepted an award from the National Conference of Police Associations meeting in Des Moines, Iowa. It is not bad enough to be attacked by the Communists, but the spirit of even a Goliath can be broken through distortion of remarks by such organs as an alleged truthful press, the Des Moines Register.

Consider the insult to a staff member of this House when one of its elected Members inserts the distorted press account in the pages of the CONGRESSIONAL RECORD. Consider how this insult is added to when the Member of Congress making the insertion possesses no information about the speech under attack, and makes no effort to obtain the truth.

Mr. Speaker, compare the distortion by the Communists of the conduct of Mr. Arens during the committee's hearings in San Francisco last May, with the statement issued by more than a dozen ministers who were in attendance at the hearings. Said these ministers in a released statement:

> We came away from this hearing absolutely convinced of the overwhelming necessity of continuing the House Committee on Un-American Activities. No free agent could view the hearings without being impressed with the fairness, justice, and dedication to a thankless but positively necessary task. Chairman EDWIN WILLIS was unusually temperate and patient. We have nothing but unbounded admiration for Richard Arens, committee counsel, whose skill and understanding of this perilous conspiracy was a blessing to behold.

Little wonder Dick Arens is leaving the committee to accept a position with the U.S. Court of Claims. Little wonder that the Communists and the apologists have broken out their brass bands to celebrate Arens' departure as staff director of this committee.

While the Communists have reason to celebrate, I wish to advise them that their celebration will be short lived.

Dick Arens' departure is a great loss to the committee and to the House of Representatives. His departure will be a great personal loss to me. His departure will be a great loss to the American people. It will not be a complete loss, however, because Dick Arens has agreed to continue the fight against communism by making his knowledge available to all and by continuing as a nonpaid consultant to the committee.

ANALYSIS OF WHAT CAN BE DONE CONCERNING THE FARM PROBLEM

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Iowa [Mr. WOLF] is recognized for 15 minutes.

Mr. WOLF. Mr. Speaker, many lines have been written about the farm problem, but none have come to grips with the reasons why we have a farm problem, how our farmers are affected, and what we can do about it, as does the following analysis recently made by Marianne Means and Everett Swingle. I commend it to the attention of my colleagues in the hope that it will stimulate interest and ideas which can be applied toward the solution of this very serious national problem:

It is tragic that in the richest nation on earth, where 1 farmer easily feeds 24 city dwellers, there could be a farm problem.

How can this be?

We have come such a long way from the days when one out of every four Americans had to till the soil to keep the Nation alive.

Our modern farm production and the vast marketing, storing, transporting, processing, wholesaling, and retailing system which moves the food into our kitchens is one reason we are healthier than ever before. Our children are taller, and have a longer life expectancy, than we did at the same age.

We have the highest level of living the world has ever seen. The food we eat is tastier, more varied, and better for us—and it comes to us tidily prepared for a minimum of effort, as ready mixes, concentrated and dehydrated products, or "heat and serve" meals.

And although most people of the world spend half their incomes for food, we in America spend only 21 percent.

If our farmers were no more efficient than those in the Soviet Union, 22½ million Americans who now work in manufacturing, mining, construction, or other nonfarm businesses would have to produce food, clothing, and forest products. For in Russia, one agricultural worker feeds only four or five people, and more than 40 percent of the total labor force works in agriculture or forestry.

Obviously, the American farmer is doing a good job of making life better for the rest of us. But he is not doing so well for himself.

And "aye, there's the rub," as Hamlet said.

For despite rising costs of food in our grocery stores, the average farm income has steadily dropped. Last year 56 percent of American farm families made less than $2,500 a year.

Grain surpluses pile up in warehouses, costing taxpayers about $1,500,000 a day. Government programs aiding farmers cost millions.

People who cannot make a decent living on their small farms are moving into the cities by droves, unprepared for city ways and untrained to handle city jobs.

What went wrong?

As the amount of food processing continues, the farmer's share of our food dollar generally declines. In 1959, the farmer only got 38 cents of every $1 worth of food you put into your grocery bag. The rest went to the men who transported it, stored it, processed it, wrapped it in a fancy package, inspected it, and put it on the grocery shelves.

For example, the wheat used in baking a 20-cent loaf of bread costs only 3 cents. The remaining cost is for the trimmings.

The shopper, cringing at the high price rung up by the grocery clerk, often forgets this when he wonders why farmers are complaining. He sometimes forgets, too, that his grocery bill is increased by the large number of nonfood items—such as drugs, cosmetics, records, cutlery—he can purchase in today's supermarket.

The farmer's unique problem is that his costs are rising, as they are for every businessman—but he cannot pass on these increased costs to the consumer, as other businessmen can. The prices of fertilizer, seed, tractors, machinery repair, fencing, etc., keep going up. But the farmer can rarely increase the prices he gets for his own products.

He cannot control his prices, because he cannot control his supply. When his crop is ripe, he must sell it; he cannot hold it back until some other time when the going market rate may be higher.

He is selling his harvest of wheat, or strawberries, or tomatoes, the same time all his neighbors are selling their harvests, too. The market is glutted, prices go down, but the farmer must sell anyway.

The more abundant the harvest, the bigger the supply, the lesser the demand, and the lower the prices.

Thanks to the technology and research which has replaced the horse with the tractor and the hoe with the combine, and taught the farmer to control drought through irrigation and insects through spray, crop production has increased steadily for the past years. Production is 56 percent higher per acre now than it was in 1919–21.

Output per breeding animal is 81 percent greater than in 1919–21.

Productivity of the American farmer is growing more than twice as fast as the productivity of workers in industry.

Yet the net income for 1 hour of farmwork, including income from capital assets, was $1.29 in 1959. One hour's work in a factory, however, averaged $2.22.

And the hourly wages of food marketing employees, who handle the farmers' products, averaged $2.10.

Thus the farmers' very efficiency has created its own problems. Seeking his own solution, the farmer has steadily increased the size of his farm during the past 20 years, as he found he could handle larger acreages. Machinery and fertilizer and the new hybrids are expensive, and the farmer whose land is too small to keep his costly machinery busy or to use up wholesale purchases cannot meet his production costs.

Thus, small farmers have steadily been forced to leave their homes, sell out to more prosperous neighbors, and make the sad trek to the city. Since 1950, about 5 million persons left their farms, leaving a present farm population of around 20 million.

Ten years ago, there were 4,700,000 farms; now there are only about 4,100,000.

True, some people, young folks usually, want to leave the old ways and share the opportunities of city life. But what about the small farmer who wants to stay on his land, into which he has poured his sweat and tears and toil for many years?

The farm problem, then, boils down to four questions which the Nation has been trying, unsuccessfully, to solve for 30 years:

1. How can we assure all farmers of a decent income, comparable to their city brothers'?

2. What should we do with our huge surpluses, costing taxpayers billions every year? How can we best distribute them to the needy?

3. How can we help the small farmer, but at the same time slash drastically the cost of our whole farm aid program, now at an all-time high?

4. How can we do these three things without complete Government control over the farmer?

Those bumper crops down on the farm and the steady drop in farm income have produced a bushel basket full of trouble which the Government has been trying to solve—with little luck—for the past 30 years.

The Nation is storing a record $9 billion worth of surpluses under the price support program. And it costs the taxpayers about $1.5 million a day to store these surpluses, of which we already have enough to last 2½ years if all production were suspended.

Politicians, aware that the big block of votes from Farm Belt States could turn an election tide, have been scratching their heads and wondering what to do about the farm problem for years.

In the past 5 years, the problem has become acute. During World War II and the Korean conflict, farmers were prosperous and surpluses reasonable because soldiers and warring allies abroad ate up the stepped-up production made possible by technological advances. In peacetime, however, this market disappeared, although production continued to increase.

The Department of Agriculture has been paying some farmers various combinations of price supports since the depression of the 1930's. This means the Government guarantees the farmer a fair profit, based on a formula. If the going market price doesn't reach that level, the Government buys his crop for the guaranteed price and stores the surplus. Law provides, however, for price supports on only 21 crops—the big ones, like corn and wheat—out of 250 commonly grown commodities.

Right now the Government is paying private warehouse and elevator owners to store 5 million bales of cotton, a billion bushels of corn, 800 million bushels of rice, 188 million pounds of peanuts, and over 1 billion bushels of wheat.

The size of these price supports, how flexible they should be, and which crops they should cover is cause for a yearly political storm, out of which both Democrats and Republicans try to make hay.

The battle over price support systems is by no means the only controversial point in the Government's efforts to help the farmer. The conservation reserve program, or soil bank, is also a victim of political crossfire. The Department of Agriculture is now paying farmers about $342 million a year to take a certain percent of their land out of production. This system of Government land rental is reducing production by about 6 percent.

This year, neither the Democrats nor the Republicans have come up with a dramatic new program to aid the farmer. Basically, their major difference on farm policy is that Democrats favor higher price supports and more Government controls than do the Republicans.

Both Senator KENNEDY and Vice President NIXON have vowed to expand versions of three aspects of farm help already urged by Secretary of Agriculture Benson. These are rural development (expanding vocational training and employment services and creating new job opportunities in rural areas); "food for peace" (stepping up shipments of surpluses to underdeveloped countries); and research to find new uses and new markets for farm products.

Fifty-six percent of our farmers are still classified as "small" despite the increasing trend toward bigger and bigger farms. These are the families who live on $2,500 a year, and who are the biggest "farm problem."

The Government does not subsidize their crops, which are usually small-volume specialties, such as strawberries, tomatoes, or truck gardens. But just as the small neighborhood grocery has nearly disappeared because it cannot compete with the huge, efficient supermarket, these small farms are disappearing because they are no longer economically feasible.

In cold logic, the answer to their problem seems to be simply sell out and move off the land.

But we are talking about human beings, used to one way of life. They are not trained for city jobs and often they do not like the crowded conditions and the rush of a city.

This is where rural development could help. The Department of Agriculture 5 years ago launched a program of encouraging industry to locate plants in rural areas, where farmers can drive to work and also till their own land. As yet, efforts along these lines have been limited, however.

The per capita income of farmers from all sources averaged $1,043 in 1958, as compared with a per capita income of $2,073 for off-farm workers. An industry job close to home could preserve our Nation's small farms and supplement the farmer's income.

The farmer wants help to bring his income nearer the rest of the Nation; but he does not want Government handouts. Nor does the Government want to spend any more money than it has to.

So what is to be done? No one seems to know.

Even the farmers themselves cannot agree. The three major organizations—the Farmers Union, the Farm Bureau, and the National Grange—have three different solutions. And the wide diversity of crops, and their often conflicting needs, sometimes leads the farm States to work against each other.

For example, Delaware's major commodity is chickens. Naturally, the chicken farmers of Delaware want cheap feed.

Out in Iowa, however, the major crop is feed corn. So Iowa farmers are all for anything which will raise the price of feed.

The Government, through the years, has tried various combinations of price supports and land retirement and other devices. None has been a complete success.

But should a Federal price-support program that costs billions of dollars a year be dumped if it isn't doing the job?

That's the problem our Nation faces. And it is not just a farmers' problem—it is everybody's problem.

In the presidential campaign, there will be much talk about it, as there has been already.

Meanwhile, the farmers wait.

MORE LIGHT ON THE REPUBLICAN CIVIL RIGHTS PLANK

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New Jersey [Mr. THOMPSON] is recognized for 20 minutes.

Mr. THOMPSON of New Jersey. Mr. Speaker, yesterday I charged that the Republican Party was guilty of circulating two different versions of its civil rights plank—one obviously intended for use in the North and one for use in the South. My remarks and those of the gentleman from Wisconsin [Mr. LAIRD] denying my charges appear in the CONGRESSIONAL RECORD of August 29, page 18199. Of course, the gentleman served as vice chairman of the Republican platform committee and I was pleased to have his explanation of how the two versions came into being.

However much the gentleman, and the publicity director of the Republican National Committee in addition, protests, the fact remains that two civil rights faces are being presented to the Nation by the Republican Party.

Perhaps they protest too much.

I am not prepared to accept unquestioningly the gentleman's explanation of how the deletion of a key sentence of the civil rights plank took place. Before I called attention to the two Republican platforms yesterday, I checked to see which version was authentic.

If the gentleman will refer to the impartial news service, the No. 31 issue of the Congressional Quarterly, July 29, 1960, page 1345, he will note this caption: "Complete Text of 1960 Republican Platform," and then this subcaption: "Following Is the Complete Text of the 1960 Platform, Entitled 'Building a Better America,' Adopted by the Republican National Convention July 27."

I emphasize this subcaption and the phrase: "Adopted by the Republican National Convention."

At page 1352 of the same Congressional Quarterly one will find the text of the Republican civil rights plank as follows:

> By Executive order, a committee for the elimination of discrimination in Government employment has been reestablished with broadened authority. Today, nearly one-fourth of all Federal employees are Negro.

I can find no evidence that the gentleman from Wisconsin [Mr. LAIRD] or the Republican National Committee has protested to Congressional Quarterly its printing of this version of the Republican civil rights plank.

Mr. Speaker, if further evidence is needed of the desperate importance of an impartial truth squad in this situation it can be found in the Senate document entitled "Factual Campaign Information" as revised August 15, 1960, and published under the supervision of Felton M. Johnston, Secretary of the Senate to serve Senators in the upcoming campaign.

Mr. Speaker, please note that the complete text of the 1960 Republican Party platform, as adopted, begins at page 115 of this document, and that the sentence "Today nearly one-fourth of all Federal employees are Negro," appears in this official version of the Republican platform.

In view of the remarks of the gentleman from Wisconsin [Mr. LAIRD] yesterday, are we being given a House and Senate version of the Republican civil rights plank, in addition to a northern version, and a southern version of this elusive plank?

Mr. Speaker, I reiterate the questions which I raised yesterday, because I think they are basic to the entire character of the Republican campaign.

Our Republican friends make much of their "truth squads," implying that they are above reproach and never stoop to those despicable devices which they impute to others. However, their past performances bear out the fact that they have had little experience in the "truth" field.

It is particularly important to have all of the facts in this matter of the Republican civil rights plank so that we can get at the truth, in view of campaign tactics employed by the Republican Presidential candidate, campaign tactics which are well known to us all, and which need no elaboration by me.

The gentleman from Wisconsin [Mr. LAIRD] stated that the sentence, "Today nearly one-fourth of all Federal employees are Negro," had been omitted because it was "questionable," and based only on a survey of "six large metropolitan areas."

It would be interesting to know which agencies of government participated in this survey, which cities were involved, and who was responsible for categorizing Federal employees by race, particularly in view of the fact that this type of information is not collected in the Form 57 Federal employment application of the Federal Government. If the gentleman from Wisconsin [Mr. LAIRD] cannot supply this information then, perhaps, the Republican platform chairman, Mr. Percy, or Postmaster General Summerfield can.

Of course, my Democratic colleagues and I are not the only people who are disappointed by the contents of the civil rights plank of the Republican platform. The Republican failure to endorse the moral persuasiveness of the sit-in demonstrations drew the fire of New York's Gov. Nelson Rockefeller, while the Republican delegations from the South also threatened to bolt over even the mild provisions it contains.

Mr. Speaker, the American people in this campaign are not going to judge the two parties on the sentence construction or even the contents of their platforms. They are going to judge the two parties on their performance record.

While I am glad to note the gentleman's admission of the circulation of two separate Republican civil rights planks—which for purposes of identification I have called the blue version and the gray version—this is not the main bone of contention.

The voters of this land will decide on which party has the best record of supporting the goals proclaimed in their platforms, as well as their performance record. Had our Republican friends been more generous in yielding time during their so-called Operation Veracity yesterday, I would have commented on this comparative record.

Mr. Speaker, I include with my remarks an interesting table which analyzes the voting record of Republican and Democratic members in the House and Senate from 1947 to 1952, and from 1953 to 1960 on the platform goals claimed by both parties in the 1960 platforms. This analysis clearly reveals the hypocrisy of the Republican Party in proclaiming support in 1960 for programs and goals which they have consistently opposed in the past when the votes were taken.

This record speaks for itself.

The analysis follows.

The box score of the 2 parties in Congress in supporting progressive platform goals

The following table shows the average percentage of Republicans and Democrats supporting goals now proclaimed by both 1960 party platforms in actual Senate and House votes over the past 13 years.

1960 platform goals	1947–52						1953–60					
	Senate			House			Senate			House		
	Number of votes	Percent for		Number of votes	Percent for		Number of votes	Percent for		Number of votes	Percent for	
		Democrats	Republicans		Democrats	Republicans		Democrats	Republicans		Democrats	Republicans
To expand foreign economic, military and technical assistance	83	91	51	44	87	45	40	68	62	36	72	63
To liberalize and extend reciprocal trade agreements	19	87	28	7	92	25	8	84	57	14	76	53
To increase national defense spending	13	82	49	12	86	81	23	94	69	11	91	91
To increase and stabilize farm income and develop soil conservation programs	30	81	30	11	89	38	71	77	34	21	78	27
To encourage rural electrification co-ops	3	76	20	6	96	21	6	86	24	5	93	30
To develop new water resource projects	44	84	43	10	75	22	19	82	67	22	72	43
To expand coverage and increase minimum wage and unemployment compensation	6	64	47	7	69	28	20	72	30	10	78	53
To extend social security benefits	3	93	68	7	93	49	8	89	53	3	98	95
To aid depressed areas							9	83	24	4	76	24
To foster small business	9	75	44	3	84	36	7	75	12	3	92	66
To use governmental powers to curb inflation	40	83	34	27	81	39	4	81	26			
Aid to education	7	89	40	2	97	85	11	77	36	13	65	57
To promote slum clearance and home financing	19	85	42	25	80	37	34	80	29	23	86	34
Aid to health services and research	17	73	19	5	88	39	5	89	31	4	63	69
Aid for highway and airport construction	8	70	29	2	99	82	11	93	37	9	85	58
To strengthen the civil service	12	80	54	6	90	70	21	96	44	21	95	66
To increase veterans benefits	5	85	43	13	87	73	2	92	75	13	95	52

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Ratchford, one of his secretaries.

THIRD SEMIANNUAL REPORT OF THE NATIONAL AERONAUTICS AND SPACE ADMINISTRATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 454)

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read by the Clerk:

To the Congress of the United States:

Pursuant to the provisions of the National Aeronautics and Space Act of 1958, I transmit herewith for the information of the Congress the third semiannual report of the National Aeronautics and Space Administration, covering the period October 1, 1959, to April 1, 1960.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *August 30, 1960.*

The SPEAKER pro tempore. Without objection the message and accompanying papers are referred to the Committee on Science and Astronautics and ordered to be printed with illustrations.

There was no objection.

EXTENSION OF REMARKS

Mr. WEAVER. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. PIRNIE] may be permitted to extend his remarks in the body of the RECORD and to include extraneous material.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

NEW YORK-NEW JERSEY MILK MARKETING ORDER

Mr. PIRNIE. Mr. Speaker, recently the attention of this body was called to the decision of the Federal Court, Eastern District of Pennsylvania, ruling against the U.S. Department of Agriculture on the validity of the compensatory payment provision in the New York-New Jersey milk marketing order. It was stated that in view of this decision that Congress should pass a resolution directing a study of this marketing problem.

This approach does not appear to be timely nor appropriate since the Department of Agriculture has appealed from this decision and the case is now pending before the U.S. Third Circuit Court of Appeals. It is not at all certain that any of the provisions of the marketing act will be invalidated. It is quite possible that the court will adopt the line of reasoning set forth in the decision file of August 18, 1960, in the U.S. District

Court, Eastern Division in the Northern District of Ohio, in which the compensatory provisions were upheld. In any event, the matter is clearly for the courts to decide.

Believing that this latter decision is of interest to those concerned with this problem, I am inserting the full text in the extension of my remarks:

IN THE U.S. DISTRICT COURT FOR THE NORTHERN DISTRICT OF OHIO, EASTERN DIVISION—CIVIL ACTION NO. 34708

(The Lawson Milk Co., a corporation, plaintiff, *v.* Ezra Taft Benson, Secretary of Agriculture, defendant—filed August 18, 1960)

McNames, C. J.:

The plaintiff the Lawson Milk Co., is a corporation with its principal place of business in Cuyahoga Falls, Summit County, Ohio, within this district. Plaintiff brings this action pursuant to section 8c(15)B of the Agricultural Marketing Agreement Act of 1937, and amendments (hereinafter the act), to review a ruling of the judicial officer of the U.S. Department of Agriculture dismissing on the merits a petition filed by plaintiff under section 8c(15)A of the act. In the proceeding before the judicial officer plaintiff sought a refund of $92,405.62, representing payments made by it, allegedly under protest, to the producers settlement fund, covering the period of December 1, 1947 through May 1952. These payments were exacted under section 975.72A of Order No. 75, which regulates the handling of milk in Cleveland, Cuyahoga County, Ohio and adjacent communities. Both parties have filed motions for summary judgment.

The jurisdiction of this court is limited to a determination whether the decision of the judicial officer, adopted by the Secretary, is in accordance with law. Thus, only questions of law are presented in this review.

Plaintiff's plant in Cuyahoga Falls, Ohio, is located about 31 miles from the center of Cleveland, Ohio. Prior to December 1, 1947, all of plaintiff's milk was distributed outside the Cleveland Marketing Area, most of it being distributed in Summit County, Ohio. In December 1947 plaintiff established a retail outlet in Bedford, Ohio, which is within the Cleveland market. During the period in question, plaintiff's sales of milk in the Cleveland market represented less than 10 percent of its total sales. After May 1952 plaintiff's sales in the Cleveland market exceeded 10 percent of its total sales and, pursuant to the terms of order No. 75, plaintiff became a fully regulated handler. The primary object of order No. 75, like that of similar orders in effect throughout various sections of the country, is to provide a stable market for milk and to secure to the producers, i.e., dairy farmers, an adequate price for their milk. The farmers do not sell milk direct to the consumers but deliver it to various bottling plants known as handlers. The economic value of milk is determined by its use. A handler usually receives raw milk from a number of producers. He may sell it either as fluid milk, as cream, or as milk products such as butter and cheese. A handler realizes his greatest profit on the sale of fluid milk, a lesser profit on the sale of cream and a still lesser profit on the sale of milk products. Producers therefore expect a higher price from handlers for raw milk sold by the latter as fluid milk and correspondingly lower prices for milk utilized in the production and sale of cream or milk products. The pricing of milk strictly in accordance with its utilization presents many difficulties and is conducive to an unstable market. To avoid these undesirable consequences the Government has adopted a scheme of regulation under which each producer is paid a uniform minimum price for all raw milk delivered to a handler irrespective of the use to which it is put.

The plan thus devised operates fairly to place the greater burden of the uniform blend price upon those handlers who sell the greater part of their milk as fluid milk. This is accomplished in the following manner: The market administrator determines a class price which pool handlers must pay for class I milk used as fluid milk, a class price for class II milk sold as cream and a class price for class III milk sold as milk products. He ascertains the marketwide use for each class, multiplies the results by the class prices and then divides the resultant sum of all class prices by the volume of milk used in the whole market. By this method a uniform or blend price for all raw milk is determined. A similar formula is applied to determine the use value of milk sold by individual handlers. Where the greater part of a handler's sales for a specified period is fluid milk, his total use value will be greater than the uniform price paid to his producers. Such a handler must pay the difference into the producers settlement fund. A handler who sells the greater part of his milk as milk products will have a use value less than the uniform blend price and is entitled to withdraw the difference from the producers settlement fund. By this method producers receive a uniform price commensurate with the weighted average use value of milk sold in the regulated market, and through the operation of the producers settlement fund in the manner above described the cost of milk to handlers is equalized. The plan also provides for payments by handlers of administrative assessments.

The foregoing is an altogether inadequate outline of the complicated scheme of regulation but will serve to indicate the essential elements of the plan. For a more comprehensive and detailed description of similar plans see: *United States* v. *Rock Royal Cooperative Inc., et al.,* 307 U.S. 533; *Grant* v. *Benson,* 229 F. 2d 765, 767 (cert. den. 350 U.S. 1015); *United States* v. *Lehigh Valley Cooperative Farmers,* 183 F. Supp. 80.

The handlers above referred to are pool handlers who regularly distribute more than 10 percent of their milk supply to consumers in the Cleveland marketing area. Producers are dairy farmers whose milk is delivered directly from their farms to pool handlers. Pool handlers and producers are subject to full regulation under the terms of order No. 75. During the period of December 1947 through May 1952 plaintiff, as a nonpool handler, distributed less than 10 percent of its fluid milk supply in the Cleveland marketing area and purchased its milk from farmers who were not producers, as that term is defined in order No. 75. Section 975.72(a) of order No. 75 provided that nonpool handlers distributing less than 10 percent of their fluid milk supply in the Cleveland marketing area were required to pay to the producers settlement fund an amount equal to the difference between the class I price (fluid milk) and the class III price (manufacturing) on all milk sold as fluid milk in such area. At the outset plaintiff refused to make the specified payments and the Secretary instituted an action in this court to enforce the terms of section 975.72(a). Early in 1949 plaintiff agreed to make all accumulated and future payments, and the action was dismissed. Thereafter, in June 1952 plaintiff became a fully regulated handler. A year later, in June 1953, plaintiff filed its petition under 608c(15)A of the act to recover the payments made by it during the period of December 1947 through May 1952. In April 1958 the judicial officer of the Department of Agriculture dismissed the petition on the merits. In July of 1958 the judicial officer denied plaintiff's motion for reconsideration.

In the hearing before the judicial officer there was evidence tending to show that during the period in question the average price paid by plaintiff to its farmers for milk was in excess of the uniform minimum blend price and the uniform class I price paid to producers under the Cleveland order. Plaintiff submitted proposed findings of fact to the judicial officer which incorporated the foregoing in detail. In addition plaintiff submitted, inter alia, a further proposed finding showing the average amount per hundredweight of milk paid by plaintiff as compensatory payments under section 975.72(a). The judicial officer refused to make such findings presumably because in his opinion they were immaterial. Additional facts essential to an understanding of the decision reached herein will be stated in the discussion of the issues.

Plaintiff attacks the validity of section 975.72(a) primarily on the ground that it is contrary to the law as announced in *Kass* v. *Brannan,* 196 F. 2d 791 (2d Cir.) Plaintiff also relies upon *Lehigh Valley Cooperative Farmers, Inc., et al.* v. *Ezra Taft Benson,* 183 F Supp. 80 (3d Cir.), which was decided on the authority of Kass. Plaintiff contends further that there is no substantial evidence in the record supporting the rate of payments exacted under section 975.72(a) of the order. The Secretary asserts that the ruling and order of the judicial officer upholding the validity of section 975.72(a) are in accordance with law and advances many other grounds in support of his decision including the contentions that—*Kass* v. *Brannan* is not controlling; the evidence in the promulgation hearing record amply supports section 975.72(a); plaintiff is estopped to claim the refund it seeks; and that order No. 75 provides a cut-off date as to refund payments. By far, the most important issue is whether *Kass* v. *Brannan* is controlling here. Kass was a handler as defined by the New York Marketing Order No. 27. He purchased cream and condensed milk from a handler in Orville, Ohio. Pursuant to section 927.9(h) of order 27 the market administrator exacted payments from Kass in the case of cream in an amount representing the difference between class II–A (New York cream) price and class IV–A (New York butter price); in the case of condensed milk, the exacted payments represented the difference between class II–B (New York condensed milk) price and class IV–A. No consideration was given to the price Kass paid to the Ohio nonpool plant. Kass sought administrative relief by way of a refund of the payments. He was denied relief by the judicial officer of the Department of Agriculture whose decision was affirmed on review by the district court. The Second Circuit Court of Appeals, however, with Judge Learned Hand dissenting, reversed. The appellate court held that the exacted payments were part of the minimum price as that term is used in section 8c(5)A of the act; that the price of nonpool cream or condensed milk to a New York handler was (1) the amount paid to the seller; (2) the "amount of the penalty required to be paid under the order." The court then added:

"Section 927.9(h)(2)(ii) assumes that the initial cost of the nonpool cream and condensed milk will be the class IV–A (butter) price under the New York order. If this assumption were true, the minimum prices of pool and nonpool cream and condensed milk would be the same and would satisfy the requirement imposed by section 8c(5)(a) that 'Such prices shall be uniform as to all handlers.'"

The court found that the initial cost of the milk products was more than the New York class IV–A price and that the exaction of an additional payment computed on the class IV price rather than on the actual cost

to the handler was "* * * a price discrimination between a handler who purchases nonpool milk products and one who purchases pool milk products, although each makes the same use of such products in the New York marketing area. This in our opinion is contrary to the requirement laid down in section 8c(5)(A) that the minimum prices for each use classification shall be uniform as to all handlers."

It is in no spirit of disrespect to the Second Circuit Court of Appeals that I profess my inability to accept the conclusion of that court that the contested provisions of order No. 27 are inconsistent with section 608c(5)(A) of the act. That section of the act is quoted in full in the margin, and in pertinent part reads:

"SEC. 8c. Orders regulating handling of commodity. * * *

"(5) Milk and its products; terms and conditions of orders.

"In the case of milk and its products, orders issued pursuant to this section shall contain one or more of the following terms and conditions, and (except as provided in subsection (7) of this section) no others:

"(A) Classifying milk in accordance with the form in which or the purpose for which it is used, and fixing, or providing a method for fixing, minimum prices for each such use classification which all handlers shall pay, and the time when payments shall be made, for milk purchased from producers or associations of producers. Such prices shall be uniform as to all handlers, subject only to adjustments for (1) volume, market, and production differentials customarily applied by the handlers subject to such order, (2) the grade or quality of the milk purchased, and (3) the locations at which delivery of such milk, or any use classification thereof, is made to such handler."

Section 8c(5)(A) makes no reference to the fixing of minimum prices which handlers shall pay to handlers. In clear and unambiguous language the uniformity of minimum class prices required by section 8c(5)(A) applies to the prices all handlers are required to pay for milk purchased from producers. The payments exacted from Kass were authorized by section 927.9(h) of order No. 27, which is entitled "Payments for Milk or Milk Products Other Than Producers' Sources." The pertinent provisions of section 8c(5)(A) of the act authorize minimum class prices for milk received from producers. The contested provisions of the order deal with the different subject matter of payments for milk and milk products received from others than producers. Moreover, section 927.9(h) of order No. 27 fixes no minimum prices. As Judge Learned Hand said in his dissent:

"Section 8c(5)(A) authorizes the insertion in an order of 'terms and conditions' fixing 'minimum prices' that all handlers shall pay 'for milk purchased from producers.' The provisions in suit do not do that; they fix no prices 'for milk purchased from producers' at all, if by 'price' is meant the money that eventually goes to producers in payment for their milk. The differential exacted from a 'nonpool' handler is not the 'price' of anything; moreover—for whatever that may be worth—it is collected 'to accomplish the purposes' of assuring 'minimum prices' for milk delivered by producers, section 8c(5)(C)" (p. 799).

It seems apparent, therefore, that section 927.9(h) of the New York order is not inconsistent with section 8c(5)(A) of the act. Furthermore, the decision in Kass is premised on the assumption that it is the purpose of 8c(5)(A) to secure equality of costs between pool and nonpool handlers on milk or milk products distributed in a regulated marketing area. However, as I read that section, its purpose is to secure equality of costs among regulated handlers on milk purchased from producers. Even though the Kass decision be considered as sound, it is not controlling here. That case is readily distinguishable from the case under review on its facts, in the nature of the problem presented and in many other respects. *United States* v. *Lehigh Valley Cooperative Farmers, supra,* is more closely analogous. In that case the plaintiffs were distributors of milk in northern New Jersey and by virtue of amendments to order No. 27 were brought within the extended New York marketing area. Only a small percentage of plaintiffs' sales were made in the order 27 area, the remainder being made in Pennsylvania. Under an amendment to order No. 27, plaintiffs were subject to partial regulation. Such regulation required nonpool handlers, including plaintiffs, to make compensatory payments to the producers settlement fund for all fluid milk distributed in the order 27 area. These payments were computed on the basis of the difference between the class I (fluid milk) price and the class III (milk products) price of order 27. An exception was made in those cases where pool milk in the area was in short supply. Upon the authority of *Kass* v. *Brannan,* District Judge Clary held the compensatory payments unlawful. He found that the cost of fluid milk distributed by plaintiffs in the order 27 area was in excess of the cost to fully regulated handlers and observed, "This is exactly what Judge Swan said section 608c(5)(A) of the Agricultural Marketing Agreement Act prohibited. *Kass* v. *Brannan, supra.*"

In his opinion Judge Clary said:

"Moreover we feel bound by the holding of the second circuit in the Kass case. Although we are not compelled to accept that court's decision under the concept of stare decisis as it applies to Federal courts and although we might have reached a contrary result if initially called upon to interpret section 608c(5), we do not feel justified in now rejecting the interpretation there placed upon section 608c(5)(A) and upon the earlier version of order No. 27. That court's opinion is always entitled to great weight."

It is apparent from the above quoted language and other statements in his opinion that Judge Clary considered that in determining the validity of the challenged compensatory payments of order 27 he was bound to follow the second circuit's decision in Kass, which had struck down an earlier and somewhat similar provision for compensatory payments in the same order. Judge Clary realized that upon appeal, the Third Circuit Court of Appeals might refuse to follow Kass, and that in such event the case would be remanded to the district court for determination of the following questions: (1) Are the compensatory payments supported by the record? (2) Are such payments authorized by the act? To obviate the necessity of a remand in the event of a reversal, Judge Clary passed upon both questions. He held (1) that the compensatory payments were supported by the record; (2) that such payments were authorized under section 7D of the act as being incidental and necessary to effectuate the other provisions of the order, thereby indicating that if not bound by *Kass* v. *Brannan* he would have upheld the contested provisions of order No. 27 as being in accordance with law. The factors that Judge Clary prudently and properly considered are not present here. This court is not bound to follow *Kass* v. *Brannan,* and for the reasons indicated above and hereinafter to be stated, Kass cannot be regarded as a binding precedential authority.

WERE THE TERMS OF SECTION 975.72(a) OF ORDER 75 AUTHORIZED BY THE AGRICULTURAL MARKETING AGREEMENT ACT?

Such authorization must be found in section 608c(7)(D), which reads:

"(7) Terms common to all orders:

"Orders shall contain one or more of the following terms and conditions:

* * * * *

"(D) Incidental to, and not inconsistent with, the terms and conditions specified in subsections (5)–(7) of this section and necessary to effectuate the other provisions of such order."

At the promulgation hearing, it was disclosed that at the fringe of the Cleveland marketing area and at other nearby points there were a number of nonpool handlers who regularly distributed milk outside the area. Located within the Cleveland area also were nonpool handlers whose regular deliveries of milk were made outside the area. It was reasonably anticipated that from time to time some of these nonpool handlers would sell and distribute their surplus milk in the Cleveland area at its highest value as fluid milk.

Fluid milk sold in the regulated area by nonpool handlers displaces fluid milk sales that otherwise would have been made by pool handlers, causing the latter to use more of their milk for manufacturing purposes (class III), thus reducing the uniform blend price to the producers. The prospect of such results constituted a real threat to the integrity of the basic regulatory plan. At the outset of the promulgation hearing it was considered that all handlers who sold any milk in the Cleveland area should be fully regulated. The proposed order that accompanied the notice of the promulgation hearing so provided. Full regulation under similar circumstances has received judicial approval. (*Titusville Dairy Products Co.* v. *Brannan,* 176 F. 2d 332. Cf. *United States* v. *Rock Royal Cooperative, Inc., supra.*)

At the hearings, however, it was shown that full regulation of such nonpool handlers would subject them to an unwarranted burden of payments and assessments and place them at a severe competitive disadvantage with other nonpool handlers in the sale of milk in nonregulated areas. Accordingly, it was determined that the alternative of partial regulation of nonpool handlers who distributed 10 percent or less of their milk in the regulated area would subserve the purpose of protecting the basic plan of regulation and be equitable to such nonpool handlers. Such alternative was incorporated in section 975.72(A) of order No. 75. The provisions of this section of the order are not inconsistent with subsections (5)–(7) of 608c of the act and being designed to preserve the integrity of the basic plan they must be regarded as incidental and necessary "to effectuate the other provisions of the order." It should be noted that in *Kass* v. *Brannan* the alternative of full regulation was not present. Kass purchased milk products from another handler. He made no purchases of milk from farmers who could have been brought within the ambit of full regulation under order No. 27 as producers.

It is held, therefore, that section 975.72(A) is authorized by law.

ARE THE PROVISIONS OF SECTION 975.72(A) OF ORDER 75 SUPPORTED BY THE EVIDENCE?

As shown above, the payments required of a nonpool handler selling less than 10 percent of his volume of milk in the Cleveland area are based upon the difference between the class I price of fluid milk and the class III price of milk. When the plan of so-called partial regulation was adopted as an alternative to full regulation of such nonpool handlers, the above formula as to the rate of payments was the only one proposed by witnesses at the promulgation hearing. There was abundant evidence that there were class III uses of milk in the Cleveland milkshed and neighboring areas. It was shown also that a similar formula had been incorporated in the Boston, Mass., order.

Plaintiff assails the formula as being predicated upon the assumption that a nonpool handler's initial cost of fluid milk is no greater than the class III price whereas the evidence demonstrates that the average initial cost to plaintiff was in excess

of both the uniform blend price and the uniform class I price of fluid milk under the order. Plaintiff's argument is premised upon the holding of the court in Kass that the initial cost of nonpool milk is a part of the minimum class prices authorized by section 8c(5)(A) of the act. However, such minimum prices apply only to classified milk, i.e., milk purchased from producers. During the period in question plaintiff made no purchases from producers as that term is defined by order No. 75 and which, as thus defined, means a dairy farmer whose milk "is moved directly from his farm to a pool plant." Section 975.8. To apply the principle of uniformity as announced in Kass would mean that any nonpool partially regulated handler whose initial cost was equal to or greater than the uniform class I price could sell fluid milk in the marketing area without making any compensatory payments. The application of the Kass principle of uniformity in cases where a nonpool handler's initial cost was slightly less than the uniform class I price would enable such handler to sell his surplus milk in the marketing area as fluid milk upon the payment of a small differential bearing no relation to the loss sustained by producers. The uniform minimum prices of classified milk referred to in section 8c(5)(A) of the act take no account of the initial cost of milk. Such prices are based upon use values. A pool handler purchasing milk from a producer may, if he chooses, pay a premium above the minimum blend price to farmers, thus increasing his initial cost. However, if a pool handler pays a premium he is nevertheless required to account to the producers settlement fund in the manner provided by the plan.

The initial cost of milk to a pool handler which may be more than the blend price is not a part of any minimum class price. Nor is the initial cost of milk to a nonpool handler part of a minimum class price. The judicial officer was correct in not regarding the evidence of plaintiff's initial cost as material to the issues. Minimum class prices have no application to milk purchased by a nonpool handler. It is erroneous, therefore, to suppose that the formula by which compensatory payments are computed is based in part upon a hypothetical initial cost to a nonpool handler equal to the class III minimum price of milk.

The rate of payment formula rests upon an entirely different principle. It is designed to compensate producers for the loss of fluid milk sales occasioned by nonpool handlers' sales of fluid milk in the marketing area and thus assure the payment of minimum blend prices to producers. Except for its reliance on the principle of Kass plaintiff submits no argument and no evidence tending to show that the compensatory payments in question are unreasonable. At the hearing in the 8c(15)(A) proceeding defendant called John R. Hanson as an expert witness. Hanson testified at length, and stated that in his expert opinion the rate of payment here in question was reasonable, appropriate and necessary. At the close of his direct testimony, counsel for plaintiff said: "The petitioner does not necessarily agree with the argument advanced in the direct examination of this witness but we have no cross-examination."

I agree with the judicial officer that "rulemaking looks to the future and is experimental in nature, being subject to amendment as experience warrants. (*American Airlines, Inc.* v. *Civil Aeronautics Board*, 192 F. 2d 417.) And, of necessity, rulemaking often calls for forecasts and estimates. In the light of the expertise of the Secretary the evidence in the record could legally form the basis for the judgment of the Secretary reflected in the protested provision. (Cf. *Railway Express Agency* v. *Civil Aeronautics Board*, 243 F. 2d 422.)"

Order No. 75 was promulgated by the Secretary on June 29, 1946. Whether the rate of the compensatory payments is supported by evidence must be determined in the light of the record before the Secretary at the time the order issued. Plaintiff did not enter the Cleveland marketing area until December 1947. Nor does it appear that plaintiff's later entrance into the market area was anticipated at the time the order was promulgated. If, as is now contended by plaintiff, the compensatory payments were unreasonable, that fact was known to plaintiff during the period in question. Yet plaintiff made no attempt, by securing an amendment to the order, to have the amount of the payments reduced although it was fully informed of its right to seek such relief. In oral argument plaintiff's counsel said: "We are not saying that we should have a free ride or that anyone should have a free ride." The above statement is hardly consistent with plaintiff's reliance upon Kass which, if followed, would require a determination that plaintiff ought not be required to make any payments. Plaintiff's case, therefore, comes down to an attack upon the rate of payment which, as indicated above, is supported by evidence and its reasonableness confirmed by expert testimony in the proceeding before the judicial officer. In this state of the case there is no basis for holding the contested provision of order No. 27 invalid. It is not without significance that during the period of partial regulation, particularly in the years 1950 and 1951, plaintiff's sales of fluid milk in the Cleveland marketing area increased substantially.

Furthermore, the Secretary has submitted evidence which is not disputed showing that if plaintiff were subject to full regulation as it lawfully might have been its payments for the period in question, including assessments, would have been more than $240,000 in excess of the amount paid by plaintiff under partial regulation.

Although the defendant raised the defense of estoppel as a bar to the maintenance of this action the judicial officer considered it unnecessary to rule upon that question. He also considered it unnecessary to rule upon the issue raised by defendant's pleading the 2-year limitation of action provision in order No. 75. It is regrettable that these issues were not determined in the proceeding before the judicial officer. Absent such administrative determination this court is without authority to decide the unresolved issues. Nor does section 8c(15)(B) of the act authorize a remand of the case except where the Secretary's decision is reversed.

For the reasons hereinabove stated the decision of the Secretary on the merits is affirmed.

An order may be prepared in accordance with this memorandum.

CHARLES J. MCNAMEE,
U.S. District Judge.

AUGUST 18, 1960.

PERMISSION TO FILE CONFERENCE REPORTS—COMMITTEE ON WAYS AND MEANS

Mr. PORTER. Mr. Speaker, on behalf of the Committee on Ways and Means, I ask unanimous consent that the conferees on the part of the House may have until midnight tonight to file conference reports on the following bills: H.R. 10960, H.R. 12536, and H.R. 12659.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

DETERMINATION OF RETAIL PRICE FOR PURPOSES OF EXCISE TAX ON CIGARS

Mr. MILLS submitted a conference report and statement on the bill (H.R. 10960) to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars.

EXCLUSION OF LOCAL ADVERTISING CHARGES FROM MANUFACTURERS SALE PRICE

Mr. MILLS submitted a conference report and statement on the bill (H.R. 12536) relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price.

HEPTANOIC ACID

Mr. MILLS submitted a conference report and statement on the bill (H.R. 12659) to suspend for a temporary period the import duty on heptanoic acid.

EXTENSION OF REMARKS IN THE BODY OF THE RECORD

Mr. PORTER. Mr. Speaker, I ask unanimous consent that the following Members may be permitted to extend their remarks at this point in the body of the RECORD, and to include therein extraneous matter: the gentleman from Indiana [Mr. BRADEMAS], the gentleman from Ohio [Mr. ASHLEY], and the gentleman from Texas [Mr. BURLESON].

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

CONGRESS MUST ACT TO PROTECT JOBS OF AMERICAN RUBBER FOOTWEAR WORKERS

Mr. BRADEMAS. Mr. Speaker, full employment has now come to be recognized as one of the major objectives of national policy.

As a Member of Congress from one of the great industrial States of our country, I have been deeply concerned about the problem of serious unemployment in a number of areas of Indiana and of course I have given particular attention to unemployment in the district I have the honor to represent.

Earlier this year I joined with the distinguished junior Senator from Indiana, the Honorable R. VANCE HARTKE, in hearing testimony presented at La Porte, Ind., in my district, to the Senate Special Committee on Unemployment Problems. The first bill I introduced in Congress was the area redevelopment bill designed to encourage new industry and more job opportunities in areas of chronic unemployment, and I have also introduced legislation to modernize our unemployment compensation system.

LEGISLATION TO PROTECT JOBS OF AMERICAN RUBBER FOOTWEAR WORKERS

Today, Mr. Speaker, I am introducing in the House of Representatives a joint resolution that is directed toward solving a problem which affects the employment of many thousands of workers in the United States, some 5,000 of whom are in St. Joseph County, Ind., in the South Bend-Mishawaka area. These workers are employed in the rubber footwear industry.

The American rubber footwear industry is now suffering serious injury from

the vast and rapidly increasing quantity of imports of rubber footwear into the United States, chiefly from Japan. Dramatic evidence of the concern of American working men and women about the threat posed to their employment is the fact that I have received over 4,000 postcards and letters from employees of the U.S. Rubber Co. plant in Mishawaka urging the passage of appropriate legislation to help protect their jobs. This plant, located in my congressional district, employs more than 5,000 men and women and is the largest footwear manufacturing plant in the United States.

U.S. RUBBER PLANT AT MISHAWAKA IMPORTANT FACTOR IN ST. JOSEPH COUNTY ECONOMY

The economic health of the U.S. Rubber Co. plant at Mishawaka is understandably a very important factor in the economy of the St. Joseph County labor market area, which has suffered several periods of serious unemployment in recent years. Mr. Speaker, even our present inadequate statistics on the imports of rubber footwear show that imports have been increasing at a remarkable rate, cutting deeply into the domestic market and thus affecting the jobs of American workers in Mishawaka, Ind., and elsewhere in the Nation.

FROM 1955 TO 1959 PAIRS OF IMPORTED RUBBER FOOTWEAR INCREASED 4,867.5 PERCENT

Here are some significant figures: from 1955 to 1959 pairs of imported rubber footwear increased from 1,085,651 to 52,860,697—an increase of 4,867.5 percent.

Approximate figures indicate that 1959 figures were 175.6 percent greater than those of 1958, and 1960 imports will probably be some 129.8 percent higher than those of 1959.

RUBBER FOOTWEAR IMPORTS TOOK 1.3 PERCENT SHARE OF DOMESTIC MARKET IN 1955 BUT 34.9 PERCENT IN 1959

The imports are coming in principally from Japan, where both labor and materials costs are so low that our efficient but high-wage-paying domestic industry is unable to compete in terms of price. For instance, average wages for the footwear industry in the United States are $2.51 per hour while in Japan the average is 20 cents an hour.

As a result, the foreign rubber footwear has been slashing into the domestic market at an alarming rate: imports in 1955 took a 1.3 percent share of the market, but this rose in 1959 to 34.9 percent, with imports of waterproof footwear taking almost 60 percent of that market in 1959.

The Census Bureau's incomplete figures show that rubber footwear imports were about 700,000 pairs in 1954, went up to 2 million in 1956, 6 million in 1957, 19 million in 1958, and 53 million in 1959, substantially all of these being from Japan.

The domestic industry's employment and profit picture is correspondingly discouraging. I am particularly aware of the problem of the factory in Indiana, but the story of layoffs, shortened workweeks, and financial trouble is generally being repeated in all parts of the country where there are rubber footwear plants. If the American industry were now producing at its 1952 share of the domestic market rate, it would have made some 150 million pairs of shoes in 1959 instead of the 99 million actually shipped. This represents a loss of production of 51 million pairs of shoes in 1959 alone, and a loss of between 9,600 and 13,000 full-time jobs.

DEMOCRATIC PARTY PLATFORM DECLARES INDUSTRIES AFFECTED BY FOREIGN TRADE NEED AND DESERVE HELP

Mr. Speaker, I am a strong believer in expanded world trade, as are both President Eisenhower and Senator JOHN F. KENNEDY, the leaders of the two major political parties in our country. But as assistant to the chairman of the platform committee at the Democratic National Convention at Los Angeles, my distinguished friend and colleague, Congressman CHESTER BOWLES, of Connecticut, I was also glad to have had a firsthand opportunity to see the Democratic Party platform recognize that expanded world trade brings difficulties as well as benefits. I was pleased to see our platform take note of the fact that "the increase in foreign imports involves costly adjustment and damage to some domestic industries and communities."

The Democratic platform concluded that—

> Industries and communities affected by foreign trade need and deserve appropriate help.

I agree.

JAPANESE MAINTAIN RIGOROUS RESTRICTIONS ON IMPORTS

And, Mr. Speaker, I should like parenthetically to point out that reciprocal trade agreements should be reciprocal. For these agreements to be effective and mutually beneficial requires a two-way street of negotiation and compromise. An article entitled "'Made-In-Japan' Dilemma," which appeared in the New York Times of June 12, 1960, made this telling commentary on American-Japanese trade agreements:

> Japan's own attitude presents a formidable block to trade benevolence by others. Ironically this nation that is so successfully invading foreign markets maintains tariffs, quotas, and other import restrictions that are among the world's most rigorous.

CENSUS BUREAU TO COMPILE STATISTICS ON RUBBER FOOTWEAR IMPORTS

Mr. Speaker, the joint resolution I am today introducing is an economically sound and economically responsible proposal. If my bill is passed by Congress and becomes law, it can go a long way toward enabling the American rubber footwear industry to maintain its economic health and workers in that industry to retain their jobs.

The purpose of my bill is simple: It would direct the Census Bureau of the U.S. Department of Commerce to compile statistics on imports of rubber footwear from foreign countries by type of footwear.

Mr. Speaker, let me explain why this legislation is desirable.

Under the Trade Agreements Act, which governs our trade relations with other nations, the only avenue of administrative relief for an American industry which is suffering serious injury from imports from abroad is an escape clause proceeding before the U.S. Tariff Commission.

Under the escape clause procedure, the President may take action to restrict imports if the Tariff Commission finds, after a thorough, factfinding investigation, that imports are causing or threatening serious injury to the domestic industry.

AMERICAN RUBBER INDUSTRY LACKS IMPORT DATA

The U.S. rubber footwear industry has available for presentation to the Tariff Commission all the necessary documentation to make its case for escape clause action with the exception of accurate data on imports of rubber footwear. The statistics compiled by the Bureau of the Census, which is the only reliable source, are inadequate. The purpose of this bill therefore is to obtain accurate statistics on rubber footwear imports in order to enable the domestic industry to prepare a full and adequate application to the Commission. The lack of such statistics has caused the domestic industry great difficulty in ascertaining the extent to which imports of rubber footwear have caused serious injury within the meaning of the escape clause.

ESCAPE CLAUSE PROVISION EXPLAINED

The escape clause provision requires the Tariff Commission to undertake an investigation at the request of any interested party. In the course of the investigation, which usually involves a public hearing, the Tariff Commission studies the domestic industry concerned (i.e., the industry in the United States producing articles "like or directly competitive" with the imported products complained of). In order to find injury to the domestic industry the Commission must conclude that imports of the competitive product have been increasing as a result of a tariff concession and that such increased imports are adversely affecting the domestic industry. Various factors are taken into consideration by the Commission. These are: a downward trend of production, employment, profits, or wages in the domestic industry concerned, or a decline in sales, an increase in imports, either actual or relative to domestic production, a higher or growing inventory, or a decline in the proportion of the domestic market supplied by domestic producers.

Within 6 months from the filing of an application the Commission must complete its investigation and report to the President. If it finds actual or threatened serious injury it is required to recommend an increase in the duty rates or the imposition of a quota or both. The President then must either adopt the recommendation or within 60 days report to the Senate Finance and the House Ways and Means Committees; the statute also provides that if the President rejects the Commission's recommendations, a congressional resolution may overrule the President.

One of the vexing problems which has faced the Commission, and which has been important in preventing it from recommending relief, is the failure of the domestic industry to present full information, thus leaving a gap in the vital statistics concerning domestic production and profits. The domestic rub-

ber footwear industry is able to present full statistics on the domestic field; however, it is seriously handicapped because it is unable to obtain adequate import statistics.

DETAILED IMPORT STATISTICS NEEDED

It is essential that detailed information be submitted to the Tariff Commission if an application is to receive sympathetic consideration. One of the kinds of information necessary is a detailed definition of the various imported products involved in the hearing and statistics by quantity and value for each type of product. This is especially important in the case of rubber footwear. The domestic industry produces distinct and varying types of footwear: Classic tennis and basketball shoes, women's specialty shoes with rubber soles and fabric or synthetic uppers, other types of rubber-soled casual shoes with fabric, synthetic, plastic, or other kinds of uppers, rubber boots for sport or outdoor or dress wear, rubbers, arctics, gaiters, and others. The escape clause now provides specifically that domestic producing organizations may be segmented by type of product and the operations attributable thereto. This enables the Commission to observe the interaction between a particular kind of import and the domestic operations involved in producing a comparable product. For example, if appropriate census figures were available, the domestic rubber footwear industry could present to the Commission an application for tariff relief on certain specified types of rubber footwear. This may be of great importance to the industry. There are indications that the case for import protection against waterproof—weather protective—footwear is one of serious urgency and that if adequate statistics were available this case could be presented convincingly now, on its own merits, independently of the status of other kinds of rubber footwear.

Similarly, without detailed statistics showing the imports of the different types of footwear, the domestic industry is seriously handicapped in proving to the Commission that its products are "like or directly competitive" with the import complained of. The industry must be able to show, for example, that its operations involving rubber boots are being injured by imports of rubber boots; inadequate import statistics which lump rubber boots indiscriminately with rubber beachwear make such a showing difficult or impossible.

Statistics showing the quantity and value of imports of the various products from the various countries must also be available going back to some point before the granting of the concession so that it is clear that imports have increased since the lowering of the rate. Information must also be presented which describes the domestic industry producing articles directly competitive with those being imported.

CENSUS BUREAU DATA NECESSARY

Without the possession of detailed import statistics an adequate presentation cannot, for the reasons given above, be made by the domestic industry involved. The Census Bureau, which collects import data at the various ports of entry, is the only reliable source of such information. Statistics issued by foreign countries are available to varying extents, but are usually unreliable and inadequate. In the case of rubber footwear the Japanese Ministry of Finance has issued statistics showing the exportation of footwear to the United States. The figures are arranged by categories of type of footwear through 1959, but the categories are neither consistent nor meaningful, and their accuracy is not beyond question.

The Census Bureau now keeps statistics on rubber footwear broken down as follows: First, rubber boots; second, rubber shoes and overshoes; and third, rubber soled shoes with fabric uppers. Each of these categories includes different types of shoes, and without a further breakdown it is not possible to make an adequate analysis of the effect of imports on the domestic industry.

INADEQUACY OF STATISTICS ILLUSTRATED

One illustration of the inadequacy of our statistics is the problem of Japanese rubber thong sandals, known as zories. These shoes have recently become enormously popular in the domestic market, but we have not been able to obtain any reliable figures as to the quantity being imported or the quantity being consumed. Journal of Commerce figures indicate approximately 12,763,000 pairs imported in 1959. One of the importers claims that the figure actually is as high as 68 million. Zories imports are of the greatest concern since they have taken from the domestic industry the market for casual beach and lounge footwear which was formerly supplied by the domestically produced stroller. In view of the current enormous size of this market, this is a very substantial loss, but without reliable figures showing the quantity of zories imported the domestic industry cannot demonstrate the extent of the loss. There may well be other types of footwear which have similarly displaced domestic production, which could be shown with adequate import statistics.

CLASSIFICATION DIFFICULTIES

The problem is additionally complicated by the fact that, according to the Census Bureau, many of these rubber shoes have been classified as manufactures of rubber rather than as rubber footwear, so that it is not even possible to obtain an accurate total footwear import figure. The official U.S. import figure for rubber footwear in 1959 is 53 million; the figure reported by the Japanese is somewhere between 61 million and 88 million—it is impossible to tell in some cases whether the Japanese categories are leather or rubber footwear.

Another example of inadequate customs classification in the present reporting system is rubber-soled shoes. Shoes with fabric uppers are separate and distinct from shoes with plastic uppers, and are not necessarily similar among themselves, that is, tennis shoes are different from basketball shoes, women's specialty shoes, and so forth. The statistics should distinguish between such types of shoes.

There is a great deal of other statistical data important to an adequate Tariff Commission presentation. The applicant is requested to present detailed figures on domestic production, profits, employment, costs, and so forth. All such statistical information is available since about 95 percent of the domestic industry is cooperating in the compilation of statistics. The industry is also prepared to present detailed figures concerning the different kinds of shoes it has produced in the past decade and is currently producing in order to correlate such data with any breakdown obtainable on imports. The only gap in the necessary statistical presentation is, therefore, the lack of accurate import figures.

PROFITS AND EMPLOYMENT DOWN

Profits and employment in the domestic rubber footwear industry are fast declining in spite of the fact that consumption is at an all-time high and has been growing far ahead of the population increase. Japanese wage and other cost figures are extremely low and it is almost impossible for the domestic product to compete in terms of price. In at least one case domestic production of a very popular type of shoe has ceased completely because of Japanese competition. The fact that imports are seriously injuring the domestic industry is clear, as is the need for immediate action if permanent damage to the industry is to be avoided.

THE NEED FOR THIS LEGISLATION IS CLEAR

Mr. Speaker, I believe the need for the legislation I am today introducing is clear. I believe my bill, by requiring the Census Bureau to compile statistics on imports of rubber footwear by type of shoe, offers the best hope for the American rubber footwear industry to present its case effectively to the United States Tariff Commission.

Mr. Speaker, I am aware that Congress is not likely to act on my proposal during this session. But I believe that the introduction of this joint resolution now will start the ball rolling for favorable action next year.

Mr. Speaker, I urge the next Congress to act promptly and favorably on this measure. The jobs of several thousand American workers and the economic health of an important industry may well depend upon such action.

The text of the joint resolution follows:

JOINT RESOLUTION TO PROVIDE FOR THE COMPILATION OF RUBBER FOOTWEAR IMPORT STATISTICS BY TYPE OF FOOTWEAR

Whereas it is the policy of Congress, as expressed in subsection (e) of section 484 of the Tariff Act of 1930 (19 U.S.C., sec. 1484 (e)), that there be kept a detailed enumeration for statistical purposes of all merchandise imported into the United States, such enumeration established by the Secretary of the Treasury, the Secretary of Commerce, and the Chairman of the United States Tariff Commission, and reported on the entry statement in conformity with such enumeration, by quantity and value for each kind of article imported;

Whereas it is the policy of Congress, as expressed in sections 6 and 7 of the Trade Agreements Extension Act of 1951 (19 U.S.C., secs. 1363 and 1364) that any domestic industry shall obtain tariff relief which can show to the satisfaction of the Tariff Commission and the President of the United States that it is suffering or threatened with

serious injury by imports of like or directly competitive products which are increasing as a result of a trade concession;

Whereas adequate import statistics must be available to the domestic industry to enable it to establish the need for relief by the criteria set forth in the aforementioned Trade Agreements Extension Act;

Whereas the import statistics on rubber footwear currently compiled by the Bureau of the Census of the Department of Commerce are inadequate for the purpose of showing the quantity and value of types of rubber footwear imported;

Whereas the domestic rubber footwear industry is currently facing serious injury from the greatly increased and increasing imports of rubber footwear: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury, the Secretary of Commerce, and the Chairman of the United States Tariff Commission are authorized and directed to establish an enumeration of articles of rubber footwear imported into the United States, such enumeration shall be made for the year 1959 and for each year thereafter and shall be in the following detail:

(1) Rubber footwear imported under paragraph 1530(e) of the Tariff Act of 1930, to be reported as follows: rubber-soled shoes with fabric uppers, such as tennis shoes, bals, and oxfords; rubber-soled shoes with fabric uppers (other than tennis shoes, bals, and oxfords), such as specialty shoes (including women's casuals); rubber-soled shoes with toya cloth uppers; rubber-soled shoes with plastic uppers (including vinyl film uppers); others; and

(2) Rubber footwear imported under paragraph 1537(b) of the Tariff Act of 1930 to be reported as follows: rubber boots; gaiters and arctics; rubber shoes; zories; waterproof shoes with plastic uppers (including vinyl film uppers); others.

SEC. 2. As a part of the entry into the United States of any rubber footwear there shall be attached thereto an accurate statement specifying in terms of the detailed enumeration as set forth in the first section of this joint resolution the kinds and quantities of all such merchandise imported and the value of the total quantity of each kind of article.

SEC. 3. The recording and compilation of rubber footwear import statistics as described in this joint resolution shall be made at the expense of the United States and no charges therefor shall be made to any other person.

COMMUNISM IN LATIN AMERICA

Mr. SIKES. Mr. Speaker, the problems posed for the free world by Korea, Vietnam, and the Middle East on yesterday will, I predict, be repeated in Latin America on tomorrow. The picture of events there is far from clear, but its portent is ominous. Castro has virtually delivered Cuba into the grasp of the Communists. Territory once seized by the Communists is rarely relinquished. South Korea was freed from Communist forces by force of arms after United States and U.N. forces went to the rescue. Guatemala threw out a Communist government when the martyred Castillo-Armas sparked a revolution from within. Later the Communists had him killed but the fact remains that only Guatemala in all the world has escaped from Communist domination with its territory intact, after Communist domination had been established. It is clear to see that Cuba can be the beachhead which communism has so long sought in Latin America. Unless positive action is taken—and that means positive action by the United States—Cuba can quickly become the capital of the Communist movement everywhere in Latin America.

Castro's order to the Cuban government to seize all American property in Cuba should have awakened the American people and the Eisenhower administration to the fact that this act is a part of the normal routine of every Communist government that comes to power. That it coincided with the meeting of the Communist-controlled Latin American Youth Congress in Havana adds to its significance. Seizure and promised distribution of private property has a profound effect on the young and impressionable. It has an even more profound effect upon the have-nots, of whom there are many in Latin America. It is most profound in its effect when the seized property belongs to citizens of the rich and powerful United States and this Nation does nothing about it.

There are many things which can be done which are short of armed intervention. American know-how and American dollars, which still are available to Cuba in surprisingly large amounts, are indispensable to Cuba. Castro cannot replace them elsewhere and without them Cuba would quickly collapse economically. Castro cannot survive such a collapse.

In the meantime, Castro's success in twisting Uncle Sam's nose has had quite an effect upon the people of Latin America. Let us face it. Aided and abetted by Russia, others will try it. The world, and particularly Latin America will be watching what the Eisenhower administration does. If there ever was a time when the phrase our Government has so frequently used on others, "deeds, not words," should be invoked, it is now.

It has frequently been said that U.S. policy is quickly to patch together a program to meet the effects of a crisis which has taken place, instead of designed policies and programs to meet crises which may be anticipated. Perhaps this has been the crux of our problems in many parts of the world. Certainly unnecessary damage has been done in Cuba through the policy of inertia and wishful thinking. It has also been said—with good cause—that the Congress of the United States is at least 2 years ahead of the Government in its reaction to world problems. The prodding of the Congress has, I believe, influenced some stiffening of U.S. attitude toward Cuba. Here again the case of Guatemala comes to mind. Here U.S. policy was timely and effective, and to considerable measure this has been because of congressional initiative. The Congress has emphasized over and over again the necessity of demonstrating to the world that the Guatemalan experiment in democracy could succeed.

The objective there as elsewhere, is simply to show that the needs of a people can be met better through democratic processes than through those of a totalitarian system. On the credit side of the ledger is the fact that the people of a small neighboring Latin American state, working now through the forward-looking leadership of President Miguel Ydigoras Fuentes, assisted in time—and I emphasize in time—by a sympathetic and understanding United States, is confronting serious problems with maturity, courage, patience, and faith.

This nation is our friend. People everywhere want to be friends of this nation and of freedom. The people of Cuba are our friends but the current Cuban dictator has alienated some of them. The others are afraid to speak. A firm policy toward Castro and toward Communist stooges elsewhere will give the people an opportunity to demonstrate their friendship for the people of the United States.

It is high time that the United States begins to recognize that she has friends in Latin America who can be counted upon. There are some so-called friends who, when the chips are down, do not stand with us. As reported in the Christian Science Monitor of August 26, 1960, Bolivia, Ecuador, Honduras, Mexico, Panama, and Venezuela were not willing to go along with the strong condemnation of Soviet intervention in the Western Hemisphere through Cuba, which the United States was anxious to be adopted. On the other hand, the report adds that "the United States can count on Brazil, Argentina, Guatemala, and a few others."

I think it is essential that we recognize that these countries which demonstrate their friendship for us, cherish common ideals and principles with us, and we must not permit those ideals to be sacrificed at the altar of complacency. I think it equally essential that the United States adopt a strong policy toward communism in the Western Hemisphere which will make it impossible for communism to gain a lasting foothold here, and around which our friends can rally with complete confidence.

PRINTING OF COMMITTEE ACTIVITY REPORTS

Mr. BURLESON. Mr. Speaker, with reference to the printing of committee activity reports for the session, as vice chairman of the Joint Committee on Printing, I wish to remind the chairmen of all committees that the Joint Committee on Printing has very properly ruled that the printing of such reports, both as committee prints and in the RECORD, is duplication, the cost of which cannot be justified.

It is requested that committee chairmen decide whether they wish these reports printed as committee prints or in the RECORD, since the Government Printing Office will be directed not to print them both ways.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. PATMAN, for 30 minutes, tomorrow, and to revise and extend his remarks and to include extraneous matter.

Mr. VANIK, for 30 minutes, tomorrow, and to revise and extend his remarks.

Mr. STRATTON, for 60 minutes, today.

Mr. SCHERER, for 10 minutes, today.

Mr. HECHLER, for 30 minutes, on tomorrow.

Mr. FLOOD, for 30 minutes, on tomorrow.

Mr. O'HARA of Illinois, for 1 hour, tomorrow.

Mr. THOMPSON of New Jersey (at the request of Mr. MCCORMACK), for 20 minutes today, to revise and extend his remarks and include extraneous matter.

Mr. WOLF (at the request of Mr. MCCORMACK), for 15 minutes, tomorrow.

Mr. DENT, for 15 minutes, tomorrow.

Mr. PUCINSKI asked that his special order for August 31 be extended to 2 hours.

Mr. WRIGHT, for 30 minutes, tomorrow.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. MCCORMACK (at the request of Mr. ASPINALL) and include extraneous matter.

Mr. KILGORE and include a speech by Mr. WALTER.

Mr. SCHERER, in the body of the RECORD in connection with remarks to be made in connection with the retirement of three Members from Ohio.

Mr. MCDONOUGH and to include extraneous matter.

Mr. MINSHALL.

Mr. FISHER.

Mr. HECHLER and to include extraneous matter.

Mr. HOFFMAN of Michigan, to revise and extend the remarks he made earlier today and include a newspaper article, not extraneous, but related to the remarks.

Mr. RHODES of Arizona.

At the request of Mr. WEAVER, the following Members be permitted to extend their remarks in the CONGRESSIONAL RECORD and to include extraneous matter:

Mr. VAN ZANDT.

Mr. CHIPERFIELD.

Mr. FINO.

Mr. WAINWRIGHT.

Mr. ROBISON of New York in two instances.

(At the request of Mr. PORTER and to include extraneous matter, the following:)

Mr. KEOGH.

Mr. GARMATZ.

Mr. ZELENKO.

Mrs. GRIFFITHS.

Mr. FASCELL.

Mr. ROOSEVELT.

Mr. GIAIMO.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 12619. An act making appropriations for mutual security and related agencies for the fiscal year ending June 30, 1961, and for other purposes.

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that committee did on this day present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.R. 900. An act to validate certain overpayments inadvertently made by the United States to several of the States and to relieve certifying and disbursing officers from liability therefrom;

H.R. 2069. An act for the relief of James H. Presley;

H.R. 2178. An act to authorize the Secretary of the Army to make certain changes in the road at White Branch, Grapevine Reservoir, Tex.;

H.R. 4059. An act to amend title 28 of the United States Code relating to actions for infringements of copyrights by the United States;

H.R. 6084. An act for the relief of J. Butler Hyde;

H.R. 6767. An act for the relief of Raymond Baurkot;

H.R. 7124. An act to require the payment of tuition on account of certain persons who attend the public schools of the District of Columbia, and for other purposes;

H.R. 7792. An act for the relief of Martin A. Mastandrea;

H.R. 8054. An act for the relief of William Edgar Weaver;

H.R. 8989. An act for the relief of Ralph W. Anderson;

H.R. 9377. An act to provide for the protection of forest cover for reservoir areas under the jurisdiction of the Secretary of the Army and Chief of Engineers;

H.R. 9406. An act for the relief of William J. Huntsman;

H.R. 9417. An act for the relief of Henry Kaloian;

H.R. 9432. An act for the relief of Maj. Edmund T. Coppinger;

H.R. 9958. An act for the relief of Brooklyn Steel Warehouse Co.;

H.R. 10431. An act for the relief of Isami Nozuka (also known as Isami Notsuka);

H.R. 10598. An act to clarify certain provisions of the Criminal Code relating to the importation or shipment of injurious mammals, birds, amphibians, fish, and reptiles (18 U.S.C. 42(a), 42(b)); and relating to the transportation or receipt of wild mammals or birds taken in violation of State, National, or foreign laws (18 U.S.C. 43), and for other purposes;

H.R. 11165. An act for the relief of Robert J. Reeves;

H.R. 11188. An act for the relief of Edward S. Anderson;

H.R. 11327. An act for the relief of Chauncey A. Ahalt;

H.R. 11390. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes;

H.R. 11420. An act for the relief of Ferdinand Hofacker;

H.R. 11460. An act for the relief of Edouard E. Perret;

H.R. 11486. An act for the relief of Richard J. Power;

H.R. 11813. An act to amend the Menominee Termination Act;

H.R. 12350. An act for the relief of Marion John Nagurski;

H.R. 12471. An act for the relief of Capt. Lucien B. Clark O2051623, MSC, U.S. Army;

H.R. 12475. An act for the relief of Claude L. Wimberly;

H.R. 12476. An act for the relief of John H. Esterline;

H.R. 12530. An act to authorize adjustment, in the public interest, of rentals under leases entered into for the provision of commercial recreational facilities at the John H. Kerr Reservoir, Va.-N.C.;

H.R. 12533. An act to amend the Migratory Bird Treaty Act to increase penalties for violations of that act, and for other purposes;

H.R. 12563. An act to amend the act entitled "An act to provide additional revenue for the District of Columbia, and for other purposes," approved August 17, 1937, as amended;

H.R. 12619, making appropriations for mutual security and related agencies for the fiscal year ending June 30, 1961, and for other purposes; and

H.J. Res. 658. Joint resolution to authorize and request the President to issue a proclamation in connection with the centennial of the birth of Jane Addams, founder and leader of Chicago's Hull House.

ADJOURNMENT

Mr. PORTER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 50 minutes p.m.), the House adjourned until tomorrow, Wednesday, August 31, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

2430. Under clause 2 of rule XXIV, a letter from the Deputy Secretary of Defense, transmitting a draft of proposed legislation entitled "a bill to amend section 1037 of title 10, United States Code, to authorize payment of costs for certain United States nationals before foreign tribunals", was taken from the Speaker's table and referred to the Committee on Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ROGERS of Texas: Committee on Interior and Insular Affairs. H.R. 10311. A bill providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724), shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas; with amendment (Rept. No. 2201). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROGERS of Texas: Committee on Interior and Insular Affairs. S. 1092. An act to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes; with amendment (Rept. No. 2202). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROGERS of Texas: Committee on Interior and Insular Affairs. S. 2195. An act to authorize the Secretary of the Interior to construct, operate, and maintain the western division of The Dalles Federal reclamation project, Oregon, and for other purposes; with amendment (Rept. No. 2203). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. S. 2761. An act to validate payments made for certain emergency conservation measures under the program authorized by the Third Supplemental Appropriation Act, 1957; without amendment (Rept. No. 2204). Referred to the Committee of the Whole House on the State of the Union.

Mr. BONNER: Committee on Merchant Marine and Fisheries. Report pursuant to section 136 of Legislative Appropriation Act of 1946, Public Law 601, 79th Congress; without amendment (Rept. No. 2205). Referred to the Committee of the Whole House on the State of the Union.

Mr. BONNER: Committee on Merchant Marine and Fisheries. House Resolution 623. Resolution relative to the operation of the Panama Line; with amendment (Rept. No. 2206). Referred to the House Calendar.

Mr. DAWSON: Committee on Government Operations. Twenty-fifth report of the Committee on Government Operations; without amendment (Rept. No. 2207). Referred to the Committee of the Whole House on the State of the Union.

Mr. COLMER: Committee on Rules. House Resolution 636. Resolution for the consideration of S. 2917. An act to establish a price support level for milk and butterfat; without amendment (Rept. No. 2208). Referred to the House Calendar.

Mr. O'NEILL: Committee on Rules. House Resolution 637. Resolution for the consideration of H.R. 13021. A bill to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes; without amendment (Rept. No. 2209). Referred to the House Calendar.

Mr. BONNER: Committee on Merchant Marine and Fisheries. S. 3018. An act to authorize the Maritime Administration to make advances on Government-insured ship mortgages; with amendment (Rept. No. 2210). Referred to the Committee of the Whole House on the State of the Union.

Mr. THOMAS: Committee of conference. H.R. 13161. A bill making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes (Rept. No. 2211). Ordered to be printed.

Mr. MILLS: Committee of conference. H.R. 12659. A bill to suspend for a temporary period the import duty on heptanoic acid (Rept. No. 2212). Ordered to be printed.

Mr. MILLS: Committee of conference. H.R. 12536. A bill relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price (Rept. No. 2213). Ordered to be printed.

Mr. MILLS: Committee of conference. H.R. 10960. A bill to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax on cigars (Rept. No. 2214). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASPINALL:

H.R. 13218. A bill to provide for the construction, operation, and maintenance of the Savery-Pot Hook Federal reclamation project, Colorado-Wyoming; to the Committee on Interior and Insular Affairs.

By Mr. BAILEY:

H.R. 13219. A bill to provide certain payments to assist in providing improved educational opportunities for children of migrant agricultural employees; to the Committee on Education and Labor.

H.R. 13220. A bill to authorize the Commissioner of Education to enter into contracts for the education of children of migrant agricultural employees, and to provide for fellowships for training teachers of such children; to the Committee on Education and Labor.

By Mr. BLATNIK:

H.R. 13221. A bill to establish the National Foundation on Aging; to the Committee on Education and Labor.

By Mr. INOUYE:

H.R. 13222. A bill to provide that the Secretary of State shall investigate and report to the Congress as to the feasibility of establishing a Pacific International House on Sand Island, Hawaii; to the Committee on Foreign Affairs.

By Mr. MARTIN:

H.R. 13223. A bill to amend the Tariff Act of 1930, as amended, with respect to the duties on hair of the cashmere goat; to the Committee on Ways and Means.

By Mr. MILLS:

H.R. 13224. A bill to implement the Agreement on the Importation of Educational, Scientific, and Cultural Materials, opened for signature at Lake Success on November 22, 1950; to the Committee on Ways and Means.

By Mr. THOMSON of Wyoming:

H.R. 13225. A bill to provide for the construction, operation and maintenance of the Savery-Pot Hook Federal reclamation project, Colorado-Wyoming; to the Committee on Interior and Insular Affairs.

By Mr. TOLL:

H.R. 13226. A bill to amend the United States Information and Educational Exchange Act of 1948 to provide for counseling and other assistance to foreign students attending colleges or universities in the United States; to the Committee on Foreign Affairs.

By Mr. WESTLAND:

H.R. 13227. A bill to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy and for the training and development of leaders in a total political war; to the Committee on Un-American Activities.

By Mr. COOLEY:

H.R. 13228. A bill to further amend the Trade Agreements Extension Act of 1951, as amended; to the Committee on Ways and Means.

By Mr. BRADEMAS:

H.J. Res. 803. Joint resolution to provide for the compilation of rubber footwear import statistics by type of footwear; to the Committee on Ways and Means.

By Mr. WESTLAND:

H.J. Res. 804. Joint resolution to authorize the Secretary of Commerce to construct a modern stern ramp trawler to be used for research purposes and authorizing the appropriation of funds; to the Committee on Merchant Marine and Fisheries.

By Mr. GREEN of Pennsylvania:

H. Con. Res. 732. Concurrent resolution expressing the sense of Congress in favor of granting relief to the domestic carpet industry; to the Committee on Ways and Means.

By Mr. BENNETT of Florida:

H. Res. 635. Resolution to provide for an investigation of the Department of Defense directive on transportation of household goods of military and civilian personnel; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of Montana:

H.R. 13229. A bill for the relief of Shi-Kuang Yao; to the Committee on the Judiciary.

By Mr. MARTIN:

H.R. 13230. A bill for the relief of Sih Chuen Liu; to the Committee on the Judiciary.

By Mr. RILEY:

H.R. 13231. A bill for the relief of Jagat Kumar Kaul; to the Committee on the Judiciary.

By Mr. SHELLEY:

H.R. 13232. A bill for the relief of Necasio Agustin, Artemio Agustin, and Gloria Agustin; to the Committee on the Judiciary.

H.R. 13233. A bill for the relief of Leonila Tolentino and Gloria Tolentino; to the Committee on the Judiciary.

By Mr. SHEPPARD:

H.R. 13234. A bill to authorize the reconveyance to the former owner thereof of certain property at Cheli Air Force Depot, Los Angeles County, Calif., when such property is declared surplus to the needs of the United States; to the Committee on Government Operations.

By Mr. WEIS:

H.R. 13235. A bill for the relief of Antonio Folliero; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

539. Mr. STRATTON presented a petition of Mr. Sam Caparossi, Gloversville, N.Y., secretary-treasurer, and 18 other members of local 234 of the International Barbers Union urging adoption of H.R. 11418; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

Radio and Television Programing

EXTENSION OF REMARKS

OF

HON. ROBERT N. GIAIMO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. GIAIMO. Mr. Speaker, the concern of our Nation with the uses being made of radio and television has been reflected many times in discussions conducted on this floor. I know that our citizens recognize the fine work of this Congress to insure that the vast resources of the radio and television media would be used constructively.

Last fall, I was among many who spoke out against the indifference to the public interest revealed in certain TV and radio practices. At that time I urged the listening and viewing public in my Connecticut community to insist upon an improvement of radio and television programing.

Mr. Speaker, I believe we should continue our concern with our national educational and entertainment media; I believe citizens should expect that the great power of the airwaves be used in behalf of the public good. I believe that this concern should be expressed not only by criticism of what is bad but also acclaim for what is praiseworthy.

In this regard, Mr. Speaker, I wish to call the attention of the House to a unique program being developed by the National Broadcasting Company. Recognizing the urgent need for widespread public participation in defining America's national goals and purposes, the National Broadcasting Co. will begin a

weekly television series this fall that will deal with vital current issues through live discussions and debates. The program, entitled, "The Nation's Future," will premiere on November 12.

As a Representative from the State of Connecticut where the town meeting still flourishes in many communities, I am particularly pleased with the unique approach which this program will make to subjects of pressing concern to each citizen and to the Nation. These discussions will be led by statesmen in public life, including world leaders, Members of Congress, ambassadors, economists, and educators, as well as leaders from management and labor. Recognizing that every citizen has a personal stake in these issues the National Broadcasting Co. will arrange for these programs to be integrated with local activities so as to stimulate discussions in local, civic, fraternal and educational groups. Research and study material will be sent to these groups in advance of each weekly program. The National Broadcasting Co. will also arrange and organize the participation on the air of representatives of these local groups. Through the cooperation of the National Broadcasting Co. affiliates in each area, The Nation's Future will give countrywide scope to our traditional town meeting system.

Mr. Speaker, I feel that the National Broadcasting Co. is to be highly commended for its efforts in originating a program of such vital national importance which will give our people an opportunity to reexamine their ideals and aspirations and utilize the facts for making informed opinions and judgment. I know that The Nation's Future will generate a deeper conscience of the American way of life and the values of democracy and freedom as well as the importance of safeguarding these values not only in our country but the world over.

This is television programing at its best. This is the kind of programing America needs, and I am certain the success of The Nation's Future will prove it is what America wants.

On the Occasion of the 20th Anniversary of the Ukrainian Congress Committee of America

EXTENSION OF REMARKS
OF
HON. PAUL A. FINO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 30, 1960

Mr. FINO. Mr. Speaker, on the occasion of the 20th anniversary of the Ukrainian Congress Committee of America I would like to pay tribute to the Ukrainian patriots who through the centuries have fought the good fight for national independence.

The Ukrainian Congress Committee of America helps us see that the fight is far from over. It serves to remind us of the plight of the dozen captive non-Russian nations. It makes us take a more sober view of the stakes involved in the cold war of today.

The chairman of the committee, Prof. Lev E. Dobriansky, was instrumental in obtaining congressional approval for a Captive Nations Week observance this year. This observance showed Khrushchev that we in the West were aware of the Soviet tyranny which oppresses the captive nations under his sway. It also gave hope to the subject peoples by showing them they were not forgotten. Most importantly, it proved that ideas can pierce through the curtain of terror that encircles the Soviet Union and its satellites.

I would like to offer congratulations to the Ukrainian Congress Committee of America on its anniversary but, in a way, it seems to me as unseemly to congratulate the committee on this occasion as it is to congratulate a man on the anniversary of his mortgage. I would rather save my most joyous congratulations for the day the mortgage is all paid up and burnt, for the day the captive nations have once again taken their rightful place among the family of free nations. In the meantime I wish the committee the very best in its endeavors.

Message to the Ukrainian Congress Committtee of America on Its 20th Anniversary

EXTENSION OF REMARKS
OF
HON. JAMES ROOSEVELT
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 30, 1960

Mr. ROOSEVELT. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following message to the Ukrainian Congress Committee of America on the occasion of its 20th anniversary:

MESSAGE TO THE UKRAINIAN CONGRESS COMMITTEE OF AMERICA ON ITS 20TH ANNIVERSARY

Tyranny has never been a stranger to the courageous people of the Ukraine. Long has it been their lot to be the victims of expanding empires, and to suffer at the blood-drenched hands of the invader.

The Ukraine has particularly fared ill at the hands of Russian imperialism. Though claiming to have cast aside the tenets of prior Russian expansionism and though picturing itself as the new savior of the masses, the Soviet Union became the most vicious oppressor in the long and hard fought saga of the Ukraine. Within 5 years after it had taken power the Soviet Union realized that a major stumbling block to her plans for world conquest lay in the nationalist strivings of the Ukraine. Repression of Ukraine culture, massacres of innocents, mass deportations to Siberia—all have been used to consolidate the power of the U.S.S.R. over the Ukraine.

In the past the Ukraine has always emerged triumphant with her enemy destroyed. Years might have passed but victory in each case was ultimately and gloriously hers. Yet in the periods of arduous waiting, years of fearing the every knock on the door, years of starvation and persecution, hope remained alive. It had to if ever the Ukrainian people were to become free again.

It is such an organization as the Ukrainian Congress Committee of America which provides the captive nations with this potent weapon against the Communist aggressor. The committee goes even further for it realizes that hope alone cannot defeat a historic imperialism and a modern totalitarianism. That is why the program of the committee, its splendid publications, and the unflagging efforts of its membership of two and one half million are all fulfilling a highly commendable and active service to America, to the free world and to the enslaved multitudes under the Soviet heel. That is why, on behalf of the millions in the dozen captive nations and on behalf of America I wish to congratulate and to thank the Ukrainian Congress Committee of America on its 20th anniversary.

Public Health

EXTENSION OF REMARKS
OF
HON. JOHN J. RHODES
OF ARIZONA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 30, 1960

Mr. RHODES of Arizona. Mr. Speaker, to meet the growing health needs of the Nation, the Eisenhower-Nixon administration has pressed forward in the fields of research and training of personnel and of stimulating State, local, and private agencies to expand and improve their facilities and services. Government action which has resulted in major improvements in public health has been of a character which neither discourages nor destroys private effort to combat disease and to lighten the costs of serious illness.

First. Public Health Service appropriation more than tripled in the last 7 years.

Second. National Institutes of Health appropriations increased from approximately $59 million in fiscal year 1953 to $400 million in fiscal 1960.

Third. Health research supported by the National Institutes of Health at outside scientific institutions increased nearly sevenfold—9,166 grants-in-aid amounting to $142,627,000 in fiscal year 1959 compared with 2,054 grants amounting to $20,936,000 in fiscal year 1953.

Fourth. Facilities for health research expanded under new legislation providing $30 million annually to non-Federal public and nonprofit private institutions to help finance construction of health research facilities.

Fifth. Manpower skilled in medical research increased. Seven thousand three hundred regular fellowships and 6,300 in other categories awarded by the National Institutes of Health between 1954 and 1960.

Sixth. Water pollution control program made permanent in 1956. In return for Federal grants amounting to $178 million, 2,100 communities have been stimulated to put up $854 million to build new or to improve existing water pollution control system.

Seventh. Federal program of research and technical activities established to strengthen control of air pollution.

Eighth. National Health Survey initiated providing data for developing more

disease research and control programs for planning health facilities and services.

Ninth. National Library of Medicine founded—will be the Nation's most important source of medical literature.

Tenth. Polio vaccine and inoculation of children carried out by Federal program of assistance to States amounting to $53,600,000.

Eleventh. Grants have been increased for Maternal and Child Health and Crippled Children's Services.

Twelfth. Broadened the program of Federal aid for construction of hospitals and outpatient facilities to include chronic disease hospitals, nursing homes, rehabilitation facilities and diagnostic and treatment centers. Current appropriation for hospital and outpatient facilities is $150 million—double the appropriation of 1953.

Thirteenth. Government action in the health field has been of a nature to stimulate rather than discourage private efforts to provide health services and to protect the American family against the costs of medical care.

As for essential services, note the following increases in public service sectors of the Federal budget between fiscal year 1953 and fiscal year 1961—proposed: Veterans, up 28 percent; labor and welfare, up 91 percent; natural resources, up 27 percent; General Government, up 27 percent.

In addition, State and local governments have expanded spending on services greatly—up well over 50 percent since fiscal year 1953. As for interest charges, these have been an essential cost of carrying the high public debt which the Republican administration inherited. The only way to bring down the cost of the public debt is to resort to the loose-money, low-interest policy of the Democrats which cut the value of the dollar in half during their period in power or to reduce the size of the debt, which Republicans are pledged to do.

Orchard Picnic Address by Senator Byrd of Virginia

EXTENSION OF REMARKS

OF

HON. HARRY FLOOD BYRD

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Tuesday, August 30, 1960

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an address which I delivered at my Annual Orchard Picnic, at Berryville, Va., on August 27, 1960.

There being no objection, the adress was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR HARRY F. BYRD AT HIS ANNUAL ORCHARD PICNIC, BERRYVILLE, VA., AUGUST 27, 1960

This is the 37th year I have had the great pleasure of greeting my friends at these annual picnics.

Today we pay tribute to Walter Hough, chief entomologist at the Fruit Research Laboratory for this area. I know of no man who has rendered greater service during the 49 years he has served the fruitgrowers so faithfully and well.

It so happens that I planted my first apple orchard 57 years ago, so he and I have grown up together in the apple business.

I had faith in the apple business then and have had through the years. I am still planting on a replacement basis. In the last few years I have pulled out over 25,000 trees, which were not productive or profitable varieties.

We have our problems and they are serious, but we are better prepared to meet them because the apple industry receives no subsidy, bonus or favor from the Federal Government. We stand on our own feet.

When I pass on and my sons and grandsons and maybe great-grandsons continue to operate the apple business, I hope they will do all they can, as I have done, to resist any and all efforts to subsidize and control the apple industry by the Federal Government.

I want to tell you something of my recent trip to Switzerland. It was very educational and at the same time most enjoyable. I went with my friend, Blackburn Moore.

On the day the Democratic candidates were nominated at Los Angeles, we had a summit meeting on the highest mountain in Switzerland—over 14,000 feet. We were enjoying the cool air there and were happy to miss the hot air at Los Angeles.

While in Switzerland we were the guests, for a part of the time, of Mr. and Mrs. Henry J. Taylor. He is our American Ambassador whose home is at Charlottesville.

We saw Switzerland at its best. I was greatly impressed with the cordiality of the Swiss people toward the United States. When we traveled with the Ambassador in his car flying the American flag, the people would clap their hands and smile, indicating their friendliness.

The Swiss have never received a dollar of American aid, and would not take it if we offered it to them. Perhaps that is why they like us so well.

I venture to say that in many areas where our contributions have been sent, instead of applauding our flag, they would hiss and condemn it and shout their disapproval, as has been shown in recent instances.

It is time that America learns that we cannot buy friendship with dollars. So far, we have expended over $80 billion in foreign aid, and much of it has been wasted and squandered in the most shameful fashion.

Incidentally, all of this $80 billion has been added to the public debt for future generations to pay.

The last foreign aid bill was more fantastic than any other because it included $100 million for the Congo, where there has been wholesale rape of the white women of Belgium and the killing and murdering of the Belgians who have accomplished such development as there is in that area.

It is peculiarly difficult to understand this. When the Senate passed this bill, the Congo was in the act of defying the United Nations; but this shows to what extremes fallacious policies can be extended.

I was deeply impressed with the Swiss Government. It is a combination of direct and representative democracy. Emphasis on local and Canton rule makes it close to pure democracy. I had a long conference with the President and his Council.

The executive power of the National Government is placed in a 7-man board known as the Federal Council. The Council is similar to our National Cabinet. The President is chosen from among the members of the Council, and serves 1 year.

Their taxes are reasonable. They have no debt. But, at the same time, they maintain a well trained army of 600,000 men out of a population of 5 million, and have a powerful air force with jet planes.

The Swiss people have lived amid wars on the European Continent for generations, without permitting violation of their territory. The mighty Hitler had this in mind during World War II, but he did not attempt it. The Swiss have a remarkable record of permitting no interference from other nations no matter how powerful.

Swiss law provides that when a member of a family is sick or needs help, the others in the family must take care of their own as far as possible. There is no Federal public assistance such as we have developed in this country.

Swiss bankers are perhaps the ablest in the world. I was deeply interested in my conversations with them. The economy, the business and the Government of Switzerland are based on free enterprise and individual liberty.

We landed at Zurich after a flight of just 6½ hours from New York. We went to Geneva, and on to Bern where we were guests of Ambassador Taylor. From there we went to Lucerne and St. Moritz. We drove back to Zurich through Liechtenstein and Austria.

I wish everyone could visit Switzerland. You would see some of the most superb scenery in the world and the hotels are wonderful. You would become acquainted with fine sturdy people. You would be inspired to fight for individual liberties and States rights.

These liberties and rights are among the fundamental principles which have made our country, in a brief span of time, the greatest democracy in all the world. These principles must be protected and preserved; and there are serious indications that we need to be reminded of this.

I say this with all the sincerity of which I am capable: if we undermine our fundamental principles, and impair our fiscal solvency in the next 25 to 30 years as we have in the past quarter of a century, I cannot believe our democracy will survive.

Perhaps it is the inspiration of Switzerland that leads me to some observations which I believe should be made today. Certainly, there is an element of contrast. This leads me to comment briefly about what has been going on in this country.

The people of Virginia have been extremely generous with their confidence in me. I have held public office almost continuously for more than 40 years. They have allowed me to represent them in the Senate of the United States for nearly 30 years.

I think I know the views of the citizens of our great Commonwealth, and the principles for which they stand, and I have always fought for them. I shall never stop fighting for them. It is a source of deep regret that I have been unable to do more.

I say this as I think over the trends toward centralization in the Federal Government over the past 30 years; and we must keep this trend in mind as we attempt to act intelligently on public matters which will affect the lives of all of us in the future.

Perhaps the two greatest foundation stones of our form of government are individual liberty and State sovereignty. These are the greatest deterrents to centralized government. Centralization of government leads to socialism.

Our great free enterprise system depends on individual freedom and States rights. Free enterprise will diminish as centralization of government and socialistic trends increase. These are vital truths to keep in mind in our efforts to preserve our form of government.

Looking to the future, against the background of trends over the past 30 years, there is reason for concern; and more important there is need for awakening. The trends have been toward centralization of government with the inevitable fiscal and socialistic deterioration.

We have had Federal deficits in 24 of those 30 years. Only 8 of the 24 deficits occurred in war years. There have been 16 peacetime deficits. And during the 22 peacetime years the increase in the Federal debt has averaged more than $2 billion a year.

In these 30 years the Federal debt has been increased by $270 billion. It is now more than $286 billion. And in these 30 years interest on the Federal debt has cost the taxpayers of this country more than $114 billion.

Federal taxes 30 years ago took only about 4 percent of the national income; today they are taking nearly 20 percent. And with these increases in debt and taxes the value of the dollar has been reduced to less than 47 cents.

Along with this fiscal deterioration has come continuous centralization of government. Federal programs are embracing an ever-widening area of our economy and endeavor. Federal subsidies are going out through all kinds of loans, grants, and payments.

There are now Federal subsidies for business, industry, private finance, agriculture, transportation, power, housing, health, education, States, localities, and individuals. Subsidies are under bureaucratic control; to take them means giving up a measure of independence and freedom.

Some 40 million people will receive payments from the Federal Treasury this year totaling some $40 billion, including social security. With their families these 40 million people could easily reach a number equivalent to half of our population.

Federal payments to people on so-called public assistance rolls are now totaling more than $2 billion a year. Thirty years ago such payments were unknown. Over the 30-year period Federal payments through programs of this type have totaled about $25 billion.

The Federal Government is now subsidizing housing in the form of grants, loans, guarantees, insurance, etc., to a total of more than $10 billion a year. The first significant Federal program in housing was the HOLC established in 1933. Since then gross Federal housing subsidies have exceeded $110 billion.

Federal payments through various programs in the field of education are now totaling over $1 billion a year. Thirty years ago the total was less than $10 million. During the 30-year period Federal payments in various forms of educational benefits have totaled about $25 billion.

Federal payments to States, localities, and individuals under numerous health programs now total $500 million a year, exclusive of huge direct Federal expenditures for related programs. Thirty years ago Federal activity in this field was negligible. Over the 30-year period Federal payments to States, localities, and individuals in the field of public health have totaled $2¼ billion.

Thirty years ago there was a mere handful of Federal programs for payments to States, localities, and individuals, costing about $100 million. Now there are at least 90 of these payment programs, and expenditures total $9.6 billion a year.

The programs I have cited are domestic-civilian, with little or no relation to military preparedness or foreign aid. They do not include tremendous subsidy areas in the fields of agriculture, industry, merchant marine, power, transportation, small business, etc.

Think of the increases I have mentioned in terms of percentage, and compare them with an increase of about 45 percent in our population over the period, an increase of about 245 percent in our industrial production, and an increase of about 432 percent in our national income.

When you analyze Federal programs in search of expenditures with subsidy aspects, the results are astonishing. It is disheartening to realize what this means in terms of centralization of government and trends toward socialism.

Thinking of Switzerland's fine example of sound democracy at work, at this 37th picnic I want to emphasize my belief that our great democracy can and should live throughout the ages.

I have confidence in our future if the citizens of the Nation will oppose those things which are destructive of the principles underlying our form of government, our free enterprise system, our individual liberties, and our national solvency.

Tribute to Gustave Fast

EXTENSION OF REMARKS

OF

HON. EDWARD A. GARMATZ

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. GARMATZ. Mr. Speaker, as the Representative of a district largely industrial in nature, I deem it highly appropriate to call to the attention of my colleagues that 1960 is the 75th anniversary of the birth year of an inventive genius whose work in the advancement of applied science was one of the most important factors in the development of industry in America, and indeed, the world, as we know it today.

I refer to the late Gustave Fast, a native of Sweden, whose adult life for the most part was spent in the city of Baltimore and in the State of Maryland. Mr. Fast came to America just 50 years ago after thorough training as an engineer. His father before him was a noted engineer and was decorated by the Swedish Government with the Distinguished Service Medal for his engineering work.

It was while living in Baltimore in 1918 that Mr. Fast designed a power-transmission coupling that was to make him world famous and which made it possible for industry—then in the throes of changing from steam to electric power and from belt to direct driven machinery—to make the transition and go on to undreamed of heights of productivity.

Until Fast invented his coupling, industry had been plagued with breakdowns in the vital link between electrical motors and the machinery they were designed to drive. No device then known could long hold up under the stresses and strains of the inevitable misalignment between the driving and driven members. The devices of the time were made of flexible materials and fell victim to metal fatigue.

The late Ernest Von Hartz, writing in the Baltimore Sun, described the situation in this fashion:

With the birth of the machine age, industry found itself confronted with the problem of misalignment between the directly connected shafts of driven and driving machinery.

The problem was not so serious in the early days with relatively slow speed machinery, but with present-day high-speed machinery this condition became acute. It was found, for instance, to be a physical impossibility to connect two shafts in perfect alignment. The misalignment caused wear on the bearings of the two shafts and other mechanical deficiencies in the machines.

To compensate for errors of alignment, flexible couplings were employed. But the solution itself was subject to limitations. Flexible materials when subjected to constant bending and twisting suffer from fatigue and failure.

Failure, of course, meant shutting down the machinery and replacing the coupling.

Gustave Fast already had made a name for himself with the invention of reducing gears and power drives used on Navy patrol boats in World War I when he concentrated on the design of a power coupling that would be flexible, yet be made of nonflexible materials that would last indefinitely.

As Mr. Von Hartz wrote:

The coupling invented by Mr. Fast solved this problem in that it does not depend for its flexibility on flexible materials. It is all metal and is based on a simple mathematical principle taking the physical form of completely meshing two spur gears with internal gears of an oil-encasing floating sleeve. Thus the entire power is transmitted through an oil film, which effectively separates the metal surfaces. This is the important discovery by Fast, for it has reduced to a practical minimum the wear on couplings.

Just how well Fast succeeded is history. Nearly 1 million Fast's couplings have been manufactured by the Bartlett Hayward Plant of Koppers Co., Inc., in Baltimore, and placed in use throughout the world, notably in the steel industry. At any given moment of a working day the Fast's couplings in use transmit more than a billion horsepower and from the very first ones manufactured they have outlasted the machinery they connect.

Mr. Fast died nearly 15 years ago but his couplings installed 30 and 35 years ago are still functioning perfectly in their original installations.

Most noteworthy of all, however, is the fact that Fast's couplings manufactured today are basically the same coupling this great Swedish-American engineer designed more than 40 years ago. What a tribute to his genius it is that in all these years no one has been able to improve his invention.

Mr. Speaker, it is my sincere belief that American industry and the world owe much to Gustave Fast. He was honored in 1928 as the recipient of the John Price Wetherill Medal from the Franklin Institute of the State of Pennsylvania in recognition of his mechanical genius, but this adopted son of Maryland should not be forgotten.

The Ukrainian Congress Committee

EXTENSION OF REMARKS

OF

HON. EUGENE J. KEOGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. KEOGH. Mr. Speaker, 20 years ago this autumn an organization was formed to represent the views of more

than 2 million fine Americans of Ukrainian ancestry. It is a privilege for me today as it reaches that milestone in its history to salute that organization, the Ukrainian Congress Committee of America, and its noted chairman, Prof. Lev E. Dobriansky, of Georgetown University and its Institute of Ethnic Studies, who has been the leader of the congress committee during more than half its lifetime.

The Ukrainian Congress Committee, under the direction of such leaders as Dr. Dobriansky, is dedicated to the security interest of the United States which it serves principally through information concerning the struggle for freedom of the captive nations behind the Iron Curtain and through concrete proposals in the propaganda aspects of the cold war. Through information provided by the congress committee we have been able to pierce the myth of Soviet unity which Communist Russia has foisted upon the free world. Dr. Dobriansky has pointed out that the non-Russian nations within the Soviet borders are peoples with enduring histories and that the Ukraine with its 42 million people is the largest of the non-Russian nations within the Soviet Union—which cannot by any stretch of the imagination be called a nation itself.

Mr. Speaker, it is my hope that the Ukrainian Congress Committee will continue to flourish so that it can proceed with its mission of informing all the American people about the conditions within the Soviet Union. I heartily congratulate it on its 20th aniversary and I commend it for the great work it has done during those years.

Greetings to the Ukrainian Congress Committee on Its 20th Anniversary

EXTENSION OF REMARKS

OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. VAN ZANDT. Mr. Speaker I am pleased on this occasion to salute the Ukrainian Congress Committee of America on its 20th anniversary.

The land and other natural resources of the Ukraine—the tremendously fertile land with acres upon acres of wheat, the rich coal and iron deposits of the Donets River Basin, the power of the Dnieper River which when harnessed helped now to power Soviet industry—all are used to serve the purposes of the Soviet Union. But there remains one invaluable resource of the Ukraine that cannot be harvested, nor extracted, nor harnessed by the brutal conqueror, and that is the people of the Ukraine, a people schooled in adversity, a people rich in national culture, a people of heroic epics. And the Soviet Union now finds, as have all the previous tyrants who have held sway over the Ukrainian people, that nothing can quench the indomitable spirit of independence of the Ukraine.

We can learn much from the history of the Ukrainian people. Their sacrifices perform a valuable service to us. The tribulations they have endured at the hands of Russian imperialism, the horrible massacre at Vinnitsa where the executioners of the hated N.K.V.D. killed 12,000 Ukrainians in cold blood, the violated pledges of the Soviet Union, and the continuing tyranny of Soviet rule over the captive nations—these help us better to see the truth and help us to rid ourselves of delusions about our common enemy.

The Ukrainian Congress Committee of America continually brings these truths to light. It helps keep hope in the hearts of those on both sides of the Iron Curtain that one day Ukrainian freedom, as well as the freedom of all captive nations, will no longer be a phrase and a hope proclaimed by such as I on an anniversary or on some other occasion of sorrowful reminiscence but instead, a living reality.

Address Delivered by Senator Harry F. Byrd, of Virginia, on the Acceptance by Him of a Distinguished Service Award

EXTENSION OF REMARKS

OF

HON. STROM THURMOND

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Tuesday, August 30, 1960

Mr. THURMOND. Mr. President, on August 29, 1960, the Senator from Virginia [Mr. BYRD] delivered a magnificent address before the Section on Insurance, Negligence and Compensation Law of the American Bar Association. The address is worthy of the attention not only of the lawyers of the country but also of the people of the United States as a whole.

Senator BYRD is one of the greatest citizens in our Nation today, and I feel that any statement by him is worthy of note by the people of this country.

I ask unanimous consent that the address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR HARRY F. BYRD, DEMOCRAT OF VIRGINIA, ACCEPTING DISTINGUISHED SERVICE AWARD, BEFORE THE AMERICAN BAR ASSOCIATION SECTION OF INSURANCE, NEGLIGENCE, AND COMPENSATION LAW, SHOREHAM HOTEL, WASHINGTON, D.C., AUGUST 29, 1960

I am honored by this award from the American Bar Association Section of Insurance, Negligence, and Compensation Law. I am not a lawyer, but my father was; and from him I first learned the sources of sovereign power, the principles of our system, and the reasons to respect the law.

I want you to know that, coming from you and coming in these times, this occasion is doubly rewarding. You are an organization of many of the Nation's finest and most responsible citizens. And these are times when friendly public reference to a conservative is rare indeed.

I am a conservative; I have been called unreconstructed. I wear the label with pride if it marks me as one who fights for the fundamentals on which we have developed the finest system of government ever known. I fight for these fundamentals because I believe in them.

I believe sound progress should be the primary purpose in every man's life. Sound progress is the source of strength. But progress is not sound unless it is based on sound financing; this is another application of checks and balances which have been so useful in our Government.

I believe that in the United States we are blessed with all the elements for sound individual progress and, therefore, for national progress. We have the people, resources, climate, and geography; and our system of government was designed for freedom, including freedom to work with incentive.

I believe the character of our governmental system stimulates enterprise and strength. It is a system characterized by local autonomy, State sovereignty, and a central government in three separate, coordinate branches—each limited in power and authority by the Constitution.

I believe that under our system we are the greatest and most productive Nation in history. The principles on which we have thrived must be preserved, and they must be defended wherever they are attacked. They guarantee our freedoms, nourish our free enterprise, and make sound progress possible.

I believe it is the sound productivity and strength developed under this system that have brought us to world power in relatively four generations. Historically, lives of nations are measured in hundreds of years. I want the life of this Nation to be the longest and the best.

I believe continuing centralization of government will destroy our freedoms and our strength. We have already gone too far. Excessive centralization inevitably leads to excessive central edict and regulation, and to excessive Federal competition and taxation. In short, it produces the evils of State socialism.

I believe our people want our system perpetuated and strengthened. Basically, the requirements are: simple honesty and individual initiative; self-reliance and willing work; constructive production and free competition; and progressive development and sound financing.

I believe that with responsible citizenship, good government and fiscal soundness there would be no fear for the future. But without these, there will be neither solid progress nor security with military preparedness. I think we face these alternatives today.

We are in a new era of atomic energy, rockets and space. Our population is increasing. Our resources are great. Our productive know-how and capacity are unsurpassed. In such conditions representative democracy with free enterprise should thrive soundly for the good of all mankind.

But I have a feeling of anxiety, and I suspect most of you know it too. Our Government is being challenged from abroad and undermined at home. This Nation is showing signs of weakness when it should be strongest. The reasons run back over 30 years and they can be documented.

Our strength is being sapped by the paternalism of Federal bureaucracy grown too big, usurpation of power by the Warren court grown too mighty, and force of labor leaders grown too arrogant. These are undermining our system, changing our attitudes, and hobbling our will for freedom.

We have deficits and threats of continuing deficits; we have debt, and inflation; we have foreign trade balance trouble and dwindling gold reserves; there are Communist gains in their race against the free world in the scientific, military, foreign relations, and economic fields. These are serious weaknesses which must be reversed.

I have been a Member of the U.S. Senate since 1933. I have seen the reasons for most of these weaknesses develop. I have tried to prevent them. I wish I could have done more. I am still trying.

It may be of interest to you to look briefly at the 30-year record since 1930 for signs and areas of weakness; and it should be noted that in this period our population has increased about 45 percent; industrial production has increased 240 percent; and national income has increased 432 percent.

But, in the same period the number of Federal agencies has increased 100 percent; Federal employees have increased 300 percent; Federal debt has increased 1,700 percent; Federal tax collections have increased 1,800 percent; and Federal expenditures have increased 2,300 percent.

Thirty years ago Federal programs for grants to States and localities could be counted on the fingers of one hand, including those for highways and land grant colleges. Federal expenditures through these programs at that time totaled about $100 million.

Now there are 60 listed Federal programs for grants to States and localities, and Federal expenditures through them are totaling $6.4 billion. And while Federal grants to States and localities have been increasing 6,300 percent, State and local debt has been increased $40 billion, or nearly 300 percent.

Through programs of grants to States and localities—and payments to individuals—Federal subsidies are now flowing to business, industry, private finance, agriculture, transportation, power, housing, health, education, States, localities, and individuals.

Nearly 40 million people will receive payments from the Federal Treasury this year totaling some $40 billion, including social security. With their families these 40 million people could easily reach a number equivalent to half of our population.

While these conditions have been developing over the past three decades, private debt in the United States has been increased nearly 250 percent; inflation has reduced the purchasing power of the dollar more than 53 cents; the value of the dollar is now 46.9 cents by the 1939 index.

It is a mistake to blame all this fiscal deterioration and socialistic growth on war. The combined duration of World War II and the Korean war was 8 years. In the other 22 years without war there were 16 Federal deficits, and the increase in the Federal debt averaged more than $2 billion a year.

The total annual cost of the Federal Government has gone up nearly $16 billion since the Korean war. This is an increase of nearly 25 percent. It may surprise you to know that the great increases in this period were not for military and foreign aid. They were in domestic-civilian programs.

Federal expenditures for these domestic-civilian programs have increased 86 percent in 7 years; they are now totaling $36 billion. These programs too frequently involve multi-year or permanent commitments for heavy spending in the future, and increases in these programs are continuing.

These are some of the signs of weakness, socialism and centralization to be found all around us—but not all. The Federal Supreme Court has undermined our system of government at all levels. This can be traced back to the Roosevelt administration when the President started packing the Court.

Judicial usurpation of power has reached a peak with the Warren court. Its decisions have invaded homes, handicapped police protection, disregarded State sovereignty, interfered with the authority of the executive branch of the Federal Government and usurped the powers of Congress.

You are familiar with the case documentation. For my purposes today, I rely on the chief justices of State supreme courts throughout the Nation. In their 1958 conference at Pasadena, they found reason to urge the Warren court to restrain itself in the exercise of vast power.

The action was taken in the 38 to 6 adoption of a report by 10 eminent jurists. The report was based on intensive study of recent decisions indicating general trends in the area of Federal-State relationships. I shall quote only two brief excerpts. The report said:

"Second only to the increasing dominance of the National Government has been the development of the immense power of the Supreme Court in both State and national affairs. It is not merely the final arbiter of the law; it is the maker of policy in many social and economic fields."

And then the report said further: "It has long been the American boast that we have a Government of laws and not of men. We believe that any study of recent decisions of the Supreme Court will raise at least considerable doubt as the validity of that boast."

It seems to me that there can be no doubt that the Warren court is undermining our system of government, contributing to centralization of power and authority; and thereby it is sapping our national strength. This makes us more vulnerable to destructive forces at home and abroad.

From experience we have learned that the more government is centralized, the more easily it is influenced—if not yet controlled—by leaders of organized pressure groups. Certainly the political target areas and the ruling officials of the government are more concentrated.

We have learned that the more government is centralized in Federal bureaucracy at Washington, the more it is susceptible to the arrogant influence of labor leaders. Call the roll, Reuther, Hoffa, McDonald, and so on. Make no mistake; these are ruthless men.

Even now there is talk of the Federal Government outlawing State right-to-work statutes. In this connection, think of this fact. In the past 30 years strikes in this country have prevented nearly 3 million man-years of work; that is a loss of nearly 3 million man-years of pay, and nearly 3 million man-years of production.

I have always conceded to good citizens in the rank and file of labor unions the privilege of organizing. I have conceded to legitimate labor unions the privilege of collective bargaining when they represent their members. But, I also concede to men and women the right to work if they choose.

You have seen the parade of some of the labor leaders before the McClellan committee. You have seen them make a mockery of the fifth amendment. Wherever and whenever I could, I have fought against giving such labor leaders power and placing them in position of Federal influence.

Power breeds power, and labor leaders are insatiable in their demands for special privileges and immunities. Federal nullification of all State right-to-work laws is high on their present list of demands.

They want the Federal Government to force membership in a union as a condition of employment. Nearly 50 million, or more than 70 percent of those employed in the United States are not now members of the big national and international unions.

Generally speaking, State right-to-work laws provide that the right of individuals to work shall not be denied on account of either membership or nonmembership in labor organizations.

The Taft-Hartley Act recognizes States rights in this field. Labor leaders want this provision repealed. Without it we could expect the Warren court to strike down every State right-to-work law in the country.

Twenty States to date have enacted right-to-work laws, eight of them with constitutional amendments adopted by referendums. If they are not desired, the people in the States who approved their enactment could bring about their repeal.

But the labor leader pressure is at the Federal level. They want Federal action for wholesale nullification of the States rights these laws represent, and the individual liberty they protect.

I regard the right to work as I do the right to life, liberty, and the pursuit of happiness. States have the right, the responsibility, and the duty to protect this fundamental freedom. This is my position and I shall fight for it.

I am the only Member now in the Senate who voted against the Wagner Labor Act of 1939, giving special privileges to labor unions and therefore to their leaders. I voted for the Taft-Hartley Act and against the Truman veto. I supported strong labor legislation last year, and I will do it again.

When irresponsible labor leaders have the power virtually to shut down the country, our national security is imperiled. When they have the power to stop production and wages, our economy is impaired. When they have the power to force wage increases without increased production, they create inflation.

You have been good enough to mention my 40 years in public service. I thank you again. I shall try to merit your confidence in the future. In conclusion, let me say that I think our system of government is being menaced by three subverting trends which must be stopped.

These trends are: (1) Increasing Federal paternalism with fiscal deterioration; (2) increasing usurpation of power by the Warren court; and (3) increasing arrogance of labor leaders in their influence over Federal authorities. Reverse these, and I have no doubt about our strength to meet any foreign challenge.

I pledge my unrelenting effort in this direction. But these changes will not come in an attitude of tolerance. There will be no status quo. There will be change.

It is up to all who believe in our system to fight for progress without destroying the fundamental principles of our Government which in a short space of time have made us the greatest Nation in all the world.

Twentieth Anniversiary of the Ukrainian Congress Committee

EXTENSION OF REMARKS

OF

HON. MARTHA W. GRIFFITHS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mrs. GRIFFITHS. Mr. Speaker, this fall 2½ million Americans of Ukrainian descent will be celebrating the 20th anniversary of the founding of the Ukrainian Congress Committee of America. I am honored and pleased to extend my wholehearted and sincere congratulations to this nationwide organization with its dedicated principles and ideals.

In the early twenties the political as well as cultural and economic independence of the Ukraine was subject to Red Russian imperialism. As one of the captive nations which was forced into the spurious federation called the Union of Soviet Socialist Republics, the Ukraine's large population of non-Russian people was submerged under the despotic and dictatorial rule of the Bolsheviks. Her

land, rich with coal and manganese, became important captive resources under the Red flag.

By means of a psychopolitical and propagandistic machine during the cold war the Communist leaders have manufactured a myth of unity which they say encompasses their country. Only the reality of truth, with which the Ukrainian Congress Committee attempts to imbue the hearts and minds of these captive people, will smash this legend.

For 20 years the Ukrainian Congress has sought in a purely educational manner to lead their organization in the task of serving these Ukrainian people who do not wish to be a part of the U.S.S.R. It is to this strong and faithful group which reflects the thoughts and sentiments of its followers that I express my appreciation for its heroic objectives toward independence, freedom and justice for the 42 million people that embody the Ukraine as well as for its efforts toward the liberation of all the non-Russian nations of the U.S.S.R.

Congressman Robison's Answers to Questions Concerning Our Chief International and Domestic Problems

EXTENSION OF REMARKS
OF

HON. HOWARD W. ROBISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. ROBISON. Mr. Speaker, recently, the Binghamton Sun-Bulletin asked me to respond to three questions dealing with our major international and domestic problems and the proper role of the Federal Government in meeting them.

I was pleased to have the opportunity to set forth my views on these questions; and, under unanimous consent, I include the questions and my answers to them at this point in my remarks:

Question No. 1. What should the United States do to promote world peace and to cope with the Soviet Union?

Answer. The goal of world peace is not a partisan one. It is an ambition common to Republican and Democratic Parties alike, and to their respective presidential and vice presidential candidates. Both parties must share in the blame for mistakes of the past, and neither party nor set of candidates has a monopoly on the successful formula we must now adopt in order to cope with the challenges of the Communist conspiracy and promote world peace, meanwhile safeguarding our own independence and preserving our individual freedoms.

The road ahead, regardless of which pathway the electorate decides to take November 8, will be a rough and rocky one. During the forthcoming campaign much will be said about our need for strong and wise leaders to guide us down that road. We will have urgent need of such leadership, but—while I have my own firm belief as to which set of candidates, by virtue of maturity, experience, and demonstrated abilities, is the better qualified—leadership alone is not enough.

I say this because I believe that in a society such as ours, under a government such as we have developed, the key to our survival lies with the individual citizen. Indeed, the individual is the core of our political, religious, and economic thought; and much of the reason for the success of our way of life, historically speaking, has been that America up to now has been blessed with an abundance of rugged individuals.

It has taken the average American citizen of today a long time, too dangerously long in fact, to become aware of the full nature of the Communist challenge. I believe that such an awareness has now, however, broken through what has recently seemed to be a shell of national apathy. We may not like what we see, but at last we are seeing it. We have begun to realize that the time has come, to say it in slang, "to put up or shut up"—to reject the false goal of mere survival, born in an almost unreasoning fear of the horrors of nuclear warfare, in favor of firmly resolving to win the cold war on all its various battlefronts.

It is difficult, in the space permitted me, to be very specific as to what this means we must do. However, I am sure we can all agree that it means we must remain physically strong. We must have a force at arms sufficient to deter our potential enemies—who have the advantage of striking the first blow—from launching an all-out nuclear war against us and, at the same time, sufficient to win such brush-fire wars as they are bound to set, probing for our weaknesses, and seeking to test our resolution. I believe we have such a force at the present time, but it will require constant vigilance to maintain. On this effort we dare not put a price tag of dollars and cents. Nevertheless, facing an enemy that also plots our economic ruin, there is the price tag of self-discipline in deciding how much should be spent and on what.

Next, we must steadfastly stand by our friends, and use every political, economic, and psychological tactic to see that the liberating spirit in the captive people of the nations conquered by communism does not perish. In the long run these people may be our best secret weapon. We must also, regardless of the unpopularity of the sacrifice it entails, continue our programs of military and economic aid to the underdeveloped nations of the world who have helped us hold the line against the spreading Communist stain. In doing so, however, we must abandon once and for all any thought that we can buy friendship, and be as realistic and hardheaded as is our enemy in his counter-effort in these fields.

We have done well to contain communism so far, but we must recognize that a holding policy, under which we are the inert, defensive target for political, economic, and psychological warfare is not enough. To recapture the initiative, as we need to do, we must believe more strongly in ourselves and in our system and sell it throughout the world with the same contagious enthusiasm with which the Communists sell their false philosophy, at the same time making it unmistakably clear that we are intent on preserving our own freedoms.

Here at home, we must also seek to grow spiritually and materially. With all the more obvious moral defects in our society today that others have noted, there may be promise of spiritual growth in the fact that Americans will voluntarily spend an estimated billion dollars this year for new churches. Only countless similar individual decisions can end America's seeming moral decline. Promoting economic growth is an equally complex matter, but here again I do not believe it can be forced by governmental edict nor planned by all wise bureaucrats. Growth will come, as it always has, under a government that holds fast to our historic foundations and provides a climate in which individual enterprises can flourish. The roots of such growth are deep and lasting, unlike those that might ensue from the adoption of economic techniques alien to our system. To those who decry our preoccupation with private comfort, let me remind them that there are dangers in the opposite extreme for it was Hermann Goering who scorned private comfort in the name of national greatness and demanded the production of guns instead of butter. In short, then, we can win this economic horserace with Russia, but not if we try to ride their horse.

Now, to do all of these things is a very large order. It will require the best leadership we can find, and the best that is in each of us. Such leadership must, first of all, believe not in the magic of centralized big government, but in the initiative, vitality, energy, and resourcefulness of our people. Unless the leadership we choose is of that type, it cannot help us cope with Soviet Russia nor help us find the way to world peace.

Question No. 2. What are the major problems on the domestic scene, within the United States, and what should the Federal Government do about them during the next several years

Answer. The list of major domestic problems facing the American citizen is as long as the issues involved are complex. Overshadowing our future decisions as to the Federal Government's proper role in seeking solutions to those problems is our growing awareness that our free society is engaged in a death struggle with communism. Senator KENNEDY, himself, has asked whether a nation organized and governed such as ours can endure in competition with the single-minded advance of the Communist system.

I wholeheartedly believe that it can. America has the brains, the wealth, and the weapons to develop a new strategy for victory. Chief among those weapons is the dynamic force of individual freedom. Using freedom as a tool—prying loose the creative energies of free men and women—America achieved her independence, conquered her wilderness, rounded out her early, natural frontiers, preserved the Union, and successfully completed the transition of her society from an agricultural one to an industrial colossus that is the envy of the world.

Now we seek to prove once again, to ourselves and a watching world, that the forces of free capitalism can continue to build and rebuild a better way of life for its citizens without departing from its historic foundations. That task will be the more difficult because we have, for a generation, been steadily dulling the cutting edge of that tool of freedom. The seeming necessity for doing so was born in a great depression that rocked our faith in ourselves, and was carried forward under the continuing pressures or threat of armed conflict. Under such motivations, we have seen the cash expenditures of the Federal Government, during the same period, rise from a yearly average of $4 billion to the present $80 billion, and our national debt, including future commitments, skyrocket to an unprecedented three-quarters of a trillion dollars.

The congressional justification for such expenditures and the piling of debt upon debt has been that, in the supercharged atmosphere in which we live, only a strong, omipotent, though benevolent, central government can successfully direct the economic affairs of its citizens and care for them in sickness and in health. The proponents of this philosophy, both yesterday and today, have been impatient with the slow processes of individual, community, and State initiative. Where they have thought such traditional areas of concern to be delinquent in action, they have moved in, often oblivious of constitutional limitations and of the ultimate cost of hazardous new areas of Federal interest.

A prime example of how badly this can sometimes work can be found in the so-

called farm problem, an industry now so enmeshed in government planning and control, and dependent upon politically motivated votes, that it seems forever doomed to permanent domination by government. I have sponsored and urged legislation to end this continuing insanity once and for all and to restore agriculture to the free marketplace, with Federal aid restricted to rural redevelopment and protection against radical marketing changes.

Acceptance by Congress of the false notion that Washington can give us something for nothing has also seen our share of world trade diminish as inflation has priced our products out of world markets, our gold reserves drop to a 20-year low, and certain American manufacturers move their plants—lock, stock, and barrel—to foreign lands. Only a continuing firm hand on Federal spending, making us live within our means, can halt the dangerous trends of which these examples serve as handwriting on the wall.

Economic growth is a proper national goal; I think we can and must do better here. Again, Congress has a part to play if it would only recognize the urgent need to ease restrictive taxation that has dulled business and individual initiative, liberalize unrealistic depreciation rates that have eroded needed industrial capital, and equalize the powers of big business and big labor so that they will not be pulling and hauling but pulling together in the national interest. While, like any other piece of machinery, our economy should not be forced to run at artificially high speeds, all parts thereof should function productively. Thus, there are pockets of chronic economic distress throughout our Nation which wise Federal action could help eradicate. I have sponsored or supported legislation, during my 3 congressional years, in all these fields.

Our remaining domestic problems lie mostly in the realm not of providing but of helping our people to provide themselves with the housing, the schools, the health care, and so on, that they need and want. It is vital, I believe, for the Federal Government to approach such needs only in such fashion for, if we remove from the people the responsibility for action we may find that we have, unwittingly, also robbed them of the vigor and faith in themselves that they must have to sustain them in what portends to be a long drawn-out struggle with communism.

The challenges we face, at home and abroad, are monumental in scope. They are unprecedented in our history. They call the American people—as did Abraham Lincoln in a time of peril a century ago—to "think anew and act anew." Yet, with the boundless evidence of the success of our system all about us, it would be utter folly, I think, to so yield either to pressures from abroad or to pressures engendered by our own domestic selfishness as to abandon our institutions and our heritage in a search for the illusory goal of what some are calling national greatness.

The ingredients for true national greatness cannot be found down some blind alley known only to the proponents of big government. They lie locked instead in millions of American hearts. All that is required for total victory is our own realization of that fact, and in the long run the stimulation of such an understanding may be our greatest domestic problem.

Question No. 3. What are the principal problems of this congressional district, with particular reference to problems about which the Federal Government might or should do something, and what should the Federal Government do?

Answer. The principal problems that face the residents of the 37th Congressional District are, in essence, the same as those faced by the other 180 million Americans. All of us—like all of them—are primarily concerned with achieving a better life for ourselves and for our children in a world of peace.

During my 3 years of congressional service I have often been asked by people unfamiliar with our district what sort of a district it is. By this they mean, do we have a predominately agricultural community, an industrial one, a rural or an urban community, or what? It has been my observation, and thus my reply to such questions, that one would have to search far and wide to find another congressional district more typical of America, a better cross-section or composite picture of America and her people in this era, than the 37th district of New York.

Of course, we are more fortunate than some of our southern neighbors in that, to us, racial intolerance is more of a personal than a community problem. We are also more fortunate, even with our spotty areas of economic distress, than the people of the coal fields of Pennsylvania or the textile towns of New England who have not had the diversification of industry and the blend of agriculture and business that have blessed us with an unusually stable economy.

Nevertheless, those of our people who have retired on fixed incomes and our housewives and their breadwinning husbands have become fully aware of the fact that during the last 5 years of the Roosevelt administration their take-home dollars lost 25 cents in purchasing power, and another 28 cents during the Truman years. By way of contrast, I believe they are also aware of the fact that, under President Eisenhower, the bite of inflation—the most insidious and cruel form of taxation ever devised—has been held to only 5 cents. This then is an area where, if it holds to the basic principles of fiscal responsibility, the Federal Government has a vital role to play in helping our individual citizens achieve their goal of economic security. My voting record on this issue speaks for itself.

Similarly, a fiscally responsible government will help our farmers and our small business men and women—the keystone of our national economy—to survive and prosper, and our industries, such as Endicott-Johnson, Remington Rand, and Corning Glass, to meet the growing problems posed by the import of shoes, typewriters, and glassware produced in countries where labor standards are far below our own. I also believe that, regardless of the importance of reciprocal world trade, our Federal Government must reappraise our trade policies without delay and formulate realistic safeguards to protect the jobs of those who work for local industries such as I have named. I have introduced legislation calling for such action in this Congress; if reelected, I will work for its early consideration.

Speaking of local industries, one of the most important—Ansco and its affiliate, Ozalid—has had to compete in this most competitive of worlds under the damper of Federal ownership and control. The history of this matter is as long as the issues involved are complex. But, under my sponsorship, legislation to restore Ansco and Ozalid to the American free enterprise system came closer to congressional approval this year than ever before in 8 years of trying. If reelected, I am pledged to an all-out effort to conclude that fight, the success of which could be of untold benefit to the future economy of our community.

Our people—like all Americans—want and need protection from other things than inflation and cheap imports. For years now, residents of our cities and towns along the Susquehanna have lived under the threat of disastrous floods because the comprehensive Federal plan for their flood protection has been stalled by opposing engineering viewpoints and local opposition. I successfully sponsored one of the largest authorizations ever voted by Congress for a new survey aimed at resolving these differences. Now, funds must be provided to start this work and get our flood-protection effort off dead center; if reelected, I pledge to work to that end.

Finally, of course, our people, like all Americans, have need of such things as new homes, more and better schools, highways, and hospitals. Our cities have slum areas that need rebuilding and they need help, as do our smaller communities, in providing their citizens with an adequate supply of pure water and with modern sanitary facilities. We have a few communities, such as Hornell and, perhaps, Elmira, that have suffered long-term economic distress and need to attract new industries. We also have some people trying to farm land on which they cannot subsist, and who need to be trained for other work.

In meeting all these and comparable needs, our Federal Government has a role, and a very important local role, to play. Space does not permit of specifics, but it is my belief that that role is not to plan and do for people, taking responsibilities from them, but to leave with the people the traditional American responsibility for helping themselves and their neighbors, while at the same time encouraging and stimulating their own creative abilities.

There are clear material limits to what the Federal Government can do. There are less clear philosophical and constitutional limits to what the Federal Government should not do. This means we must seek to establish a table of priorities for our local needs. The pressures of the impatient, combined with the intensifying pressures of the cold war, will make living with those priorities a difficult task. Nevertheless, upon how well we succeed may depend the survival of the American way of life, which has only begun to achieve its promise of abundance, and the blessing of individual freedom without which that way of life has no meaning.

U.S. Senator Spessard Holland, Florida, Wins Great Victory

EXTENSION OF REMARKS

OF

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. FASCELL. Mr. Speaker, the city of Long Beach, Calif., recently held a civic testimonial in honor of Florida's Senator, SPESSARD HOLLAND. Does it strike you as unusual that the people of California honor the distinguished U.S. Senator from Florida?

Not at all, they have good cause, as do the people of Florida and all America.

Mr. Speaker, I could not have this Congress close without again calling to the attention of my colleagues a significant and important contribution by Florida's distinguished and able senior Senator, the Honorable SPESSARD HOLLAND. His participation and leadership in a momentous task has culminated in the recent ruling of the Supreme Court of the United States applying the Submerged Lands Act to the State of Florida. This ruling confirms Florida's claim to all property rights to a distance of 3 marine leagues in the Gulf of Mexico, off the mainland of Florida.

Not only has Senator HOLLAND had to carry on his many duties in the U.S. Senate, but since 1951, he has had a primary responsibility in the tidelands dispute, which affects many of our States. His most recent effort was joining in the argument before the U.S. Supreme Court. The case was so brilliantly and convincingly presented that it resulted in a 6-to-1 decision. In this matter, Senator HOLLAND has gone far beyond his duty as a U.S. Senator. He has fought for and supported, in and out of the Senate, a cause born of deep conviction—the cause of States rights. In these days of claims of centralized government, it is especially noteworthy that in a case of this magnitude, the U.S. Supreme Court has recognized the proprietory authority of the State of Florida over these marine lands. The Court's decision not only settled oil and gas rights, but the citizens' rights in construction, extension of lands, conservation, use of sand and gravel, and other still unknown and potential rights in the use of the sea.

The affirmation of these rights are important in themselves. There is, however, greater pride for all of us in recognizing and realizing that this long, persistent effort on the part of Florida's great Senator took courage, determination, ability, and qualities of leadership which can only be claimed by few Americans. U.S. Senator SPESSARD HOLLAND, senior Senator from Florida, has carved a rightful place in American history with this most recent success in a long and distinguished public career.

After this session, Senator HOLLAND will return to Florida for this year's presidential campaign. Nothing less than a hero's welcome should be awaiting him.

Minshall Again Brings Traveling Office to District

EXTENSION OF REMARKS
OF
HON. WILLIAM E. MINSHALL
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 30, 1960

Mr. MINSHALL. Mr. Speaker, for the past 6 years, it has been my privilege and honor to represent the people of the 23d Congressional District of Ohio in the Congress of the United States. As a Representative of this outstanding district, I have considered it my duty not only to be well informed of the opinions of the people through personal contact and use of opinion polls, but also to be of the greatest possible service to persons having problems dealing with Federal agencies and departments. To help accomplish this, I maintain on a year-round basis a congressional office in room 525 of the Federal Building in downtown Cleveland where I can meet with people personally during trips back to the district when my official duties permit. While I am in Washington, a competent staff is in charge of the Cleveland office.

A further service to the people of the 23d District is my Washington Report which, in newsletter form, periodically presents a concise accounting of events and opinions on Capitol Hill.

During my service in the Congress, I have considered it of primary importance to be present at the Capitol whenever Congress is in session in order to participate in committee work and to vote on important legislation. This year with Congress in nearly continuous session, I have not been able with intervening committee work to return to Cleveland as much as I should have liked. Therefore, in accordance with the practice I initiated 6 years ago, I am bringing a traveling office to the various communities in the 23d District. This method of meeting with the public has been tremendously popular and it gives me a wonderful opportunity to discuss and learn at firsthand the opinions and individual needs of the people.

With the understanding that Congress will not be in session during the early part of October, I will again this year from October 3 through October 7 follow the same procedure and have a series of conference meetings so that every resident of this suburban district can conveniently meet with me. These are not group meetings but office conferences for the individual which will enable them to discuss their views and problems personally. No appointments are necessary and I urge individuals to meet with me on the date and at the place most convenient. Every resident of the 23d District is cordially invited to talk over problems of national concern, to discuss personal problems they might have with the Federal Government, or just to chat and get better acquainted. The knowledge thus obtained will better enable me to represent the residents of the 23d District in the Congress of the United States.

I am most appreciative of the fine cooperation of the many officials who have made these meeting places available as an aid in rendering this public service.

Following is the schedule for these office conferences:

Lakewood: Lakewood City Hall, 12650 Detroit Avenue, Monday, October 3, 2 to 4:30.

Westlake, Bay Village: Westlake City Hall, 27216 Hilliard Boulevard, Monday, October 3, 6:30 to 9.

Parma Heights, Brook Park, Middleburg Heights, Linndale, Cuyahoga Heights, Brooklyn Heights: Parma Heights Townhall, 6281 Pearl Road, Tuesday, October 4, 2 to 4:30.

North Royalton, Strongsville, Broadview Heights, Seven Hills, Brecksville, Independence: North Royalton Townhall, 13834 Ridge Road, Tuesday, October 4, 6:30 to 9.

Berea, Olmsted Township, Olmsted Falls, North Olmsted, West View, Riveredge Township: Berea City Hall, 47 East Bridge Street, Wednesday, October 5, 2 to 4:30.

Rocky River, Fairview Park, Parkview: Rocky River City Hall, 21012 Hilliard Boulevard, Wednesday, October 5, 6:30 to 9.

Shaker Heights, University Heights, Pepper Pike, Hunting Valley, Beachwood: Shaker Heights City Hall, 3400 Lee Road, Thursday, October 6, 2 to 4:30.

Maple Heights, Bedford, Bedford Heights, Walton Hills, Valley View: Maple Heights City Hall, 5353 Lee Road, Thursday, October 6, 6:30 to 9.

Solon, Glenwillow, Oakwood, Bentleyville, Chagrin Falls: Solon Village Hall, 6315 SOM Center Road, Friday, October 7, 2 to 4:30.

The Status of Public and Private Debts, 1952 to 1959

EXTENSION OF REMARKS
OF
HON. JOHN W. McCORMACK
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 30, 1960

Mr. McCORMACK. Mr. Speaker, sometime ago I requested the Library of Congress to prepare for me a statement showing the status of public and private debts by years 1952–59.

I wanted to know the status for the Federal Government, the State governments, and the local governments—county, city, township, school district, special district, and also private debts by corporations, individuals, farm, and nonfarm.

I have recently received a statement from the Library of Congress which, under leave to extend my remarks, I am placing in the RECORD. This statement—all figures in millions—shows that the Federal debt has increased from $259,105 in 1952 to $284,706 in 1959 or about 10 percent. Actually, the public debt as of the present time is about $289,000.

The State governments' debt has increased from $6,874 to $17,102 or about 149 percent.

The local governments' indebtedness rose from $23,226 to $45,235 or about 95 percent.

The total public debt, therefore, has increased from $289,205 to $347,043 or about 20 percent.

In the meantime the total private debt has increased from $337,100 to $601,700 or about 78 percent and is broken down as follows:

Corporation, $201,600 to $335,800 or about 67 percent.

Farm, $15,200 to $23,700 or about 56 percent.

Nonfarm, $120,400 to $242,100 or about 101 percent.

The grand total of public and private indebtedness has increased from $626,

305 to $948,743 or about 51 percent during this 8-year period.

I have noted also from a speech which Budget Director Stans made to the New Jersey State Chamber of Commerce on June 20, 1960, that:

Now the $290 billion of public debt, plus over $350 billion of future obligations for past services, plus nearly $100 billion of c.o.d.'s adds to the almost unbelievable total of nearly $750 billion.

Mr. Stans also states that:

We should realize that when you look only at the budget for one fiscal year at a time, you see merely the visible part of the iceberg; the dangerous part is below the surface.

I am making this information available to the public at this time in order that they may have a more complete look at the fiscal picture than is revealed in a statement that the budget for a particular fiscal year shows a surplus of $1.1 billion or some relatively small amount.

The statement from the Library of Congress follows:

Gross public and private debt, 1952–59

[In millions]

	1952	1953	1954	1955	1956	1957	1958	1959

Total, local governments	23,226	25,957	29,331	33,069	36,271	38,995	42,656	45,235
Total, public debt	289,205	296,852	310,191	318,641	321,977	323,360	334,517	347,043
Private debt:								
Corporations	201,600	211,500	216,300	251,000	274,900	293,400	305,000	335,800
Individuals and unincorporated enterprises:								
Farm	15,200	16,800	17,600	18,800	19,500	20,300	23,300	23,700
Nonfarm	120,400	133,400	147,800	171,600	188,100	201,200	217,100	242,100
Total, individuals and unincorporated enterprises	135,500	150,100	165,400	190,400	207,700	221,500	240,400	265,800
Total, private debt	337,100	361,600	381,700	441,300	482,600	514,900	545,300	601,700
Total, public and private debt	626,305	658,452	691,891	759,941	804,577	838,260	879,817	$948,743

NOTE.—Debt of the Federal, State, and local governments are for the end of the governmental fiscal year. For the Federal Government, most school districts, and all except 4 of the States the fiscal year ends on June 30. With respect to other governments a considerable proportion end their fiscal years on Dec. 31. Private debt is for the end of each calendar year.

[1] Not reported for these years.
[2] Less than $500,000.
[3] Breakdown is not yet available. Total figure given is for June 30, 1959.

Let's Stop Selling America Short

EXTENSION OF REMARKS
OF

HON. ROBERT B. CHIPERFIELD

OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. CHIPERFIELD. Mr. Speaker, I wonder how many Members of this distinguished body are getting just a little sick and tired of those who are running down our great country.

Just the other day, I heard one of them say his "criticism is not borne out of disloyalty, but out of deep loyalty." To me, that sounds just a bit like the old quote about the licking in the woodshed—"this hurts me more than it does you." But when I was a boy I was always under the impression that I was the one who got hurt.

And today I think the country may be getting hurt worse than those who are trying to make capital by calling us a second-rate power.

Our national wealth is the greatest in the world. We have built more than 9 million new homes since World War II. Only a very few years ago the demand seemed insatiable.

Poverty and unemployment are close to a minimum. Our economy continues steady, neither pushing upward into an inflationary spiral, nor slipping into recession. And above everything else, we are at peace.

We are spending 2½ times more for research and development than we did 7 years ago. Nearly 12 million more persons are covered by social security than when the Democrats lost the White House; and medical care of the aged is at long last getting the attention it deserves.

We are carrying a tremendous burden for defense and foreign aid in addition to the cost of domestic programs. Under President Eisenhower's administration and its leaders in Congress we managed to produce a $1.1 billion surplus last year.

We could probably have had a surplus of $4.2 billion this fiscal year, had the opposition paid any responsible attention to the recommendations of President Eisenhower.

But to become more specific about our relative standing, economically, with our principal competitor, Soviet Russia, I suggest we consider these figures recently compiled by the Library of Congress. They compare prices in terms of hours worked in Moscow and New York. They show how much better off American workers are than Russian workers.

Items	Hours worked, Moscow, Russia	Hours worked, New York, U.S.A.	Russians work times more
Suit clothes	275 hours	23 hours	11 times.
Lady's dress (rayon)	73½ hours	4 hours 36 minutes	16 times.
Cotton shirt	15 hours	56 minutes	16 times.
Shoes (man)	61 hours	7 hours	8½ times.
Nylon hose	8 hours	37 minutes	13 times.
Beef (pound)	1 hour 22 minutes	21 minutes	4 times.
Butter (pound)	3 hours 4 minutes	20½ minutes	9 times.
Milk (quart)	31 minutes	7½ minutes	4 times.
Cigarettes (20)	27 minutes	7 minutes	4 times.

Now it will be said by some that Russia is at least ahead of us in the space race, even though at this moment we have 14 satellites in orbit as against 3 belonging to Russia. It is true that they can send a larger thrust into orbit, but our satellites have a notable advantage in the more subtle areas of instrumentation. We are better able to record, transmit and receive information about the universe.

We were the first to send a navigational satellite aloft; a satellite whose radio signals can provide "fixes" for ships in bad weather.

We were the first with a satellite whose successors will give this country early warning of missile launchings.

We were the first to recover a capsule from orbit in space.

The giant, 100-foot balloon, Echo I, is the largest object in space, and is the first communication satellite. It has already relayed recorded messages, "live" telephone calls and even radioed pictures.

The National Aeronautics and Space Administration expects soon to fire an American astronaut into space in the nose cone of a rocket, and have a man put into orbit and returned to earth. The moon will be the target of an instrument package.

And the most outstanding aspect of these technological breakthroughs is that they came from a nation whose research and development was begun in 1953—less than 8 years ago—in a Republican administration.

We have the word of President Eisenhower that we have become the strongest military power on earth. We have, for example, operational Atlas missiles ready for launching and capable of hitting targets anywhere in the world.

We have 2,000 long-range strategic bombers, deployed at bases around the globe, each of which can deliver more destructive power than has been spent in all the wars in history.

We have 16 wings of tactical aircraft, each with nuclear capability deployed on strategically located advance bases around the world.

We have missiles with large warheads, difficult to detect through defense radar.

We have Matador and Mace operational tactical missiles, each packing more explosive power than was expended against all Axis military targets in Europe during World War II.

We have intermediate range ballistic missiles, such as the Thor, which is stationed in allied forces' hands in the United Kingdom.

We have cruisers and submarines equipped with the Regulus I, a surface-to-surface weapon.

We have aircraft carriers, several of which are deployed around the periphery of the Soviet Union, able to launch more aircraft than the entire Soviet heavy bomber force and capable of nuclear strikes into almost any area of the Communist bloc.

We have naval alert forces which include 9 antisubmarine carriers, 14 cruisers, 269 destroyers, 115 submarines, 81 minecraft, and more than 7,000 operational aircraft.

We have 14 Army divisions, 8 overseas and 6 in this country, all at the highest state of readiness in peacetime history.

We have three divisions of marines, always prepared to move quickly and effectively into trouble spots anywhere in the world.

In addition, we have as part of our defense program another very important factor often overlooked by its critics: The collective military strength of our friends and allies abroad, embracing, in effect, the armed forces of all free nations. Our allies provide the United States with some 250 strategically located bases, contribute to our collective defense more than 5 million men, more than 25,000 planes, half of which are jet powered, and some 2,200 combat vessels which help insure free world control of the seas.

All this adds up to a military force overwhelmingly superior to anything the Russians can put together.

Nowhere in this admittedly brief account do I find anything but justification for pride in our country. I say, let us stop selling America short.

Representative Ken Hechler Answers an Attack on His Record in Congress

EXTENSION OF REMARKS
OF

HON. KEN HECHLER

OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. HECHLER. Mr. Speaker, in the CONGRESSIONAL RECORD on August 24, was printed a letter I received from Clyde B. Pinson, one of my constituents. The following is the text of my response to Mr. Pinson, which was in his hands 24 hours prior to publication; he gave his letter to the press and it was published long before I received the letter in the mail.

AUGUST 25, 1960.

Mr. CLYDE B. PINSON,
Huntington, W. Va.

DEAR MR. PINSON: I was glad to receive your good letter of August 22. I love nothing better than a good, clean campaign on the issues, which will help the voters to make an intelligent choice on November 8.

Your letter furnishes a wonderful springboard for me to discuss some of the basic issues, and I welcome the opportunity.

Reelection really doesn't obsess me, as you say. You know, there are lots of very excit-

ing things I enjoy doing. I love to write, I love to teach, I love to work with young people, and I love any occupation which enables me to help my fellow human beings and bring out their best qualities. I love serving in Congress because it give me an opportunity to help people, to help our State, our Nation, and the whole free world. It is a challenging job, and I love challenges—which is why I accept yours with such relish.

Your letter expresses a concern about my inactivity and failure to "do something." I am glad, however, that my activities are sufficiently important to attract your attention and impel you to write me. As I stated, when your letter appeared in the press, long before I had a chance to receive it, I doubt whether you want a serious answer, or you would not have given it to the press beforehand in the way you did. Nevertheless, I am going to furnish a serious answer in the hope that it will illuminate the issues involved in this campaign.

The Democratic Party has a majority in the House and Senate, which enabled the Congress to pass an area redevelopment bill which would have helped many of our communities with chronic unemployment. West Virginia's one Republican representative, the Honorable ARCH A. MOORE, JR., voted for that bill, yet your Republican President vetoed it and thus helped choke off a program to do something for West Virginia. I voted for that bill, and stood up on the floor of the House of Representatives and invited President Eisenhower to visit West Virginia and see how the area redevelopment bill would have helped our State. The President didn't accept that invitation, although he has had plenty of time to visit India, Turkey, and many other foreign lands. In 1958, President Eisenhower, Vice President NIXON and many members of the Republican Cabinet came to West Virginia to make campaign speeches because our State had two Senators up for election, but despite our pleas they haven't been back to help us or even to inspect West Virginia. I'll be willing to bet you that they'll be back just before the election in 1960 to make some more campaign speeches, but when the chips were down and the President had a good bill in front of him to sign, he vetoed it.

I also fought and voted for a bill which Congress passed to control water pollution of our streams in West Virginia and all over the Nation. Cleaning up our streams and preserving our God-given natural resources was such a worthwhile program—particularly for our Ohio Valley area—that I was astonished when the President opposed this bill and torpedoed it with another veto. This measure would have "done something" for West Virginia, for all American communities and for lovers of the great outdoors everywhere. The spirit of a great Republican President, Theodore Roosevelt, must have wept at this shoddy spectacle.

I must also point out that I voted for bills to create a Coal Research and Development Commission and to preserve the markets for our small tobacco farmers. Yet the President vetoed both these bills in 1959 and stalled action on them for 1 full year, until Congress returned them in revised form to him in 1960.

Your letter said that I had done nothing to "feed our hungry children." President Eisenhower denied in his press conference on April 27, 1960, that there were any hungry children. In response to a question by Mrs. May Craig of the Portland Press-Herald, he answered: "Well, Mrs. Craig, you say they haven't been helped. I thought they had." Nonetheless, I believe that there are needy children in West Virginia, and these are the things I have done to help them:

I introduced a bill to require the Secretary of Agriculture to provide a balanced diet for needy persons from funds already at hand. The Department of Agriculture under Ezra Taft Benson fought this bill and deterred its passage.

I wrote, phoned and pleaded with the Department of Agriculture to add a few more staple items to the diet being provided needy persons. I was rebuffed at every turn.

I supported a food stamp plan to reduce our huge crop surpluses by helping to feed the needy. Secretary Benson has refused to use this law a Democratic Congress put on the books to do something for the needy.

I obtained a special order of $10,000 worth of vitamins for needy children in West Virginia from the Department of Health, Education, and Welfare after the State health department advised that the poor diet these children were forced to eat had lowered their resistance to flu and other diseases last winter.

Now may I move to your charge that I consistently opposed defense expenditures, while urging better preparedness in the space and missile fields. My position on this is well known, and I am sure you are aware of it. I made it clear at the beginning of this session of Congress that because I believe education is our real first line of defense, I would not vote for any defense expenditures which placed emphasis on muscles and material, without regard for the brainpower and trained hands that could put these things to the best use in our struggle to stay strong and to resist Communist pressures until some form of aid to education had been passed. Although this principle was thoroughly publicized and my position was made crystal clear, I heard no objection from you.

Now as for the request that I "do something" during these last days of the postconvention session of Congress. I am sure that you know—if you keep abreast of national affairs through news media—that this session was called for the sole purpose of handling some "must" legislation, including several appropriations bills. These are major bills affecting the entire Nation. A new bill coming up would require committee hearings and debates for which there simply is not sufficient time prior to the adjournment of this session. I am proud of my record of "doing something" for our district and State. Among the proudest of these accomplishments, I list:

Helped put through two appropriations totaling $19,750 for a survey to determine the feasibility of a dam and reservoir on Twelve Pole Creek in Wayne County. This project had been inactive for 28 years since its inception due to lack of funds.

Called conferences and repeatedly put pressure on Navy and General Services Administration officials to free the idle Sylvania plant for sale to an industrial employer. This plant is now available for sale to private industry.

Helped to get money to complete planning for the vast Belleville lock and dam project on the Ohio River in Wood County.

Assisted area industries with efforts to get defense contracts and spoke out in the House on 18 occasions in favor of more defense contracts and facilities for West Virginia.

Made countless appearances before the Civil Aeronautics Board and its officials in support of better airline service for the State and in appearances before congressional committees urged more funds for the Tri-State Airport.

Worked to convince the Eisenhower administration of the need for mandatory controls on importation of residual fuel oil, which had cut into West Virginia coal markets. These controls were imposed in March 1959, and tightened in 1960.

Urged the U.S. Tariff Commission on several occasions to restrict imports of glass, ceramics, steel and fabrics which were cutting production of West Virginia plants and throwing workers out of their jobs.

Introduced and worked to have enacted a bill to transfer a Federal lock and dam on the Big Sandy River to Fort Gay, W. Va., to improve its water supply and open the way to industrial development.

Repeatedly wrote, called and conferred in person with industrialists interested in locating facilities in West Virginia.

But if I did nothing else in Congress, I am proudest of all of the opportunity and inspiration I have tried to afford young people in West Virginia by enabling them to come to the Capitol to work for periods of a week or longer in my office and learn about our democratic processes. More than 60 high school and college students—45 of them winners in the nonpartisan "Week in Washington" contest which I conduct for high school juniors—have come from West Virginia to work in my office, and the door is always open to these energetic, idealistic young volunteers.

I am enclosing a summary of 101 points which represent my aims and achievements. I also am enclosing a detailed summary of legislation which I have introduced, and a history of what has become of these bills, indicating the number which have become law.

I would be glad to send these two documents to any person you suggest, or to anyone who writes in to ask for them.

In your letter, you state: "I shall be happy to consult with you on the problems we face." That statement particularly interested me, because I am always glad to consult with constituents like yourself who have constructive ideas.

However, in all the time I have represented you in the Congress, you have never communicated with me about issues or problems.

A thorough check of my files reveals that you have never once written me a letter, telephoned me, visited my office in either Huntington or Washington, nor made one single suggestion to consult with me on the problems we face. Our only communication is a response to a telegram I sent you on the occasion of your primary victory.

Since you have been in Washington recently having your picture taken with President Eisenhower, Mr. NIXON and others, I can only assume that you considered none of the problems you mention of sufficient importance to call my office about them, nor to contact me in Huntington, although our offices there are not too far apart.

If you have problems, however, I want to assure you that I shall be happy to consult with you and to attempt to give you the same intensive degree of personal service which I am proud of giving every voter in my district who comes to me for assistance, regardless of political affiliation.

Do you have problems? Why not come by my office and you may be sure my all-West Virginia staff will give you a cordial welcome and we can discuss action in the best interests of our State.

I will be happy to confer with you at any time or place, provided it does not interfere with a rollcall vote in the House of Representatives, for I am very proud of my voting attendance record (95 percent in 1959, 100 percent in 1960) which is the best mark of any West Virginia Congressman and far above the average of all Members of Congress.

As I told 23,000 Huntington citizens in a letter asking them to make my campaign one financed by contributions from the people, "I will conduct a clean and constructive campaign on my record, never either privately or publicly attacking my opponent, but setting forth the details of my performance and platform." I intend to abide by that pledge.

You seem to be disturbed by the fact that frequent stories appear in the newspapers concerning my activities. I believe very deeply that every person in public life must

be an educator, bringing facts to the attention of the people so they can make firm judgments. I also believe that a very important part of a Congressman's job is to keep the people informed on what he is doing. That is why I have worked hard to inform the people about the background of issues confronting the Congress, what goes on behind the scenes of Congress, and what your Congressman is doing or planning to do. In public life, one cannot retire behind a cloak of false modesty, but one must continue to give the people the whole truth about matters which affect their interests. So far as "gimmicks" are concerned, I guess everybody has to get a good, hearty laugh every now and then, and I get just as much of a kick out of this as the next fellow.

I have had your letter printed in the CONGRESSIONAL RECORD, with an invitation to my colleagues in Congress and constituents to comment on what they feel I have accomplished in my first term. After all, a fellow can't judge this with total objectivity himself, and I'd prefer to have others indicate what they think from their own viewpoint. From time to time, I'll send you copies of these letters.

We are living in very troubled times in the world. From Cuba to the Congo, the world is in ferment. If there is one thing we need in our own country it is a new moral leadership. We also need a rededication to basic ideals and principles, a redefinition of our national purpose, and a determination on the part of the people that we will lift our sights above the petty, backbiting, and selfish jealousies which sap our Nation's moral strength. We must be builders, and not wreckers. We must purify our hearts if we would strengthen our muscles.

Your servant in Congress,

KEN HECHLER.

The American States Must Not Allow Cuba To Become a Soviet Satellite

EXTENSION OF REMARKS

OF

HON. O. C. FISHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. FISHER. Mr. Speaker, anyone so naive as to think the present Cuban Government is not today virtually dominated by communism must, following what took place at San Jose during the past 2 weeks, have any possible doubts removed.

The conduct of Cuban Foreign Minister Raul Roa throughout those proceedings was the conduct of a Communist or of a Communist puppet. His ill-tempered ravings when his Communist connections were unfolded exposed the depth of his enmeshment in the Communist conspiracy.

It is an old trick of the Communists to hide guilt by violent and unfounded accusations. That technique is a dead giveaway of guilt. It is a pattern that is uniformly followed whenever the Communists take over. It has happened scores of times in different countries in recent years. Look at South Korea, invaded from the north under Russian direction, to avoid invasion by the unarmed, impoverished, peace-loving South Koreans. Look at the "yakking" that has been coming out of Red China for years—about the threat of attack by imperialists. And remember the Soviets that try to keep their own people whipped into a frenzy by the threatened aggression by imperialists. And all this despite the fact that is undeniable, that the only imperialists in the world today are Communists—and they know it.

Now we see the same technique being employed in the Communists' newest satellite, the Caribbean island of Cuba. Is it any wonder, therefore, that at the recent meeting of the Organizaion of American States at San José, Cuban spokesmen there were repeating the old discredited Communist bromide of aggression by the imperialists? The American States are not so dumb as to believe any such tripe. It is a part of a plan handed to the Cuban puppets by their Communist masters, and they know it. Just how dumb do those Communist agents think the people of South, Central and North America are, to expect them to be fooled by such hokum?

The alertness and intelligence of 19 members of the OAS was demonstrated by the adoption at the end of their historic meeting of a resolution condemning the Red Chinese and Russian interference with the freedom, peace and tranquility of the Western Hemisphere. By a vote of 19 to 0, the Cuban involvement in communism was established and recognized by the jury of States that heard the evidence, and then returned their verdict.

OAS FINDING SHOULD BE FOLLOWED BY POSITIVE STEPS

It is to be hoped that the OAS finding will be followed by such positive actions as may be necessary to stamp out this threat to the peace of this hemisphere. If a break in diplomatic relations with the Dominican Republic is a good thing, then surely similar action should be taken at once against Cuba. And the economic boycott should be included, plus whatever other measures as may be needed in effectively dealing with this Communist maneuver. Halfway measures will not suffice.

The Communist beachhead in Cuba got going with the secret arrival there more than a year ago of one Vadim Kotchergin from Soviet Russia, who at first spent about 20 days in Cuba. There he conferred with Raul Castro, the well-known Communist, who is today head of the Cuban military. Kotchergin, a colonel in the Soviet secret service, was in Cuba to give secret instructions in Communist tactics.

Kotchergin called for indoctrination of the Cuban Army and Navy in Marxist-Lenin theories. And that order has been carried out.

He directed that a propaganda campaign be launched at the Cuban people that would depict the Communist image of the United States to them as an enemy, and to be strongly anti-American in character. He required that the line play up the counter revolutionary interests, and to talk and talk and talk about the "Yankee imperialists," intent on aggression.

Colonel Kotchergin instructed Raul to immediately begin preparing the Cuban people for confiscation of all foreign-owned property. And that order was carried out.

The adroit Soviet colonel also called for a preparation of public opinion in Cuba for the taking over of the U.S. naval base at Guantanamo, maintained there by virtue of a treaty. And accordingly the Castro government has been busy lying about aggressive appearances within their territorial waters of American naval craft. Just something to feed the Cuban people in an attempt to poison their minds and deceive them.

He also called for a virtual end to all trade with the United States, and a devaluation of the Cuban peso. That order has been complied with.

Kotchergin expressed particular interest in the Oriente Province. He obtained topographical maps and detailed information of the province. He was particularly interested in the coast of Oriente Province, and this was provided.

Reliable information is available to the effect that Russian agents are making, and have for more than a year been making, frequent trips to what is known as Cienega de Zapata, and that three highways are being constructed to that part of the coast of Cuba. Reinforcing steel and cement in considerable quantity has been reported moving to that area. A Soviet submarine base? A Soviet missile base? They wasted no time. While some in the west were equivocating and trying to imagine the Castros were interested in doing something for the Cuban people, the Soviets and Red Chinese were moving in—and gradually taking over.

RUSSIANS AND CHINESE MOVED IN

When Secretary of State Herter recently informed the Organization of American States that Cuba is marked by Communist conspirators as a base for operations in an all-out attempt to communize other American states, he supported his charge by evidence of a well camouflaged school located in the Oriente Mountains, being used to train students in the art of Communist infiltration, sabotage, and other Communist devices.

Before Kotchergin left Cuba he agreed secretly with Castro to send a Russian military mission, to come secretly to Cuba.

The Russian's visit to Cuba has been followed by many forms of loans, trades, and economic aid. And it has been followed by Red Chinese emissaries who have become very active in the Communists' newest satellite. Large numbers of Chinese have poured in, disguised, many reportedly for military use if and when needed.

The Communists are taking no chances. They want to be prepared to stamp out any outbreak of resistence inside Cuba.

One of the Russian officers who since Kotchergin's departure has spent a lot of time in Cuba is a Colonel Truesoff, a

Soviet Air Force colonel. He has been in close contact with Raul Castro, spending a lot of time in and out of San Antonio (Cuba) Air Base.

Kotchergin's visit to Cuba has been followed by many other forms of aid, much of which has been disclosed in the press.

All freedom of press has been wiped out. Most of the newspapers and other news media have been confiscated, Communist style, their editors either in prison or now refugees. Religion is under heavy attack, and it is only a matter of time until the Soviets decide how to handle that sanctuary for freedom among the Christian people of Cuba.

The University of Havana is today under Communist control, following the taking over by force exerted by leftist students and faculty, undoubtedly acting under Communist direction.

A vast propaganda machine has been at work in Cuba, carrying out orders from Peiping and Moscow. Not confined to Cuba, this propaganda is being spread throughout Latin America.

With total disregard for the freedom and welfare of the Cuban people, the Communist-dominated government is pressing for complete control over the life and activity of every citizen. Who today would dare stand on a street corner in Havana and criticize one of the Castros? Or, for that matter, Red China or Soviet Russia?

MONROE DOCTRINE MUST BE ENFORCED

President Eisenhower, very wisely in my opinion, has said that the Monroe Doctrine must be observed by these foreign imperialists. That doctrine, proclaimed by President James Monroe on December 2, 1823, directed that any attempt by European powers "to extend their system to any portion of this hemisphere" would be considered "dangerous to our peace and safety."

The Eisenhower reminder, issued on last July 9, should be implemented by whatever is necessary. I have no doubt that with the understanding our sister republics in this hemisphere must now have of what is taking place in Cuba, the United States will have substantial backing among the American States who are concerned, just as we are, about this Communist grab.

Nikita Khrushchev's missile-rattling threats should be treated as rubbish and condemned for what it is—an imperialist threat and a gratuitous act of attempted intimidation. The "Big Bluffer" wanted to make headlines in the Communist press in Havana, and he succeeded.

WE SHOULD MAKE TRUTH KNOWN TO CUBAN PEOPLE

Mr. Speaker, if this attack on the freedom of the Cuban people by the imperialists of Peiping and Moscow is impressing the people of Cuba, then it is our duty, as I see it, to retaliate by making the truth known to the Cuban people. A lot has been done, but even more needs to be done. The rank and file of Cuban people are good people, and they love freedom. The freedom-loving American States, spearheaded by this country, should saturate the air waves of that Caribbean island with messages of warning and truth. Every time Castro or Guevara tells them a lie—and that is very often—we should send a message of truth three times.

The Cuban people must be made to realize that any legitimate objectives of the revolution is being thwarted by evil-minded men, intent upon using the revolution to disguise their determination to destroy their freedom and their liberty. It is but a snare and a delusion. These warnings can be documented and their truth undeniably established.

The Cuban people must be made to realize that the best friends they can have are the American people. They should be reminded that for more than half a century Cubans and Americans have fought and died together against common enemies, and that for these many decades we have lived in friendship and mutual respect for each other.

They should be reminded that only 60 years ago Americans fought and died with Cubans in the cause of Cuban independence. And they should be reminded that "imperialist" America promptly yielded to Cuba its complete independence following the Spanish-American War.

And, above everything, they should be reminded, day after day, that everything they have fought for in the past is now at stake, with the Communist noose being gradually tightened about their necks. These are simple facts, and they should be brought home, repeatedly, to the Cuban people.

We must fight this menace with every weapon at our command, because a Communist beachhead in Cuba is a threat to the freedom of all the Americas.

The Cubans should be reminded, time and again, of the fate that awaits them. And all of the peoples of the Americas should be reminded.

Let us hope, Mr. Speaker, that the President and the Congress will act boldly and resolutely in this time of peril, when freedom in this hemisphere is under real attack. And I feel certain that the American people will applaud and support every action, drastic though it may be, which will effectively cope with this bold attempt by these Communist warlords to impose tyranny and slavery upon our island neighbors who are being hoodwinked by men whose motives are to use them or destroy them.

The Ukrainians Continue To Fight the Soviets

EXTENSION OF REMARKS

OF

HON. HOWARD W. ROBISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. ROBISON. Mr. Speaker, when Mr. Khrushchev is in the United States attending the United Nations General Assembly session, we should again remind ourselves of the unquenchable thirst for freedom on the part of the people behind the Iron Curtain and particularly many of the nationality groups within the Soviet Union. The torch of freedom is held high by the various nationality organizations in America. One particularly active group is the Ukrainian Congress Committee of America, Inc., representing some 2½ million Americans of Ukrainian descent.

During Mr. Khrushchev's stay in Manhattain, I know that the Ukrainian Congress and similar groups, while respecting the safety of Mr. Khrushchev's person, will, nevertheless, make it unquestionably clear to him that the Ukrainians and other nationalities within the Soviet Union do not accept dictatorial domination.

Know Your Congressman—Legislative Record, Duties, and Responsibilities of Congressman Gordon L. McDonough

EXTENSION OF REMARKS

OF

HON. GORDON L. McDONOUGH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. McDONOUGH. Mr. Speaker, it is the desire of all Members of Congress to become intimately and personally acquainted with all of the people they represent and likewise for the people they represent to know their Congressman.

This is not always possible as much as the Congressman and the people he represents try to become personally acquainted.

However, through correspondence, the press, radio, TV, and other means of communication, all Congressmen try to inform their people what they are doing; the bills they sponsor, introduce, and promote; the committees they are assigned to; the major issues they have voted for; and their duties and responsibilities.

In order to properly inform the people of the 15th District, I am submitting the following summary of my legislative record, my duties and responsibilities, and some of the important legislation I have promoted:

MAJOR ISSUES CONGRESSMAN M'DONOUGH HAS SUPPORTED AND VOTED FOR

The McDonough record speaks for itself. But the record of achievement in legislation initiated by him is but a small part of the total record of accomplishment built by the consistent and vigorous efforts of the Congressman from the 15th District in behalf of his constituency.

He has supported legislation to establish a strong adequate national and civilian defense to meet any enemy attack.

He has urged legislation to outlaw the Communist Party in the United States and to combat communism both within the United States and abroad.

He stands firmly opposed to the admission of Red China to the United Nations.

He has consistently supported new and improved veterans' hospitals and necessary increases in pensions for service and nonservice-connected veterans and war widows and dependents.

He has supported lower downpayments on new homes and liberal loans for alterations and repairs of existing homes, and for slum clearance under housing legislation.

He has supported increased social security payments that would provide adequate pensions to our senior citizens, and legislation to provide health and medical aid for our needy senior citizens.

He believes in a sound fiscal policy which will hold inflation in check and at the same time promote stable economic growth in the United States and maintain a maximum level of employment.

He has supported civil rights legislation to eliminate discrimination because of race, creed, or color in education, voting rights, and employment.

McDONOUGH believes in economy in Government through elimination of waste, extravagance, and duplication of services. He also believes in providing maximum service to our citizens for every dollar spent by Government.

He believes in tax reduction, if such reduction can be achieved while we at the same time maintain our national defense at the high level necessary and meet the technological challenge of the Soviet Union in the field of scientific achievement.

LEGISLATIVE RECORD OF CONGRESSMAN GORDON L. M'DONOUGH

The record of achievement attained during his term of service to the people of the 15th Congressional District is outstanding. It is a record of action rather than words—of accomplishment rather than promises. It is the result of his consistent efforts to act and work in the best interest of all the people in his district as well as for the Nation.

During the eight complete Congresses in which McDONOUGH has served, he has introduced the following major bills which have resulted in ultimate action and public law.

Now let's have a look at the McDonough record.

California ownership of tidelands: A bill to establish the title of the States to tidelands areas was introduced by McDONOUGH in the 79th Congress. His fight to establish California's ownership of tideland property which is so important to the citizens of our State culminated in enactment of Public Law 31, 83d Congress, which recognizes California's ownership of tideland property.

Los Angeles post office expansion: A bill for the expansion and remodeling of the terminal annex post office was introduced by McDONOUGH in the 80th Congress. The improvement and extension of facilities at terminal annex which included an additional floor on the building was necessary as this post office handles the bulk of ingoing and outgoing mail for the Los Angeles area, and the tremendous population increase in the Los Angeles area since World War II resulted in a corresponding increase in the mail load handled at terminal annex. The expansion and remodeling of terminal annex has been completed as a result of Public Law 238, 81st Congress, and efficient mail service in the Los Angeles area has been maintained.

Federal buildings for Los Angeles: Congressman McDONOUGH introduced a bill in the 80th Congress for the construction of a new customhouse and Federal office building to meet the increased need in the Los Angeles metropolitan area, and to afford greater service and convenience to the public. Congressional action providing approval of this building was completed July 1956, and construction on the new Los Angeles customhouse and Federal office building will soon be under way.

Los Angeles harbor improvements: Los Angeles Harbor is one of the largest harbors in the United States, and with constantly increasing commerce, facilities for the loading and unloading of vessels must be expanded with harbor channels extended and enlarged to provide more space for vessels and to assure adequate channels for larger vessels to make port at Los Angeles.

Congressman McDONOUGH introduced bills to improve the east basin of Los Angeles Harbor by dredging and enlarging, and to improve the west basin including the removal of a drawbridge, and these harbor improvements were authorized in Public Law 641, 84th Congress.

He also obtained reimbursement to the city of Los Angeles for funds which had been expended on the East Basin harbor improvement for necessary immediate work prior to the congressional authorization.

Air pollution control—smog: Recognizing the serious threat of smog to the health and welfare of every citizen of Los Angeles, McDONOUGH introduced a bill in the 84th Congress to provide for research by the Federal Government into the causes of air pollution, its control and prevention.

The Federal program for research on air pollution now in progress under the direction of the Department of Health, Education, and Welfare was inaugurated with enactment of Public Law 159, 84th Congress.

Marina Del Rey project: The McDonough bill introduced in the 83d Congress provided for authorization of the Marina Del Rey small craft harbor, a project urgently needed to supply a base for the U.S. Coast Guard Air-Sea Rescue Unit, and which also will provide additional small-craft facilities and a useful recreation area. Authorization for this project was included in Public Law 780, 83d Congress. Congressman McDONOUGH's vigorous efforts also obtained the following appropriations for the Marina Del Rey project: $25,000, Public Law 163, 84th Congress; $355,000, Public Law 641, 84th Congress.

Repeal of taxes: Congressman McDONOUGH introduced legislation in the 80th Congress to repeal the excise tax on theater admissions. Partial repeal of the admission excise tax was enacted under Public Law 324 of the 83d Congress and Public Law 1010, 84th Congress.

Veterans: In the 79th Congress, McDONOUGH introduced a bill to extend national service life insurance for 5 additional years thereby assuring life-insurance benefits for all men in service which otherwise would have terminated. The extension of national service life insurance was established under Public Law 118, 79th Congress.

McDONOUGH introduced a bill in the 83d Congress to extend the 3-year presumption of service connection to veterans in all types of tuberculosis. This bill was designed to bring relief to many veterans with types of tuberculosis other than pulmonary, which were contracted as a result of service. The 3-year presumption of service connection was extended to veterans in all types of tuberculosis under Public Law 241, 83d Congress.

McDONOUGH introduced legislation in the 85th Congress to increase pensions for widows of Spanish-American War veterans. The increase in pension was effective under Public Law 425, 85th Congress.

Armed services: The McDonough bill introduced in the 82d Congress fixed the personnel strength of the United States Marine Corps to assure full efficiency of the corps, and also gave the Commandant of the Marine Corps a place on the Joint Chiefs of Staff. This was accomplished with the enactment of Public Law 416, 82d Congress.

Air Force Academy: A bill to establish an Air Force Academy to provide the highly specialized training necessary to provide competent and efficient officers for the United States Air Force necessary for the defense of our Nation was introduced by McDONOUGH in the 81st Congress. The U.S. Air Force Academy, now located in Colorado, was authorized with enactment of Public Law 325, 83d Congress.

Post Graduate Naval Academy in California: The McDonough bill to establish an additional Naval Academy in California and his fight to improve and extend facilities for the technical training of officers for the U.S. Navy resulted in establishment of the Post Graduate Naval School at Monterey, Calif., December 23, 1951.

U.S. flag: McDONOUGH introduced House Joint Resolution 167 in the 80th Congress to assure that the flag of the United States always shall receive proper respect and be placed in its proper position by providing that no foreign or supranational flag shall be displayed in a superior position or in place of the flag of the United States.

This protection of the flag of the United States was established with enactment of Public Law 107, 83d Congress.

Scientific research: In the 85th Congress, McDONOUGH introduced a bill to establish the National Aeronautics and Space Administration. The National Aeronautics and Space Administration was established with the enactment of Public Law 568, 85th Congress.

In the 80th Congress, McDONOUGH introduced a bill to provide a research program to develop economical methods to convert sea water to fresh. This program is of vital importance to southern California, as a practical economical method which will convert sea water to fresh for industrial, agricultural, and domestic use, will help solve the all important problem of continuous adequate water supply to meet continuing needs of an increasing population and industry. This bill also provided for establishment of demonstration plants, one of which is scheduled for construction in southern California with construction beginning early in 1961.

The research program now in progress by the Federal Government to convert sea water to fresh was initiated under Public Law 448, 82d Congress.

McDONOUGH also introduced a bill in the 80th Congress to provide for Federal research into the causes and treatment of multiple sclerosis. This program was initiated under Public Law 835, 84th Congress.

Statehood for Hawaii: McDONOUGH introduced legislation in the 80th Congress to grant statehood to Hawaii. Hawaii became the 50th State in the Union with the enactment of Public Law 3 of the 86th Congress.

Automobile exhaust control: McDONOUGH introduced a bill in the 86th Congress to provide for the necessary research by the Surgeon General to establish the amounts of exhaust gases discharged by motor vehicles and their effect on human health to provide the basis for necessary Federal control to eliminate harmful exhaust from motor vehicles. Research was authorized under Public Law 493 of the 86th Congress.

Recognition of the American schoolteacher: A bill introduced in the 82d Congress by McDONOUGH provided for the issue of a special postage stamp honoring our American schoolteachers who receive so little recognition for the service they render to our Nation.

The special stamp honoring the American schoolteacher was issued July 1, 1957.

Equal rights: A bill introduced by McDONOUGH in the 82d Congress provided naturalized citizenship rights to all immigrants having the right to permanent residence in the United States, and provided quotas for

Asian and Pacific peoples. The provisions of this bill were included in Public Law 414, 82d Congress.

IMPORTANT DUTIES AND RESPONSIBILITIES OF CONGRESSMAN GORDON L. M'DONOUGH

Banking and Currency Committee

McDONOUGH is a ranking member of the powerful and important Banking and Currency Committee which has jurisdiction over the Federal Reserve Board, the Federal Home Loan Bank Board, the Export-Import Bank, the International Bank for Reconstruction, the International Finance Corporation, and all legislation concerning the financing and rehabilitation of homes, and military housing.

Housing Subcommittee

He is also a ranking member of the House Subcommittee on Housing which has made a specific and detailed study of the need for all types of housing throughout the United States, which includes multiple housing, individual homes, slum clearance, and rehabilitation, and reconstruction of blighted areas in the cities throughout the Nation.

Committee on Science and Astronautics

He is a ranking member of the Committee on Science and Astronautics which has the duty and responsibility to pioneer the study of interplanetary travel and communication, and outer space exploration. The efforts of this committee have resulted in the successful advances in the exploration of outer space and the establishment of its practical uses as typified by Tiros I, Pioneer V, Echo I, and others.

Joint Senate and House Committee on Defense Production

He is also a member of the Joint Senate and House Defense Production Committee, which has the responsibility of making a continuous study of the programs authorized by the Defense Production Act and of reviewing the progress achieved in the execution and administration of these programs for the defense of our Nation.

Voting record and attendance

With the multiple duties and responsibilities required by the foregoing committee assignments and congressional responsibilities, Congressman McDONOUGH has one of the best records for being present and voting on important and vital issues debated and voted upon in the House of Representatives.

He is also a member of the Inter-Parliamentary Union by appointment of the Speaker and approval of the House.

He was a U.S. delegate to the 46th Conference of the Interparliamentary Union, which was held in London in September 1957, and also a U.S. delegate to the 48th Conference of the Interparliamentary Union, which was held in Warsaw, Poland, in September of 1959. Some 700 delegates from 46 countries attended the Conferences.

Jewish Home for Convalescents To Honor Harry D. Cohen, Its President, on the Occasion of Its 45th Anniversary

EXTENSION OF REMARKS

OF

HON. HERBERT ZELENKO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. ZELENKO. Mr. Speaker, on December 11, 1960, at the Hotel Biltmore, in New York City, the Jewish Home for Convalescents will honor its president, Harry D. Cohen. It is important that the history and efforts of this institution be made a part of this RECORD, for it is indeed a classic example of an American community effort.

In reciting the story of the Jewish Home for Convalescents, located at Grand View on the Hudson, and in bringing it to the attention of a larger public than the community in New York City which it serves, I do so because its story is a reflection of life as we know it in America—where everyday people are concerned about the welfare of a neighbor on a true humanitarian level. It is a story of good will, opportunity, and achievement, and in its dissemination projects a plan which can benefit other communities. To paraphrase an early neighbor, best-seller author, Harry Golden, "Only in America" could this story be told.

It was back in 1915 in New York City that everyday people, struggling to support their families, felt the existing need to succor the needy who had become ill and although discharged from the hospital, had no place to recuperate. This socially creative urge expressed itself in the affiliation of some 15 small fraternal societies of the East Side which began a search for a suitable location for a rest home. They planned that on the basis of an annual $50 membership by enough affiliated organizations they could create the fund with which to initiate the enterprise. Neighborhood doctors Phillip Bereano and Julius Weiss, merchants Samuel Goldstein and Emanuel Bauman, restaurateur Solomon Hechter, and lawyer Morris D. Reiss were of the committee that brought back the report that the opportunity had been found. It presented itself when a roadhouse on the Hudson River, some distance from the city, had been foreclosed.

It would only need a deposit of $500 to sign the contract. The bank was impressed with the project and made the terms easy.

It had to be a labor of love—how else to explain the fact that East Side ladies like Jennie Leibowitz, Rose Markowitz, Betty Zucker, and Rose Cohen would go up to the building on the river to clean rooms, wash floors, and sew linens. How else to explain how Eddie Stein and Max Orenstein would solicit the merchants of the East Side for their overstocked weekend perishable foods and cart them up so that needy sick people could be nourished and restored to health. The efforts of this pioneer group soon became the talk of the organizational life of the community and Rumanian, Hungarian, and Russian organizations joined them. In time there were some 110 affiliations. Labor and industrial groups joined in too, for here was a group of people that was really being helpful to working people. The Masons, Odd Fellows, and Pythians and their ladies' affiliates added their support.

Soon the bank's mortgage was lifted and there was now room for expansion. Solaria were built, modern plumbing introduced, and an elevator installed. The department of social welfare under whose legal supervision the enterprise functioned looked upon the program with great approval—it rated it A–1 for plant and administration. The home had reached a point of development where it was referred to as "Grand View the Gem on the Hudson." What earned it that name was the scenic beauty of the Hudson River at that point. The patients were resting in chaises and lounging chairs on the large veranda overlooking the river, with sun, mountain air, and river breezes blending in a well balanced portion of a health restorative. Plentiful food, adequate rest, and medical supervision assured speedy recovery.

The patients represented a true cross section of the New York community, for this was intended to be a true nonsectarian philanthropic enterprise. They came from the city's municipal and private hospitals, from the social service agencies, and were recommended by the fraternal organizations and private physicians. They included people with backgrounds of 23 different nations, and of all creeds and colors. The project of the city people appealed to the neighbors of the surrounding villages and the nonsectarian character invited the interest of appellate division Justice Arthur Tompkins, Grand View Mayor James Bloor, and the Drs. Kline and Drs. Rooney, fathers and sons.

In its time the home attracted, in New York City, Dr. Julius Weiss, leather merchants Samuel Goldstein and Isaac Lippman, counselor Morris D. Reiss, and construction contractor Maurice Schwartz to become presidents of the organization. Samuel Koenig, the textile executive, made gifts of substantial improvements. Dr. O. L. Friedman, the noted expert on geriatrics, headed the medical board.

Harry D. Cohen, who has been the president during the past 10 years, was an immigrant who had been brought up in a home which had encouraged philanthropic interest. Together with his brothers he found his way into the company of the pioneers in 1915. He prospered as a dress manufacturer and Miami hotel owner. During all this time he has given this philanthropic interest the same devotion he has shown to his own business activities.

Recognition has come to the Jewish Home for Convalescents in its selection as one of the agencies of the Greater New York Fund to receive an allocation from its annual fund raising campaign.

An example of the home's progressive outlook is the seminar which is conducted annually when the social workers of the hospitals are taken for a day's outing to the institution where coupled with a recreation program, a period is devoted to the exchange of ideas of how the service can be put to a more efficient use by the public, and speakers from the department of hospitals and the department of social service are heard.

The home with its 100-bed capacity presently accepts guests for a period of 2 to 4 weeks and under the new program a stay will be of longer duration. It is

most gratifying that during its existence the home has brought important help to over 50,000 families in restoring people to health and enabling them to take again their positions as active members of the community.

During the past several years, with the discovery and use of new drugs and procedures, a new hospital approach to immediate patient ambulation reduced the need of convalescence of hospital patients in the home as the institution had been practicing it for many years.

Always progressive in outlook, the governing board studied the problem and learned how urgent was now the need for care for the aged sick. There was now an overwhelming demand for nursing care. It consulted with the department of social welfare and decided to request charter authority to extend its functions to include nursing care aid to supplement its dwindling convalescent care program.

The State's architects studied the building and plans were formulated to convert one wing of the building from a ward into a series of private rooms. They would experiment with the idea of a concentrated health and care program to serve the community's needs in one center instead of in separate institutions. The idea would encourage an ambulatory existence for all as part of the same health and restoration and maintenance program.

A new day was dawning. The opportunity to serve people would now be greater than ever and it would be measured by the readiness of the organization to adapt itself to the needs of the changing times, changes dictated by science, medical outlook, and community viewpoint. Since the care of the aged was a greater responsibility than the care of the fully ambulatory convalescent patient, the safety measures prescribed by law would be extensive and the home must be prepared to implement them.

And so now in its 45th year of existence, the institution is launching its programs to create these new facilities and is bringing itself to the attention of foundations, labor, industry, fraternal societies, and the legal and accounting professions to grant encouragement and material aid to a project which may serve as a pilot for implementation by other communities throughout the land, illustrating how a people's project, although unendowed, renders superb service.

Address by Hon. Francis E. Walter Before the Texas Department of the American Legion

---

EXTENSION OF REMARKS
OF
HON. JOE M. KILGORE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 30, 1960

Mr. KILGORE. Mr. Speaker, recently our colleague, the Honorable FRANCIS E. WALTER, addressed the Texas Department of the American Legion on the occasion of its annual convention in Dallas, Tex.

I obtained a copy of Mr. WALTER'S speech and read it with great interest. It is so timely and so cogent that I know many others will want to read it.

The speech follows:

ADDRESS BY CONGRESSMAN FRANCIS E. WALTER, DEMOCRAT, OF PENNSYLVANIA, CHAIRMAN, COMMITTEE ON UN-AMERICAN ACTIVITIES, U.S. HOUSE OF REPRESENTATIVES, TEXAS DEPARTMENT, THE AMERICAN LEGION, DALLAS, TEX., AUGUST 12, 1960

In glancing at the correspondence which I had with Commander Peters in response to the invitation to speak to this convention, I noticed that I addressed him as "Dear Comrade." To those of us in the Legion, this salutation has special significance, because as comrades in arms we have shared common dangers and as Legionnaires we are dedicated to common objectives.

How curious it is that even this salutation "Comrade" has been appropriated and perverted by our Communist enemy who debauches language itself.

Masquerading behind a facade of peace, they have brought to this planet total warfare, in which every weapon—military, psychological, diplomatic, political, and economic—is employed.

In the name of freedom they have imposed slavery on one-third of the people of this globe. Under the banner of humanitarianism they have brought more suffering and human misery than any force since the dawn of time. Under the guise of the more abundant life, they have reaped a harvest of death and destruction—and the end is not in sight.

That in the course of 50 years a devilish conspiracy should evolve and should gain such momentum as to encircle the globe with its tentacles, is sobering indeed. That this conspiracy should pretend to be Messianic in intent and purpose is diabolical, but comprehensible.

What is incomprehensible, however, is that notwithstanding their publicly announced program of world domination and the plain, obvious record which they write in human blood, even now they continue to dupe those whom they would destroy. Even those who have faced them in mortal combat on the field of battle are among the victims of their deceit.

A 5-year study made by a special committee selected by the Secretary of Defense, of the conduct of American prisoners of war during the Korean conflict reveals that one out of every three American prisoners of war collaborated with the Communists. Their collaboration included signing Communist appeals, participation in Communist propaganda broadcasts, and writing articles commending communism and life under communism. Seventy-five American prisoners of war committed themselves to become Communist spies against the United States. Almost two dozen agreed to relinquish all ties with this country and to remain in Communist China. The report of this special committee also reveals unprecedented breakdown in the morale of the American prisoners of war, including fraternization with the enemy.

I brought with me to this convention motion picture films depicting the Communist-led student riots during the recent hearings of the committee in San Francisco. That these riots were the results of Communist infiltration is clearly demonstrated, not only by the films, but by the factual material contained in a report made to our committee by the FBI, which we just published and which confirms beyond a shadow of a doubt that these student riots were inspired and directed by trained Communist agents. In the words of J. Edgar Hoover, "The Communist success in San Francisco in May 1960 proves that it can happen here."

How do we account for the sordid disclosures contained in the report on the conduct of American prisoners of war during the Korean conflict? What interpretation is to be made of the fact that a great many students here on American soil defied lawful authority and openly rioted against a duly constituted committee of the U.S. Congress?

In attempting to assess the reasons for the conduct of the Americans who betrayed their cause during the Korean conflict, the special committee appointed by the Secretary of Defense states:

"When plunged into a Communist indoctrination mill, the average American POW was under a serious handicap. Enemy political officers forced him to read Marxian literature. He was compelled to participate in debates. He had to tell what he knew about American politics and American history. And many times the Chinese or Korean instructors knew more about these subjects than he did. This brainstorming caught many American prisoners off guard. To most of them it came as a complete surprise and they were unprepared. Lectures, study groups, discussion groups, a blizzard of propaganda, and hurricanes of violent oratory were all a part of the enemy technique.

"Ignorance lay behind much of this trouble. A great many servicemen were teenagers. At home they had thought of politics as dry editorials or uninteresting speeches, dull as ditchwater. They were unprepared to give the commissars an argument.

"Some of the POW's—among them men who became defectors—had heard of communism only as a name. Many had never before heard of Karl Marx. And here was communism held up as the salvation of the world and Marx as mankind's benefactor.

"The committee heard evidence which revealed that many of the POW's knew too little about the United States and its ideals and traditions. So the Chinese indoctrinators had the advantage.

"The uninformed POW's were up against it. They couldn't answer arguments in favor of communism with arguments in favor of Americanism, because they knew very little about their America."

And what of the large number of students who engaged in the San Francisco riots? Shortly after the publication of the FBI report in which appears the identification of trained Communist agitators and the techniques which they employed in agitating to action the students who were engaged in the riots, a number of the rioting students joined in the issuance of a public statement denying any cognizance that they had been led by Communists.

The fact is that of those who participated in the riots in San Francisco not more than a dozen were Communists, but they were trained in the techniques of incitement to riot. They spent weeks in laying the groundwork. They knew they had material to work with which had been conditioned by clever propaganda. They were organized for action and at the proper time they pulled the switch and then lurked in the background while the students did their dirty work.

One month before the Communist-led student riots in San Francisco, we read of riots in Korea in which large numbers of students joined mobs led by Communist agitators to force the abdication of a stanch anti-Communist regime. At about the same time, an estimated 100,000 British young people jammed London's Trafalgar Square in a Communist-oriented "ban the bomb" rally.

Within days after the San Francisco student riots, we read of a Communist-led student rally of 20,000 in Bologna, Italy, to protest U.S. bases there, and we read of similar rioting student demonstrations in Indonesia, in Laos and Brazil. A few weeks later, the proposed visit of the President of the United States to Japan was canceled as a result of demonstrations by hundreds of thousands spearheaded by Communist-led students.

I surmise that in each of these riots—as in all Communist enterprises—only a handful of Communist agents who knew their business as agitators were directly responsible for the demonstrations of the multitudes.

This brings us to consideration of one of the dangerous fallacies which many people entertain in attempting to appraise and evaluate the threat of communism. It is often said by people of unquestioned patriotism and of good faith that we in the United States have little to fear from communism or from Communists because they are counted only in the thousands in a population of 180 million.

Time and time again the Committee on Un-American Activities has pointed out that the strength of the Communist movement in any of its ramifications bears little relationship to the number of its members; that instead, its strength and effectiveness are in direct ratio to the intensity of the efforts of the few who are trained and disciplined agents. It was with only a relative few that Lenin seized control of the government of Soviet Russia. Even today only 3 or 4 percent of the captive nations are Communists. It is estimated that of the 33 million Communists in the world today probably not more than 10 percent, some 3 million, are the hard-core trained zealots and yet these 3 million control absolutely 900 million and are masters of the world conspiracy which has tentacles on every continent of the globe. To attempt to appraise the strength of the Communist movement in terms of numbers, then, is like appraising the threat of cancer to the human body by comparing the size of the cancer with the rest of the body which is sound.

Permit me to dwell briefly on one phase of Communist subversion which is illustrated by the student riots which demonstrate the power of a few trained agents; namely, Communist infiltration of youth. At the outset, let me say that the overwhelming majority of the young people of this Nation are of unquestioned patriotism and dedication to all that is good and noble in our society. But this most not beguile us into feeling that the threat from Communist infiltrators among our youth is insignificant. The fact is that today the Communist conspiracy has given a top priority to infiltration and subversion of youth over the world and is right now concentrating on its program of subversion of the youth of the United States.

Here is a resolution passed last year at the national convention of the Communist Party:

"The national committee within a period of no more than 30 days after the adjournment of this convention, shall appoint a full-time director of youth affairs and establish a functioning national commission on youth affairs composed of youth and adult members. This commission, amongst other things, shall issue a regular national party youth bulletin. We urge that in a brief period of time those State committees which have not done so, shall establish political and organizational responsibility for youth affairs."

About a year ago the Committee on Un-American Activities began a series of hearings on Communist activities and propaganda among youth groups. Let me recite to you some of the factual material developed in these hearings.

Officials of the U.S. Bureau of Customs of the U.S. Treasury Department displayed to the committee samples of typical Communist propaganda periodicals published abroad and sent into the United States destined to student groups in schools and colleges. These officials testified that every school and college in the United States is directly or indirectly the recipient of some of these Communist propaganda publications. A spot check of Communist propaganda destined to schools and colleges in this country was made at New Orleans which is one of the lesser ports of entry of approximately 40 ports through which Communist propaganda is entering the country. The result of the spot check made at New Orleans showed that at least 300,000 packages of Communist propaganda destined to schools and colleges in the United States were processed there during a 12-month period and that from 5 to 15 separate publications were contained in each package.

This propaganda emanates from two major international Communist-controlled youth organizations, the World Federation of Democratic Youth, and the International Union of Students. These organizations publish at least 40 different periodicals which are disseminated regularly in schools and colleges over the world, including the United States. None of these publications bears labeling as Communist propaganda, however, in accordance with the requirements of the Foreign Agents Registration Act.

In the United States, tied in with each of these two major international Communist-controlled youth organizations are student groups which, wittingly or unwittingly, are conduits for Communist poison.

Running parallel with this Communist operation there are now infiltrating among youth groups, trained Communist agents under the immediate direction of Hyman Lumer, educational director of the Communist Party. These Communist agents, who are masters of perversion, attempt to turn the legitimate concern of our young people for peace, freedom, civil liberties and the whole area of humanitarianism into an acceptance of the Communist program which is served up under false labels. At the same time, with diabolical cleverness, these Communist agents arouse student groups into an attack against law enforcement agencies of the Government which are portrayed as instruments of oppression.

And let me say, that in this program of Communist subversion, the plain fact is that Communist agents are frequently assisted by the professors in the classrooms. And the American Association of University Professors has a consistent record of censorship against schools and colleges which fire Communist instructors.

"Wait * * * I refuse to accept an award from an organization I cannot respect." So said young Stephen Bayne recently in refusing an American Legion Post citizen award. Those of us who are constantly engaged in surveying the operations of the Communist conspiracy and the impact which this monolithic force has on all segments of our society were not shocked at this statement, because the brainwashing technique of the Communists has not been confined to prisoners of war or to the leading of students in rioting. I dare suggest that the statement by young Bayne is only a symptom of a disease which results from a deliberate infection.

We are today concerned about building more schoolrooms with better equipment for training our youth, but our curriculums are almost void of training regarding the machinations and operations of the world force which threatens freedom everywhere. I have frequently observed that the most appalling fact of our time is our own ignorance respecting the Communist menace and we are beginning to reap the harvest of our ignorance.

The American Legion is to be commended on its back-to-God program which emphasizes basic beliefs in the Divine and in spiritual values. But this is only a start. If the forces of freedom are to survive on this globe, we need desperately to inculcate in our youth the virtues of patriotism and a recognition simply that treason is wrong. We need to reemphasize the sources of strength of our own free society and then we need to present to our youth a critical study of communism, its ideology, philosophy and communism in action. This analytical study of communism which I suggest must not, of course, be confused with advocacy of Communist doctrine. In other words, I am suggesting study of communism in the same manner that the criminologist studies crime—not for the purpose of emulating the criminals, but in order to cope with crime.

The Committee on Un-American Activities and your own Americanism Commission of the Legion, as well as other non-governmental patriotic organizations are constantly publishing authoritative reports and other documentation which are excellent source material.

This program which I have outlined might well be a pilot project to be undertaken by the American Legion of Texas, to urge and assist every school and college in this State to equip its students to cope with the greatest challenge in history—a challenge which we shall either meet or perish.

Report From Washington by Stuyvesant Wainwright

EXTENSION OF REMARKS

OF

HON. STUYVESANT WAINWRIGHT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 30, 1960

Mr. WAINWRIGHT. Mr. Speaker, this is my eighth annual report from Washington to the citizens of Long Island's First District. It is my custom each year to submit this report so that a record of the year's congressional business is available. At this point I ask your permission, Mr. Speaker, to address myself directly to the men and women of Suffolk and Nassau Counties.

The simplest breakdown is to divide this report into two parts: First, a legislative report on this 86th Congress, properly labeled the "Wait and See" Congress; the second part will deal with personal service rendered in the district and to the individual.

I. LEGISLATIVE SECTION

In 1958 at the conclusion of the 85th Congress I wrote in this report that the 85th had been a good session. That also was a Democrat-controlled Congress; but in 1957 and 1958 the Democrats cooperated in the national interest. It was not a major election year. Unfortunately, the same cannot be said for the present 86th Congress. With presidential elections in the offing, the Congress—with a

2-to-1 Democrat majority—turned from statesmanship to gamemanship.

The Democratic leadership—the Johnson-Rayburn team—failed to take action on issues which they were later to incorporate in their party platform. They rejected all major requests made by President Eisenhower in January. A few of these requests were: liberalization of the immigration laws, a farm bill designed to eliminate "giveaway," much needed additional Federal judgeships, new conservation proposals, a sound minimum wage, health insurance for the aged, a housing bill, school construction aid, a depressed area assistance bill, and proper financing of the interstate highway program. With legislation floundering, Congress recessed on July 2 for the hoopla of party conventions. Needed bills gave way to balloon flying, histrionics, and portly cheer leaders reviving the "old college spirit." After 10 days of hearts and flowers, 6 weeks of recess and NIXON and KENNEDY both nominated on the first ballot, Congress reassembled.

The Senate returned on August 8 and proceeded to accuse President Eisenhower of being "silly" to expect 21 measures to be passed in 4 weeks. Yet the President had been urging 18 of these measures for 2 years. The Senate then turned to discussing which presidential nominee had been absent from the Senate on more occasions. A crescendo came when 3 hours of oratory was delivered at the celebration of a Senator's 50th birthday. All this momentous drama played to a sellout audience in the galleries. Occasionally a young spectator would lean on the rail under the approving eye of a parent, displaying a "Vote for ——" banner until an usher would smilingly reprove this offender to senatorial dignity.

The House convened on August 15 and in an entire week worked the grand total of 1 hour and 12 minutes. The Democratic leader did not even bother to show up in Washington. The reason the House loafed through the week of August 15 is the fact that KENNEDY and JOHNSON in the Senate could not unify their party—66 Democrats, 34 Republicans—behind the Democratic Party platform.

The reason the Senate twiddled its thumbs in political quandary lay in ineffectual leadership. During the final 2 weeks of the rump session, Congress could only manage a compromise measure on care for the aged. Of the 21 needed bills advocated by the President, 4 were enacted—2 of these being the ratification of the Antarctica Treaty and the appropriation of funds for Latin American aid. Of the five "must" issues in the Democratic program, none was successful. The Kennedy bills on minimum wage and care for the aged were defeated by his own party.

The lesson here is that "wishful thinking" does not enact legislation. An old Democrat, Columnist Walter Lippmann, summed it up a few days ago as follows:

It is plain enough that the Democrats would be better off if there had been no August session of Congress. Senator JOHNSON and Speaker RAYBURN, who engineered it, made a miscalculation. They supposed that the session would help JOHNSON to win the presidential nomination and then to shine in August as the great legislative operator. In fact, with President Eisenhower in the White House, the odds were overwhelmingly against any Democratic success. For while the Democratic majority can say "No" to the President, and they did, a Republican President can say "No" to a Democratic majority, and he did. In our congressional system positive political achievement in a very short session against the will of the President is impossible.

And the lead article of the New York Times of August 31st:

The end of efforts for a minimum wage bill signaled the failure of the Democratic congressional leadership to pass any of the three major bills it had hoped for when the Senate reconvened August 8—a social security medical-care bill for the aged, a school construction measure, and a broadening of minimum wage legislation.

That the Democratic leaders failed, even with their immense majority, can mean only one thing. The Democratic majority refused to buy the Kennedy legislative proposals. Senator KENNEDY already feels that this congressional rejection of his program may cause his defeat in November.

II. PERSONAL SERVICE RENDERED TO THE DISTRICT AND TO THE INDIVIDUAL

Due to the incredible population growth of the First District—the 1960 census shows a count of approximately 900,000 persons—this personal service phase of congressional work has increased almost beyond the physical ability of my small staff and myself. It is virtually impossible for me to spend as much time on each case as I would like. However, you may be sure that I examine each individual problem to make certain that proper action is taken. I am especially proud of my professional, nonpolitical staff who have worked long, extra hours to serve you.

Of this year's several hundred military cases, over 94 percent have been successfully resolved. A great many people think this type of work is easy for a Congressman. It just is not so. For example, the Congressman can never himself authorize a "compassionate" reassignment or a "transfer." The decision is up to the military service. All the Representative can do is to make sure all the facts are reviewed. Unfortunately, it is often true that the armed services get bogged down in the tremendous volume of peacetime administration. Request forms might lie weeks in a sergeant's "in" box. A Congressman stimulates the machinery, cuts the redtape.

The annual review of our files reveals over 100 veterans cases completed, 267 passports and citizenship cases expedited, and 136 visa cases handled and processed. This is over three times the number received by the average legislator. The visa problems we receive are extremely complicated. One individual case, successful this year, was actually initiated early in 1955. It concerned a young man of Polish descent, born in this country. He was taken to Poland as a child by his parents and thus acquired dual citizenship. Having remained in Poland by necessity during the war, his chance to come to the United States finally arrived in 1955. Naturally, this was within his right as an American citizen. The problem arose when the Polish, Communist-controlled government, ignoring his American birth, claimed him as a national. After 5 years of negotiation with the State Department, our Embassy in Warsaw, the Immigration Service, and relatives in the United States, I am happy to report that the man and his family have arrived safely in this country. Incidentally the file of correspondence in this case is over 4 inches thick. It is also most gratifying to have been of assistance in having several foreign-born orphans admitted for adoption by couples in Suffolk and Nassau—five from Korea, two from Italy, two from Germany, and one each from Greece and Norway. Miss Alison Anderson of my staff has done unselfish service on all these cases.

Another service of this office is to fulfill requests for everything from a 400-foot Navy destroyer, the U.S.S. *Myles S. Fox*, for Port Jefferson's Fourth of July celebration, to simply a copy of a House resolution. Perhaps the bulkiest item in this category was the many flags that were flown at my request over the Capitol this Fourth of July. As a matter of interest, these flags will some day be collectors' items in that they were certified by the Architect of the Capitol as having been flown on the first day our 50-star flag became official. Since it is rather unlikely that there will be any additional States admitted to the Union for many years, or possibly ever, this event is historic. All flags so flown are paid for by the constituent.

As in past years, we have filled our entire quota to each of the service academies, including six at the Merchant Marine Academy at Kings Point. Perhaps the most important aspect of the service function is to keep you, the citizen, informed. This report is but one method. Each week while Congress is in session I submit to our weekly newspapers a column for publication. I also broadcast a weekly radio program over a number of local stations. Both of these efforts are designed to give you a better insight into the workings of our Government. This is based on my fundamental belief that a Representative is responsible to the people. What he does or fails to do in Washington is in the last analysis your concern. Perhaps the high point of this year's radio programs was the interview with Captain Edward Beach, a distinguished friend and skipper of the Navy's atomic-powered submarine, *Triton*, immediately after the return from his epic, globe-encircling voyage.

Another important area of service is to provide you with proper postal facilities. In this instance it is necessary to repeat the fact that Suffolk and Nassau Counties are colossal "growth regions." I would estimate that an average of four

letters a day leave my office on some postal matter. This year we have been especially fortunate in acquiring a record of 15 new post offices—Babylon, Center Moriches, East Hampton, East Islip, East Patchogue, East Setauket, Massapequa, Montauk, Shelter Island, Greenport, Shirley, East Quogue, Farmingdale, Farmingville, and Shoreham. In addition, Amityville now has "foot delivery"; Cutchogue, Farmingdale, and Greenport all have new R.F.D. routes; Port Jefferson will have outgoing mail on Sunday; Sag Harbor has delivery service to North Haven; and Westhampton Beach has had city delivery approved. Each one of these items represents many man-hours in Washington, especially on the part of Mr. Ralph A. Patterson of my staff.

As in past years there have been several million dollars in Federal Housing Administration loans and Defense Department contracts awarded to Long Island. This fact in itself is a mark of economic growth and national prosperity. The Army Corps of Engineers reports over $5 million in construction in Suffolk alone. While on the subject of the engineers, I might mention that their work at Fire Island Inlet has not been satisfactory. Guided by the New York Park Commission, they failed to provide the type of inlet channel to give maximum safety. Several tragedies have occurred. All that they did was to put sand on the park commission beach. All my attempts to keep this from happening were to no avail. At the present time I have asked for a complete review of the project. This along with my beach erosion program must be constantly watched or else the State park commission will force deviation.

My personal economic prediction for Long Island, highly accurate over the past 8 years, is extremely optimistic for the next 6 months. Despite every effort of partisan Democratic politics to claim that we are in the midst of a depression, the proof contained in facts and figures continues to provide evidence of a healthy, expanding economy.

Finally, through our efforts the Federal Aviation Agency has agreed to locate a new $41 million air route traffic control center near MacArthur Airport in Islip, as well as to relocate a facility at Montauk.

As you know, I hold regular office hours in Huntington and Wainscott on alternate weekends to hear your problems and suggestions. In Washington I welcome your mail. An effective democracy must involve, by its very nature, the interest and opinions of all its member citizens. It is a pleasure and an honor to serve you in Congress.

Mr. Speaker, I thank you for this opportunity to address my annual report to the people of the First District of New York.

SENATE

WEDNESDAY, AUGUST 31, 1960

The Senate met at 10 o'clock a.m., and was called to order by the President pro tempore.

Rev. Ronald A. Millian, minister, St. Mark's Methodist Church, Rockville, Md., offered the following prayer:

Holy and great God of all nations and peoples, we bow here in humble reverence before Thee, asking Thy divine blessing for the living of this day. Make us spiritually sensitive, that we may clearly discern Thy divine leading. Open our hearts, that we may accept Thy truth. Bestow upon us moral courage, that we fail not to speak and act for right and righteousness.

May we during this day be worthy of this great Nation founded upon Thy moral and spiritual laws. May there go from these legislative halls such acts and messages of love and understanding that all the world will be brought closer to a oneness of mind and unity of purpose. Help us to be true to the trust placed in us, that together we may build Thy kingdom on earth. This we ask in Thy holy name. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, August 30, 1960, was dispensed with.

ROUTINE MORNING BUSINESS

Mr. JOHNSON of Texas. Mr. President, we shall now have the usual morning hour.

Mr. MANSFIELD. Mr. President, is there any morning business?

The PRESIDENT pro tempore. Morning business is in order: Reports of committees, the introduction of bills and joint resolutions, the submission of concurrent and other resolutions.

If there are no concurrent resolutions, morning business is closed.

Mr. DIRKSEN. Mr. President, before morning business closes, I wanted to be sure that the Senator from New York would be here.

I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Illinois will state it.

Mr. DIRKSEN. I must confess that I could not hear what the Chair said shortly after the prayer. If we did get by the point for the introduction of bills, I would respectfully ask unanimous consent that that be vacated, so that we could go back to that point in the procedure, in case the Senator from New York had something that he wanted to offer.

The PRESIDENT pro tempore. Is there objection?

Mr. RUSSELL. Mr. President, reserving the right to object, I certainly will accept at face value the statement of the distinguished minority leader that he did not hear the Chair, because I myself have had a little trouble, on occasion, hearing what has transpired here.

But this is a rather unusual procedure. We have had demand after demand that the Senate adjourn, so that we would have a morning hour. The Senate did adjourn. We had a morning hour. It happened that I did hear the Chair call the order for the introduction of new business. No Senator appeared on the scene to introduce any new legislation or to tender any motions of any kind.

I do not wish to be captious about it. The minority leader, the distinguished Senator from Illinois [Mr. DIRKSEN], has stated in his place that he did not hear the order for the introduction of new matter, under the rule.

The PRESIDENT pro tempore. The Chair said the introduction of concurrent and other resolutions was in order at that stage.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from New York will state it.

Mr. JAVITS. Is that as of right, or is it by unanimous consent?

The PRESIDENT pro tempore. As a matter of right.

Mr. JAVITS. As a matter of right. No unanimous consent is required? Is that correct?

The PRESIDENT pro tempore. That is correct.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on today, August 31, 1960, the President had approved and signed the act (S. 2830) to amend the Library Services Act in order to extend for 5 years the authorization for appropriations, and for other purposes.

CONVENTION AND RECOMMENDATION CONCERNING WAGES, HOURS OF WORK ON BOARD SHIP, AND MANNING, ADOPTED BY INTERNATIONAL LABOR CONFERENCE—MESSAGE FROM THE PRESIDENT

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which, with the accompanying papers,

was referred to the Committee on Foreign Relations.

To the Senate of the United States:

I transmit herewith an authentic text of a convention (No. 109) concerning wages, hours of work on board ship, and manning, adopted by the International Labor Conference at its 41st (maritime) session, held at Geneva, on May 14, 1958, and request that the Senate give its advice and consent to ratification of the convention, exclusive of the part dealing with wages. In accordance with the obligations of the Government of the United States as a member of the International Labor Organization I transmit also, for such action as may be appropriate, an authentic text of a recommendation (No. 109) concerning wages, hours of work on board ship, and manning, also adopted at the 41st (maritime) session of the International Labor Conference.

In connection with consideration of the convention and recommendation, I am enclosing the report of the Acting Secretary of State with respect thereto, together with a copy of a letter from the Secretary of Labor to the Secretary of State, expressing the coordinated view of the interested departments and agencies of the executive branch of the Government with respect to the convention and recommendation.

Convention No. 109 provides that a member nation of the International Labor Organization may ratify the convention without ratifying that part of it dealing with minimum wage standards (pt. II of the convention). In accordance with the recommendation of the interested departments and agencies, I request that the Senate give its advice and consent to ratification of Convention No. 109, exclusive of part II, subject to the understanding regarding payment of overtime as set forth in the report of the Acting Secretary of State.

No legislation is recommended with regard to Convention No. 109 or recommendation No. 109 inasmuch as U.S. law and practice meet or exceed their terms.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *August 31, 1960.*

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed the following bills of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 1545. An act to amend the Federal Aviation Act of 1958 so as to authorize elimination of a hearing in certain cases under section 408;

S. 1740. An act to amend section 202(b) of the Communications Act of 1934, in order to expand the Federal Communications Commission's regulatory authority under such section;

S. 3533. An act to protect farm and ranch operators making certain land use changes under the Great Plains conservation program against loss of acreage allotments; and

S. 3772. An act to amend certain provisions of the Investment Company Act of 1940, as amended.

The message also announced that the House had passed the following bills of the Senate, each with amendments, in which it requested the concurrence of the Senate:

S. 1764. An act to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard; and

S. 1964. An act to amend the act requiring certain common carriers by railroad to make reports to the Interstate Commerce Commission with respect to certain accidents in order to clarify the requirements of such act.

The message further announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H.R. 10341. An act to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health;

H.R. 10586. An act to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corp. of the Church of Jesus Christ of Latter-day Saints;

H.R. 11917. An act to authorize and direct the Secretary of Agriculture to convey certain lands in Lassen County, Calif., to the city of Susanville, Calif.;

H.R. 12491. An act to authorize the Secretary of Agriculture to convey certain lands in the State of Wyoming to the county of Fremont, Wyo.;

H.R. 12503. An act to provide for the conveyance to Carolina Freight Carriers Corp., a corporation of the State of North Carolina, of certain lands and any improvements thereon located in Bibb County, Ga.;

H.R. 12622. An act to amend chapter 85 of title 28 of the United States Code relating to the jurisdiction of the U.S. district courts, and for other purposes;

H.R. 13062. An act to amend the Sugar Act of 1948, as amended;

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended;

H.R. 13067. An act to amend Public Law 86-619, an Act to make uniform provisions of law with respect to the terms of office of the members of certain regulatory agencies, approved July 12, 1960;

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes; and

H.J. Res. 723. Joint resolution extending an invitation to the Federation Aeronautique Internationale to hold the 1962 world sport parachuting championships at Orange, Mass.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 1066. An act to revise the boundaries and change the name of Fort Donelson National Military Park, and for other purposes;

S. 1214. An act to amend the Act of March 11, 1948 (62 Stat. 78), relating to the establishment of the De Soto National Memorial, in the State of Florida;

S. 1870. An act to provide for examination, licensing, and for regulation of practical nurses, and for practical nursing education in the District of Columbia, and for other purposes;

S. 2131. An act to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia approved May 25, 1954, as amended;

S. 2575. An act to provide a health benefits program for certain retired employees of the Government;

S. 2633. An act to amend the Foreign Service Act of 1946, as amended, and for other purposes;

S. 3416. An act to provide for the restoration to the United States of amounts expended in the District of Columbia in carrying out the Temporary Unemployment Compensation Act of 1958;

S. 3648. An act to authorize the Commissioners of the District of Columbia on behalf of the United States to transfer from the United States to the District of Columbia Redevelopment Land Agency title to certain real property in said District;

S. 3727. An act to authorize the bonding of persons engaging in the home improvement business, and for other purposes;

S. 3834. An act to increase the maximum amount which may be borrowed by the District of Columbia for use in the construction and improvement of its sanitary and combined sewer systems, and for other purposes;

S. 3835. An act to authorize the District of Columbia Civil War Centennial Commission to plan and carry out in the District of Columbia civic programs in commemoration of the 100th anniversary of the Civil War; to authorize the Commissioners of the District of Columbia, the Secretary of the Interior, and the Secretary of Defense to make certain property of the District and of the United States available for the use of such Commission; to authorize the said Commissioners to make certain regulations and permit certain uses to be made of public space, and for other purposes;

S. 3867. An act to exempt from taxation certain property of the National Guard Association of the United States in the District of Columbia;

H.R. 3313. An act to amend section 200 of the Soldiers and Sailors Civil Relief Act of 1940 to permit the establishment of certain facts by a declaration under penalty of perjury in lieu of an affidavit, and for other purposes;

H.R. 4826. An act for the relief of Arthur E. Collins;

H.R. 6597. An act to revise the boundaries of Dinosaur National Monument and provide an entrance road or roads thereto, and for other purposes;

H.R. 6871. An act to amend title III of the Public Health Service Act, to authorize project grants for graduate training in public health and for other purposes;

H.R. 7758. An act to improve the administration of oversea activities of the Government of the United States, and for other purposes;

H.R. 10921. An act to amend section 35 of chapter III of the Life Insurance Act for the District of Columbia; and

H.R. 12326. An act making appropriations for civil functions administered by the Department of the Army, certain agencies of

the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1961, and for other purposes.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated:

H.R. 10586. An act to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corp. of the Church of Jesus Christ of Latter-day Saints; to the Committee on Interior and Insular Affairs.

H.R. 11917. An act to authorize and direct the Secretary of Agriculture to convey certain lands in Lassen County, Calif., to the city of Susanville, Calif.; and

H.R. 12491. An act to authorize the Secretary of Agriculture to convey certain lands in the State of Wyoming to the county of Fremont, Wyo.; to the Committee on Agriculture and Forestry.

H.R. 12503. An act to provide for the conveyance to Carolina Freight Carriers Corp., a corporation of the State of North Carolina, of certain lands and any improvements thereon located in Bibb County, Ga.; to the Committee on Public Works.

H.R. 13066. An act to amend section 4(a) of the Securities Exchange Act of 1934, as amended; to the Committee on Banking and Currency.

H.R. 13067. An act to amend Public Law 86-619, an act to make uniform provisions of law with respect to the terms of office of the members of certain regulatory agencies, approved July 12, 1960; to the Committee on Interstate and Foreign Commerce.

H.J. Res. 704. Joint resolution to remove copyright restrictions upon the musical composition "Pledge of Allegiance to the Flag," and for other purposes; to the Committee on the Judiciary.

H.R. 13062. An act to amend the Sugar Act of 1948, as amended; to the Committee on Finance.

APPOINTMENT OF MEMBER OF DISTRICT OF COLUMBIA REDEVELOPMENT LAND AGENCY

The PRESIDENT pro tempore laid before the Senate a letter from the Acting Secretary, Board of Commissioners, District of Columbia, transmitting, pursuant to law, the appointment by the Commissioners of the District of Columbia of Neville Miller as a member of the District of Columbia Redevelopment Land Agency which, with the accompanying papers, was referred to the Committee on the District of Columbia.

SHIPMENTS OF OIL TO CUBA—RESOLUTION

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the RECORD, a resolution adopted by the board of directors of the American Hellenic Congress, relative to the shipments of oil to Cuba.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE BOARD OF DIRECTORS OF THE AMERICAN HELLENIC CONGRESS—HON. DEAN ALFANGE OF NEW YORK, CHAIRMAN—SHIPMENTS OF OIL TO CUBA—GREEK SHIPOWNERS OF NEW YORK

Resolved, That the American Hellenic Congress commend Manuel E. Kulukundis, president of the Greek Shipowners New York Committee, and the Greek shipowners of the United States for their exemplary patriotism and loyalty to the cause of freedom in placing the great and aggregate interests of the West above personal consideration; and be it further

Resolved, That the American Hellenic Congress call upon all Greek shipowners the world over, irrespective of their citizenship and the flags they fly, to emulate the example of the Greek shipowners of the United States and to refrain from:

1. Shipping oil to Cuba directly on their own tankers, and

2. Generally from chartering their tankers to Russia since such charters would free Russia's own tankers for oil transportation to Cuba; and be it further

Resolved, That the officers of the American Hellenic Congress be authorized to implement this appeal in every feasible way to the end that the attempt by the Soviet Union and Cuba to establish a Communist-controlled base in the Western Hemisphere be defeated in the interest of freedom and democratic survival.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service, without amendment:

H.R. 7810. An act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement Act and the Annual and Sick Leave Act of 1951 (Rept. No. 1936);

H.R. 8424. An act to amend section 505 of the Classification Act of 1949 with respect to positions in the Library of Congress (Rept. No. 1937); and

H.R. 12043. An act to amend sections 22, 23, and 24, title 13, United States Code, and for other purposes (Rept. No. 1938).

By Mr. MURRAY, from the Committee on Interior and Insular Affairs, with an amendment:

H.R. 383: An act to authorize the annexation of certain real property of the United States by the city of Wyandotte, Mich. (Rept. No. 1939).

REPORT OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES—FEDERAL EMPLOYMENT AND PAY

Mr. BYRD of Virginia. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, I submit a report on Federal employment and pay for the month of July 1960. In accordance with the practice of several years' standing, I ask unanimous consent to have the report printed in the RECORD, together with a statement by me.

There being no objection, the report and statement were ordered to be printed in the RECORD, as follows:

FEDERAL PERSONNEL IN EXECUTIVE BRANCH, JULY 1960 AND JUNE 1960, AND PAY, JUNE 1960 AND MAY 1960

PERSONNEL AND PAY SUMMARY

(See table I)

Information in monthly personnel reports for July 1960 submitted to the Joint Committee on Reduction of Nonessential Federal Expenditures is summarized as follow:

Total and major categories	Civilian personnel in executive branch			Payroll (in thousands) in executive branch		
	In July numbered	In June numbered	Increase (+) or decrease (−)	In June was	In May was	Increase (+) or decrease (−)
Total [1]	[2] 2,382,551	2,382,674	−123	$1,078,964	$1,082,424	−$3,460
Agencies exclusive of Department of Defense	1,339,719	1,335,454	+4,265	582,513	595,872	−13,359
Department of Defense	1,042,832	1,047,220	−4,388	496,451	486,552	+9,899
Inside the United States	2,224,978	2,224,632	+346			
Outside the United States	157,573	158,042	−469			
Industrial employment	565,406	559,715	+5,691			
Foreign nationals	176,118	177,416	−1,298	23,053	[3] 21,112	+1,941

[1] Exclusive of foreign nationals shown in the last line of this summary.

[2] Includes 3,013 temporary employees (enumerators, clerks, supervisors, crew leaders, etc.) of the Department of Commerce engaged in taking the 18th Decennial Census as compared with 16,174 in June.

[3] Revised on basis of later information.

Table I breaks down the above figures on employment and pay by agencies.

Table II breaks down the above employment figure to show the number inside the United States by agencies.

Table III breaks down the above employment figures to show the number outside the United States by agencies.

Table IV breaks down the above employment figures to show the number in industrial-type activities by agencies inside and outside the United States.

Table V shows foreign nationals by agencies not included in tables I, II, III, and IV.

TABLE I.—*Consolidated table of Federal personnel inside and outside the United States employed by the executive agencies during July 1960, and comparison with June 1960, and pay for June 1960, and comparison with May 1960*

Department or agency	Personnel				Pay (in thousands)			
	July	June	Increase	Decrease	June	May	Increase	Decrease
Executive departments (except Department of Defense):								
Agriculture	100,263	98,702	1,561		$40,327	$37,397	$2,930

STATEMENT OF SENATOR BYRD OF VIRGINIA

The cost of civilian employment in the executive branch of the Federal Government reached its all-time high in fiscal year 1960 which ended June 30. The regular Federal payroll exceeded $12.6 billion, averaging more than $1 billion a month for the second consecutive year.

The 12 months' total was $12,637 million plus $268 million in U.S. pay for foreign nationals not on the regular rolls. The Federal Pay Act of 1960 was not effective until July 1, 1960, therefore does not reflect in these figures.

The payroll cost for employment by civilian agencies in fiscal year 1960 was $6,877 million and for civilian employment in military agencies was $5,760 million.

Figures by fiscal years since 1955 follow:

Annual Federal expenditures for civilian payroll, executive branch, fiscal years 1955–60

[In millions of dollars]

Fiscal year	Civilian agencies	Department of Defense [1] (civilian employment)	Total
1955	$4,921	$4,700	$9,621
1956	5,359	5,167	10,526
1957	5,602	5,399	11,000
1958	6,040	5,415	11,455
1959	6,564	5,766	12,330
1960	6,877	5,760	12,637

[1] Excludes U.S. pay for foreign nationals not on regular rolls.

The figures include payroll for temporary employees of the Commerce Department engaged in taking the 18th decennial census, estimated by the Bureau of the Budget at $64 million during fiscal year 1960.

Both employment and payroll increased in fiscal year 1960. Employment by executive branch agencies during fiscal year 1960 (ended June 30) averaged 2,386,345 as compared with an average of 2,352,242 in the previous year. Employment by civilian agencies averaged 1,331,605, an increase of 65,039 as compared with an average of 1,266,566 in the previous year. Civilian employment by military agencies averaged 1,054,740, a decrease of 30,936 as compared with an average of 1,085,676 in the previous year.

Average employment by fiscal years since 1955 follows:

Average civilian employment by Federal agencies, executive branch, fiscal years 1955–60

Fiscal year	Civilian agencies	Department of Defense [1] (civilian employment)	Total
1955	1,182,663	1,184,627	2,367,290
1956	1,189,458	1,174,584	2,364,042
1957	1,219,835	1,174,263	2,394,099
1958	1,242,941	1,104,403	2,347,344
1959	1,266,566	1,085,676	2,352,242
1960	1,331,605	1,054,740	2,386,345

[1] Excludes foreign nationals not on regular rolls (averaging 180,806 during fiscal year 1960).

JULY 1960 EMPLOYMENT

Monthly reports on personnel certified to the committee showed civilian employment by executive agencies of the Federal Government during July totaled 2,382,551 a decrease of 123 from the previous month.

The largest decrease in civilian agency employment was reported by the Department of Commerce with 13,155. Civilian agencies reporting the larger increases were Post Office Department with 4,789, Treasury Department with 1,562, Agriculture Department with 1,561, Veterans' Administration with 1,173, Department of Health, Education, and Welfare with 957, General Services Administration with 784, and Interior Department with 531. The increases in the Departments of Agriculture and Interior were largely seasonal.

(The July figure reflects a decrease of 13,161 in Commerce Department temporary employees engaged in taking the 18th Decennial Census. In July temporary Census employees totaled 3,013, including: 1,333 enumerators, 1,297 crew leaders, and 383 clerks and others.)

Total employment inside the United States in July was 2,224,978 an increase of 346 as compared with June. Total employment outside the United States in July was 158,042, a decrease of 469 as compared with June.

Employment by civilian agencies in July totaled 1,339,719, an increase of 4,265 over June. Civilian employment by military

agencies in July totaled 1,042,832, a decrease of 4,388 as compared with June.

FOREIGN NATIONALS

The total of 2,382,551 civilian employees certified to the committee by executive agencies in their regular monthly personnel reports includes some foreign nationals employed in U.S. Government activities abroad, but in addition to these there were 176,118 foreign nationals working for U.S. agencies overseas during July who were not counted in the usual personnel report. The number in June was 177,416. A breakdown of this employment for July follows:

Country	Total	Army	Navy	Air Force	National Aeronautics and Space Administration
Australia	1				1
England	3,214			3,214	
France	21,839	17,735	4	4,100	
Germany	81,088	67,849	56	13,183	
Japan	59,763	20,655	15,655	23,453	
Korea	6,177	6,177			
Morocco	3,355		837	2,518	
Netherlands	41			41	
Norway	24			24	
Saudi Arabia	1			1	
Trinidad	615		615		
Total	176,118	112,416	17,167	46,534	1

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BIBLE (by request):

S. 3917. A bill to provide for apportioning the expense of maintaining and operating the Woodrow Wilson Memorial Bridge over the Potomac River from Jones Point, Va., to Maryland; to the Committee on the District of Columbia.

By Mr. JAVITS:

S. 3918. A bill to assist business enterprises, communities, and individuals to make necessary adjustments required by changed economic conditions resulting from the trade policies of the United States; to the Committee on Finance.

(See the remarks of Mr. JAVITS when he introduced the above bill, which appear under a separate heading.)

By Mr. MORSE:

S. 3919. A bill for the relief of Helen Choi Bratton; to the Committee on the Judiciary.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mr. CARROLL:

S. 3920. A bill for the relief of Ronald Perrin; to the Committee on the Judiciary.

By Mr. HARTKE (for himself and Mr. CAPEHART):

S. 3921. A bill to authorize certain property located in the State of Indiana to be made available for use by the Clark County 4-H Club, Inc., Clark County, Ind.; to the Committee on Armed Services.

(See the remarks of Mr. HARTKE when he introduced the above bill, which appear under a separate heading.)

By Mr. YARBOROUGH:

S. 3922. A bill for the relief of the State of Texas; to the Committee on the Judiciary.

By Mr. SALTONSTALL (for himself and Mr. KENNEDY):

S. 3923. A bill to amend the Tariff Act of 1930, as amended, with respect to the duties on hair of the Cashmere goat; to the Committee on Finance.

(See the remarks of Mr. SALTONSTALL when he introduced the above bill, which appear under a separate heading.)

By Mr. HARTKE:

S.J. Res. 223. Joint resolution to provide for the compilation of rubber footwear import statistics by type of footwear; to the Committee on Finance.

(See the remarks of Mr. HARTKE when he introduced the above joint resolution, which appear under a separate heading.)

RESOLUTIONS

DISCHARGE OF COMMITTEE ON THE JUDICIARY FROM FURTHER CONSIDERATION OF S. 958, RELATING TO SCHOOL DESEGREGATION PROGRAMS

Mr. JAVITS submitted a resolution (S. Res. 386) discharging the Committee on the Judiciary from further consideration of S. 958, relative to school desegregation programs; which was ordered to lie over under the rule.

(See the above resolution printed in full when submitted by Mr. JAVITS, which appears under a separate heading.)

RESTRICTIONS ON IMPORTATION OF MILITARY SURPLUS FIREARMS

Mr. DODD submitted a resolution (S. Res. 387) favoring restrictions on the importation of military surplus firearms, which was referred to the Committee on Foreign Relations.

(See the above resolution printed in full when submitted by Mr. DODD, which appears under a separate hearing.)

SURVEY RELATING TO FEDERAL AID FOR INSTITUTIONS OF HIGHER LEARNING

Mr. YARBOROUGH (for himself and Senators HILL, MURRAY, KENNEDY, MCNAMARA, MORSE, CLARK, RANDOLPH, WILLIAMS of New Jersey, BURDICK, CASE of New Jersey, JAVITS, PROUTY, HART, GORE, PROXMIRE, ANDERSON, MANSFIELD, KUCHEL, BYRD of West Virginia, CARROLL, and ENGLE) submitted a resolution (S. Res. 388) favoring a survey looking to Federal aid for institutions of higher learning, which was referred to the Committee on Labor and Public Welfare.

(See the above resolution printed in full when submitted by Mr. YARBOROUGH, which appears under a separate heading.)

NATIONAL TRADE POLICY ACT OF 1960

Mr. JAVITS. Mr. President, I introduce, for appropriate reference, a comprehensive trade bill which would establish a national export-import policy geared to increased U.S. participation in world trade as an essential element in the maintenance of a sound U.S. economy and healthy international relations with industrial nations and underdeveloped areas.

Mr. President, the National Trade Policy Act of 1960 includes a number of marked innovations not contained in other adjustment assistance measures which set up a national program to provide assistance to businesses, individual workers, and communities, so that they can adjust to the changed economic conditions which may result from the expected increase in world trade. A distinction of prime importance made by this bill is between serious injury from foreign imports to an entire industry or part of it—now dealt with by the Reciprocal Trade Act—and serious injury to a business, community, or worker.

Today, the Tariff Commission may not recommend increased import restrictions unless there is actual or threatened serious economic injury to an entire industry, although there is increasing sentiment that it should be able to do so. However, such action could provide a windfall to the competitive firms in the industry which though not presently affected, would find themselves operating under the cover of additional tariff protection—and it would not help less efficient firms to become more competitive. My bill would make those hurt by increased imports eligible for aid whether or not the Tariff Commission returns a finding of serious injury for the entire industry. Also, it amends the Trade Agreements Act to authorize the President to place a time limit of not more than 7 years on any additional import restrictions which may be adopted upon the recommendation of the Tariff Commission, and to reduce such additional restrictions on a specified gradual basis.

U.S. trade policy is going to be an issue of top priority before the Congress next session. For many months, protectionist pressures have been steadily on the rise at a rate and in a volume which is unparalleled during my 14 years in the Congress, and this despite the fact that U.S. exports are heading toward a record, or near-record high in 1960 of more than $19 billion. The latest figures show that U.S. imports are not expected to exceed $15.5 billion for this year. Nevertheless, the protests of companies and industries that they are being seriously injured by low-priced foreign imports continue to mount and they must be respected.

At my request, the U.S. Tariff Commission has just completed a special study of these intensified pressures. Between 1955 and 1960, written briefs filed with the Committee for Reciprocity Information by companies, trade associations, and unions in opposition to tariff reductions increased 171 percent, and more briefs are still flowing in. Those applicants requesting increases in U.S. import duties have increased by 340 percent in the same 5-year span. A breakdown indicates that a majority of firms in textiles and in metals manufactures have been strongly opposed to any tariff reductions on their products and have been joined in their protests by a substantial number of chemical firms.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a table of briefs received in connection with trade-agreement negotiations, 1960–61, compared to 1955–56.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Briefs received in connection with trade-agreement negotiations, 1960–61 compared to 1955–56

	Firms, [1] total number	Briefs, [2] total number	Firms [1]		Briefs [2]				
			Opposing reduction	Favoring reduction	Opposing reduction	Percent of total	Requesting U.S. duty increase; included in number opposing reduction	Favoring reduction	Percent of total
U.S. imports, imports-exports, general:									
1960–61	537	575	442	105	461	80	(110)	122	21
1955–56	244	276	179	65	170	61	(25)	81	29

[1] Trade and labor organizations, and departments of divisions of individual firms, where indicated, were counted as 1 firm, each.
[2] Some briefs both favored and opposed reductions, in which case they are included in both counts.

NOTE.—In 1960–61, 2,250 schedule A statistical classes of products were included in the published list. In 1955–56, 1,270 schedule A statistical classes of products were included in the original and supplemental published lists.
AUG. 29, 1960.

Mr. JAVITS. Mr. President, in 1962, the Trade Agreements Act, the backbone of our reciprocal trade program, will again come before the Congress for another extension. It has been the principal reason behind the upsurge of U.S. trade, which has grown from $4.8 billion in 1934 when the act first became law, to an estimated $35 billion in total U.S. exports and imports by the end of 1960—a sevenfold increase. The yearlong negotiations among the member nations of the General Agreement on Tariffs and Trade—GATT—scheduled to start this Thursday in Geneva will swing into high gear by January 1961. Then the United States as the world trade leader must indicate to its trading partners whether or not it is prepared to take the necessary steps including additional tariff reductions which will presage an era of expanded trade in which U.S. exports can soar above the $30 billion figure by 1970.

This goal can only be achieved if U.S. domestic and foreign economic policy incorporates an imaginative dimension in its trade policy which will adequately care for the needs of individuals, businesses, communities, and entire industries which are seriously affected by foreign imports deemed necessary in the overriding national interest of expanding U.S. and free world trade. Therefore, I am introducing for appropriate reference the National Trade Policy Act of 1960. It is being put forward after several months of study in a complex and highly controversial field during which I have personally consulted with some 200 leaders in the fields of business, economics, and labor.

It is my earnest hope that U.S. trade and this extremely sensitive area of what proper remedies should be taken to alleviate the hardships on U.S. firms unavoidably injured by correspondingly expanding imports will undergo the most detailed study by congressional committees in the months ahead.

Under the terms of the National Trade Policy Act of 1960, assistance to alleviate serious injury from imports would be available from the Federal Government in the form of loans, tax incentives, and technical aids to qualified businesses, communities, and industrial development corporations; together with special unemployment compensation, retraining assistance, provisions for early retirement, and relocation allowances for workers.

Large businesses, communities, and industrial development corporations found eligible under the bill's criteria would have recourse to a $100 million revolving loan fund, so they could finance the adjustments necessitated by our policy in support of increased trade. A $50 million fund to supplement the present Small Business Administration's disaster loan fund would be authorized to help smaller companies adjust to the same circumstances. In addition, the bill amends the Internal Revenue Code so that more liberal depreciation allowances and more rapid amortization will be available to seriously affected enterprises.

To workers unemployed as the result of increased foreign imports, the act would set up a program to assure unemployment compensation for at least 6 months at a rate of 70 percent of the average weekly wage in their respective States, with the difference between State unemployment payment levels and the compensation provided under this act to be made up by the Federal Government. Those among these unemployed workers who cannot find new jobs because of their advanced age would become eligible to receive their regular social security retirement benefits at age 60, with such payments to be made out of general revenues and not out of the social security trust fund. In addition, vocational training will be available to workers as well as relocation allowances should they be unable to find new employment in their own labor market areas. In the case of a worker, he must only show that he was dismissed from his last regular employment because of increased imports.

A company or individual applying for tariff relief under this bill would first appear before the Tariff Commission which would then launch an investigation. The Commission might recommend relief in which case the company could apply for assistance at once; but should the Commission find only that the application was made "in good faith and with reasonable cause" without further recommendation, application could still be made. Technical aid would be given a business, community, and industrial development corporation in preparing a program to show how Government aid would be effectively utilized.

The act would also establish an Advisory Committee on Trade Policy to be composed of nine members, appointed by the President, and broadly representative of production, commerce, finance, agriculture, labor, and consumer interests. It would meet at the request of the President to consult on the administration of the provision in this act.

The assistance which is available under this bill is designed to give us a truly flexible trade policy which will not be linked to impossibly high trade barriers that could lock out the exports of nations which currently import increasing amounts of U.S. goods. This act in allowing the President to make a finding of serious injury or the threat of such injury to one or more businesses but not to an entire industry need not lead to the imposition of quotas or higher tariffs. Similarly, the certificates of eligibility for assistance under the act are to be valid for no more than 18 months and are subject to cancellation sooner should the President determine they are no longer necessary.

In the first 6 months of 1960, U.S. trade figures have shown an upsurge over the same period in 1959 and much of this increase is attributable to the very real effort several European nations have made to end many of their discriminatory trade policies. From January through June of this year, our exports to the six Common Market nations shot up 52 percent and to the seven nations of the European Free Trade Association, they rose 57 percent—more than $1 billion and $385 million, respectively. For the first half year of 1960, our total exports to all countries are running $1.7 billion ahead of 1959, January through June, with $1.4 billion of that total represented by gains to the Common Mar-

ket and EFTA countries alone; so that it is very obvious how extremely important the markets of Western Europe continue to be to U.S. traders. However, they may not continue to welcome our goods in such large volume if their traders encounter high tariff walls and quotas which only allow a trickle of their goods into our domestic markets. This is a powerful reason why we must build into our economic structure fair provision for the U.S. industry which must compete with their best selling exports—first, let us help it become competitive if it has fallen behind; but if that proves a futile goal, then let us make provision for such companies and their employees to shift to more profitable pursuits. This is the paramount aim of the National Trade Policy Act, an essential element in an expanding world trade and in a prosperous domestic economy.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD, as part of my remarks, a section-by-section analysis of the National Trade Policy Act of 1960, and also an article from the New York Times and two articles from the New York Herald Tribune.

There being no objection, the analysis and the articles were ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF NATIONAL TRADE POLICY ACT OF 1960

Title: A bill to assist business enterprises, communities, and individuals to make necessary adjustments required by changed conditions resulting from the trade policies of the United States.

Section 2 recognizes the need for U.S. participation in world trade in order to maintain a sound domestic economy and healthy international relations, and establish a national trade policy to provide assistance to business enterprises, individuals, and communities so that they may make the adjustments required by changed conditions resulting from U.S. participation in world trade.

Section 3 authorizes the President to delegate the powers he receives under this act. Provides that the several departments and agencies of the Federal Government engaged in carrying out the functions of this act will consult with each other. By precedent, this could call for the setting up of an interdepartmental National Trade Policy Committee with a chairman, possibly the Assistant Secretary of Commerce for International Affairs, or the delegation of these powers to an existing agency of Government.

Section 4 establishes an Advisory Committee on Trade Policy, composed of nine members broadly representative of production, commerce, finance, agriculture, labor, and consumer interests. One of the members shall be a member of the National Export Expansion Committee, which was established as a result of the export promotion program announced by the President on March 17, 1960. This advisory committee, similar to the one established for the Export-Import Bank, would advise in the operation of this act.

Section 5 establishes the criteria for eligibility of business enterprises, communities, industrial development corporations and individuals or organizations representing individuals for assistance under this act. The President is to issue certificates of eligibility, valid for no longer than 18 months, which he may cancel when he feels they are no longer necessary—including in the event of congressional action to change the tariff or quota structure in the United States.

A business enterprise is eligible, if the President finds that it has suffered serious economic injury resulting from increased imports, or is threatened with such injury, after:

(a) The Tariff Commission makes a finding of serious injury, or the threat of serious injury, under section 7 of the Trade Agreements Act (the escape clause) to an industry of which the business enterprise is a member; or

(b) The Tariff Commission makes a recommendation for relief under section 336 of the Tariff Act of 1930, which permits tariff relief in order to eliminate differences in cost of production between foreign and domestic items; or

(c) The Tariff Commission does not make such findings or recommendations for the industry but does find that the application was made "in good faith and with reasonable cause"; or

(d) The Tariff Commission has made an investigation and report under section 332 of the Tariff Act of 1930, which provides for such investigations and reports at the request of the President, either House of Congress, the House Ways and Means Committee, or the Senate Finance Committee, and the business enterprise is a member of an industry which has been the subject of such an investigation.

A community is eligible, when it has substantial and persistent unemployment as the result of reductions in personnel by businesses in industries investigated by the Tariff Commission, if these reductions in personnel are due to increased imports.

An industrial development corporation is eligible, if it is operated to achieve a more balanced and increased level of economic activity in a type of community cited above.

An individual is eligible, if he is unemployed as the result of reductions in personnel by businesses in industries investigated by the Tariff Commission, if his or her last regular employment was in such a business and if the reductions in personnel are due to increased imports.

In addition to the above criteria, the President would have to consider what portion of a business enterprise's production is directly and adversely affected by increased imports. Furthermore, a business enterprise, community or industrial development corporation would have to present plans for effective programs of economic adjustment before being eligible for assistance. A worker, of course, would not have to meet these last two requirements.

This section furthermore amends section 7 of the Trade Agreements Act and section 336 of the Tariff Act of 1930, to authorize the President to place a time limit of not more than 7 years on any additional import restrictions which he adopts upon the recommendation of the Tariff Commission, and to reduce such additional restrictions on a specified, gradual basis.

The distinctive feature of this section is that it permits assistance to a business, community, and worker adversely affected by increased imports, even when the Tariff Commission does not find serious injury to the entire industry. This prevents the establishment of additional import restrictions when only part of an industry is seriously injured, and thus eliminates the accrual of windfall profits for the more efficient members of the industry under the cover of import barriers. Furthermore, the eligibility for assistance of workers and communities seriously injured by additional imports is separated both from the eligibility of industries and of individual business enterprises.

The criteria for eligibility are strict; there must be a thorough investigation by the Tariff Commission upon the findings of which the President can base his decision. The Tariff Commission must also find that the application was made with reasonable cause, and the affected elements of an industry (except the workers) must present effective plans for use of the assistance for which they apply.

Section 6 provides the President with administrative powers under this act, specifically the power to make rules, regulations, and procedures for the carrying out of his functions in determining eligibility for assistance.

Section 7 provides for loans to larger business enterprises, communities, and industrial development corporations which are eligible for assistance. A $100 million revolving fund is established for this purpose.

Section 8 provides for loans to small business enterprises which are eligible for assistance; $50 million is added to the present Small Business Administration disaster loan fund for this purpose.

Section 9 amends the Internal Revenue Code to provide for more liberal depreciation allowances and more rapid amortization of property of business enterprises eligible for assistance.

Section 10 provides for technical and managerial aids to business enterprises, communities, and industrial development corporations in making application for assistance, and, if possible, in making the necessary adjustments without Government assistance. If assistance is required, these aids will also be provided to help those receiving it to make effective use of it. This technical aid will take the form of advice and counsel on good management and related matters.

Sections 7 through 10 are designed to give economic assistance and incentives through loans, tax policies and technical aids, so that those elements of our private enterprise system which are seriously injured by increased imports may again become competitive.

Section 11 provides that unemployed workers eligible for assistance will receive unemployment compensation for at least 6 months at a rate of 70 percent of the average weekly earnings in their State. The difference between the payments provided by the regular State unemployment compensation programs and the amounts which are provided to the workers by this act will be paid by the Federal Government. Special provision is made to assure a worker who is eligible for assistance a minimum of unemployment compensation for a period of no more than 3 months, if he works in an on-the-job or in-plant training program approved by the Secretary of Labor and if this work pays no more than the partial earnings allowance permitted by his or her State.

Section 12 provides for the payment of benefits equal to the full social security retirement benefits which workers would receive at the regular age of retirement, if the Secretary of Labor determines that an eligible worker of 60 years of age or older is unable to find employment because of his age. Payments will be out of general revenues; not the social security trust fund.

Section 13 provides for programs of retraining and vocational rehabilitation for eligible workers, under the supervision of the Secretary of Labor.

Section 14 provides for the payment of moving expenses of an eligible worker and his family, when the Secretary of Labor determines that there is no job opportunity in his or her labor market area but that there is such opportunity elsewhere in the United States.

Sections 11 through 14 are designed to give assistance to workers unemployed as the result of increased imports, so that they may be tided over during their period of unemployment and so that they may adjust to the new economic situation.

Section 15 authorizes the appropriation of funds necessary to carry out the purposes of this act.

U.S. STAND HELD VITAL ON TARIFFS—CONCESSIONS ARE CONSIDERED NECESSARY FOR BIG CUTS AT GATT NEGOTIATIONS

(By Edwin L. Dale, Jr.)

PARIS, August 27.—The world's major trading nations will gather Thursday at Geneva for a set of tariff negotiations that could turn out to be either mountain or molehill. The present odds slightly favor the molehill.

The negotiations among the member nations of the General Agreement on Tariffs and Trade (GATT) are expected to take the better part of a year. It is certain that out of them will come some further lowering of world trade barriers, but whether the results will lead to significantly less protection and thus more trade is an open question.

With the industrially developed world rapidly moving away from quantitative controls on imports, at least in nonfarm goods, tariffs now take on more importance than at any time since World War II. In principle, the nations at Geneva will set out to bargain tariff reductions with each other.

The outcome of the bargaining will depend mainly on two factors presently unknown.

One is the attitude of the United States, which will come to Geneva theoretically empowered to reduce tariffs on all products by 20 percent of the present levels. But it is not clear how aggressive U.S. negotiators will feel able to use this power, given the strong protectionist pressure from much of domestic industry and legal provisions hampering concessions in cases where domestic industry might be hurt.

Without significant U.S. concessions—which means tariff reductions on items where increased imports will follow and probably hurt—the other bargainers may save their concessions for another day.

The second unknown, probably even more important, is the attitude of the nations of Western Europe. This will turn not only on the eternal issue of free trade versus protection, but also on intricate questions of European politics.

Europe is now divided into two trading blocs—the six-nation European Economic Community, or Common Market and the Free Trade Association, known as the Outer Seven—each committed to internal free trade with tariffs against outsiders. Each bloc aims at expanding trade internally but the result of the split could be a serious distortion of the traditional flow of goods.

Members of the Common Market are France, West Germany, Italy, Belgium, Luxembourg and the Netherlands. The Outer Seven is composed of Britain, Sweden, Denmark, Portugal, Norway, Switzerland and Austria.

There are two ways of dealing with the problem caused by the split. One is to organize the two groups into some form of Europewide free trade zone, possibly a customs union. This presents many problems, but recent developments in some key countries have revived slightly the hopes of those who want such a solution.

If such a solution is now actively sought, the negotiations will take place outside of GATT and the coming session will take a bad second place in attention and achievement.

The second way of dealing with the European problem is the product-by-product approach, in which the GATT session could be crucial. Each group would negotiate for reductions in the other's outer tariff to give nonmembers a fair try at the market.

Both sides will have until January to decide what approach to take. From now to the end of the year the sessions will be devoted to technical problems raised by the formation of the Common Market and its impact on past tariff bargains with outsiders. The real bargaining will begin in January, and the political and economic attitudes of Western Europe may be considerably clearer by that time.

WALL STREET, U.S.A.—FOREIGN TRADE AND AID

(By Harvey S. Firestone, Jr., chairman, Firestone Tire & Rubber Co.)

One of the most serious and perplexing problems facing the world today is the question of American assistance to other countries. There is growing concern regarding this problem and increasing sentiment against the continuance of the present large foreign-aid program. Year after year, the Government has requested billions of dollars for this purpose and now, some 15 years after World War II, many Americans are wondering when it is going to end.

This is particularly true of those millions of Americans who have traveled to Europe in recent years and have seen, in some countries, what they regard as a booming industrial economy. In addition, our people have read in their press many reports of waste and inefficiency in the granting and administration of the funds which the United States has sent overseas, and they are aroused by what seems to them an attempt on the part of individuals and nations to gain unreasonable advantages at the expense of American taxpayers.

Therefore, I think it is high time that we take a good, hard look at the subject of foreign aid and that we weigh up the factors for and against its continuance by the United States. In connection with my participation as a member of the International Development Advisory Board, I have followed closely the progress and problems of this program, which is often difficult to understand for people who are not closely associated with it.

WHICH OF TWO ROADS?

Briefly stated, the problem which the United States faces today is simply this: Which of two roads is the better to follow to achieve real security and economic progress for our families and our country today and in the future? If we travel one road, we utilize our industrial might to build an armed fortress, lock the doors, sit tight and let the rest of the world take care of itself, if it can.

If we follow the other road, we carry on the fight for what we believe in, utilizing our ideas, our technical skills and some of our wealth to back our convictions that the free enterprise system can win the cold war by helping to establish strong and free nations which will not fall prey to the economic warfare the Soviet Union is now waging in the strategic areas of the world. There is no middle ground.

It is in our own interest, and the interest of our friends, that we follow the second path. Supporting this position is the fact that foreign trade now provides 4½ million jobs for Americans, more than all the jobs in the automobile, textile, chemical, and steel factories in the United States. In one city alone, New York, 1 job in every 4 is dependent on international trade.

EXPANDS 68 PERCENT

In the last 5 years, our foreign trade has expanded 68 percent, compared with an increase of only 18 percent in our domestic trade.

In the case of agricultural products, foreign markets take the yield of 1 out of every 5 acres in the United States. The production from an estimated 60 million acres of American farm land is sold abroad.

But international trade is a two-way street. About 60 percent of U.S. imports are raw materials. We import three-fourths of the bauxite from which we make aluminum. To manufacture a new television receiver, we use more than 40 imported materials coming from more than a dozen free-world countries. We import substantial quantities of more than 30 materials required in automobile manufacturing.

Surprisingly, the United States is well on its way toward becoming the biggest "have not" nation on the face of the earth. At the moment there are only two metals, magnesium and molybdenum, for which our Nation is not at least partly dependent upon outside supplies.

DEPEND ON IMPORTS

For ten strategic materials we are dependent upon the rest of the world for at least 75 percent of our requirements, and by 1975 we shall need to import between 25 and 100 percent of our consumption of the 26 most important industrial raw materials, ranging from antimony to zinc.

The sale of American-made products to countries which can supply the United States with such raw materials should not result in any excessive balance of trade in favor of the United States. However, since we are basically an industrial, manufacturing nation, it is inevitable that we should make thousands upon thousands of products which are also made by other industrial, manufacturing countries. It is natural that these other nations should want to sell their competing products in the American marketplace.

Just what solution can be worked out between the United States and its friends throughout the world is still a matter of debate. If it is simply a question of dollar balances, it seems to me that much of this difficulty could be resolved if the nations wishing to export their products to the United States would concentrate more upon exporting needed raw materials and other noncompetitive products, rather than trying to put pressure behind the export of goods which compete directly with basic American industries.

WANT FAIR PLAY

Americans are not afraid of competition. On the contrary, they thrive on it. It is the very essence of the free enterprise system which is an integral part of the American way of life. But they believe in fair competition.

They do not believe that it is fair for American industry to have to compete in the world trade race shackled and burdened by heavy taxes, resulting from the cost of foreign aid, which greatly increase its cost of doing business.

Millions of Americans now feel that other nations of the free world should assume a greater part of the responsibility, and a larger proportion of the cost, of keeping the free world free and keeping the uncommitted nations and the less-developed countries of the world out of the Communist orbit.

They believe that other free nations are now in a position to express themselves in ways more material than mere words. They contend it is high time that the nations which insist on full partnership with the United States in the common defense against the military threat of the Communist bloc also accept full partnership with the United States in the common defense against the economic threat of the Communist world.

[From the New York Herald Tribune, Aug. 7, 1960]

WALL STREET, U.S.A.—RESEARCH—KEY TO THE FUTURE

(By Donald C. Power, chairman and chief executive officer, General Telephone & Electronics Corp.)

During the last 10 years, America has been going through a full-scale economic revolution. Entirely new industries have emerged, and existing industries have expanded at an unprecedented rate. Countless new products and services have been developed. Manufacturing processes have been steadily improved through the introduction of new equipment and techniques. Major changes have occurred in the country's entire distribution system. All of these devel-

opments have combined to create a half trillion dollar economy, in contrast to some $300 billion a decade ago.

Concurrent with this revolution here in the United States, another revolution has been going on overseas—the rebirth of Western Europe after the war. In place of the "Old Country," we see across the ocean a revitalized, energetic, and progressive European economy, symbolized so well by the Common Market. Here is the new brand of foreign competition—more resourceful, skillful, ingenious, and energetic than ever before.

And there we have the challenge confronting the American businessman in the 1960's—the challenge of maintaining the momentum and strength of our economic revolution of the last decade. This will be the only way we can meet competition from abroad for our markets here at home, and it is the only way we can participate in the growth of markets overseas.

BIGGEST PROBLEM

Management, labor, and Government must keep foremost in mind that foreign competition is here, it is going to grow stronger and we are going to have to adjust to it. Certainly we may find it necessary to adopt protective measures for certain industries—particularly those vital to national security—but any large-scale drive to create tariff barriers across the board will only isolate us from the rest of the world.

There are tremendous opportunities for American industry to participate in the economic growth of the world—by accelerating the development of new and improved products and services, new, and less costly ways of making them and more efficient ways of getting them to present and potential customers. In other words, far greater emphasis must be given to finding new and better ways of doing things, and the key is sharply increased research and development.

Since World War II, there has been a dramatic growth in research and development. Back in 1941, the total spent throughout the country on research was less than a billion annually, and the greater share of it represented advanced engineering, rather than fundamental research.

Today, the total expenditure by industry, Government, and the universities is more than $13 billion annually—and the range of activities reaches across the entire spectrum of science.

RESEARCH NEEDS

Large as this total expenditure is, however, it is not nearly enough. It must at least be doubled over the next 7 or 8 years if we are to maintain our commanding world position in technology.

In many fields today we are seriously challenged; in some, we have already been surpassed, witness the technical achievements of the Soviets. It would be disastrous to lose further ground.

Even more tangibly, however, the National Science Foundation says that research pays off at the rate of 100 to 200 percent a year. This means that $100 spent on research will bring back a total of $2,500 to $5,000 over a 25-year period—depending, of course, on the state of the art prevailing in a given industry or company.

The experience in many companies has been that 7 to 10 years are required on the average to translate the findings of research into a new product. This time interval must be reduced substantially—and this challenge becomes especially significant when you bear in mind that from 50 to 75 percent of the products of many companies today are completely or radically different from their products of 15 years ago.

ELECTRONICS EXAMPLE

The electronics industry is a prime example of the large-scale benefits derived from research. From some $500 million in annual sales and revenues before the war, electronics today is a diversified $15 billion industry. Its dollar volume has increased threefold in 11 years. There is every indication that sales and revenues will be nearly $22 billion by 1965, and upward of $30 billion by 1970.

The greatest potential is in the field of commercial and industrial electronics, where intensive research led to the steadily expanding use of electronic devices and equipment in the broad field of communications, especially data processing and telephone communications.

Ten years ago, commercial and industrial electronics totaled some $700 million. Last year, the total had reached $2.5 billion, and $2.8 billion is our latest estimate for this year. By 1965, annual sales should be approaching $5 billion, and from then on the sky is the limit—the potential applications, being virtually unlimited, particularly because of the rapid advances being made in business communications and space technology.

However, the electronics industry is only one example of the unlimited growth and development that lie ahead for the American economy, provided we devote enough research and development effort to realize the potentials.

This country is confronted with the strongest competition in its history, but our competitors have no magic formulas for success. The advantages they may have in one aspect of the productive process can be effectively neutralized by our advantages in others. Ours has been a history of innovation and invention, of ingeniously coming up with new ideas, year after year. We must increase and accelerate that trend.

Ten years from now we will look back at the rising tide of foreign competition as the incentive which provided us with new concepts and equipped us to play the leading role in the growth of the world's markets. Or we will look back and see where we missed a golden opportunity. The choice is squarely up to us.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3918) to assist business enterprises, communities, and individuals to make necessary adjustments required by changed economic conditions resulting from the trade policies of the United States, introduced by Mr. JAVITS, was received, read twice by its title, and referred to the Committee on Finance.

HELEN CHOI BRATTON

Mr. MORSE. Mr. President, I introduce, for appropriation reference, a bill for the relief of Helen Choi Bratton. It is a private bill which I am introducing today, in the dying hours of the session, because I want to get certain reports on the bill between now and January, when I will reintroduce the bill at that time. I ask unanimous consent that the bill be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3919) for the relief of Helen Choi Bratton, introduced by Mr. MORSE, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of sections 101(a)(27)(A) and 205 of the Immigration and Nationality Act, the minor child, Helen Choi Bratton, shall be held and considered to be the natural-born alien child of Nancy Bratton, a citizen of the United States: *Provided*, That the natural parents of the said Helen Choi Bratton shall not, by virtue of such parentage, be accorded any right, privilege, or status under the Immigration and Nationality Act.

AVAILABILITY OF CERTAIN PROPERTY IN INDIANA FOR USE BY CLARK COUNTY 4–H CLUB

Mr. HARTKE. Mr. President, on behalf of myself and my colleague, the senior Senator from Indiana [Mr. CAPEHART], I introduce, for appropriate reference, a bill to authorize certain property located in Indiana to be made available for use by the Clark County 4–H Club.

This land is being declared excess, Mr. President, and the Clark County 4–H Club desires to use it for a permanent fair-and-exhibit ground.

Title in the property would be vested in the Department of Agriculture.

Our 4–H Clubs are training our young men and women to become progressive and helpful members of our communities. We should certainly welcome any opportunity to assist them. Rather than have this land in Clark County, Ind., remain idle, it could serve a useful purpose. I earnestly hope that this bill will receive the favorable consideration of Congress.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3921) to authorize certain property located in the State of Indiana to be made available for use by the Clark County 4–H Club, Inc., Clark County, Ind., introduced by Mr. HARTKE, was received, read twice by its title, and referred to the Committee on Armed Services.

AMENDMENT OF TARIFF ACT OF 1930, RELATING TO DUTIES ON HAIR OF THE CASHMERE GOAT

Mr. SALTONSTALL. Mr. President, the trade agreement between the United States and Iran came to an end last Friday. This agreement had been in existence since 1943.

This unfortunate termination has had the effect of increasing by 16 cents per pound the tariff on raw cashmere, and this has had a disastrous effect upon the domestic cashmere industry, most of it centered in Massachusetts.

The continued importation of cashmere at the old rate is necessary for our domestic cashmere industry, and it is in the best interests of consumers in the United States. For those reasons, Mr. President, I introduce, for appropriate reference, a bill to restore the old tariffs, and request that it be printed in the RECORD at the conclusion of my remarks.

I realize that any action on this proposed legislation is impossible at this session, but I introduce it now so that Department reports on it can be requested promptly. Introduction today also serves the useful purpose of reassuring our domestic industry of our awareness of this serious problem.

I ask that the cashmere tariff be restored to the level at which it stood for 17 years for the following reasons:

First. The increased duty will have an adverse effect on the market for cashmere in the United States, and can be expected to injure the entire cashmere industry in this country.

Second. A substantial part of the world's cashmere is produced in areas under Communist domination. These sources of supply are closed off to our domestic industry by the foreign assets control program. It is unfair that our U.S. industry be further penalized by an increase in the tariff on the cashmere that is still available to it.

Third. The American manufacturer, injured now by the increase in the tariff on his raw material, is further injured by having no added tariff protection on the manufactured products containing cashmere against which the U.S. producer has to compete. The new high tariff prevents him from securing his raw material on fair terms; but low tariffs on completed cashmere sweaters, for instance, permit foreign imports to swamp the domestic industry. Our domestic manufacturers ask for no unfair protection; they ask only for a fair chance to compete.

Mr. President, my colleague, the junior Senator from Massachusetts [Mr. KENNEDY], joins with me in sponsoring this legislation.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3923) to amend the Tariff Act of 1930, as amended, with respect to the duties on hair of the cashmere goat, introduced by Mr. SALTONSTALL (for himself and Mr. KENNEDY), was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1001 of the Tariff Act of 1930, as amended (19 U.S.C. 1001) be amended by deleting from paragraph 1102(b) thereof the words "cashmere goat", and inserting after the words "other like animals" the following: "(including animals like the cashmere goat)".

SEC. 2. Section 1001 is further amended by adding the following:

"PAR. 1102(c) Hair of the cashmere goat, in the grease or washed, 18 cents per pound of clean content; scoured, 21 cents per pound of clean content; on the skin, 16 cents per pound of clean content; sorted, or matchings, if not scoured, 19 cents per pound of clean content."

COMPILATION OF RUBBER FOOTWEAR IMPORT STATISTICS BY TYPE OF FOOTWEAR

Mr. HARTKE. Mr. President, I introduce, for appropriate reference, a joint resolution to provide for the compilation of rubber footwear import statistics by type of footwear.

This joint resolution is a companion measure to a House joint resolution which was introduced in the House of Representatives yesterday by my distinguished and learned colleague from Indiana's Third District, the Honorable JOHN BRADEMAS.

Mr. President, I have become seriously concerned over the effect which foreign imports are having on our domestic industries. I am particularly concerned over the effect which foreign imports are having on industry in Indiana.

This joint resolution authorizes the Department of Commerce to compile statistics on imports of rubber footwear from foreign countries by type of footwear.

It is necessary to have this breakdown so that the rubber footwear industry may make the strongest possible case when filing an appeal to the Tariff Commission for relief under our trade laws.

I also would like to call attention to the resolution which I submitted in July to set up a special committee of the Senate to consider the effect which imports are having on our domestic economy. Such a study is necessary if we are to proceed intelligently in trying to arrive at a solution to this problem.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 223) to provide for the compilation of rubber footwear import statistics by type of footwear, introduced by Mr. HARTKE, was received, read twice by its title, and referred to the Committee on Finance.

RESTRICTIONS ON IMPORTATION OF FOREIGN SURPLUS MILITARY RIFLES

Mr. DODD. Mr. President, last week, House conferees twice succeeded in striking from appropriations bills a sense resolution which I submitted advising the State Department to clamp down on the importation of foreign surplus military rifles. These rifles are being dumped on the American market by the hundreds of thousands and are endangering the survival of our domestic arms producing industry.

I know that the Senate conferees on both the State, Justice, and the Judiciary appropriation bill and on the mutual security bill were thoroughly in accord with this amendment and did their best to retain it. In each case, it was deleted because of determined and adamant opposition by the principal conferee in the other body.

I believe this amendment is of supreme importance to the preservation of a great and vital American industry. Day after day and month after month I have heard Senators speaking on this floor of the damage being done to our domestic industries by foreign competition which at least can be described as legitimate commerce. But in this case, we have an American industry, vital to our national defense, being undermined by competition which cannot be called legitimate.

We have an industry being damaged by the importation of goods which were never originally produced for commercial use, which were never intended for civilian use, and which were produced for the use of armed forces of foreign nations. These foreign nations, like our own country, now have millions and millions of surplus military rifles on hand. Our Government will not allow our military rifles to be dumped on the domestic market to go into competition with sporting rifles in our domestic industry because our Government does not want to destroy that industry through unfair competition.

The foreign nations of which I speak, England, Italy, Sweden, and Germany, will not allow these rifles to be sold on their domestic market for fear of destroying their own arms producing industry. And so they send them here and our State Department lets them get away with it. We are even allowing the importation of surplus military rifles from Iron Curtain countries to go on the market in competition with our own sporting rifles made by free American workmen earning decent wages in an industry which is absolutely essential to our national defense.

Having twice succeeded in having the Senate adopt this amendment, only to see it deleted by the House in conference, I shall try a third time.

The resolution which I offer today is in the form of a separate Senate resolution rather than an amendment to an appropriations bill. It does not require concurrence by the other body.

It would advise the State Department that it is the sense of the Senate that the State Department should stop granting licenses to foreign nations permitting the importation of surplus military weapons to be sold in this country at cut rates in competition with our domestic producers.

The PRESIDENT pro tempore. The resolution will be received and appropriately referred.

The resolution (S. Res. 387) was referred to the Committee on Foreign Relations, as follows:

Whereas the American firearms industry is important to the national security of the United States; and

Whereas since 1956 hundreds of thousands of used surplus military rifles have been imported into the United States market at prices with which the American arms industry cannot compete, thus threatening to destroy the defense readiness of this essential industry; and

Whereas on June 29, 1956, six of the leading American firearms manufacturers filed a petition with the Office of Civil and Defense Mobilization, asking for relief against such imports and no decision has been forthcoming from this Agency, and

Whereas the Department of Defense in furtherance of national security has frozen further disposition of the vast quantities of military surplus rifles owned by the United States Government; and

Whereas the Secretary of State has continued to authorize the unrestricted importation of foreign military surplus into the United States market; and

Whereas the United States Government should adopt and pursue a consistent policy with respect to the disposition of all military surplus firearms; and

Whereas the small arms mobilization base of the United States continues to remain in jeopardy unless immediate action is taken by the Secretary of State: Therefore be it

Resolved, That it is the sense of the Senate that in the administration of section 414 of the Mutual Security Act of 1954, as amended, the Secretary of State shall take such action

as may be necessary to restrict the importation or reimportation into the United States (other than for use by the Armed Forces of the United States) for resale of surplus rifles originally manufactured for the armed forces of any country, or parts thereof for reassembly, except those which are curios or antiques or weapons of obsolete ignition incapable of using a fixed cartridge or fixed shotgun shell.

ASSISTANCE TO INSTITUTIONS OF HIGHER LEARNING, INCLUDING JUNIOR AND COMMUNITY COLLEGES

Mr. YARBOROUGH. Mr. President, I submit, for appropriate reference, a resolution sponsored by more than 20 Senators, including 13 members of the Committee on Labor and Public Welfare. The resolution is on the subject of Federal assistance in the field of higher education. It requests the Secretary of Health, Education, and Welfare to review and survey various forms of potential Federal assistance for encouraging and helping institutions of higher education, including junior and community colleges, to meet their critical needs, and also to help students finance their education.

Mr. President, a number of bills on this subject are pending in the Education Subcommittee. But due to the well-known bogdown of procedure in the Committee on Labor and Public Welfare, because of the fight over the common situs picketing bills, it has not been possible for the committee to bring up these aid-to-education bills. They include the bill, sponsored by the distinguished majority leader, to provide a guaranteed loan fund to enable students to go to college; Senate bill 3776, introduced by the Senator from Pennsylvania [Mr. CLARK] and myself, to lend funds and make grants to colleges, to assist them in building additional classrooms; three bills, introduced by the Senator from New Jersey [Mr. CASE], to lend funds to junior colleges, to assist them in the building of additional classrooms and teaching facilities; and also a bill to help the States survey their college facilities.

In view of the fact that we shall have 1 million more college students by 1964 than the present 3¾ million, due to the fact that the children of the veterans of World War II will be old enough then to go to college, the Senator from Alabama [Mr. SPARKMAN], who now is on the floor, has successfully sponsored measures to provide Federal funds to assist in the building of college dormitories, although up to this time such funds have not been provided.

But now the American Council on Education, which heretofore has proposed that such Federal aid be restricted to funds and grants for the building of college dormitories, is joining in the requests that Federal funds be made available for the construction of additional classrooms.

I ask unanimous consent to have printed at this point in the RECORD a letter from the American Council on Education and an attached memorandum entitled "Comments on the Proposed Omnibus Bill in the Light of the Most Serious General Needs of Higher Education." The memorandum commences with the following statement of principles and priorities, by the Committee on Relationships of Higher Education to the Federal Government, of the American Council on Education:

STATEMENT OF PRINCIPLES AND PRIORITIES

It is the unanimous judgment of the Committee that the priority needs of higher education among items of legislation now being considered by the Congress are as follows:

1. Continuation of the College housing loan program with adequate funds to meet the urgent need for additional dormitories and related facilities.

2. Legislation to make available long-term, low-interest loans or matching grants, at the option of the institution, to facilitate the expansion of academic facilities such as classroom buildings, laboratories, and libraries.

3. Further measures designed to expand educational opportunity through aid to students in financing their higher education.

There being no objection, the letter and the memorandum were ordered to be printed in the RECORD, as follows:

AMERICAN COUNCIL ON EDUCATION,
Washington, D.C., August 22, 1960.

Hon. RALPH W. YARBOROUGH,
U.S. Senate, Washington, D.C.

DEAR SENATOR YARBOROUGH: It is a pleasure to express to you on behalf of the American Council on Education our gratitude for the excellent presentation concerning the proposed omnibus bill in support of higher education which you made last Thursday to our Committee on Relationships of Higher Education to the Federal Government. Subsequently the committee heard a frank and informative statement from Secretary Flemming on the same subject, and then after full discussion, authorized a statement including comments on the various proposals embodied in the bill. A copy is enclosed for your information. The committee hopes that this statement will assist you and Secretary Flemming in agreeing on the provisions of a bill on which immediate action will be possible with bipartisan support.

Sincerely yours,

RAYMOND F. HOWES,
Acting Chief Executive.

COMMENTS ON THE PROPOSED OMNIBUS BILL IN THE LIGHT OF THE MOST SERIOUS GENERAL NEEDS OF HIGHER EDUCATION

(By the Committee on Relationships of Higher Education)

STATEMENT OF PRINCIPLES AND PRIORITIES

It is the unanimous judgment of the committee that the priority needs of higher education among items of legislation now being considered by the Congress are as follows:

1. Continuation of the college housing loan program with adequate funds to meet the urgent need for additional dormitories and related facilities.

2. Legislation to make available long-term, low-interest loans or matching grants, at the option of the institution, to facilitate the expansion of academic facilities such as classroom buildings, laboratories, and libraries.

3. Further measures designed to expand educational opportunity through aid to students in financing their higher education.

COMMENTS ON PROPOSED OMNIBUS BILL

The committee has been invited to present its views on the proposed "Omnibus bill in support of higher education." The six items included in this legislation, as described by the Senate Subcommittee on Education in a news release dated July 1, together with our comments, are as follows:

1. A guarantee loan program for college students similar to a proposal introduced by Senator LYNDON JOHNSON in his bill S. 2710.

Comment: "With the rising cost of higher education, there is expanding need for various types of student assistance. We have been gratified at the success of the fellowships provided by several government agencies, particularly the National Science Foundation under its general authority and the U.S. Office of Education under the National Defense Education Act. We are also pleased with the success of the student loan fund under the National Defense Education Act and strongly recommend that adequate funds to continue this program at a level to meet demonstrable need be appropriated during this session of Congress. A guarantee loan program such as is proposed in S. 2710 would be a useful supplement to the other Federal programs now in effect, although it still would not meet the total needs of students in our colleges and universities."

2. Provision for $2.5 million for statewide inventories of existing college facilities and survey of the need for additional facilities. This is similar to a proposal contained in S. 878, introduced by Senator CASE of New Jersey.

Comment: "A number of States, including most of the larger ones where major planning problems exist, are well advanced in their inventories of present facilities and their studies of projected needs. A national survey of these needs has also been made by the U.S. Office of Education. However, some States have not as yet done all that could be desired in this area, and if the program of assistance here suggested, can be so designed as to apply particularly to their needs, it would certainly strengthen the Nation's total planning program for higher education."

3. A combined loan-guarantee and debt-retirement assistance program, including the earmarking of $50 million for junior colleges.

Comment: "We oppose that part of this legislation (the administration's S. 1017) which would replace the college housing loan program. We believe, however, that this program, as amended by Secretary Arthur S. Flemming in his testimony before the Senate Subcommittee on Education, would provide useful assistance in the construction of academic buildings as one of several optional approaches to the problem."

4. A $100 million grant program for construction of academic and other college and university facilities, with Federal grants to be matched by the institutions, and $15 million earmarked for junior colleges. These two proposals (items 3 and 4) include programs sponsored by the administration in its bill, S. 1017; S. 3776, introduced by Senators JOSEPH S. CLARK and RALPH W. YARBOROUGH; and S. 879, introduced by Senator CASE of New Jersey.

Comment: "Since neither a grant nor a loan program meets the needs of all institutions, we strongly favor legislation which makes both types of assistance available in accordance with institutional option, as is provided in S. 3776. While the suggested amount of $100 million is obviously inadequate to meet the total or even the immediate need, it would be sufficient to launch this dual program on an experimental basis.

"In the event that the Senate Subcommittee on Education believes the inclusion of a program involving matching grants would make the passage of the omnibus bill as a whole impossible during the present session of Congress, we recommend as an absolute minimum that Congress direct the Department of Health, Education, and Welfare to prepare a detailed report on a program of this type for submission to the 87th Congress not later than February 15, 1961."

5. A $100 million Federal grant program for construction of medical and dental teaching facilities. This is similar to the administration's proposal contained in S. 3680, introduced by Senators JACOB JAVITS and CASE of New Jersey, and others.

Comment: "In recognition of the long established and critical need for facilities in medical and dental teaching, we endorse legislation of the type represented in S. 3680."

6. Extension of lending authority in the present college housing program to provide $250 million in loan funds for the current backlog of applications. This is similar to the proposal presented by Secretary Flemming before the subcommittee on June 13, 1960.

Comment: "The council stands firmly behind the present college housing loan program, and the previous recommendation of $500 million in additional authorization which is included in the general housing bill passed by the Senate, and in the general housing bill voted out by the House Committee on Banking and Currency and now under consideration by the Rules Committee. In this stand the council has the almost unanimous support of institutions of higher learning and of the organizations representing them. Consequently, the committee would endorse the above proposal only in the event that enactment of a housing bill at this session of Congress should become impossible, and that the reduced amount of authorization in this proposal should not be considered as terminal.

"Specifically, then, the committee strongly recommends that the following two provisos be included in the draft of the proposed omnibus bill:

"(a) That such an additional authorization for housing shall not in any sense be considered a terminal authorization for the college housing loan program, and

"(b) That the provision shall be of no effect if additional authorization of funds is made for the college housing loan program at this session of the Congress through a general housing bill."

Members of the committee extend the appreciation of the colleges and universities of this country to those Members of Congress, of both parties, who by such proposals as the omnibus bill in support of higher education give evidence of their enlightened concern for the future of American education.

Mr. YARBOROUGH. Mr. President, I also ask unanimous consent to have printed at this point in the RECORD a letter from Arthur S. Flemming, Secretary of Health, Education, and Welfare, addressed to the Senator from Montana [Mr. MURRAY], endorsing the principles of this resolution. This is a bipartisan effort to aid higher education in America.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF
HEALTH, EDUCATION, AND WELFARE,
August 30, 1960.

Hon. JAMES E. MURRAY,
Chairman, Subcommittee on Education, Committee on Labor and Public Welfare, U.S. Senate, Washington, D.C.

DEAR SENATOR MURRAY: It is my understanding that the Education Subcommittee of the Senate Committee on Labor and Public Welfare is giving consideration to a Senate resolution which would request the Secretary of Health, Education, and Welfare to "review and survey various forms of Federal assistance for encouraging and helping institutions of higher education" and to submit the results of such review and survey to the Congress not later than February 15, 1961, together with such recommendations for legislation as he might deem to be appropriate.

The proposed resolution would put the Senate of the United States on record as initiating and supporting a thorough review and survey by the Department of Health, Education, and Welfare of the several forms of Federal assistance which might be utilized to assist institutions of higher education, including junior and community colleges, to meet their critical needs.

I have repeatedly emphasized the need for addressing ourselves to the problems of institutions of higher education. By the fall of 1964 a million more students will seek admission to institutions of higher learning. Every effort must be made to assure that places are available for them and that instruction of undiminished quality is made available to them. Legislative proposals recommended by this administration for various forms of Federal assistance in the field of higher education have indicated our awareness of these problems. The review and survey proposed by the resolution would, in my judgment, give impetus to further consideration of financial assistance for higher institutions.

Sincerely yours,

ARTHUR S. FLEMMING,
Secretary.

The PRESIDENT pro tempore. The resolution will be received and appropriately referred.

The resolution (S. Res. 388) favoring a survey looking to Federal aid for institutions of higher learning, submitted by Mr. YARBOROUGH (for himself and Senators HILL, MURRAY, KENNEDY, MCNAMARA, MORSE, CLARK, RANDOLPH, WILLIAMS of New Jersey, BURDICK, CASE of New Jersey, JAVITS, PROUTY, HART, GORE, PROXMIRE, ANDERSON, MANSFIELD, KUCHEL, BYRD of West Virginia, CARROLL, and ENGLE) was received and referred to the Committee on Labor and Public Welfare, as follows:

Whereas one million additional students are expected to enroll in institutions of higher education by the fall of 1964; and

Whereas the accommodation of these additional students without diminution of the quality of instruction or impairment of educational opportunity will require broad and effective planning and action on the part of the institutions and greatly increased support on the part of all individuals and organizations, public and private, concerned with higher education; and

Whereas strong and effective institutions of higher learning and opportunities for all qualified youths to secure a higher education are essential to the well-being and continued progress of this Nation: Now, therefore, be it

Resolved, That the Senate requests the Secretary of Health, Education, and Welfare to review and survey various forms of potential Federal assistance for encouraging and helping institutions of higher education, including junior and community colleges, to meet their critical needs, giving particular consideration to the desirability and feasibility of Federal assistance to help States assess their needs in higher education and develop plans for meeting them, of Federal loan and matching grant assistance in the construction of classrooms and related physical facilities, and matching grants to help construct medical, dental, osteopathic, and public health teaching facilities, and of Federal assistance, including student loan insurance, which will broaden the opportunity of qualified students to obtain a higher education.

SEC. 2. The Secretary of Health, Education, and Welfare is requested to consult with persons and groups broadly representative of American higher education in making his review and survey, and to submit the results of such review and survey to the 87th Congress not later than February 15, 1961, together with recommendations for such legislation as he deems to be appropriate.

Mr. CASE of New Jersey. Mr. President, I wish to commend the junior Senator from Texas on the submission of a resolution in regard to a higher education study which he has presented on behalf of himself and a number of our colleagues, including the senior Senator from New Jersey.

The problem of higher education is one with which we are all concerned, one which has many ramifications, and one that many of us have made many suggestions in regard to handling.

Unfortunately, time ran on so quickly during the session that it was impossible for our Subcommittee on Education to take definitive action on the many proposals that were made before us, but, as the Senator from Texas has said, we have been working not only closely with each other, but also closely with Secretary Flemming. As he also said, the resolution for the study and the report to be made by the Secretary of Health, Education, and Welfare is a subject on which the Department is fully agreed, and all Members who have signed the resolution on a bipartisan basis are also agreed.

I hope that much good will come of it. I believe this effort is additional evidence that with respect to this great problem we are not acting in a partisan or narrow way, but Senators on both sides of the aisle who are deeply dedicated to the service of education have joined and will continue to join in seeking the legislation proposed.

I ask unanimous consent that these remarks be placed at the conclusion of the remarks of the Senator from Texas which he made when he submitted his resolution.

The PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT OF TITLE V OF AGRICULTURAL ACT OF 1949—AMENDMENT

Mr. JAVITS. Mr. President, I submit an amendment, intended to be proposed by me, to House bill 12759, the so-called Mexican labor bill, and ask that the amendment be printed, under the rule, together with an explanation of the amendment.

The PRESIDENT pro tempore. The amendment will be received, printed, and lie on the table; and, without objection, the amendment and explanation will be printed in the RECORD.

The amendment and explanation are as follows:

At the end of the bill add a new section as follows:

"SEC. 2. Section 501 of such Act is amended by striking out the period at the end of paragraph (6), and inserting a semicolon in lieu thereof; and by adding at the end of such section a new paragraph as follows:

"'(7) to establish specific criteria for judging whether the employment of Mexi-

can agricultural workers in the United States is adversely affecting or will adversely affect the wages, working conditions, or employment opportunities of domestic workers similarly employed. Such criteria shall include but shall not be limited to (a) failure of wages and earnings in activities and areas using Mexicans to advance with wage increases generally; (b) the relationship between Mexican employment trends and wage trends in areas using Mexican workers; (c) differences in wage and earning levels of workers on farms using Mexican labor compared with nonusers.' "

EXPLANATION OF AMENDMENT

Title V of the Agricultural Act of 1949 prohibits the Secretary of Labor from making Mexican workers available for employment in agricultural activities in the United States unless he determines and certifies that their employment will not adversely affect the wages and working conditions of domestic agricultural workers similarly employed. In its present form, title V contains no standards to guide the Secretary in the development of appropriate measures to carry out his statutory responsibilities. All efforts by the Secretary to establish reasonable standards have been resisted both in and out of the courts.

If this provision, designed to protect domestic workers, is to be meaningful, it would seem necessary and appropriate, in the light of the controversies which surround the Secretary of Labor's effort to apply reasonable tests, for the Congress to provide in the law some criteria against which the Secretary can carry out his statutory responsibility to assure that the use of Mexican workers will not adversely affect the wages, working conditions and employment opportunities of our own workers.

This amendment provides a few minimum statutory guidelines. To this end, clause (a) requires the Secretary of Labor in making a determination as to whether he can certify that the employment of any Mexican agricultural workers in any area would not adversely affect the wages, working conditions and employment opportunities of our own agricultural workers, to examine whether the wages and earnings of workers in the activities and areas that use Mexican workers have risen correspondingly with wage increases generally.

Clause (b) is designed to require the Secretary of Labor to examine and consider in connection with his certification whether the number of Mexican workers in the area involved have increased progressively and whether there has been in the same area a downward trend in wage rates.

The criterion provided for under clause (c) would require a comparison of wages and earning levels of workers on farms using Mexican labor with the wages and earning levels of domestic workers employed on farms that use no Mexican workers.

AUTHORIZATION FOR COMMITTEE ON GOVERNMENT OPERATIONS TO FILE REPORTS SUBSEQUENT TO ADJOURNMENT

Mr. McCLELLAN. Mr. President, I ask unanimous consent that the Committee on Government Operations, on its own behalf or on behalf of its subcommittees, be authorized to file reports with the Secretary of the Senate during the adjournment sine die of the 86th Congress, 2d session, and that they be printed.

The PRESIDENT pro tempore. Without objection, it is so ordered.

TRANSPORTATION BY AIR OF MAIL NOT BEARING AIR MAIL POSTAGE

Mr. JOHNSTON of South Carolina. Mr. President, it is evident now that the press of other legislative business very likely will prevent the Senate Committee on Post Office and Civil Service from reporting H.R. 12595, the bill to halt the transportation by air of mail not bearing air mail postage.

In a letter to the Postmaster General on July 20, 1960, Comptroller General Joseph Campbell suggested that there be no expansion of the airlift "during the balance of the 2d session of the 86th Congress in order that the Senate may have an opportunity to consider H.R. 12595."

In my opinion, it is of no practical significance whether or not the Senate actually considers H.R. 12595 in the present session. The House of Representatives on July 2, 1960, passed the bill prohibiting the transportation of first class mail by air unless air mail postage at the 7-cent rate has been paid. The action of the House of Representatives very effectively should eliminate the "implied legislative approval" mentioned in the U.S. court of appeals decision on December 12, 1955, when on the basis of such implied approval, it was found that the airlift operation was legal.

Even though no action may be taken in the Senate because of the time element, it is my considered judgment that the action of the House clearly eliminates any conceivable idea of congressional consent to this operation, and the Postmaster General is hereby put on notice that there is no longer any congressional consent either implied or otherwise. Accordingly, in the future, the Postmaster General should respect the wishes of Congress in this matter.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. CASE of New Jersey:

Letter written by him, addressed to Prof. Lev E. Dobriansky, chairman of the Ukrainian Congress Committee of America, Inc., relating to the 20th anniversary of the founding of that committee.

By Mr. THURMOND:

Address intended to be delivered by him at the forthcoming dedication of the new headquarters of the National Association of Life Underwriters in Washington, D.C., on September 11, 1960.

DISCHARGE OF THE COMMITTEE ON THE JUDICIARY FROM FURTHER CONSIDERATION OF SENATE BILL 958

Mr. JAVITS. Mr. President, I thank the Chair, and I send to the desk a resolution.

The PRESIDENT pro tempore. The resolution will be read by the clerk.

The resolution (S. Res. 386) was read, as follows:

Resolved, That the Senate Committee on the Judiciary be, and hereby is, discharged from further consideration of the bill (S. 958) to assist in meeting the costs of special professional services needed in carrying out public school desegregation programs, and for other purposes.

Mr. JOHNSON of Texas. Mr. President——

Mr. JAVITS. Mr. President, I ask for its immediate consideration.

Mr. RUSSELL. Mr. President——

The PRESIDENT pro tempore. The Senator from Texas.

Mr. JOHNSON of Texas. Mr. President, I should like to have the reporter read the statement that was made by the Chair in order to ascertain just what stage in the morning hour we had reached. I heard the Chair state that morning business was over. I thought I did, and I would like to have that read back to the Senate to determine whether that is correct. I have no objection to the request of the Senator from Illinois. He was asking me about a matter on the Executive Calendar. I thought the Chair asked if there was any morning business and announced the conclusion of morning business. I have no objection to the request of the Senator from Illinois to return to morning business, but I do not want the RECORD to show it is a matter of right, because it is not a matter of right. The Chair had stated morning business was concluded.

Mr. JAVITS. I think it is very important that we have the RECORD read to see if it is a matter of right. I do not want to avail myself of a unanimous consent if it is a matter of right.

The official reporter (Mr. Herbert N. Budlong) read as follows:

The PRESIDENT PRO TEMPORE. Morning business is in order: Reports of committees, the introduction of bills and joint resolutions, the submission of concurrent and other resolutions.

If there are no concurrent resolutions, morning business is closed.

Mr. JOHNSON of Texas. Mr. President, I submit that is the statement I heard. It is up to the Senator to make his decision.

Mr. JAVITS. Mr. President, I would like to say to my colleague, if I may be recognized, it is very well known why an adjournment was taken.

Mr. JOHNSON of Texas. An adjournment was taken because the majority leader decided it was appropriate to adjourn, not because anybody put a pistol to his temple.

Mr. JAVITS. It was not because anybody put a pistol to his head. I think I would have a right to be extremely unhappy over that statement in view of the fact that on the floor yesterday I stated I respected the leadership and would not contest that, and said I did not intend to. It seems to me I was very polite to him and very decent about the whole situation. I was not trying to raise a question about that.

Mr. JOHNSON of Texas. The Senator from Texas is not raising a question about somebody being polite. The Senator from Texas raised the question whether morning business had been concluded. It had been concluded. The minority leader asked consent to return to it, and I am willing to give him that

consent. If the Senator from New York does not want to operate under those conditions, it is up to him.

Mr. JAVITS. When I asked the Chair whether it was of right or whether it was by consent, the Chair said it was a matter of right. I would prefer, naturally, to proceed as a matter of right. That was my view, and that was the view I expressed.

Mr. JOHNSON of Texas. The Senator heard the RECORD read.

Mr. JAVITS. I did. That is the first time I did hear the RECORD. May I say, too, in all kindness, 10 minutes after 10 was the time I arrived in the Chamber. It would seem to me, even from my own side, a quorum call could have been asked for if this matter was going to be gone through quickly.

Mr. JOHNSON of Texas. I am sure if the Senator had desired one and had made that suggestion he would have been within his rights. I do not know what steps the Senator took. I was here at 10 o'clock. I am here every morning when we meet.

I have no disposition to preclude the Senator from proceeding, but since he talks about not wanting to do it unless it is a matter of right, I want him to know what his rights are.

Mr. JAVITS. This is the first time I have known about it. I thank the Senator.

I now send the resolution to the desk and ask to have it read——

Mr. RUSSELL. Mr. President, reserving the right to object, I stated a few moments ago I would not object to the request of the minority leader, inasmuch as he had stated in his place he did not hear the Chair state the morning hour had been closed, and that it ought to be reopened, but I must object to any request from the floor for introduction of new matter after that point has passed.

If the minority leader, not having heard the Chair state that morning business was closed, makes the request that we return to the introduction of concurrent and other resolutions, I shall not object, but I shall object to the introduction of this matter from the floor.

The PRESIDENT pro tempore. The Chair is advised by the Parliamentarian that the Senator from Illinois was seeking recognition at the time.

Mr. DIRKSEN. Mr. President, I renew my unanimous-consent request that we return to morning business. Let me say in explanation that I was conferring with the majority leader and directing his attention to an item on the Executive Calendar.

I cannot ofttimes well follow all things at once, although the presumption is that every Member of the Senate should know that after the prayer we start on the regular procedure, after adjournment, with the morning business. If I have been in error in that respect, I freely confess my sins.

I renew my request, because I feel duty-bound, because of the adjournment last night, that the distinguished Senator from New York should have an opportunity to submit the resolution he is proposing to offer.

The PRESIDENT pro tempore. Is there objection? The Chair hears none.

Mr. JAVITS. Mr. President, I send to the desk a resolution and ask to have it stated.

The PRESIDENT pro tempore. The resolution has been read.

Mr. JAVITS. I ask unanimous consent for its immediate consideration.

The PRESIDENT pro tempore. Is there objection?

Mr. RUSSELL. Mr. President, may I understand what the request was?

The PRESIDENT pro tempore. The Senator from New York has asked for present consideration of the resolution.

Mr. RUSSELL. Mr. President, there is objection to that request or to any other proceedings that require unanimous consent under this resolution.

The PRESIDENT pro tempore. In view of the objection, the resolution will go over 1 day, under the rule.

Mr. JAVITS. Mr. President, a parliamentary inquiry. At what point in the proceeding may I make a brief statement with reference to this resolution?

The PRESIDENT pro tempore. Under the present situation, there is a bill under consideration. The Senator will have to get time from somebody in control of the time, because the time on the bill is under control.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that Senators may have not to exceed 3 minutes to make any statements on any matters they may desire to discuss.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

CIVIL RIGHTS LEGISLATION

Mr. JAVITS. Mr. President, aside from the details of this resolution, everybody knows I could proceed in this matter in many other ways than by submitting a resolution. The important question I am seeking to present to the Senate is what, if anything, the Senate ought to do about the civil rights issue at this session. Instead of presenting that issue in some peripheral way, by a proceeding incident to some bill or by another proceeding that would require a committee to report on a day certain, I have chosen at this moment to present the matter by a discharge resolution, and for this reason: I think we have to pinpoint, both in the Senate and in the country, that whether or not civil rights is considered in this session of Congress is a leadership decision. Under existing circumstances, with a few days to go, it cannot be made by any one Senator, nor can it be made unless there is some reason to expect very extensive and very real bipartisan support.

Mr. President, by presenting a discharge resolution in the way I have, which is now at the desk, the door is open to action by the leadership; and that is my purpose. I think it has to be emphasized time and again to the American people that if civil rights legislation is not acted on in this session of Congress an issue which I think towers above all the others we shall have left unfinished, with those we have tried to secure action on and could not finish, like the minimum wage bill.

Considering the nature of the session, we have no choice in the matter except to understand that this is a leadership decision and that the leadership will unquestionably have made it in a very advised way.

Mr. President, civil rights is the one issue which now towers above all others as the great piece of unfinished business before this Congress. The accomplishment or lack of accomplishment of this bobtail session of Congress will be debated for some time to come—in the immediate future by the political partisans and over the long run by the scholars and analysts. We have apparently approached this session with the view to dealing with the so-called "gut" issues, those issues to protect the persons, the livelihoods and the physical well-being of our citizens. But, despite the results of political conventions which produced lengthy platforms devoted to "building a better America" and "the rights of man," we have failed to deal with the one issue which touches the very soul of our Nation, civil rights.

When we returned after the July conventions, there was an urgent need for action on civil rights. This was due to the critical nature of the issue and to the expectations each party had aroused by its platform pledges. Those of us who attempted even to place this issue on the calendar and bring it on the floor were sidetracked by the cry of "interference" with vital legislation, such as the minimum wage bill, medical care for the aged, school construction, housing, mutual security and even the Antarctic Treaty. All of these issues have now been disposed of, and noticeably without the support of those who cried "interference" most loudly when civil rights was mentioned. Nevertheless, the problem of civil rights is still with us and is still acute—we see the sad spectacle of an elected official in one of our great states openly defying a Federal court; we are plagued with senseless violence resulting from peaceful protests over the failure to secure equal rights.

Both major parties made broad promises on civil rights in their platforms—promises which in some cases were in marked contrast to votes which had been cast on the very same issues earlier in the year. The American people deserve to know whether civil rights is to be a subject for the phrasemakers or the lawmakers.

Should a last-ditch fight now be made to seek the passage of even the most minimal—but still vitally necessary—piece of civil rights legislation before we adjourn sine die? That is the decision with regard to which every sincere supporter of civil rights on this floor must search in his mind and his heart for the answer.

The Democratic majority and its leadership have told us in effect, "No, wait until next year. Next year we'll give you a good civil rights bill." Mr.

President, members of minority groups living in areas of the United States where their constitutional rights are flagrantly violated must find little solace in the Democratic majority's implicit stand that they "wait 'til next year." They know from experience that there is a strong minority within this Chamber—and within the Democratic majority in the Senate—which seems to be determined that they shall wait not " 'til next year," but perhaps forever.

Within the next few weeks, millions of schoolchildren will return to their classes throughout the Nation, and once again we can anticipate, with a gripping fear of the national embarrassment which always accompanies it, the difficulties which will arise in many communities where a premium has been placed on failure to honor the law of the land regarding school desegregation; indeed, where the agencies of State and local government are themselves dedicated to evading the law.

The PRESIDENT pro tempore. The time of the Senator from New York has expired.

Mr. JAVITS. Mr. President, I ask unanimous consent that I may proceed for 2 additional minutes.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from New York? The Chair hears none, and it is so ordered.

Mr. JAVITS. Mr. President, on Monday I submitted a resolution that would have permitted the Senate to consider a very minimal civil rights bill, S. 958. This bill merely provides technical and financial assistance to those communities in our Nation which wish to desegregate their public schools in compliance with the law of the land, a problem which in this season particularly cries out for relief. This legislation deals, therefore, with an immediate problem, one which must be faced now and which cannot be postponed until the Congress returns in January at the beginning of a legislative year. The school year begins in September.

Let us remember that this is not new legislation. Its consideration is not precipitate. It was proposed by the President of the United States, has had many days of hearings and committee consideration in both Houses, and has been debated at great length on the floor of the Senate.

There are several means open to deal with this issue. It can, of course, be dealt with by having a committee report a bill which is pending before it on this issue. There is the route of amendment, which has, in the past, been availed of by the Senate—even during the closing hours of a session—as was the case with the extension of the life of the Federal Civil Rights Commission, which was accomplished as an amendment on the mutual security appropriations bill in 1959; and with the opening Senate consideration of the Civil Rights Act of 1960. It can be done by introducing a new bill and having it placed on the Senate Calendar, as the minority leader attempted to do when this August session began. It can be done by referring a bill to committee with instructions to report back to the Senate on a day certain. It can be done by discharging a bill which has received full consideration in an appropriate committee.

But one clear, penetrating lesson has emerged from this brief session. Notwithstanding the 2-to-1 majority of the Democrats in the Senate—only bipartisan teamwork can get enacted civil rights legislation because of the entrenched opposition of a minority among the majority party. Yet, apparently up to now in this short session a conscious political decision has been made which has led to the sacrifice of civil rights legislation upon the altar of what is seemly considered to be higher political expediency. In effect, the Republican minority, upon which the Democratic majority in the Senate has been inescapably dependent for support for civil rights legislation, has been cut adrift and told to "go it alone" for this short session. But we cannot pass such legislation without the support of Democrats, and the majority leadership knows it. This has sadly occurred, notwithstanding the Democratic Party hoisting high—indeed, it feels higher than the Republican Party—the banner of civil rights in this year's campaign.

But there is even now a last chance for determined action to redeem the promises so brightly made but 6 weeks ago. At this point in the session, successful action on taking up civil rights legislation must have leadership support and it must have bipartisan support—and as we saw in 1959—it can happen in a matter of hours when there is leadership and bipartisan support. The resolution which I intend to place on the Senate Calendar will provide the leadership with an opportunity to indicate whether such action has its support—it will enable friends of civil rights legislation in both parties to join as they did in 1959 and earlier in 1960.

When we pierce the veil of polite parliamentary language used by the opponents of civil rights we see the stark threat of a filibuster against any civil rights measure that is brought to the floor. Therefore, we know in advance that cloture must be invoked if a civil rights bills is to pass in the short time before we go home. The Senator from Kentucky [Mr. COOPER] told us that over 2 weeks ago. Between the two parties if we will, we have enough votes to invoke cloture even by the unnecessarily restrictive requirements now in the rules—this was illustrated by the fact that two-thirds of the Senators were necessary last year to suspend the rules and extend the life of the Federal Civil Rights Commission and were available to vote such extension.

The discharge resolution which I propose to submit presents to the Senate a full opportunity to select any one of the proper methods under our rules by which we might consider this essential legislation. The discharge petition offers an opportunity for this U.S. Senate, given a determined leadership which has shown in the past that it can act—and which is now calling upon the country to bestow upon it the mantle of national leadership—to take the technical assistance measure and such other proposals as a majority of the Senate choose to add, and enact it into law before we adjourn sine die.

In this eleventh hour, I hope there may yet be Democratic support for taking up civil rights even on this minimal basis, support which I have found but from the four Democratic Senators DOUGLAS, MCNAMARA, HART, and MORSE who voted with the overwhelming majority of Republicans on August 9, 1960. I say to my colleagues on the other side of the asile who have traditionally stood with me in the civil rights fight, I would rather go home with a minimal civil rights bill than with what some may classify as a good campaign issue.

I know we will be together in the fight to revise rule XXII in January again—as we have certainly seen that the change made in January 1959 changed practically nothing at all. But let us go into that fight at least with the unity which will come from redeeming this short session from its signal failure in civil rights legislation which we both join in considering so vital to our country.

Mr. President, I have submitted the resolution in the hope that there may yet be time to arouse the views and feelings of my colleagues on the other side who have been very stanch on this issue before we actually adjourn sine die by again giving an opportunity to the leadership, through the resolution, or a move related to it, to bring up some civil rights legislation, particularly the two items referred to in the President's message.

Mr. RUSSELL. Mr. President, were we not in the midst of a presidential campaign, it would be impossible for any person to comprehend the tremendous urgency which is attached to this particular piece of proposed legislation in the last hours of this session.

If there is any bill which has been around for a long time, which has been considered and reconsidered, voted upon in the committee and in the Senate, it is the proposed legislation to which the Senator from New York has referred.

The bill was introduced as early as February 5, 1959, and was referred to the Committee on Labor and Public Welfare. Later, by unanimous consent, on the 10th day of April 1959 the Committee on Labor and Public Welfare was discharged from further consideration and the bill was referred to the Committee on the Judiciary.

On May 13, 1959, the bill was referred to the Subcommittee on Constitutional Rights of the Committee on the Judiciary.

Mr. President, within the 3 minutes at my disposal I cannot discuss the long and checkered career of the bill. I wish to point out, however, that this proposal has been voted upon in the Committee on the Judiciary on four different occasions and has been defeated. It has been voted upon by the Senate on two different occasions in this Congress and has been defeated. It has been laid on the table on two separate occasions. Despite this, in the very last hours of the Congress great urgency is attached to it. We are asked to follow unusual procedures to get resolutions introduced to discharge the committee.

The committee has had the bill in its custody in one form or another ever since February 5, 1959. When the report is generally bruited about the land that the Congress will at last get out of town this week, we are confronted with a motion to discharge a committee from the consideration of a Senate bill dealing with this subject.

There has been no issue, so far as I know, which bears the title, conferred usually by some person seeking public favor, of "civil rights" that has been more thoroughly discussed, more often voted upon, and more consistently defeated in this Congress, than the bill which the Senator from New York is trying to wring from the hands of the Committee on the Judiciary. I can only say it seems that attempt might have been made somewhat earlier.

I ask unanimous consent that there be printed in the RECORD as part of my remarks a memorandum showing the course of the legislative history of this item, and the fact that it has repeatedly been the subject of votes not only in the committee, but on the floor of the Senate itself.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

LEGISLATIVE HISTORY OF S. 958, A BILL TO ASSIST IN MEETING THE COST OF SPECIAL PROFESSIONAL SERVICES NEEDED IN CARRYING OUT PUBLIC SCHOOL DESEGREGATION PROGRAMS, AND FOR OTHER PURPOSES, 86TH CONGRESS

1. Introduced in the Senate on February 5, 1959. Referred to the Committee on Labor and Public Welfare.

2. On April 10, 1959, the Committee on Labor and Public Welfare discharged, and the bill referred to the Committee on the Judiciary.

3. On May 13, 1959, referred to the Judiciary Subcommittee on Constitutional Rights.

4. This bill, along with others, was the subject of public hearings conducted by the Constitutional Rights Subcommittee on May 15, 18, 19, 20, 21, 22, 25, 26, 27 and 28, 1959 (printed hearings are available in four volumes).

5. On July 15, 1959, the Subcommittee on Constitutional Rights reported to the full Committee that it had considered S. 958 along with other bills, having held public hearings at length and having considered all the proposals before it, and reported favorably a clean bill (S. 2391) to extend the Commission on Civil Rights and to provide further means of securing and protecting the right to vote. Nothing resembling the text of S. 958 was included in S. 2391.

6. On August 19, 1959, Mr. KEATING proposed an amendment (8–19–59—A) to H.R. 4938, Calendar No. 656, title 8 thereof, incorporating substantially the text of S. 958.

7. On February 15, 1960, Mr. DIRKSEN submitted amendments (2–15–60—B) intended to be proposed to H.R. 8315. Section 204 of these proposed amendments incorporates substantially the text of S. 958.

8. On February 24, 1960, Mr. DIRKSEN proposed an amendment to H.R. 8315 in the nature of a substitute. Section 4 of this amendment incorporates substantially the text of S. 958. The Dirksen substitute was the subject of extended debate on the floor of the Senate and a great portion of the discussion of this amendment in the nature of a substitute was directed to section 4 thereof.

9. On March 24, 1960, the Senate adopted a motion of Mr. JOHNSON of Texas that H.R. 8601, a bill to enforce constitutional rights and for other purposes, be referred to the Committee on the Judiciary, with instructions to refer it back to the Senate not later than Tuesday, March 29, 1960.

10. On March 29, 1960, H.R. 8601 was reported to the Senate, with amendments, by the Judiciary Committee under authority of the order of the Senate of March 24, 1960.

11. While H.R. 8601 was being considered by the Senate Judiciary Committee, Senator KEATING, of New York, submitted an amendment thereto proposing to incorporate the text of S. 958 into H.R. 8601. This amendment was defeated in the committee.

12. On April 4, 1960, while H.R. 8601 was being considered by the Senate, Mr. KEATING sent to the desk a proposed amendment which would have incorporated the text of S. 958 into H.R. 8601. This proposed amendment was the subject of a vigorous debate in which the senior Senator from New York, Mr. JAVITS, participated. This proposed amendment, along with others offered thereto, was tabled by a vote of 61 yeas to 30 nays.

13. On August 9, 1960, Mr. DIRKSEN introduced S. 3828, a bill to amend the Civil Rights Act of 1960 in order to establish a Commission on Equal Job Opportunity Under Government Contracts, and to authorize assistance to State and local educational agencies to effectuate desegregation in public schools. The second section of this bill incorporates the substance of S. 958. Mr. DIRKSEN indicated his intention that the bill not be referred to the Judiciary Committee but that it might be placed on the calendar. Mr. CLARK moved to lay on the table the bill introduced by Mr. DIRKSEN. The motion to table carried by a vote of 54 yeas to 28 nays.

UNION WELFARE AND PENSION FUNDS

Mr. ALLOTT. Mr. President, approximately 2 years ago we passed a law concerning the regulation of the union welfare and pension funds. At that time the senior Senator from Colorado was forced to take a very extremely lonesome position about the quality of the legislation which was being submitted to Congress for the control of these funds.

Recently the junior Senator from Pennsylvania [Mr. SCOTT] placed in the RECORD a long report by Secretary Mitchell and made a speech upon the subject, showing that the words uttered 2 or 3 years ago were prophetic.

Out of an estimated 400,000 to 500,000 funds in the United States, only 142,000 have ever reported, and those reports are very inadequate. I feel that this is an area in which Congress must take action, but the fact that performance under this law has turned out so unsatisfactorily, it is in my mind conclusive proof that the law that we passed was completely inadequate, that we have wasted hundreds of thousands of dollars in the administration of so-called welfare and pension funds, and, most pathetic and sorrowfully of all, we have not protected the workingman today from raids upon his funds by the unscrupulous people in power.

I ask unanimous consent that there be printed in the RECORD at this point in my remarks a statement I have prepared upon this subject.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ALLOTT

There have been references made in this body in the past few weeks as to the need of strengthening the Welfare and Pension Plans Disclosure Act of 1958. I was pleased to hear the distinguished Senator from Illinois, Mr. DOUGLAS, only last week add his voice to those of President Eisenhower and Secretary Mitchell in requesting needed amendments to the act. I point out to the Senate that President Eisenhower had grave misgivings as to the effectiveness of the law when he signed the bill in August 1958. At that time he indicated that he was approving the act only "because it establishes a precedent of Federal responsibility in this area. It does little else." He stated: "If the bill is to be at all effective it will require extensive amendment at the next session of the Congress." His views in this regard were shared, I believe, by all of my colleagues who had worked on this problem in the Senate.

Secretary Mitchell's report on the first 18 months of operation of the Welfare and Pension Plans Disclosure Act confirms the fact that the act provides only "a shameful illusion" of adequate protection to over $30 billion in which 85 million Americans have a vital interest. That report supports President Eisenhower's misgivings in 1958 and clearly points up the need for action on a bill (S. 2550) which was introduced by my good friend, the junior Senator from Pennsylvania, HUGH SCOTT, in the first session of this Congress to carry out the President's recommendations and provide a measure of protection over these funds.

Unfortunately, that bill has lain dormant, day after day, month after month, and very soon we shall be able to add year after year, in the Senate Labor Subcommittee, chaired by the distinguished junior Senator from Massachusetts. I hope that Secretary Mitchell's dramatic report indicating the shortcomings of that act will prompt the junior Senator from Massachusetts, who has a responsibility in this area, to join with President Eisenhower, Secretary Mitchell, Senator Douglas, and myself in an effort to correct its ineffectiveness.

I do not intend to cast blame for the original failure of a Democratic controlled Congress to pass meaningful legislation. However, in view of statements recently made on the floor of this great body directed at an administration which was the prime mover in bringing to light the sickening abuses in the handling of welfare and pension funds, I intend to set the record straight.

President Eisenhower in a special message to Congress in January 1954, recommended that the Congress study the operations and administration of welfare and pension plans. The tremendous growth in these plans during World War II and the years that followed, together with possible abuses which may have developed during such expansion, prompted the President's recommendations. In May of that year a special subcommittee was set up under the chairmanship of our esteemed former colleague, Senator Irving Ives, of New York, to investigate the operations and administration of these plans. The investigation was continued during the 84th Congress under the chairmanship of the able Senator from Illinois, Senator DOUGLAS. The final report of the welfare and pension plans investigation filed by Senator DOUGLAS contained the following paragraph:

"The mandate which brought about the subcommittee's investigation of these programs did not arise from a desire on the part of Congress to meddle in the affairs of either labor or management; it became necessary because of unfavorable developments in the welfare and pension programs, as recognized in the President's message of January 11, 1954."

The extensive investigative hearings which had been so ably conducted, first by our well-remembered colleague, Senator Ives, and later by the able senior Senator from Illinois, Senator DOUGLAS, served as a basis for

consideration of legislation by the Subcommittee on Labor of the Committee on Labor and Public Welfare. Unfortunately, Senator DOUGLAS' tenure as chairman of that subcommittee was terminated prior to the consideration of such legislation. I had come to appreciate Senator DOUGLAS' broad insight during the time we served together on the special investigating committee and had confirmed my high regard for his doggedness and determination in debate. His extensive knowledge and wise counsel were sorely missed during the course of our consideration of legislation in this area. I say this even though we did not entirely agree on the proper scope of this legislation.

The administration maintained its position in the forefront of welfare and pension legislation when an administration bill designed to cope with the abuses in the administration and operation of welfare and pension funds was introduced in Congress in January 1956. (Three months before the filing of the final report by Senator DOUGLAS' investigating subcommittee.) A similar bill (S. 1145) was introduced in the Senate. The administration's position was later revised and support given to S. 2888, a bill which passed this body by the overwhelming vote of 88 to 0.

I differed with some of my colleagues as to the broad sweep of S. 2888 which I felt covered unnecessarily certain types of pension and welfare plans where no abuses had been uncovered and which seemed for good reason to be immune to skulduggery—the "level of benefits" plans. But when I was unsuccessful in limiting the legislation to those crucial areas where abuses had been uncovered, I voted to support the bill. My supplemental views filed with the Senate Labor Committee report explained my belief that the broad scope of the bill would "make it difficult for the administering agency to detect the evils which disclosure is intended to reveal." Nevertheless, although I looked upon certain provisions of the bill as questionable (CONGRESSIONAL RECORD, vol. 104, pt. 6, p. 7515), I voted to support the bill because of the urgent need to "restore some sense of integrity, decency, and honesty to the administration of the fixed-cost funds." (CONGRESSIONAL RECORD, vol. 104, pt. 6, p. 7515.)

I believe that the 88-to-0 vote of this body in support of the Senate bill disproves the charge of administration lipservice to the passage of this legislation.

The fact of the matter is the Democratic-controlled House, led by Chairman BARDEN and Congressman TELLER, conspired to cut the guts out of the Senate-passed bill by stripping the Secretary of Labor of all power under the bill. He was installed by the terms of the House bill as a mere custodian of reports, reports which under the terms of the House bill were meaningless. And, what did this great body do? Why, our conferees led by the distinguished junior Senator from Massachusetts, in spite of a vote of 88 to 0 in support of our position, accepted the House version of the bill almost verbatim.

It is true that we were successful in obtaining permission from the House conferees to permit the Secretary to prescribe "forms" but even this concession provided that such forms did not have to be used. It was as the junior Senator from Massachusetts has indicated a difficult conference. But I can scarcely agree with his sentiments that "the Senate conferees were negotiating from a point of weakness." I suppose my colleagues on the other side of the aisle who controlled a majority of the Senate conferees and a majority of the House conferees will soon be accusing the Republican administration of making the Senate conferees weak and for having brought forth the more ineffective of the two bills from that completely Democratic dominated conference. The fact of the matter is that an ineffective bill was brought forth and was pawned off to the public as the answer to the abuses discovered in the operation and administration of welfare and pension funds.

I differed with such an approach. When the conference report on this legislation was up for adoption in the Senate, I stated, "I believe the people of the country, particularly the laboring people, should understand that the report will not remedy many of the troubles which afflict the pension and welfare plans. I believe that point should be clearly understood, so that the people of the country who work and who are members of some kind of fund or plan will understand the limitations of the conference report legislation.

"The report will give to each individual member information about how his fund is operated, what it consists of, and what his benefits and his rights under it are. But so far as being a really tough bill to stop the abuses which are found in abundance in many, many of these funds, throughout the country, particularly in the fixed-cost, Taft-Hartley type plans, the conference report does not provide any effective authority to clean up the funds.

"Under the circumstances, I believe the conference report probably is weaker in some respects than Senate bill 2888. The conference report will do what I have just said and no more."

In short we had come full circle from the Committee bill which provided unnecessarily burdensome regulation to one which accomplished virtually nothing.

In spite of the bill's shortcomings I indicated that I believed the wisest thing we could do at that time was agree to the conference report, and go along with it for a year or two; and then, when the next session of Congress convened, proceed to make improvements.

I told the Senate, "* * * that with the information which is given to individual Members, and with the statistical information made available, within a year and a half, or two years at the most, we can have a wealth of information which will permit us to legislate far more adequately than at the present time."

It appeared during our discussion of the conference report that the junior Senator from Massachusetts agreed with my remarks. However, in view of his subsequent statement at the time of the signing of the bill by President Eisenhower that "workers can now rest assured that the funds they depend upon for old-age retirement and for health and welfare benefits will be protected," I have no present knowledge as to whether or not he recognizes the urgent need to amend the legislation to provide adequate safeguards for the over 30 billions of dollars in which 85 million Americans have an interest.

In 1959 and again this year, the administration made specific recommendations to strengthen the law. Bills, which if enacted would make this law effective, have been pending in both Houses of Congress since the first session of this Congress but no legislative action has been taken.

In addition, we now have Secretary Mitchell's report on how the Welfare and Pension Plans Disclosure Act has been working out. It is an excellent report, some 43 pages in all, and I urge the Members of the Senate to study it.

In his report, Mr. Mitchell explained that the two major shortcomings of the law were its failure to provide authority to the Secretary to interpret its provisions or to investigate and enforce compliance with it. This lack of authority to administer effectively the law has resulted, Secretary Mitchell stated, in the obvious failure of many thousands of pension and welfare plans to file with the Labor Department as required by the law. In addition, the Secretary explained, thousands of reports filed with the Department contain defects in and omissions of information required by the law.

In his letter of transmittal to the President of the Senate and the Speaker of the House on August 11 last, Secretary Mitchell called for "prompt amendment of the act" to correct its deficiencies. He asked that the law be changed to require prompt and meaningful reports from pension and welfare funds plan administrators, to permit the Secretary of Labor to issue authoritative interpretations of the law, and to give the Labor Secretary power to investigate violations and enforce provisions of the legislation.

The situation in which the Secretary of Labor finds himself and which so handicaps him is best described by the following examples:

1. The number of plan descriptions (142,500) which have been filed with the Department of Labor to be made available for public disclosure is many thousands short of the number of plans believed to fall within the scope of the act.

2. Based upon information relating to the frequency of changes in employee benefit plans it is obvious that the number of plan amendments submitted to the Department of Labor under the requirements of the act is thousands short of the total number which should have been submitted and thus full and current details of these plans are not available for public disclosure.

3. The law requires that for each description of an employee welfare or pension benefit plan the plan administrator shall file an annual report covering the operations of that plan. By June 30, 1960, only 100,500 annual financial reports had been filed with the Department of Labor. Not only were some 15,000 to 20,000 reports delinquent and in violation of the law after June 30 but thousands of other submissions consolidated the financial data for several plans into a single report contrary to the explicit provisions of the act.

4. Moreover, obvious defects and omissions are clearly evident in thousands of reports which have been filed and thus patently not in compliance with the law. In many instances, after these deficiencies have been called to the attention of plan administrators, they remain uncorrected. Under the present state of the law, the Department can take no further action.

5. Finally, the overall adequacy or accuracy of seemingly complete reports filed with the Department of Labor cannot be effectively determined because of the absence of rulemaking, investigatory or enforcement authority thus leaving the Secretary of Labor for all practical purposes, powerless to uncover abuses.

By failing to act on this legislation, we are failing to keep faith with the people of America. We are continuing to maintain the false impression in the minds of over 85 million working people that their interests in welfare and pension funds amounting to over $30 billion are adequately protected.

We owe a duty to these millions of Americans to amend the Welfare and Pension Plans Disclosure Act. By amending the act, we can see to it that the billions of dollars annually received and disbursed by these plans are not being manipulated or embezzled. We should assure the working people of this country that these plans will be honestly managed for the lawful purposes for which they were intended.

I ask the Senate to honor the request of President Eisenhower for amendment to this act. I ask the distinguished junior Senator from Massachusetts, who has jurisdiction over this area, to give some attention to the ineffectiveness of this law which was pointed out by the President when he signed the bill in August 1958, and confirmed by Secretary Mitchell's report on the

first 18 months of operation of the Welfare and Pension Plans Disclosure Act. I ask that the junior Senator from Massachusetts consent to have early hearings on amendment to this act. Continued silence on his part can only mean that the chairman of our Labor Subcommittee really was interested more in getting "a bill" than in protection of the workingman's welfare and retirement funds. They are not now protected and unfortunately those who need the protection believe that the protection exists.

FARM CREDIT

Mr. ALLOTT. Mr. President, I am informed, although I have not yet had an opportunity to locate it in the RECORD, that the senior Senator from Minnesota [Mr. HUMPHREY] yesterday made a speech upon farm credit and the need for it. I could not agree with him more. The first bill I offered in the Senate of the United States was a bill to completely revise, modernize, and codify the farm credit laws of the United States, which began with the Bankhead-Jones Act, and come up to date with some 30-odd amendments. The regulations alone interpreting these laws consist of about 1,200 pages. Not only are the local committees of the Farm Home Administration confused about the laws and regulations, but also attorneys in the Department of Agriculture many times say that they cannot untangle the web that Congress has woven around them.

There has been lying in the Committee on Agriculture for several months now a codification, a good farm credit bill. I wish to say that it has been held up not by any Members on my side of the aisle but by some Members on the other side of the aisle. I wish to say specifically that the chairman of that subcommittee, the senior Senator from Florida [Mr. HOLLAND] deserves our thanks. If he were here on the floor at this moment I would thank him for all the efforts that he has made to try to bring this proposed legislation, which is so necessary to the welfare of our farmers, to fruition. If anyone had seen, as I have seen, good American farmers lined up for a block and a half down the street waiting to file their applications for loans, he would understand why these laws must be simplified and why they should be made meaningful.

THE PLACING OF APPROPRIATE MONUMENT OR MARKER AT SITE OF FORT CLATSOP IN HONOR OF THE LATE SENATOR NEUBERGER

Mr. MORSE. Mr. President, I ask unanimous consent that there may be printed in the RECORD the text of a resolution adopted at the last meeting of the Democratic Central Committee of the State of Oregon. The resolution provides for the placing of a marker or plaque at Fort Clatsop in honor of my late colleague, Richard Neuberger, who was the moving spirit behind the creation of Fort Clatsop as a national memorial.

I ask unanimous consent that both the resolution and the letter, which I received from the chairman of the Democratic Party of Oregon, be inserted at this point in the RECORD.

There being no objection, the resolution and letter were ordered to be printed in the RECORD, as follows:

RESOLUTION OF CLATSOP COUNTY DEMOCRATIC CENTRAL COMMITTEE, ASTORIA, OREG.

Whereas it was due to the untiring work and devotion of the late Senator Richard L. Neuberger that Fort Clatsop was declared a national memorial by the Congress of the United States and the necessary funds were provided to carry out the work of making Fort Clatsop a national shrine; and

Whereas the Fort Clatsop National Memorial is of great historical interest and will attract thousands of visitors in coming years: Now, therefore, be it

Resolved, That the Clatsop County Democratic Central Committee and the Democratic Party of Oregon, acting jointly do go on record as urging that in recognition of Senator Richard Neuberger's work and devotion a suitable monument or marker be placed at the site of Fort Clatsop in honor of the late Senator; and be it further

Resolved, That copies of this resolution be presented to the Oregon congressional delegates, Department of Interior Secretary Seaton, Gov. Mark Hatfield, Mrs. Maurine Neuberger, the Oregon Historical Society, Clatsop County Historical Society, and other interested parties.

DEMOCRATIC PARTY OF OREGON,
Portland, Oreg., August 27, 1960.

Senator WAYNE MORSE,
Senate Office Building,
Washington, D.C.

DEAR WAYNE: The enclosed resolution urging that a suitable monument or marker be placed at the site of Fort Clatsop in honor of Senator Richard Neuberger was proposed at the July 31, 1960, Democratic State Central Committee meeting. That body unanimously endorsed the resolution.

Your favorable attention to this resolution will be greatly appreciated.

Sincerely,

ROBERT W. STRAUB,
State Chairman.

SAN JOSE CONFERENCE OF AMERICAN FOREIGN MINISTERS

Mr. MANSFIELD. Mr. President, Secretary of State Herter has just returned from San Jose, Costa Rica. I know that the Senate joins with me in welcoming him home. I should also like to take this occasion to extend to him and his associates my congratulations and thanks for their exceptional efforts on behalf of the Nation and the hemisphere at the American Conference of Foreign Ministers.

The word "victory," notwithstanding the use of it in speeches in Havana, has no relevance in relation to the results of this Conference. The Conference did not convene for the purpose of defeating any nation. And it is a measure of the depths of misunderstanding which still remains in this hemisphere that it should be so interpreted by anyone. It convened in an effort to meet two real problems of this hemisphere. In the one, there was a situation of continuing tyranny which, after decades of incubation within the borders of one nation, had evidently reached such lengths as to bring about an attempted assassination of a leader of another nation elsewhere in the hemisphere. The conscience of the Americas could no longer suffer that situation in silence and the first specific steps were taken to neutralize it. The decision, to act in this fashion, adopted by 20 of the 21 American states, was a milestone in the development of a doctrine of hemispheric concern which had been enunciated last year in the Declaration of Santiago.

With respect to the second problem, the Conference drew clearer the line against attempts of those not of this hemisphere to introduce destructive dissension among the American states and break their unity by missile threats. It also strengthened the resolve of the hemisphere to deal in concert with any member nation which facilitates that introduction by an arrogant and immature denial of the common history of the Americas and its own responsibilities to the hemisphere. That is the substance of the new Declaration of San Jose, signed by 19 of the 21 American nations. How it will be elaborated depends upon the strength of the resolve of the preponderant number of nations which signed it and on how those to whom it applies respond, not today or tomorrow but in the weeks and months and years ahead.

Regardless of my personal feelings, there is no comfort in the fact that two states chose not merely to differ with, but to defy the combined judgment of the other American Republics. But there would have been even less comfort in not facing the problems which had to be faced in the interests of the hemisphere in order to put on a misleading mask of unity. I hope that those nations now in defiance will ponder their actions and their interests most carefully. I hope that they will reach the same conclusion which this Nation reached when it inaugurated the good neighbor policy; that it is in the long-range national interests to work in concert with the other American states regardless of what temporary gain may seem to flow from working independently of them or against them.

I do not think it is too much to ask American nations and to continue to ask them to keep family quarrels within the house of the Americas and not, in a blind fury, run to the corner to find a "furioso" to back up their defiance. But if one or two must follow this pattern of immaturity so be it. But let us strengthen the house and keep it strong. The house will be there when the fury is spent. The door will always be open to them, and they can reenter whenever they are prepared to clean the mud from their shoes and to come in not as conquerors or tyrants but as sensible, sober and equal members of the American family.

To keep the house strong, Mr. President, and to build it stronger, we must move forward rapidly in concert with the other American States to deal with the economic and social problems of the hemisphere. This administration already has the full support of the Senate for a new approach to Latin America. I hope that the House will now act on S. 3839, prior to adjournment, so that the administration can go to the Bogotá Economic Conference which opens in a few days certain in the knowledge that the Nation stands solidly behind it in its efforts to rebuild the essential solidarity of the Western Hemisphere.

I ask unanimous consent that there be printed in the RECORD at this point in

my remarks the draft text of the Declaration of San Jose, Costa Rica, as published in the New York Times on August 29, 1960.

There being no objection, the draft text was ordered to be printed in the RECORD, as follows:

DRAFT TEXT OF DECLARATION OF SAN JOSE

The Seventh Meeting of Consultation of Ministers of Foreign Affairs—

1. Condemns emphatically intervention or the threat of intervention, even when conditional, from an extra-continental power in the affairs of the American Republics and declares that the acceptance of a threat of extra-continental intervention by any American state jeopardizes American solidarity and security, wherefore the Organization of American States is under obligation to disapprove it and reject it with equal vigor.

2. Rejects, also, the attempt of the Sino-Soviet powers to make use of the political economic, or social situation of any American state, inasmuch as that attempt is capable of destroying hemispheric unity and jeopardizing the peace and the security of the hemisphere.

3. Reaffirms the principles of nonintervention by any American state in the internal or external affairs of the other American states, and it reiterates that each state has the right to develop its culture, political, and economic life freely and naturally, respecting the rights of the individual and the principles of universal morality, and as a consequence, no American state may intervene for the purpose of imposing upon another American state its ideology or political, economic, or social principles.

OPPOSES TOTALITARIANISM

4. Reaffirms that the Inter-American system is incompatible with any form of totalitarianism and that democracy will achieve the full scope of its objectives in the hemisphere only when all the American Republics conduct themselves in accordance with the principles stated in the Declaration of Santiago, Chile, which was approved at the Fifth Meeting of Consultation of Ministers of Foreign Affairs, the observance of which it recommends as soon as possible.

5. Proclaims that all member states of the regional organization are under obligation to submit to the discipline of the Inter-American system, voluntarily and freely agreed upon, and that the soundest guarantee of their sovereignty and their political independence stems from compliance with the provision of the Charter of the Organization of American States.

6. Declares that all controversies between members states should be resolved by the measures for peaceful solution that are contemplated in the inter-American system.

7. Reaffirms its faith in the regional system and its confidence in the Organization of American States, created to achieve an order of peace and justice that excludes any possible aggression, to promote solidarity among its members, to strengthen their collaboration, and to defend their sovereignty their territorial integrity, and their political independence, since it is in this organization that the members find the best guarantee for their evolution and development.

8. Resolves that this declaration shall be known as the Declaration of San Jose, Costa Rica.

FOREST FIRES AND BUDGET BUREAU POLICY OF NOT ONE CENT FOR DEFENSE BUT MILLIONS FOR TRIBUTE

Mr. MANSFIELD. Mr. President, I rise in the closing hours of this Congress to make some remarks on the terrible forest fires that have swept our national forests again this year. I do not speak in a partisan vein, but I must point out that I believe that the budget policies of this administration have contributed significantly to the terrible situation.

In the years since 1953, 1,585,350 national forest acres have been burned. This year alone over one-third of a million acres will be consumed by these forest fires. The estimated loss in timber, watershed, grazing, recreation, and other values is close to $150 million.

I judge this to be conservative for certainly it does not fully measure the loss in productive capacity, the loss to future generations, or the loss due to delay in rehabilitating these lands.

The cost to extinguish these fires from 1953 to date has been $134 million and before the bill is in for this year it will run in excess of $140 million.

The aggregate of losses and costs to extinguish forest fires has been almost $300 million. This is an expenditure which buys us nothing.

Since fiscal year 1955, and I regret that I do not have immediately available the 2 preceding years, the Forest Service has requested $91.4 million for fire prevention. The Budget Bureau has cut this request to $84.4 million and Congress has granted $86 million. For structural improvements, another program essential to fire prevention, the story is the same. A Forest Service request aggregating $60.4 million was reduced to $46 million by the time the Budget Bureau wielded its ax. Congress granted $50.3 million. I ask unanimous consent that a table showing this history be placed in the RECORD.

These two activities aggregate $136 million. We find the Budget Bureau economizing on fire prevention while not an eyelash is batted as $150 million worth of natural resources are burned up and $140 million is spent to stop the fires.

During the 1930's, under the CCC program, Franklin D. Roosevelt invested substantial funds to develop an adequate forest fire organization. In the 1930's national forest fire losses were reduced 1,600,000 acres below what they were in the 1920's. In the 1940's losses dropped 630,000 acres below those of the 1930's. In the 1950's losses are but 100,000 acres less than in the 1940's.

In the last 8 years, 5 of these have been marked by years when over 200,000 acres of national forest have been consumed by forest fire. In the previous 8 years in only 2 years did losses exceed 200,000 acres.

As the investments of the thirties deteriorated and were not replaced the Forest Service has lost some of its fire prevention capability. The last few years have been bad fire hazard years and there has been increased public use of the forests. The need to start to rebuild our forest fire prevention facilities existed several years ago. The harvest of delay is here today.

Clearly the danger signals have been up, but the Bureau of the Budget can only see the dollar sign in the Federal budget. It is incapable of assessing the national interest.

It is willing, in its myopia, to spend millions to put the fires out—$140 million to be exact—while it cuts budget requests to strengthen fire prevention. It is willing to spend millions in tribute, to close its eyes to the staggering losses in a vital natural resource. It will not allocate money for an adequate defense against these fires. The Budget Bureau has opposed needed investments in roads, reforestation, watershed management research, State and private forestry, and every other phase of national forest activities. This case was clearly presented on June 8 by the Senator from Wyoming [Mr. MCGEE]. On August 29 he again set forth the Bureau of the Budget's historic opposition to adequate funds for reforestation to repair the damage caused by these terrible fires.

I express the hope that the next President will, as his first step, reconstitute the Bureau of the Budget so that he has at his disposal an adequate mechanism for gearing the budget to the national need. Here is a clear example where budget policies have been permitted to wreak havoc with a valuable public resource.

Congress can take pride that it has exceeded the President's budget to strengthen Forest Service fire prevention work. If we had not done this, I shudder to think that the losses would have been even greater.

I want to commend the Chief of the Forest Service and his employees for their accomplishments under difficult circumstances. We can all be proud of the superlative effort of their people against difficult odds.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a table showing Forest Service budget history for the fiscal years 1955–61, and forest fire protection and structural improvements.

There being no objection, the table was ordered to be printed in the RECORD.

Forest Service budget history, fiscal years 1955–61—Forest fire protection and structural improvements

Fiscal year	Forest fire protection				Structural improvements for fire and general purposes			
	Forest Service request	Department request to Budget Bureau	Budget estimate	Appropriation act	Forest Service request	Department request to Budget Bureau	Budget estimate	Appropriation act
1955	$10,402,000	$9,341,000	$9,341,000	$9,333,707	$3,495,351	$2,886,000	$2,876,000	$3,566,167
1956	12,593,000	10,466,000	10,466,000	10,769,500	3,726,000	3,089,000	3,089,000	3,995,050
1957	11,752,000	11,502,000	11,502,000	11,669,000	5,881,000	4,862,000	4,771,000	5,509,750
1958	13,791,100	12,577,100	12,546,000	12,546,000	13,944,600	8,731,850	8,725,000	7,725,000
1959	12,546,000	12,546,000	12,533,000	12,784,000	8,725,600	8,725,000	8,620,000	10,900,000
1960	15,264,000	14,046,000	13,673,000	13,973,000	13,353,000	11,375,000	8,879,000	8,879,000
1961	15,280,000	14,345,000	14,345,000	14,887,000	11,271,000	9,246,100	9,100,000	9,740,000
Total	91,428,100	84,823,100	84,406,000	85,962,207	60,396,051	48,914,950	46,060,000	50,314,217

MORE TATSEY COLUMNS

Mr. MANSFIELD. Mr. President, this session of Congress has been a busy one and at times a frustrating one. We have debated and acted on many important issues. And, I am sure we are all most anxious to adjourn and head for home or whatever activities the fall may bring.

A diversion from the heavy and scholarly content of the CONGRESSIONAL RECORD would be most appropriate at this time. Therefore, I ask unanimous consent to have the latest series of John Tatsey's Heart Butte News columns reprinted at this point in the CONGRESSIONAL RECORD. As my colleagues will recall, John Tatsey is the Indian Service policeman who writes a weekly news column about the Blackfeet Indians which appears regularly in the Glacier Reporter at Browning, Mont., and the Hungry Horse News at Columbia Falls, Mont.

The being no objection, the columns were ordered to be printed in the RECORD.

[From the Hungry Horse News, May 6, 1960]

APRIL STORM STOPS HEART BUTTE NEWS CARS

The storm that came up Saturday sure disappointed a lot of folks because they could not get to church and their weekend stick game. There was all of 3 feet of snow on the level.

Police Tatsey was stalled between Old Agency and Duck Head hill and could not go either way. Luck he had his two-way radio. Porky Sellars came out only to get stuck but all got home OK.

Mose the trapper headed toward Swift dam before the storm to trap. He is trapped in there by the deep snow. There was a letter sent to the reporter asking if Mose would rather give up beaver trapping to go killing porcupine for the hide. Some money in it.

Stoles Head Carrier has been staying close to home, he can not walk in deep snow, he may lose some weight when the snow goes off.

Alfred Bouttier is out to Big Badger helping with cattle and sheep at the Tatsey ranch.

Dr. King was called out to the Richard Heavy Gun Place Tuesday night where Richard got an attack of some sort and was very sick.

Mrs. Frank Comes at Night rushed her little girl to the hospital Saturday afternoon.

Louie Red Head has been staying near the school all winter. Last Friday he went home west of Heart Butte about 4 miles. Sunday morning he saw that he was hemmed in by snow.

The storm was really hard on the loafers. Farmers and stockmen were happy. All worried before the snow came, all safe now.

There will be a music festival at Heart Butte school on May the 5th by the school children.

George Wippert was rather lonely Sunday. No one came but had a few boys who played pool till late at night.

Old time doctors who first came to work among the Indians claimed that they could cure drunkenness by injecting horse blood in their veins. Maybe now it would be better to inject horse sense into their heads. Might help some.

Sam Horn was seen in Browning last Thursday first time all winter. He thought it was summer but found it different Sunday morning.

[From the Glacier Reporter, June 9, 1960]

HEART BUTTE NEWS

(By John Tatsey)

Last Saturday was a fine day. In the afternoon there was a meeting at the Sam New Breast Place on Big Badger. There were some candidates present. There were some speeches by candidates and lunch was served in the evening.

Sunday at the church were a lot of people. Everyone enjoying the nice weather. Fishermen on all the creeks some having luck others had little hard luck. The creeks are a little too high and rilly.

There will be a candidate rally Saturday, June 11, at the gymnasium or the commissary room. All council members and candidates are invited. There will be some lunch served by the candidates. Some have donated to buy lunch with.

One election is over and no one hurt too bad and now the big one coming this fall will be the exciting one.

There has not been anything exciting going on at Heart Butte. Horseracing will be starting this month. Some new race horsemen and new horses on the training track.

Charles Reeves made a talk at Swims Under meeting when he said that the council had made a rut with the wheeler—Howard Act and can't get out of it. So if we elect some new ones they may help old ones get out on the level where they will have good footing.

Heart Butte may have a Mexican rally as one of our candidates has some Mexican blood and he may make a good one. Blackfeet mixture might work out all right.

The Boy Scouts from different parts of the country and Canada were camping out at two medicine lake last Friday and they had a program Saturday evening by a bonfire where the scoutmasters represented a tree. There were five in all. Wayne Higgins represent the sap of the tree and the others represent the rest of the tree so they started running around in a circle as the bark and leaves dropped off on the ground and Wayne was the running sap.

The undersheriff of Pondera County and family were around Heart Butte looking around and looked on at the stick game which they enjoyed very much.

Sorry that we have not heard or seen what Stoles is doing. Everybody watches and listens to hear of Stoles but he is getting wise.

[From the Hungry Horse News, June 24, 1960]

HEART BUTTE PRACTICES FOR RODEO

(By John Tatsey)

Sunday was a busy day visiting tribal council candidates at church and at the rodeo which was held at Francis Bull Shoe ranch. They were a lot of people where riders and ropers were loosing up for the coming big rodeo at Browning. Joe Wild Gun and Francis Bull Shoe were unlucky; when Francis threw his rope his horse stopped quick and Francis kept going and fell off. Joe came next. He caught his calf when he jumped off and ran the opposite direction.

Mr. and Mrs. Allen Milne, of Somers, were over around Heart Butte and at the rodeo—a special trip to see Stoles Head Carrier. They said by reading the news they can picture him so they come over to see if their imagination of Stoles would be true. Stoles showed up after they left.

Stoles came home Sunday and got his car from the police yard and come to town Monday, and Tuesday morning he woke up in a "soop" hole. He went to his house to get help and found his son Thomas still in bed. He jumped on him—the boy swung his right to Stoles' left eye. He came to rally at Morning Gun with a pretty two-row "shiner."

Calf branding has got under way on the south side and sheep shearing also coming up.

Report come Saturday that upper Big Badger was booming with gallo (wine) so the police went to investigate and found only James Spotted Bear and Mike Swims Under in bad shape and were hauled to town to Jim Walters "sober up" shop.

Eugene Rutherford has arrived from Aberdeen, S. Dak., where he attended the boys state which was held on the campus of Northern State Teachers College during the first week of June. Along with him were other high school junior boys from 244 towns in South Dakota. He learned how officials were nominated and elected in South Dakota and what they do when they take office. They studied municipal government, county government and then the State government under South Dakota law. They had legislators and courts—justice courts and supreme court—and were shown how they work.

Mr. and Mrs. Abe Rutherford are proud of their son. They live on Birch Creek near Heart Butte.

The Boy Scouts from different parts of the country and Canada were camping out at 2 Medicine Lake last Friday and they had a program Saturday evening by a bonfire where the Scoutmasters represented a tree. There were five in all. Wayne Higgins represent the sap of the tree and the others represented the rest of the tree so they started running around in a circle as the bark and leaves dropped off on the ground and Wayne was the "running sap."

There has not been anything exciting going on at Heart Butte. Horseracing will be starting this month. Some new racehorsemen and new horses on the training track.

Sunday at the church were a lot of people. Everybody enjoying the nice weather, fishermen on all the creeks—some having luck, others had little hard luck. The creeks are a little to high and rilly.

STOLES SIGNS UP TO FIGHT FIRES

(By John Tatsey)

Stoles Head Carrier got in the Can at Browning last week and paid Jim Walters a short visit and did some work for him digging and covering two graves. He lost a little weight by sweat and not much to eat and now he signed up to fight fires.

The heat has bothered the people to near burning but that could happen anywhere. One Indian is believed to burn up in his house in Moccasin Flat. Some people move right in the devils house when they leave Browning.

There was an old man that took some young girls out for a spin one evening and coming home they landed in the ditch, when the car come to a stop they were setting girls on each side of him and he walked them home.

There were 40 young men signed up to go fight fires so the Police will have some sleep.

Boys and girls that took part in the rodeo at Conrad sure did a fine showing. Bill Brown a Blackfeet only contestant from Browning won first in saddle Bronco riding and 3 places in Calf Roping. One good showing by an Indian.

There were five Teepees and dancers taken to Conrad for the High School Rodeo where the Indians pitched teepees near the grounds. They danced on Sunday and George Montgomery took movies. They started to dance at noon and were out in the heat till about 5 o'clock and pretty hungry. Some got paid others got nothing.

[From the Glacier Reporter, Aug. 18, 1960]

HEART BUTTE NEWS

(By John Tatsey)

Heart Butte news was off for two weeks on account of the reporter being busy haying but will try and have some news each week.

Things have been very quiet all month. Some trying to work and all getting ready for winter.

Some good rains helped out some last week brightens things up some.

Haying has been slow but stock men are really busy trying to get enough hay for their stock for the coming winter.

Rankin Brown was around Heart Butte checking on some hay deals where there was some misunderstanding.

Some of the fire fighters that went over around Wolf Creek told there were 10 Blackfeet and one colored guy so when they put one fire out they new they were on a hog back so they inducted the colored boy into the tribe and giving him the Indian name Chief Hog Back.

The race committee meet and discussed the races they are going to put on this coming labor day.

There will be horse races Sunday Aug 21st at Heart Butte. All match races so bring all your horses and money. There will be coffee and sandwiches which are cheap.

There were some good races last Sunday because Old Bill Show was there made betting lively.

Stoles Head Carrier has quit traveling around. During the day last Sunday the Police was driving around midnight when he saw some thing off the road when the lights were thrown on it was Stoles standing like a post.

George Montgomery was at Heart Butte Monday. Took the trouble of coming just to take a movie of Jerry Comes at Night on a wagon and family showing how the Indians used to move around, so we will see Jerry on movie this winter, maybe on TV.

[From the Glacier Reporter, Aug. 25 1960]

HEART BUTTE NEWS

(By John Tatsey)

Contractors have been working on three school cottages and two classrooms and addition to the kitchen; all foundation in and the building will be coming up to be completed by December if weather permits.

The boys that had been running horses all went to the junior fair did not do so good but the footless Indians gathered at Heart Butte and played there stick game.

The people are just sitting waiting for Thursday when the payment will be made and hit for the tribal office.

Leo Bull Shoe has moved up to his hay meadow to start putting up hay for the winter.

Word was received from Conrad that Richard Vielle went before Judge Black to make his plea.

Stoles Head Carrier has been getting ready for winter by picking berries has been at this for a week the hot weather thinned him down.

Dr. Anderson from Portland Oregon was around Browning and Heart Butte collecting old Indian customs and other things he really like the Heart Butte country.

There will be a 2-day race meet Saturday and Sunday 27-28. Everyone welcome so come all and have a good time.

The Junior Fair was discouraging the way it was carried out being with the rodeo everyone being around the arena kicking beer cans around. Good example for the Juniors.

Report came from Starr school that the Labor Day races will be held there if it don't snow by then.

The teachers have all returned from there summer school at Havre and other parts of the State. All ready to go Monday the 29th.

Mose the trapper has finally returned to Heart Butte. He plans to trap only mink because he had Beaver last spring, he could not get a buyer and still has them.

It was good to see Francis Bull Shoe back home and at the stick game Sunday evening.

James Buffalo, Pat Kennedy from Starr school were at Heart Butte Sunday and John Little Dog and family were also at Heart Butte.

Peter Day Rider was committed to Galen Hospital last week where he will take treatment for 2 months.

There was a prowler at the school yard Saturday night knocking at doors. When Tatsey went out to investigate he found Joe Middle Rider from lower Two Medicine. Lucky Tatsey was on a vacation and no jail keys so stay away Joe.

TRIBUTE TO SENATOR DWORSHAK

Mr. MURRAY. Mr. President, I was unavoidably absent from the floor on Monday when the distinguished minority leader called to the attention of the Senate that it was the birthday of one of our hardest working and ablest colleagues. I shall now say what I would have said had I been present.

Our colleague to whom I refer, of course, is the ranking minority member of the Senate Committee on Interior and Insular Affairs of which I have the honor to be chairman. No member of that committee is harder working than HENRY DWORSHAK, and no member has a clearer understanding of the problems and needs of the West than does the senior Senator from Idaho; nor does any member work harder to solve those problems so far as they can be solved through Federal legislation.

HENRY DWORSHAK is an able and dedicated public servant, and I wish him many happy returns of the day.

SENATOR O'MAHONEY, OF WYOMING

Mr. KEFAUVER. Mr. President, I rise today on the Senate floor to speak of a man who has shared our work over many, many years.

This not an unhappy occasion in the sense that I have the privilege and honor to call to the attention of my colleagues a tribute to this man who serves his people and his Nation with devotion and fierce courage.

He has announced that he will relinquish his post in the U.S. Senate and return to his home where the jagged peaks of the Rockies are measured only by the lofty goals for which he has always fought.

I ask unanimous consent that this resolution I have here, signed by the members of the Antitrust and Monopoly Subcommittee, be placed in the RECORD at the conclusion of my remarks.

This resolution tries to tell, in words which are never adequate, of the respect and affection with which we have always regarded—and will always regard—the distinguished Senator from Wyoming, JOSEPH C. O'MAHONEY.

And, while it speaks of "goodbyes"—it will always be regarded by each and every one of us, and indeed by all his colleagues, as a wish of godspeed to his home in Wyoming. There, we hope, he will remember us in the many, many years of fruitful life that lie ahead for him, as we shall remember him.

These are our words for our friend and our colleague—JOE O'MAHONEY—and we speak them with tenderness and respect.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Mr. KEFAUVER, on behalf of himself, as chairman, and the members of the Antitrust and Monopoly Subcommittee, reported the following resolution on the occasion of the impending retirement of Senator JOSEPH C. O'MAHONEY, from the Senate of the United States:

"Whereas Senator JOSEPH C. O'MAHONEY has consistently sought to improve and strengthen the basic freedoms of our country; and

"Whereas the Senator's long service has brought forth a courageous and determined stand to resist the dangerous trend toward monopoly and to shore up the American system of free enterprise; and

"Whereas in pursuance of this task he has served as Chairman of the Temporary National Economic Committee which produced a vast storehouse of invaluable data on the workings of our economic system; and

"Whereas the Senator has served as acting chairman of this subcommittee and has presided over many of its important studies and legislative hearings; and

"Whereas the Senator has brought home to all of the people the simple vital fact that tremendous concentration of economic influence in the hands of a few persons demands the constant vigilance of legislators and other public servants who will act in the people's behalf; and

"Whereas the Senator's entire career in public life will serve as a constant reminder to all Americans of his profound belief that there can be no political liberty without economic freedom: Now, therefore, be it

"*Resolved*, That the Antitrust and Monopoly Subcommittee of the Committee on the Judiciary hereby expresses to Senator JOSEPH C. O'MAHONEY its deep appreciation for his many accomplishments in public office and his lifetime of devotion to the public interest; and further

"*Resolved*, That a copy of this resolution be made a permanent part of the records of this subcommittee, and that it be inserted in the CONGRESSIONAL RECORD, and conveys to him and his beloved spouse its heartfelt best wishes for a happy and fruitful life in the years that lie ahead."

ESTES KEFAUVER,
Chairman.
THOMAS C. HENNINGS, Jr.
JOHN A. CARROLL.
PHILIP A. HART.
EVERETT MCKINLEY DIRKSEN.
ALEXANDER WILEY.
ROMAN L. HRUSKA.

THE RELIGIOUS ISSUE IN THE CAMPAIGN

Mr. CLARK. Mr. President, this morning, in the New York Times, the very able columnist, James Reston, has published a brilliant article on one of the seamier sides of our national political campaign.

I ask unanimous consent that the article may be printed at this point in my remarks. I commend it not only to all my colleagues, but also to all readers of the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 31, 1960]

LET THE READER BEWARE FROM NOW ON

(By James Reston)

WASHINGTON, August 30.—Sometimes a small incident tells more about what is happening in the politics of the Nation than all the contrived propaganda of both parties. Here is a little story that illustrates both the cunning and the weakness of the anti-Catholic campaign against Senator KENNEDY.

Last week Senator JOHN J. SPARKMAN of Alabama received a copy of a Baptist paper from Alvin H. Hopson, preacher of the First

Baptist Church of Huntsville, Ala. This paper, called the Messenger, carried an article by Jess Moody of the First Baptist Church of Owensboro, Ky., entitled, "Thomas Jefferson, the Bigot."

The article read as follows:

"Perhaps the most widely quoted statement by Thomas Jefferson—'I have sworn upon the altar of God eternal hostility against every form of tyranny over the mind of man'—needs to be quoted in its full context.

"They who stand on political rostrums this fall should be aware as to whom Jefferson was referring when he wrote the words.

"Writing to a Dr. Rush in 1800, Jefferson said: 'They [the Boston Catholic clergy] believe that any portion of power confided to me will be exerted in opposition to their schemes. And they believe rightly: for I have sworn upon the altar of God eternal hostility against every form of tyranny over the mind of man. But this is all they have to fear from me, and enough too, in their opinion.' "

Dr. Moody's article then concludes by saying:

"Thomas Jefferson, the founder of the Democratic Party, had nothing but hostility for the Boston Catholic clergy. The present day Democratic Party just nominated the Boston Catholic leadership as the candidate for the position of Commander in Chief of the Government of the United States. Times do change, don't they?"

THE CROPPED QUOTATION

Of course, the only thing wrong with this quotation is that Mr. Jefferson did not mention the Boston Catholic clergy in his letter to Dr. Rush. The letter was written to Dr. Benjamin Rush from Monticello on September 23, 1800. He was arguing against the establishment of a national church which would give any denomination a favored position over any other, and in no way suggested anything about the Roman Catholic Church.

On the contrary, he singled out the Episcopalians and the Congregationalists for censure, all of which was omitted from the Moody article quoted above.

Incidentally, Dr. Moody was not in his study at the First Baptist Church of Owensboro, Ky., today. He was in the office of Senator THRUSTON MORTON, the Republican National Chairman, here in Washington, and explained that he got the quotation out of a book by Saul K. Padover.

"To be honest," he said, "I have not read the complete letter from Mr. Jefferson. If you knew me, you would know I am not attempting to create any division. I certainly don't want to do that. In fact, I am spearheading a project to softpedal this bigotry, for I fear it will backlash against Mr. NIXON."

Dr. Moody, who is staying at the Texas Gas suite in the Shoreham Hotel, said he came here at his own expense to discuss some ideas he sent to Mr. NIXON, he said, on the subject of religion.

THAT OATH AGAIN

Nevertheless, this illustrates what is going on. Today's mail brings one more printed copy of the bogus and infamous "Oath of the Knights of Columbus," described as a "Roman Catholic secret order." To give it authenticity, the oath is presented as coming from the CONGRESSIONAL RECORD of February 15, 1913.

Like the Moody quote from Jefferson, however, this one fails to mention that it was put in the CONGRESSIONAL RECORD as an example of false and libelous campaigning and described in the RECORD as spurious.

Fortunately, the anti-Catholic campaign is now so widespread and so savage that it is beginning to boomerang. There is a law of politics, similar to the law of dynamics, that every pressure creates a counter pressure, and that is now beginning to happen.

For this kind of thing affronts fair-minded people in the South as it does in the North, and while it may help the Vice President in some areas of the South, it could easily solidify KENNEDY'S strength in the large States of the North, where the election will undoubtedly be won or lost.

Mr. CLARK. Mr. President, I strongly support the position taken by Mr. Reston in this article, and hope that the religious issue may be kept out of the campaign.

SUGGESTED CHANGES IN SENATE RULES

Mr. CLARK. Mr. President, during the past 2 weeks I have offered 10 suggested changes to the Senate rules. For the convenience of Members of the Senate and for other readers of the CONGRESSIONAL RECORD I should like briefly to summarize what those changes are.

First. Senate Resolution 118 would require that a majority of the Senate conferees represent the prevailing view of the Senate in matters in disagreement with the House.

Second. Senate Resolution 361 would require that the debate on a pending measure be germane, upon the request of any Senator.

Third. Senate Resolution 364 would permit Senate committees to meet during sessions of the Senate.

Fourth. Senate Resolution 367 would permit speeches to be inserted in the RECORD in normal type, whether or not actually delivered on the floor.

Fifth. Senate Resolution 372 would create a rule permitting the previous question to be moved after 15 hours of debate, which motion, if adopted by a majority without further debate, would limit the debate on the pending measure or amendments to 1 hour per amendment and 4 hours on the bill. The previous question procedure is invoked in practically every other legislative body in the free world.

Sixth. Senate Resolution 369 deals with appeals from rulings under rule XIX, section 2, under which any Senator may require another Senator to take his seat. Under present procedure this can be done without a ruling from the Chair that the rule has been violated prohibiting any Senator from speaking disrespectfully of another Senator. My resolution would require a ruling by the Chair from which an appeal could be taken.

Seventh. Senate Resolution 377 provides that the Journal need not be read every day.

Eighth. Senate Resolution 378 would limit the morning hour to 60 minutes, and individual speeches to 3 minutes.

Ninth. Senate Resolution 384 would place a 3-hour limitation on the speech of any Senator, after which period unanimous consent would be required for him to continue.

Tenth. Senate Resolution 385 would empower the majority of any committee to convene and set the agenda and close debate after a certain time had elapsed during which a matter had been under consideration before the committee.

THE ORGANIZATION OF THE SENATE

Mr. CLARK. Mr. President, I should like to speak briefly on how the Senate should be organized next year to enact the Democratic platform, in the event our party's candidates are successful in the November election.

First, we should amend the rules in the 10 particulars I have outlined. I further believe it important that we should reorganize the Democratic leadership so that it will represent fully and fairly the prevailing view of a majority of the Democratic Members of the Senate. In this regard I would make the following points:

First, the leadership should be committed to enact the Democratic platform into law.

Second, the leadership should represent the majority view of the Democrats in the Senate. This majority view will support the Democratic platform.

Third, the best way to achieve these results, in my judgment, is, first, to provide for the appointment of three whips, in addition to the majority leader; one to represent the geographical area of the Mississippi Basin; the second to represent the Northeast of our country; the third to represent the South.

Then, if, as we all hope, the present majority whip the distinguished Senator from Montana [Mr. MANSFIELD] should become the majority leader, representing as he does the Mountain States and the Far West, we would have in the leadership both geographical and ideological representation on a fair basis for all Members of the Senate who are Members of the Democratic Party.

Fourth, we should reconstitute the policy and steering committees of our party, so that they will fairly represent both the major geographical areas and the differing ideological views of Senators.

Consideration should also be given to merging the two committees and restating their functions.

I believe their functions should be to advise the leadership on policy and on committee assignments. Careful thought should also be given to the election of those committees by the Democratic conference.

Fifth, a majority of the Democratic members of the committees, including, in some cases, the chairmen, should have signified their support of the platform in the legislative area dealt with by their respective committees. This, in my judgment, would be an essential step to enable us to support the program of the next Democratic President.

Sixth, and finally, I believe we should provide for periodical and frequent meetings of the Democratic conference at times and places convenient to the members, perhaps at lunch, in order that the leadership may report to the other Democratic Members of the Senate the recommendations which they make with respect to policy. These recommendations should be subject to full and free debate by members of the conference.

Mr. KEATING subsequently said: Mr. President, I was very much interested to hear the recommendations of my distinguished colleague from Pennsylvania [Mr. CLARK] with reference to the reorganization of the Democratic leadership in the next Congress. Of course, I

would not presume to try to interfere with any plans which he or others might have. On our side I am very well satisfied with the organization of the Republican leadership.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. KEATING. I would be happy to yield, but I am so short on time. I suggest the Senator may speak on his own time after my remarks.

The PRESIDING OFFICER. The Senator from New York refuses to yield. The Senator from New York may proceed.

Mr. KEATING. I feel certain that my distinguished friend from Pennsylvania, in referring to these changes on the Democratic side of the aisle, will share my view that it is imperative, at the very beginning of the next session, that we make determined efforts to modify rule XXII, in order to make it possible to enact meaningful legislation in the field of civil rights and, indeed, in other fields.

I invite the Senator's attention to the definite pledge in the Republican platform:

> We pledge our best efforts to change present rule XXII of the Senate and other appropriate congressional procedures that often make unattainable proper legislative implementation of constitutional guarantees.

I only regret that the Democratic platform on this subject is not quite so explicit, although I hope my friend from Pennsylvania reads into it substantially the same meaning as that of the Republican platform. The Democratic platform says:

> In order that the will of the American people may be expressed upon all legislative proposals, we urge that action be taken at the beginning of the 87th Congress to improve congressional procedures, so that majority rule prevails and decisions can be made after reasonable debate without being blocked by a minority in either House.

That is certainly a statement with which I find myself in complete agreement. I appeal to my friend from Pennsylvania, in his efforts to reorganize the Democratic leadership, as to which I would express no view. Of course he should bear in mind the important necessity of changing rule XXII, in order that we may be able to bring about action early in the next session of Congress.

Mr. President, I ask unanimous consent that these remarks may be printed in the RECORD immediately following the remarks of the Senator from Pennsylvania, and that if the Senator desires to say anything further, his further remarks may be printed in the RECORD following my remarks on this subject.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York? The Chair hears none, and it is so ordered.

Mr. JAVITS subsequently said: Mr. President, I ask unanimous consent that my remarks may be printed in the RECORD along with the remarks of my colleague in regard to the proposed change in rule XXII.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York? The Chair hears none, and it is so ordered.

Mr. JAVITS. Mr. President, at the opening of the Congress in 1959 we had a bipartisan group which sought to revise rule XXII. I express the confident expectation, Mr. President, that at the opening of the Congress in 1961 the same bipartisan coalition—and I hope it will then represent a decided majority—will move to amend rule XXII effectively in accordance with the Douglas plan, as reported to the Senate some time ago by the Senate Committee on Rules and Administration.

Mr. President, I think everything we have seen, including my own presentation this morning on the civil rights issue, the tremendous work of my colleague from New York in that field, and the work of other Senators, demonstrates this is the key to getting anything done, and that if we wish to get anything done we must not fail when the next session of Congress opens.

NEED FOR NATIONAL MORTGAGE MARKET

Mr. SPARKMAN. Mr. President, recently Dr. Kurt Flexner, an outstanding economist, addressed the American Bankers Association on the subject: "Why We Must Soon Have a National Mortgage Market." The address was published in the Commercial and Financial Chronicle of June 30, 1960.

Some time before the recess of Congress prior to the conventions, I introduced a bill to create a national mortgage market. I did so in the hope that most careful study and attention would be given to it. I think it is necessary for us to have such a market if we are to provide adequate financing methods for the supplying of homes to American families.

I am delighted that this outstanding economist, who, by the way, is an economist with the American Bankers Association, has taken this stand and has recommended to the American Bankers Association that they should support such a move.

Such organizations as the National Association of Home Builders, real estate boards, and similar groups who are concerned with this problem have supported the idea of a central mortgage market. I earnestly hope that the American Bankers Association will do likewise.

Mr. President, I ask unanimous consent that Dr. Flexner's address, which is published in the Commercial and Financial Chronicle, be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

WHY WE MUST SOON HAVE A NATIONAL MORTGAGE MARKET

(By Dr. Kurt F. Flexner)

(Parting the curtains slightly on an ABA study now taking place on how to create an adequate secondary market for secondary mortgages, Dr. Flexner underscores the pressing need to develop such a market in order to meet the future challenging demand for housing without Government intervention. He warns that imperfections and inefficiencies in private enterprise must be solved so they do not serve as a road for Government entry. He contrasts VA and FHA with conventional mortgages, and runs down the problems that remain to be solved in order to make conventional mortgages a competitively desirable credit instrument—in yield, safety, liquidity and marketability.)

According to a report recently published by the Subcommittee on Housing, Senate Banking and Currency Committee, the demand for housing during the next 10 years will be considerably greater than it was during the decade of the 1950's. During the last decade housing starts averaged 1,200,000 annually reaching twice nearly 1,400,000. Upon what assumptions is the expected increase in the demand for housing based? Perhaps the most important is the expected population increase, which according to present indications will add 35 million human beings by 1970. Perhaps equally important, however, is the fact that gross national product is expected to increase by 50 percent, or to $750 billion in 1970. This means that there will be not only many more families in 10 years from now, but it means that the average family will have an income of over $9,000 annually, with a rise in its expenditure for housing from $800 annually today to $1,200 annually in 10 years from now.

The mortgage debt which exceeds $185 billion today is expected to reach well over $300 billion by 1970. It is already the largest single private debt in the United States. Its share of the total debt will be even larger 10 years from now.

AN IMPORTANT CHALLENGE

It is quite likely that the demand for housing in the future will develop into an important political and economic challenge for this Nation, and it is equally important that this challenge be faced squarely. The demand for housing, however, is only one of the many demands households and business make upon an economy. Even at the level of full employment the gross national product is, of course, limited by our physical ability to produce. As our population grows and as we advance scientifically and technologically, we produce more; but the total amount is always limited and must be allocated among the great multitude of demands which always exist. Unless there is significant unemployment, it is not possible at any given time to increase output in housing without reducing output in one or more other industries.

In the American economy, what we produce is determined by private, business, and public demands and is allocated generally via a free market mechanism except for that sector of the economy which is more or less planned as a result of Federal or local government intervention. When an economy operates in a relatively free market atmosphere under conditions of fairly stable prices, each sector of the economy will bid according to its conditions of demand for the available supply of goods and services. The price mechanism and the interest rate serve to equate supply and demand. The increase in the demand for housing during the next decade, therefore, will have to be met out of the supply of goods and services we produce during that time. As we have seen in the past, however, the Government sometimes intervenes by attempting to increase the supply in a particular industry, such as housing, because for one reason or another that is thought desirable.

In the most advanced economies including the United States, a certain amount of Government intervention in the different areas of the economy has been accepted and already is taken for granted. Housing has become a major issue in American politics; and in order to avoid excessive Government intervention, it is extremely important to make the housing industry as efficient as possible. In the field of finance, this means that the mortgage as an instrument of credit should be made as desirable as any other instrument of credit. Every effort should be made

to make it appeal to every type of investor so that it can compete effectively with every other type of credit instrument. There is no reason why a mortgage cannot offer in terms of yield, safety, liquidity, and marketability the same advantages enjoyed by any other credit instrument now purchased by investors who still discriminate against mortgages. In other words, if housing is to be financed privately without increased Government intervention, certain weaknesses now found in the mortgage market must be eliminated.

CONTRASTS TODAY'S MORTGAGES

Government insured and guaranteed mortgages do possess a fair degree of national marketability, but the rigidities found in the interest rates discourage investment in such mortgages at the very time when the demand for housing is likely to be greatest. One need only look at the record to substantiate this. Conventional mortgages, on the other hand, which are not subject to the same interest rate rigidities, suffer from an equally serious handicap—that is, they lack national marketability, a handicap which discourages many potential investors.

Although the conventional mortgage is considered to be too personal an instrument of credit to appeal to such institutional investors as pension funds, I believe that it is only a matter of know-how to convert these mortgages into credit instruments that will prove attractive to such investors. On the other hand, FHA and VA mortgages which have been made impersonal through insurance or guarantees are often still considered cumbersome investments by such institutional investors as pension funds and trust funds, and by others. These characteristics of mortgages are technical rather than generic, however, and with imagination and effort, whatever handicaps now exist can be eliminated.

If private enterprise can meet the challenge of increased demands in the next decade or two, it will contribute much to economic stability as a whole. An improved secondary market for mortgages will attract, if necessary, additional funds to the mortgage market to meet increased demand. This will not prove inflationary if it is done via a free market mechanism in which all industries compete equally for the available supply of credit. The price of money will determine the direction of the flow of credit. On the other hand, if private enterprise permits certain shortcomings to continue in the area of mortgage financing, it may lead to greater Government intervention. This often contributes to economic instability since the additional funds coming into the mortgage market via Government intervention are usually in addition to all other outlays which at the level of near full employment is inevitably inflationary.

The development of a strong secondary market will do much to build a strong foundation for private enterprise in the housing industry. American business enterprise has been financed on the whole without the benefit of Government insurance or guarantees and largely as a result of the existence of a highly developed secondary market. Corporate stocks and bonds are freely traded across the country. A mortgage differs, of course, initially from a corporate bond. Conventional mortgages, as I have pointed out, are too personal an instrument of credit to lend themselves to nationwide trading. Even FHA and GI mortgages are too difficult to handle in the opinion of many potential investors. These handicaps, however, can be overcome in any number of ways.

REFERS TO ABA EXAMPLE

The American Bankers Association currently is studying the problems involved in creating an adequate secondary market for conventional mortgages. We are still in the stage of analysis, and no definite conclusions have been reached on major points. It is possible, however, to give a general example to show how the conventional mortgage can be given national marketability. In general, an organization could be created, privately owned, which would issue debentures backed by mortgages. Investors such as pension funds consequently would buy the debentures rather than the mortgages. Naturally, there are many questions and problems that arise in connection with such a plan. Ownership, capital, and management are merely some. Other problems are standards to be applied for selecting the mortgages which will serve as collateral for the bonds and the type of insurance or guarantee to be applied to the mortgages or the bonds. This is not to be taken as the plan that ultimately will be proposed by the American Bankers Association, for that plan is still under consideration. It merely is intended to serve as one example of how a mortgage can be given national marketability.

The mortgage debt is the largest private debt in the United States. The housing industry is the largest industry which serves all the people in every economic group. There is no real reason why that industry more than any other needs to depend upon special privileges or special aid from the Government if weaknesses which now exist in private financing can be eliminated. Corporate bonds are purchased by investors because they are impersonal and marketable across the country and not because they are insured or guaranteed by the Government.

I think it is a mistake to take it for granted that the mortgage lacks the liquidity or national marketability or ease of handling of other instruments of credit or Government bonds. A more constructive approach, I think, would be to make the mortgage so desirable an instrument of credit for every type of investor that the question of Government intervention would be reduced to a minimum. Imperfections or inefficiencies in private enterprise should never be the road through which the Government enters into economic activity, for with some effort and imagination, inefficiencies and imperfections can be eliminated.

FIRST FLAG TO BE RAISED OVER EXTENDED EAST FRONT OF CAPITOL, FRIDAY, SEPTEMBER 2, 1960

Mr. JOHNSON of Texas. Mr. President, on Friday, September 2, at 10 a.m., the first flag will be raised over the extended east front of the U.S. Capitol.

For the information of the Members of the Senate, there will be a brief ceremony at that time. The U.S. Marine Band will be present and the Marine Corps will provide a color guard.

Speaker RAYBURN has invited all Members, officers, and employees of both branches of Congress to attend the ceremonies. I ask unanimous consent that a press release issued by the Speaker of the House be printed at this point in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

Speaker SAM RAYBURN, Chairman of the Commission for Extension of the U.S. Capitol, announced today that a brief ceremony would be held on Friday, September 2, 1960, at 10 a.m., in connection with the raising of the first flag over the extended east central front of the U.S. Capitol.

The U.S. Marine Band will play selections from 9:45 to 10 a.m. The U.S. Marine Corps will provide a color guard, the members of which will lower the flag from the temporary pole installed in the peristyle of the dome during construction (when the old east front and old flagpole were removed about 2 years ago) and will raise a new flag over the extended east front. The color guard will receive the new flag from the Speaker of the House and proceed up the main central steps and through the Capitol to the roof. As they ascend the steps, the band will play "America the Beautiful." As the flag is raised for the first time on the permanent pole located on the roof of the extended east front, and as, simultaneously, the flag on the temporary pole is lowered, a trumpeter will sound "To the Colors."

The band will then play "The Star-Spangled Banner" and, in conclusion, "Stars and Stripes Forever."

Speaker RAYBURN invites Members, officers, and employees of the Senate and House of Representatives, and the general public to attend the ceremonies to be held in the area immediately in front of the main east central steps.

THE SPACE RACE

Mr. JOHNSON of Texas. Mr. President, two of our great newspapers, the Washington Star and the New York Times, have recently printed very perceptive and well-balanced editorials concerning the space race between the United States and the Soviet Union.

I ask unanimous consent to have printed at this point in the RECORD the editorial entitled "Forward in Space" from the August 22, 1960, issue of the Washington Star and the editorial entitled "Perspective in Space" from the August 25, 1960, issue of the New York Times.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Star, Aug. 22, 1960]

FORWARD IN SPACE

The American-Soviet race in space continues to gather momentum in a way that makes predictions about the ultimate outcome seem altogether idle and hazardous.

Within recent days our country has scored several important advances. These have included the successful launching of the huge Echo I communications satellite and the recovery (one by a spectacular "air snatch") of the capsules of Discoverers XIII and XIV—the first recovery ever made of instruments that had been placed in orbit around the earth.

As far as the historical record goes, this is a "first" that still stands, and all Americans can take proper pride in it. Over the weekend, however, it has lost much of its luster in the light of the Soviet Union's newest reported achievement—another truly great "first" involving the safe return to earth of an orbiting "cosmic space ship" carrying two dogs and other living things, including rats, mice, flies, seeds, and fungi.

What makes the latest Russian feat seem particularly impressive is the fact that the recovered vehicle has been described as a craft weighing close to 5 tons—quite big enough to carry a human passenger or two. By way of contrast, the Discoverer satellites—which have yet to send a living thing on a successful round-trip orbital flight—weigh only about 300 pounds. This speaks for itself as a measure of the current superiority of the thrust power of Soviet rockets: They can put up payloads far heavier than those that can be put up by the family of missiles now available to us.

In view of all this, the Russians would seem to be odds-on favorites to be the first to place a man in outer space and bring him back safe and sound. Certainly, as they have just demonstrated with their "menagerie" satellite, they have what it takes to loft

highly instrumented craft of great weight into orbit. And they probably have learned a lot about the problems of maintaining life up there and preserving that life—whether a dog's or a man's—for a healthy return to mother earth.

Nevertheless, regardless of what the gambling odds are said to be, our Mercury Project continues very much in being, and we have the thrust power to carry it out. One of the seven Astronauts engaged in it will be rocketed into space on a nonorbital flight later this year, and the big orbital shot is scheduled to take place some time in 1961. There is still a chance, in short, that we will succeed in doing the job before the Russians.

In any event, the race as a whole is likely to be neck and neck for a long time to come. And maybe, if one may be optimistic for a moment, it will end in a draw, with all parties cooperating in space for the peaceful progress of mankind.

[From the New York Times, Aug. 25, 1960]

PERSPECTIVE IN SPACE

Whatever else may happen during the rest of this month, it is already clear that August 1960, will go into history as a period of major advance in man's penetration of outer space. Both the United States and the Soviet Union have demonstrated the capability of returning safely to earth objects which had been put into orbit, and Echo I has demonstrated the feasibility of using balloon satellites for communications. Of all these feats the Soviet success in returning safely to earth the living organisms which had been in orbit is technically the most impressive, but our own scientists' achievements were also of first-rate importance. In both nations very rapid and important progress is obviously being achieved.

In all candor, it must be recognized that the Soviet feat this month suggests a continued substantial lead over the United States in a number of major areas of space research capability. The huge size of the latest Soviet sputnik testifies again to the Soviet lead in the rocket power needed to send very heavy vehicles into orbit. And if the Soviet claims that the flying menagerie was landed on earth within a few miles of a preassigned point is true—and there is no present reason to question this claim—then Soviet capabilities in this important respect are obviously greater than the relatively crude recovery techniques which we have demonstrated this month. The Soviet Union, in short, seems closer to manned space flight than we are and it may accomplish that feat before the year is out.

Before the latest Soviet space accomplishment some wishful thinkers had suggested that we had forged ahead in the space race. The more accurate perspective, it is now clear, shows that we are still behind because our competitor is himself moving rapidly even as we forge ahead. Much hard work and much expensive research and experimentation lie before us if we are to make up for the advantage gained in the late forties and most of the fifties, when the Soviet Union created the prerequisites for the space lead it has enjoyed ever since Sputnik I went into orbit.

But we may also hope that someday in the not too distant future the present rivalry will be turned into a fruitful cooperation which will speed humanity's common progress into space and cut the cost for that progress.

Mr. JOHNSON of Texas. Mr. President, the August 28, 1960, issue of the magazine section of the New York Times contains an excellent article which gives an emphatic "yes" to the question "Are Space Probes Worth It?"

The article deals with the problems and potentialities of our space program and the efforts we have made during recent years to explore outer space, as well as what is to come from these explorations.

I ask unanimous consent that the article entitled "Are Space Probes Worth It?" written by L. V. Berkner, be printed at this point in the RECORD, together with a memorandum concerning suggested changes to the Space Act.

There being no objection, the article and memorandum were ordered to be printed in the RECORD, as follows:

[From the New York Times magazine, Aug. 28, 1960]

ARE SPACE PROBES WORTH IT?

(By L. V. Berkner)

"Sites Mapped for Bases on Moon," "Suborbital Flight by Astronaut Due This Year," "Echo I Relays Voices Coast to Coast," "U.S. Recovers First Capsule From Orbit," "Soviets Bring Back 'Noah's Ark' Chamber." No month—and hardly a week—goes by without more news about man's trials and triumphs in the world of space.

In the 5 years since President Eisenhower's announcement of the U.S. space program on July 28, 1955, we have learned much, and not the least important fact is that space exploration will be expensive. In 1959, our space program cost us almost $500 million, and in 1960 it is expected that military and civilian space activities will cost more than $1,150 million.

Are such huge expenditures worth while? Although it is true that we cannot predict the full returns to mankind that will come from thorough space exploration, we can already perceive very substantial rewards from our present program. Our space expenditures should be considered a capital investment, like the construction of a great factory from which will emerge profitable products in the future.

In many respects, the situation is parallel to the system of subsidy that was necessary for the aircraft industry 30 years ago. Such subsidies made possible the creation of a new industry which not only provided us with the benefits of fast transport between any points on earth, but created employment, new sources of tax revenue and new and challenging opportunities for businessmen. At the moment, many of us do not realize that a similar situation exists with respect to space.

The practical potentialities of space exploration are sharply punctuated by the development of our capability to recover space vehicles on earth. The success this month of both the United States and the Union of Soviet Socialist Republics in returning space vehicles safely marks a major step toward ease in all aspects of space operations in the future. The ability to return vehicles with safety will increase the payoffs to be anticipated from our space program in military, commercial, and particularly in scientific applications of space activity.

Just what rewards can we expect from space? Each field of research has its hopes and has its attendant hazards. These are some of the payoffs and problems:

MILITARY

The most promising military application of space vehicles is the reconnaissance satellite. Already the first craft has been launched to develop this capability. A half dozen such devices, in appropriate orbits about 300 miles above the surface, could scan during sunlight hours every point on the earth daily. If it was not considered necessary to cover the whole earth, a smaller number could do the job. The nation possessing them would have an immense defensive advantage.

Even with present techniques, it is reasonable to expect that surface objects about 100 feet across could be distinguished in the pictures sent back by a reconnaissance satellite. Radar would enable it to observe large movements, as of troops or airplanes, even through a cover of clouds.

It could also eavesdrop on communications carried on at such very high frequencies that they cannot be received over more than a limited surface distance. Indeed, the quantity of communications information that can be acquired in this way is so great that a special problem will arise in handling the data collected, so that only useful information will be sorted out.

A special application is the 24-hour satellite. This is one launched in such a way as to orbit at the same rate as the earth revolves. Thus it would appear to remain stationary (or to swing very slowly in an arc) over one spot. Here, truly, "Big Brother is watching you." Such a satellite could be used not only for reconnaissance, but to broadcast television and radio programs into another nation's territory. Jamming such broadcasts would be difficult and could be accomplished only by another satellite.

Obviously, overflights by reconnaissance satellites will raise serious problems in international relations. We consider that space begins about 100 miles above the earth's surface, but how far does a nation's territorial rights extend? If a nation considers an overflying or hovering satellite inimical to its interests, it will be impelled to take countermeasures to reduce its effectiveness, or to destroy it. Thus the possibility of a space war arises, unless agreements among nations avoid the creation of friction in this way.

There is a more reassuring aspect to the use of reconnaissance satellites. By providing dependable data to show that a nation was not preparing an attack, they could conceivably quiet the nerves of a troubled world in a time of crisis, and so help to avert a war.

To reach these goals, however, costly development is required. Instruments are still primitive and great advances and repeated tests will be called for. Much experience will be required to evaluate and comprehend the information telemetered back to earth.

INDUSTRIAL

Space activities promise to revolutionize communications—radio and television, telephone and teleprinter messages, wirephotos and radiophotos, and the like—to such an extent as to produce a whole new industry.

The number of radio channels suitable for long-distance communications by present methods is very limited. Cables can be used—across both land and oceans—but these also have limited capacity, and are very costly.

Communications by means of suitably oriented and instrumented satellites promise to change this situation entirely.

We have just seen the first such experiment, with the launching of an inflated, 100-foot metallic-coated balloon from which radio signals, sent from a highly directional antenna, can be reflected, or bounced to a distant receiver. The system will make very high frequencies—now normally confined to short-distance uses, such as television and car telephones—available for long-distance communications.

The simple reflecting sphere is but a beginning. A 24-hour, or hovering, satellite, equipped with a solar or nuclear power supply and a relay transmitter, could increase the present communications capacity between two distant points a hundredfold. A hundred such satellites properly placed would increase our worldwide communications capability by a factor of 10,000.

Intercontinental radio and television networks are elementary examples of the applications of space communications that should be available in the next decade or

so. Worldwide telephone dialing will become possible. Message costs will be cut to perhaps one-tenth their present levels.

Whole new systems of international communications will doubtless appear. One can imagine a plant manager instantly ordering materials from anywhere in the world, with detailed specifications communicated automatically.

Indeed, the remote operation of automated machines in accordance with predetermined specifications seems entirely probable. Beyond lie applications in forms we cannot now even visualize, but we can be sure that they will bring peoples closer together and create enormous industrial opportunities.

Again, a heavy expenditure of effort will be needed. Component parts of electronic circuits must reach quite new levels of reliability to last for 10 or 20 years in continuous operation on station. Even our largest present rockets could not place a heavy relay satellite in 24-hour orbit and we must await the Saturns and Novas that are now being developed.

To acquire this communications capability—with the industry and employment and other advantages that it can provide to mankind—will require the development of an intricate system of international agreements and controls.

For example, there must be agreement on the transmitters and receivers to be used. Frequencies must be allocated in detail to avoid interference among satellites or with the present short-range users of high frequencies. There must be controls to prevent commercial warfare in the form of jamming signals that would render satellites useless.

The International Telecommunications Union, an affiliated agency of the United Nations, provides a basis for such agreements. At its regular decennial meeting in Geneva last year, the ITU called a special session on space communications for 1963. Already a work group of the agency has begun studies to see how the world can deal with these revolutionary problems. Within the United States, the Federal Communications Commission has announced hearings to review and evaluate the new problems that space communications impose.

SCIENTIFIC

The immense advances in science brought about by space research were clearly evident at the assembly of the International Union of Geodesy and Geophysics at Helsinki, Finland, early this month. Illustrative of these advances were the accomplishments of Pioneer V.

As it left the earth, Pioneer V found a third belt of electrification encompassing the earth 50,000 miles above its surface. Farther out, this great rocket found that interplanetary space was permeated by a small but significant magnetic field. Then, following an eruption on the sun, it encountered a dense cloud of ejected solar particles carrying with it a strong magnetic field. As this cloud reached the earth it caused a severe geomagnetic storm. This rocket showed that decreases in cosmic-ray intensity associated with geomagnetic storms occurred in distant space as well as at the earth, so that cosmic-ray decrease is an interplanetary and not a geocentric phenomenon.

From data like these observed in space, together with the IGY observations on earth, the scientists at Helsinki pieced together an exciting and coherent picture of the earth's interplanetary environment, and of the mighty influences of a stormy sun in producing important effects on the earth. Where will this new knowledge from space lead us?

Let us consider, as an example, the benefits of space research in meteorology. At present, weather forecasts can be made with reasonable reliability only about 48 hours in advance. If we could extend our forecasts only a little, the monetary gain would be enormous.

A representative of the American Petroleum Institute recently remarked that a knowledge of climate only a few percent more reliable than we have might save oil companies $100 million a year, since they would know in advance where to ship their oil and could cut inventories elsewhere. In one way or another, almost every aspect of human activity is affected by the weather, affected in terms of actual costs of operation.

How can satellites increase the accuracy of our forecasts? One way is by observing and mapping variations in the earth's cloud cover. We know that clouds reflect back into space 10 to 12 percent of the sun's heat which otherwise would reach the earth's surface. Since it is this heat that warms the atmosphere and powers the terrestrial heat engine that gives us winds and storms, variations in the cloud cover have a profound effect upon our weather. But we do not yet know how, when, and to what extent these variations occur.

The primitive experiments now under way, such as the many cloud photographs taken by the satellite Tiros, indicate that we are on the threshold of unimagined advances in our knowledge of meteorology. In the long run, increased understanding of climatic trends may prove more important than improvements in day-to-day forecasting. Man's earthly environment changes constantly. After all, New York was in the grip of an ice age probably not more than 20,000 years ago, hardly any time in geologic terms.

We do not yet know, although we should, what will be the ultimate effects on our environment of the simple activity of burning up the earth's fossil fuels—coal and oil—and discharging the resulting carbon dioxide into the atmosphere. Improved knowledge of meteorology has an enormous bearing on mankind's welfare in the future.

Astronomy offers another example of how space activity can pay off in terms of scientific research. Satellite-borne telescopes, outside the earth's atmosphere, will show the heavens with new clarity. From these studies, it seems likely, we shall learn not only much about the origin and character of the universe, but also new information about the basic physical processes of things about us.

Finally, space exploration will extend to the moon and planets. The first steps will be taken by placing a man in orbit around the earth and bringing him back—Project Mercury. A suborbital test flight is imminent, probably before the end of the year. Then will come visits to the Moon made by unmanned craft equipped with instruments to study their targets as they circle them, and radio their findings back to Earth. Next will come unmanned vehicles that can be landed, made to gather samples of the surface, and relaunched to return to Earth; and, at length, manned vehicles.

No one can predict just what the material payoff will be, but as John A. Johnson, General Counsel of the National Aeronautics and Space Administration, has said:

"It is the thought of man being projected into a totally alien environment, whether in orbit about the Earth, or standing for the first time on the Moon, or preparing to land on another planet, that makes the whole business the most exciting enterprise of our age."

Certainly, landings of instruments on the moon to relay back information will be possible within 3 or 4 years. But to take man out, to give him protection, to equip him for useful work, and to return him is a project that will require at least a decade.

The foreign affairs problems in the scientific space field are fourfold. First, there is the need for international cooperation in tracking and communicating with space vehicles. Not only must there be observation stations in different countries around the globe but there must be agreements to clear specific radio channels for space use.

Second, there must be agreements for the exchange of data received from satellites, and of the codes whereby they can be "read." Clearly, scientists of a nation cooperating in the collection of data will want to share in their interpretation.

Third, scientists of nonlaunching nations must be given access to space. Agreements permitting them to use facilities aboard space vehicles for their own experiments are necessary if we are to avoid envy and hatred—and if we are to advance science by drawing upon the best men, regardless of nationality.

Fourth, international agreement on the biological decontamination of space vehicles is of the outmost importance. If there is life on other planets, even in the most elementary forms of viruses or bacteria, it is vital that it be identified without any confusion introduced by bringing earthly forms of microorganisms.

Fortunately, international scientific cooperation in space dates from the very beginnings of space activity, under the International Council of Scientific Unions, in the organization of the International Geophysical Year. It is being continued in the work of a worldwide group known as the Committee on Space Research (Cospar), which held its first international symposium on space science in Nice in January of this year.

The United Nations, too, is working in this field through its Committee on the Peaceful Uses of Outer Space. The first U.N. International Conference on Outer Space is to be held sometime next year. Out of these discussions can come intelligent planning for the necessary steps toward international cooperation and agreement.

These are some of the payoffs that we can expect from a solid program of space research. Without international controls on the use of space, however, the possibilities for good will become sources of serious international tensions—possibly even of space war.

For the moment, we have a period of respite while nations develop new and more sophisticated forms of space activity. We must hope that the nations use it for serious discussions leading to agreements that will enable space research to exploit its existing opportunities and benefit all mankind to the full.

MEMORANDUM ON PROPOSED AMENDMENTS TO THE SPACE ACT (H.R. 12049)

The proposed amendments to the Space Act involve three principal areas of change, relating to (1) patent provisions, (2) organization, and (3) indemnification.

Analysis of the key issues involved fails to uncover any persuasive reasons for pressing for Senate action on these amendments during the current session.

One fact is of overriding importance. A new President will take office on January 20, 1961—less than 5 months from now. The next President could well have different views as to organization and functions of the military and civilian space programs. Any changes in the Space Act at this session will have little or no effect on the space programs during these next few months, but could restrict the freedom of action of the next President.

PATENT PROVISIONS

The Space Committee has received approximately 100 letters from corporations and patent lawyers, urging acceptance of the patent provisions of the House bill. Several Members of the Congress have notified the committee that they wish to testify in opposition to any such action to change existing NASA patent provisions.

Senator O'MAHONEY has informed the committee that his Judiciary Subcommittee is surveying patent policies of all Government agencies, preparatory to possible action to establish a uniform patent policy for the Government as a whole.

The following factors would affect any attempt to act on the patent provisions during the current session:

1. The proposed changes are controversial. The House appointed a special subcommittee which spent months on the problem. Senate action would also require considerable time for committee hearings and committee discussion. Floor debate on committee proposals would unquestionably be extensive.

2. It has been alleged that the present patent provisions deter corporations from seeking NASA contracts. However, this agreement appears to be largely based on theoretical considerations and hearsay.

In recent months, industry has demonstrated increasing interest in getting NASA contracts.

3. There is obvious need for a more uniform governmentwide policy on patents. Since NASA is operating successfully under existing patent provisions, it would appear logical to defer any changes in the law until they could be related to a uniform governmentwide patent policy.

ORGANIZATION

Last year, a subcommittee of the Senate Space Committee, with Senator SYMINGTON as chairman, held hearings on governmental organization for space activities. All the witnesses unanimously recommended against changes in the Space Act, on the ground that existing problems and deficiencies could best be solved by administrative actions taken under existing law. Despite this unanimous testimony the executive branch requested certain changes in the Space Act at the beginning of this session.

The following factors would affect any attempt to act on organization changes during the current session:

1. Although the House passed a bill along the lines requested by the administration, there has been no conclusive testimony as to the need for the changes. The record fails to show a single specific illustration of anything which should be done but which cannot be done under the existing Space Act.

2. The House bill would abolish the National Aeronautics and Space Council. Without passing judgment on whether this is desirable, such action clearly is not urgent, since the Space Council has met only once this year—on January 12, 1960. No meetings have been held since the President recommended abolition of the Space Council, and the Acting Executive Secretary of the Space Council has stated that no future meetings are planned.

3. The House bill would abolish the Civilian-Military Liaison Committee (CMLC) between NASA and the Department of Defense. This already seems to be an accomplished fact, however, since there has been no sign of any CMLC activity since the resignation of its Chairman, Mr. Holaday, on April 30, 1960. No successor has been appointed.

4. The House bill would establish an "Aeronautics and Astronautics Coordinating Board" to take the place of CMLC. NASA, Department of Defense, and Bureau of the Budget recommended against statutory creation of such a Board. However, Dr. Glennan has testified that such a Board was being created by administrative action. This clearly demonstrates that there is adequate authority under existing law for the establishment of any coordinating groups or mechanisms considered necessary or desirable.

5. The House bill includes a provision (the McCormack amendment) which states affirmatively that: "The Department of Defense shall undertake such activities in space, and such research and development connected therewith, as may be necessary for the defense of the United States."

The administration objects to this language and advocates only including a disclaimer provision to the effect that: "Nothing in this act shall preclude the Department of Defense from undertaking such activities involving the utilization of space as may be necessary for the defense of the United States."

The arguments pro and con are frankly fuzzy. As a practical matter, any policy disputes between NASA and the Department of Defense would be resolved by the President, which is exactly what is contemplated by existing law.

INDEMNIFICATION

Early during the first session of the 86th Congress, NASA and the Department of Defense submitted separate but identical proposals for authority to indemnify all contractors against unusually hazardous risks involved in space and military programs. The Armed Services Committee felt that no action was needed on the Department of Defense proposal. Because of the close interrelationship, no action was taken on the NASA proposal.

At the beginning of the 2d session of the 86th Congress, NASA requested authority to indemnify only contractors engaged in research and development contracts against unusual risks. It was pointed out that the Department of Defense has possessed such statutory authority since 1952.

While the Department of Defense has had authority to indemnify research and development contractors (but not production contractors) since 1952, this authority has never been exercised. This authority is meant to cover disaster situations that could involve hundreds of millions of dollars. As a practical matter, it is hard to conceive any Government agency trying to make any such settlement except after presentation of all the facts to the Congress, particularly since no funds would be available for any such huge expenditures. In the event of demonstrated need, appropriate legislative action could be taken promptly, on the basis of actual facts rather than hypothetical conjecture.

For this reason, the proposed indemnification authority appears to provide little more than an acknowledgment that the Government will stand behind any defense contractor for any claims arising out of unusually hazardous risks in research and development contracts. Clearly, the space program will not be affected by deferring action on this proposal until the next session of the Congress.

AMENDMENTS TO HOUSING BILL

Mr. JOHNSON of Texas. Mr. President, the distinguished Senator from Alabama [Mr. SPARKMAN] is in the Chamber. I am informed that he desires to offer to a bill now on the calendar certain amendments which would deal with the housing situation, so as to prevent certain programs from being shut down when they expire at an early date. Will the Senator from Alabama tell us how long he thinks it will take to consider the extension amendments?

Mr. SPARKMAN. Mr. President, so far as I am concerned, I would not require any time more than to make a mere explanation; and I think the explanation could be simply this: The amendments will be the identical provisions lifted from the housing bill which the Senate accepted, which are noncontroversial, and which, I think I can say, are clearly nonpartisan.

Mr. JOHNSON of Texas. Mr. President, before the Senator from Pennsylvania [Mr. CLARK] leaves the floor, I should like to ask him if he is agreeable to the suggestion made by the Senator from Alabama, to take three noncontroversial provisions from the housing bill as passed by the Senate, and to consider them as an amendment to another bill, so that the House may act before the program expires.

Mr. CLARK. Yes; if I may have 5 minutes.

Mr. JOHNSON of Texas. May I ask the Senator from Illinois [Mr. DIRKSEN] to state his view?

Mr. JAVITS. Mr. President, if the Senator from Texas will yield to me, I am a member of the committee and am very much interested in housing. Like the Senator from Pennsylvania [Mr. CLARK], I have been apprised of the whole situation. I am quite prepared to coincide with it, but I should like to have 5 or 6 minutes in which to interrogate the Senator from Alabama.

Mr. DIRKSEN. It occurs to me, since we have been over this ground many times before, and the amendments are acceptable to the administration, that we have 10 minutes on a side. I should think that would be enough.

Mr. JAVITS. I should like to have 5 or 6 minutes. The Senator from Illinois knows why. He and I have discussed the question.

Mr. LAUSCHE. Mr. President, what assurance is there that only those items will be dealt with by amendment? What will prevent other amendments from being offered to try to embody what is in the original bill?

Mr. DIRKSEN. We have canvassed the situation with respect to Senators who had intended to offer other amendments.

Mr. LAUSCHE. I ask the majority leader, what will be his position if an effort is made to expand the efforts into fields which are not contemplated by the Senator from Alabama?

Mr. JOHNSON of Texas. I would not want to pass judgment unless I had seen some of the proposals. However, I believe the Senator from Alabama would be within his rights to move to table them.

Mr. SPARKMAN. Mr. President, as it relates to housing, if the Senator from Ohio means other provisions in the omnibus housing bill, I recognize the realities of the situation. The Senate passed a good housing bill. I think all of us will agree to that. But we know we do not have a chance to get that bill through Congress. There are three housing programs which need immediate attention. First, the FHA title I, home repair and improvement program will expire in a few more days; second, the college housing loan program has no funds, and, third, the community facilities loan program for needed public facilities for small towns and cities is out of funds. Perhaps it is worthwhile to note that the President requested funds for the third program I mentioned. The amendment I offer relates to these three programs only. We consider them to be noncontroversial. I certainly would oppose

the bringing up of any other amendments, and I would move to table them.

Mr. DIRKSEN. I would have to oppose any other amendments.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the measure relating to housing amendments is called up, there be a limitation of debate not to exceed 15 minutes on a side, the agreement to be in the usual form.

Mr. JAVITS. Mr. President, reserving the right to object, I agree thoroughly with the Senator as to the program. I question the propriety of the agreement. We had an agreement the other day which did not then provide for amendments. With all respect, that is what we ought to be doing. I shall not object to this request. Does not the majority leader feel, nevertheless, that he should provide for the possibility of other amendments?

Mr. JOHNSON of Texas. I do not. If other amendments were proposed, the whole matter would be opened up, and everything we now have would be destroyed. The House has to act, and we know that these are the three things we want to have passed.

Mr. JAVITS. There will be nothing to stop any Senator from submitting an amendment anyway. There would not be any time to discuss amendments. I am perfectly willing to agree to the proposal. I shall not object.

The PRESIDING OFFICER. Is there objection to the proposed unanimous-consent request? The Chair hears none, and it is so ordered.

IMPROVED TELEVISION SERVICE AND SCHEDULE OF FEDERAL COMMUNICATIONS COMMISSION HEARINGS

Mr. PASTORE. Mr. President, as the Senate knows, the Committee on Interstate and Foreign Commerce, and particularly the Subcommittee on Communications, has been working for a number of years on the problem of bringing television service to smaller communities. Extensive hearings have been held by this committee. In fact, my subcommittee held field hearings in five States in the West, last year, on this very subject. A report, entitled "The Television Inquiry—TV Service for Smaller Communities," was issued in December 1958.

Proposed legislation in the form of a measure regulating community antenna television systems was reported by this committee, and after extensive debate has been recommitted to the committee, for further study.

In addition, a specific bill, S. 1886, relating to certain authority relating to television boosters was passed by the Senate and the House, and has now been signed into law.

It is heartening to note that the Federal Communications Commission has moved promptly to exercise its new authority, recently voted by Congress, to regulate certain rebroadcasting activities.

The legislation was signed by the President on July 7, 1960, as Public Law 86-609. It permits the FCC to authorize unattended operation of TV translators and also to grant licenses for such devices, even though they had been constructed without prior FCC authorization.

Within 3 weeks after such legislation was approved, the FCC adopted rules to provide for the licensing of VHF and UHF translators under modest technical requirements designed to minimize the hazard of harmful interference from these low-power devices. The new FCC rules provide a reasonable period of time for existing unlicensed stations to comply with the new regulations. During this interim period, temporary authorizations will be issued for the operation of these devices.

On August 22, the FCC dispatched a team of experts in its broadcast, field engineering, and legal units into centrally located cities in the Western States, to meet with TV booster operators and to advise them how to obtain interim authority for continued operation while preparing to convert to new low-power VHF translator authorizations. The Commission is to be commended for taking the initiative in rendering this public service to the operators of these installations, many of which are located in small, isolated communities. In most instances the operators are unfamiliar with the legal and technical requirements of the Commission.

At these meetings the FCC experts explained the purpose of the new legislation and gave technical advice and assistance to such operators in filing applications for temporary authorizations under the new procedures. State and national representatives of TV repeater groups are also cooperating with the FCC staff in these meetings.

The revised schedule of meetings is as follows:

City	Place	Date	Time
Prescott, Ariz	Public Service Co. auditorium	Aug. 23	9 a.m.
Denver, Colo	State capital, senate chamber	Aug. 24	1 p.m.
Casper, Wyo	Townsend Hotel	Aug. 25	11 a.m.
Miles City, Mont	Elks Club	Aug. 27	11 a.m.
Great Falls, Mont	DeMolay Youth Center	Aug. 29	11 a.m.
Wenatchee, Wash	Regional library	Aug. 30	11:30 a.m.
Salt Lake City, Utah	State capitol, Governor's board room	Sept. 1	9 a.m.
Redmond, Oreg	Westminster Hall	do	1 p.m.
Pocatello, Idaho	City hall	Sept. 2	11 a.m.
Grand Junction, Colo	KREX-TV auditorium	do	1 p.m.
Rapid City, S. Dak	(Mr. Larry Owens, chamber of commerce, to arrange place of meeting.)	Sept. 3	2 p.m.

NEW FARM PROGRAM NEEDED

Mr. YOUNG of Ohio. Mr. President, despite the fact that the Eisenhower administration has poured more than $40 billion into its agriculture programs, the economic plight of the Nation's farmers continues to worsen. At the same time, Government warehouses are bulging at the seams with surplus farm products that flow in endlessly.

If our present Republican farm program should continue to be followed, there is every likelihood that the situation will continue to deteriorate. The unfortunate Eisenhower-Benson policies have proven, beyond a doubt, that this Republican administration is unable to cope with the problems facing the American farmer. No wonder Vice President NIXON recently publicly dissociated himself from the Eisenhower-Benson farm policies.

In 1952 President Eisenhower promised 100 percent of parity. The parity ratio is lower today than at any time since 1940. During the last 7 years, this administration, under the guidance of Secretary of Agriculture Ezra Taft Benson, has reduced parity drastically on every basic farm program in existence except for tobacco and wool, which has been maintained at roughly 110 percent. Of course, people produce wool in Secretary Benson's State and in other Western States.

FARMERS' PLIGHT WORSENS

From 1952 to 1959 farm income dropped 35 percent, and the farmer's share of the food dollar decreased by 19 percent. American farmers last year received $11 billion less for their products than they did in 1951, while consumers paid $7.4 billion more for these same food products.

At the same time, farm distress sales went up 27 percent; surpluses increased by 636 percent; farm debt rose by 43 percent; and the farmers' production expenses soared 15 percent.

In 1958 the income per person on the farm was approximately half the income per person off the farm.

With production costs rising and prices for farm products declining, the producers of our country's food and fiber, caught in this cost-price squeeze, are finding it increasingly difficult to operate.

The much-heralded Eisenhower soil bank program has proven a dismal failure. Farm income has dropped; prices have skyrocketed; surpluses have become unmanageable. As a result, the family farmer is virtually disappearing from the American scene. More than 3 million persons have been driven from the farm since 1952.

It is easier for the farmer to put his land, or at least his most unproductive acres, in the soil bank and take a job in the city than to struggle under Republican programs for a meager living on his farm. The great midwestern heartland of America is gradually becoming a vast economically depressed area.

Faced with discouragement on every side, the small family farmer feels that there is no longer hope in the land. Republican farm policies have made it easy for the large corporate interests and huge farm syndicates to seize our Nation's vast acres of farmlands.

EIGHT YEARS OF WEAK POLICIES

This administration has not offered us a sound farm program in nearly 8 years. Its policies have weakened the ability of the Government to aid farmers, have driven the young people from the land, and are stifling our small town business communities. Must we have only huge corporate farms in our country?

Only recently, after his nomination, the Republican candidate for the Presidency admitted that both the country and the farmers need a fresh approach to the farm problem. He stated it is essential that we abandon the rigid positions of the last 8 years and adopt new leaders and new programs, not wedded to the past. We have yet to hear what his proposed new programs will be.

If the past is any indication, it might be recalled that in 1954 this same man predicted that the verdict of history will be that Secretary of Agriculture Benson has been one of the best Secretaries of Agriculture in our history and that he was a friend of the farmer.

In 1956, he said that he was confident the Republican farm program was right and that if continued it would bring the farmer unparalleled prosperity.

In February of this year, the Republican candidate hailed Secretary Benson as the greatest Secretary of Agriculture in our country's history.

Now he has suddenly had a change of heart. The same Secretary of Agriculture that he hailed as the greatest in our country's history will be forced to walk the plank of political expediency if the Vice President is elected in November.

Mr. President, I must say that in this regard I agree with the Vice President. I am delighted to see him finally come around to the viewpoint the Democratic Party has taken for the past 8 years. It is always heartening to receive converts to the principles of the Democratic Party, especially one so notable as the Republican candidate for the Presidency.

But try as he may, this candidate cannot divorce himself, with a few words, from 8 years of the fantastically expensive and yet bankrupt farm policy of the Eisenhower administration.

PROGRAM COSTS SOAR

Under President Eisenhower, the cost of all Federal farm programs exceeded $7 billion in 1959 alone. Under President Truman in 1952, his last year in office, all these programs cost taxpayers less than $700 million—one-tenth of the cost last year under President Eisenhower and Secretary Benson.

Throughout the Truman administration, the farm program cost less than $14 billion.

The farmer received 90 percent of parity, could pay his taxes, bills, and feed his family. The total cost of the Eisenhower-Nixon-Benson farm programs will exceed $40 billion. Now the farmer is having trouble holding on to his land, much less making a living. Empty promises do not pay off mortgages.

Mr. President, there is no farm problem. It is an American problem. As long as human beings require food, anything that concerns the men who grow it concerns everyone.

It is not, nor is it going to be, an easy problem to solve. Great imagination, intelligence, skill, and foresight will be required. Most important, it will require human compassion and understanding—our farmers must no longer be looked upon as nothing more than mere economic units. This is a human problem as well as an economic one. As such, we must have humane solutions.

Prosperity for our farmers can be brought about only by passage of good workable legislation that will boost the income of farm families, and by revamping our lopsided national economy into some semblance of equality between industrial workers and farmers.

During the past 6 years Congress has tried again and again to legislate toward this end. Each time it was met by the veto. With the election of a Democratic President and Congress, we can begin to take steps toward curing this nagging cancer in our economy.

Mr. President, it is not only our farmers, businessmen, and consumers who have suffered as a result of our farm policies during the past 8 years.

The hundreds of millions of people—over half the world's population—who go to sleep hungry every night have also suffered.

At the present time we have over $7 billion of food in storage throughout the Nation. For the first time in history a Nation is faced with the problem of how to dispose of its food, while millions throughout the world are starving.

OVER $1,000 A MINUTE

Every day of the year American taxpayers are paying over $1.5 million rent or over $1,000 a minute to store our surplus food products even as they spoil. Last year it was $612 million; this year $700 million. Who knows to what heights this cost will rise? Rats are the principal beneficiaries while human beings both at home and abroad go hungry.

Is there any better weapon for the Communist dictators of Russia and Red China to use against us than pictures of our granaries straining at the seams with surplus food?

Mr. President, our agricultural policy is a vital part of our foreign policy. Food is the universal language. It can bring us the gratitude of the peoples of the world or it can bring us their enmity. The choice is ours.

Expert dietitians tell us that it takes from 2,500 to 3,000 calories per day for an average man to carry on his daily activities. The daily per capita consumption in most parts of Asia is 1,000 calories. For these people there is little energy left for building schools, hospitals, and highways or to defend themselves and work their farms.

If we sincerely wish to establish sound democratic governments and institutions in this area and in all the underprivileged nations of the world, we must help them to help themselves.

In sharing with them the blessing of our bountiful food supply—a supply not yet really tapped—we will earn their undying gratitude and do more to further democracy and combat communism than could be accomplished with guns and tanks.

At the same time, we shall be putting to use billions of bushels of food, storage of which is paid for by taxpayers, and which is presently inexcusably going to waste.

In doing so, there is no need to upset the world produce market or to destroy existing channels of trade. This tired old argument has been constantly used by people of little imagination to defeat any real food for peace program.

Mr. President, I am speaking of feeding the hungry people of the world who today do not and cannot buy food. They do not understand world market conditions and economic statistics. They are hungry—their sole aim in life from sunrise to sunset is to scratch enough food to keep their families alive.

To feed these people and the hungry of our own Nation will upset nothing except, perhaps, the Communists who thrive on human misery.

FOOD FOR PEACE

Mr. President, we can do this by ourselves. Better yet, we can utilize the machinery of the United Nations to distribute our surplus food to the starving millions of the world.

There could then be no charge of "Yankee imperialism" or greedy self-aggrandizement. With one bold stroke—a move that would not cost us one additional dollar—we could regain the good neighbor image of America—the true image of America—painstakingly created by Franklin Delano Roosevelt and Harry S. Truman.

Mr. President, this is a time for boldness. For too long the image of America has been allowed to deteriorate through our carelessness and through Communist propaganda into that of a money-hungry, luxury-loving, overstuffed land.

In what better way can we reveal to the world our real image and our true purposes than by offering our surplus food to the community of nations through its established organization—the United Nations?

At the same time, we will be helping to solve our farm problem and to restore dignity and prosperity to American farmers.

The mistakes of the past are over and done. Farmers will remember in November who has been for them and who has been against them. We must look to the future. As the distinguished junior Senator from Massachusetts [Mr. KENNEDY] has said, we must establish and explore new frontiers. Next year, under leadership of a Democratic President, an all-out food for peace program may be launched as a realistic farm program will surely be formulated.

"LAND, WOOD, AND WATER"—BOOK WRITTEN BY SENATOR ROBERT S. KERR

Mr. SYMINGTON. Mr. President, all of us know of the fine constructive mind possessed by the senior Senator from Oklahoma.

All of us know also that he is one of the great public speakers of our time.

Not all of us know, however, that he is an outstanding author.

ROBERT S. KERR has written a very informative, a very readable, and very timely book, entitled "Land, Wood, and Water."

The title was inspired by his father, Sam, who traveled horseback from Bakersfield, Mo., to Ellis County, Tex.; and thence, with his new wife, Maggie, by covered wagon to Ada, Okla., where they built a log cabin which became the birthplace of our colleague.

Senator KERR says that his parents were in search of three necessary elements to the existence of the pioneer—land, rich enough to produce their crops; wood, for the buildings and fuel; and water, clean enough for their household use—bountiful enough in the form of rainfall to produce their food, feed, and fiber.

In this magnificent book our colleague explains why the future of America and the future of the world both depend on what we do about the natural resources we possess.

Mr. President, who in our midst is more qualified to speak out on this subject?

When BOB KERR came to the Senate, he sought membership on the committees dealing with these important subjects. It did not take long for all to realize that here was a man of vision, of knowledge, and leadership in the field of natural resources.

Senator KERR now serves as chairman of the Select Committee on National Water Resources, and in that position is bringing forcefully to our attention the need for a forthright handling of the water problem of this Nation.

By his portrayal of the lack of conservation and the excess of pollution of our water resources, he has shocked most out of their complacency and won converts to his theme of land, wood, and water.

His exposé of this situation has helped in both political parties writing vigorous action planks on natural resources into both party platforms.

As chairman of the important Subcommittee on Rivers and Harbors and Flood Control of the Public Works Committee, BOB KERR has brought to us some of the most important legislation ever enacted by the Congress.

I refer to such acts as the Water Supply Act of 1958, the Water Pollution Control Act, the Niagara Power Act, the Upstream Flood Control Act, the TVA Financing Act, the Omnibus Rivers and Harbors Acts of 1958 and 1960. These are only a few of the legislative monuments to this superb leader in the field of water resources.

This book will be of special interest to our Senate colleagues because although the book was published in a political year, it is singularly free from partisanship and sounds a keynote for unity.

The introduction to the book was written by our distinguished majority leader, Senator LYNDON B. JOHNSON. He sets the tone of the book when he says:

"Water must not be a partisan subject. Water policy simply does not belong in politics. Water is the indispensable resource for the people. It is not a resource for our parties or partisans. The issue of water is action versus inaction—to win or not to win."

Mr. JOHNSON of Texas. Mr. President, will the Senator yield to me?

Mr. SYMINGTON. I yield to the distinguished majority leader.

Mr. JOHNSON of Texas. I thank the Senator for his references to me, and I am very appreciative of the remarks he has made. I think the Senator from Oklahoma is most deserving of this commendation. I wish to inform the Senator that, after reading the book, we were so impressed with it and the need of our people to have an opportunity to read it that Mrs. Johnson and I have purchased and sent to each institution of higher learning in our State a copy of this book as a present from us.

Mr. SYMINGTON. I thank the majority leader. The first time I visited him in his home State, he showed me the results of some of the work that he and other Texas statesmen, like the Speaker of the House, had done in this field. I am going to follow his leadership in this connection, as I have in others, and place this book in the institutions of higher learning of my own State.

Mr. President, in the same vein, Senator KERR quotes President Eisenhower as warning:

> If we are to advance agriculturally and industrially, we must make the best use of every drop of water which falls on our soil or can be extracted from the oceans.

Senator KERR recognizes that any conservation program must have broad public support. This cooperative action must stem from an enlightened and enthusiastic public opinion.

Senator KERR's book can go far toward this objective. I hope it will be read by Americans generally, especially our youth. It should be on the shelves of school and city libraries.

It is a privilege to congratulate this great public servant for his fine contribution to both the literature of America and the future of America.

Mr. FREAR. Mr. President, will the Senator yield?

Mr. SYMINGTON. I am glad to yield to my able colleague from Delaware.

Mr. FREAR. First, I want to congratulate the Senator from Missouri for taking note publicly of the fine work of the senior Senator from Oklahoma. The words he has spoken are true. The Senator from Oklahoma is an industrious person working for the benefit of others. The Senator from Missouri has so amply stated it that, if he will permit me, I would like to share in the statement he has made about the Senator from Oklahoma.

Mr. SYMINGTON. I am proud to share my high opinion of the Senator from Oklahoma with the able and distinguished Senator from Delaware.

The PRESIDING OFFICER (Mr. PASTORE in the chair). The time of the Senator has expired.

REMOVAL OF CERTAIN LIMITATIONS ON DEFENSE EXPENDITURES

Mr. SYMINGTON. Mr. President, turning to another matter, I ask unanimous consent that Senate Resolution 376, a resolution for removal of certain limitations on defense expenditures, now be laid before the Senate.

Mr. DIRKSEN. Mr. President, I object.

The PRESIDING OFFICER. Objection is raised.

Mr. SYMINGTON. Let the RECORD show that I have done my best in recent days to make this question of removal of money limitations on high priority defense items a practical matter, and that it is unfortunate those now opposed to it do not practice what they preach.

Mr. DIRKSEN. Mr. President, in connection with my remarks, I ask unanimous consent to insert at this point in the RECORD a statement.

The PRESIDING OFFICER. Is there objection?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DIRKSEN

Last night I took occasion to study, in some detail, the speech delivered on the floor of the Senate yesterday by the junior Senator from Missouri. Among other surprising statements contained therein I was dismayed to find that there were quite a number which were left incomplete in a most damaging way.

For example, on page 5 of the released text, the junior Senator from Missouri quotes the Deputy Secretary of Defense as follows:

"The House Appropriations Committee recommended, and the House approved, an increase of $115 million for 'airborne alert capability'. After reconsideration of this problem, we again recommended the program as proposed in January."

Here the quotation from the Deputy Secretary of Defense has been abruptly ended. If the junior Senator from Missouri had continued his quotation of the Deputy Secretary of Defense just one more sentence we would have discovered why the Defense Department again recommended the program as proposed in January. The omitted sentence reads as follows:

"Section 512 of the bill now before this committee—section 612 of the 1960 act—gives the Department the authority to increase this program if the need should arise."

Specifically, section 512(b) of the Defense Department Appropriation Act for 1961 states:

"Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of R.S. 3732 (41 U.S.C. 11)."

This is the provision enacted on the initiative of the Senate last year. As you can see, it gives the Secretary of Defense the broadest kind of authority with respect to incurring additional expenses for an airborne alert.

As a matter of fact, it was the consensus of the whole Senate that section 512(b) provided the Defense Department with all the authority needed to incur whatever expenses were deemed necessary for an airborne alert. That was the very reason why in the bill passed by this body we did not support the House action appropriating $115 million in additional funds for an airborne alert. The additional $85 million finally enacted arose out of a compromise in conference with the House.

Now that the money has been appropriated the Secretary of Defense has decided to use it instead of relying to that extent on section 512(b) of the act.

The junior Senator from Missouri then goes on to say, on page 6 of the released text, that the letters from Secretary Gates to the majority leader are not clear, and I quote the Senator, "in fact they are misleading." Yet when I read Secretary Gates' August 9 letter to the majority leader in context with the majority leader's July 28 letter to the Secretary of Defense, I find nothing that is not perfectly clear and certainly nothing that is misleading.

The majority leader's letter states:

"This net increase of $661,608,000 was the end result of various program increases of roughly $1¾ billion and individual reductions totaling approximately $1.1 billion."

He then requests a detailed statement on Defense Department plans to utilize the funds for each of the individual items or programs provided by the Congress in excess of the budget request.

The Secretary's reply simply states that a large part of the $1¾ billion of individual items or programs for which the Congress appropriated additional funds were, and I quote, "recommended by the administration to the Senate Appropriations Committee subsequent to the January budget request." In attachment A to the Secretary's reply we find a table which shows, on the third page, that additional appropriations provided by the Congress over the President's January budget did indeed total about $1¾ billion as stated by the majority leader; the exact figure being $1,815,236,000. Of this amount, the table shows $1,371,442,000 of additions already applied by the Department of Defense to the programs designated by the Congress.

A footnote to the $1,371,442,000 figure indicates that, "Included in these amounts are the additional funds requested by Department of Defense revisions for Army modernization, airlift aircraft, Minuteman, Polaris, antisubmarine warfare research and development, Midas, Discoverer, Atlas, BMEWS, and certain air defense programs, totaling over $750 million." This is, of course, the figure cited in the Secretary's August 9 letter to the majority leader. In the light of these facts, how can anyone who has read with any degree of care the majority leader's letter and the Secretary's reply claim that the Secretary of Defense has fostered an untruthful impression?

Now, elsewhere in his speech, the junior Senator from Missouri states that "The President's January budget asked for $1,337 million for Army modernization; and there were no official or semiofficial requests made to the Congress to change that figure." Yet I find on page 1491 of part 2 of the hearings before the Defense Department Subcommittee of the Senate Appropriations Committee that the total requested of the Senate by the Department of Defense for procurement of equipment and missiles, Army, was $1,366,500,000 as compared with the $1,337 million in the President's January budget. This is $29½ million more than the amount requested in the January budget. This particular budget revision was one of many enclosed with a letter dated May 12, 1960, from the Secretary of Defense to the distinguished chairman of the Department of Defense Subcommittee of the Senate Committee on Appropriations.

So we see that there have in fact been official requests made to the Congress not only to change the $1,337 million figure for Army modernization but for many other items including all those mentioned in the first paragraph of the Secretary's August 9 letter. And I include therein the Defense Department's recommendation to the Senate Appropriations Committee for $150 million more for airlift, over and above the amount requested in the January budget.

I was particularly intrigued by the remarks of the junior Senator from Missouri with respect to the antisubmarine warfare research and development program. He quotes the Deputy Secretary on this matter as follows:

"With regard to the $100 million of additional funds voted by the House for ASW research and development * * * we recommend that the remaining $58.1 million be eliminated."

In going back into the hearings to discover what words had been omitted in this quotation, I found the following on page 1537:

"We now believe that we could usefully apply $41.9 million of that amount. This would bring our 1960–61 level of obligations in this area to about $220 million, or some $20 million higher than the level previously planned."

The Deputy Secretary of Defense then went on to say:

"We recommend that the remaining $58.1 million be eliminated from the 'Research, development, test, and evaluation, Navy,' appropriation."

So we see that the Defense Department actually recommended to the Senate Defense Appropriations Subcommittee that $41.9 million for ASW research and development be added to the amount requested by the President in January. And, of course, the Defense Department has used these funds. Now, just who is doing the misleading?

It may be that the junior Senator from Missouri has a point to make, but it certainly is not clear to me what it is. The Defense Department did recommend to the Senate Appropriations Committee amounts in excess of the President's January budget, just as Secretary Gates stated in his August 9 letter to the majority leader. I see no useful purpose served by Senator SYMINGTON'S deliberate obfuscation of this issue in a fog of semantics.

The simple fact remains, that of the $1¾ billion in specific programs added by the Congress to the President's January budget request, more than $750 million of such items were recommended to the Congress by the Defense Department subsequent to January 1960. Whether or not some of these amounts were less than the amounts recommended by the House is immaterial. The fact remains that the Department of Defense on certain items did recommend to the Senate Appropriations Committee increases over the amounts requested in the January budget. And that is all the Secretary of Defense is saying.

Much was said on the floor of the Senate yesterday about the "freezing" of $621 million. Anyone who has followed the defense program closely during the last several years would know that at the beginning of any fiscal year some relatively small amount of funds are usually unallocated to specific programs. So it has been in fiscal year 1961. The majority leader was informed by the Secretary of Defense on August 9 that the Department of Defense had available for future requirements a total of $621 million. This represents only a little more than 1 percent of the total amount available for obligation in fiscal year 1961—about $51.2 billion. It represents only about 1½ percent of the amount appropriated by the Congress for fiscal year 1961, approximately $41 billion. Why, with 10 months of the fiscal year yet to go, such a modest reserve should so greatly agitate certain Members of the Senate is hard for me to understand.

You will recall that the $621 million held for future requirements was the amount shown in the Department's financial plan dated August 9. As a matter of interest, I contacted the Defense Department to learn the present status of these funds, and was informed that the Defense Department has released $107 million of the $621 million. For example, of the $17 million of military construction funds shown in the August 9 plan as available for future requirements, $3 million has already been released for the Army Reserve. The release of an additional $3 million of military construction funds is now under consideration.

I have also learned that all the additional funds appropriated by the Congress for the Samos program will also be used. The Secretary of Defense, in his August 9 letter, pointed out that this program was still under technical study but that it then appeared that another $50 million would be used for that purpose. Now that the technical study has been completed, it has been determined that all $83.8 million of the additional funds appropriated by the Congress for Samos will be needed in fiscal year 1961.

You may recall that the Secretary in his August 9 letter talked about initiating development of a new longer range Polaris missile. He pointed out that this program was not included in either the January or the revised Defense Department budget requests or in the congressional add-ons, and that the additional funds required would be found by reprograming. Now I have learned that the $33 million remaining unused for Polaris submarines and the $37 million remaining unused for Polaris missiles in the August 9 financial plan will be utilized for the development of this new longer range Polaris missile.

I understand that the transfer of these funds will be effected under the authority of section 535 of the Department of Defense Appropriation Act of 1961. This is the provision which authorizes the Secretary of Defense, should he deem it advantageous to the national defense, to accelerate any strategic or tactical missile/satellite program, by transferring for this purpose up to $150 million from other accounts.

So it is clear, as it certainly should have been from past experience, that the financial plans of the Department of Defense are living things. Changes are made all during the fiscal year as they are found necessary and desirable. And this is as it should be. We are living in times of rapid change and the defense program must not remain static. That is why the Congress has provided the Department of Defense with a considerable degree of flexibility in the utilization of its funds.

Thus, we find that in the last 17 days the $621 million held for future requirements, which seems to be burning a hole in the pockets of some of my colleagues, is now reduced to $514 million—and we still have 10 months of the fiscal year to go. All this hue and cry about freezing and impounding defense funds is much ado about very little. It may be that these funds will be used in other categories under the various transfer provisions provided in the law, or with the express permission of the Congress. But even without being privy to all the plans of the Defense Department, I am sure that by the end of this fiscal year, 10 months hence, little if any of the $514 million still available for future requirements will be left unused.

In this connection I would remind the Senate that the President stated in his special message to the Congress on August 8 that some additional funds for military personnel and operation and maintenance may be required by the new readiness measures recently undertaken by the Department of Defense. We know, of course, that additional funds will be required in fiscal year 1961 to pay for the civilian pay increases voted by the Congress earlier in this session.

One final comment. The distinguished majority leader yesterday expressed concern over the fact that the executive branch does not use promptly every dollar appropriated

by the Congress. He went so far as to suggest that failure to do so might even be unconstitutional.

Now, I do not propose to be an expert on the Constitution nor even an expert on appropriations. But, we have it on the authority of no less an expert than the distinguished chairman of the House Appropriations Committee, Mr. CANNON, that, and I quote, "Appropriations of a given amount for a particular activity constitute only a ceiling upon the amount which should be expended for that activity." Chairman CANNON goes on to say that "the administrative officials responsible for administration of an activity for which appropriation is made bear the final burden for rendering all necessary services with the smallest amount possible within the ceiling figure fixed by the Congress" (Rept. 1797, 81st Cong., 2d sess., p. 9).

In the light of the facts I have recited here today, I feel that the remarks of the Senator from Missouri on the floor of the Senate yesterday constitute a grave injustice to Secretary of Defense Gates, and a serious disservice to a better public understanding of the defense program.

AMERICAN BAR ASSOCIATION CONVENTION AND SPACE ACHIEVEMENTS POINT UP NEED FOR INTERNATIONAL RULES GOVERNING OUTER SPACE

Mr. KEATING. Mr. President, an often overlooked aspect of recent American accomplishments in outer space is the fact that there are no rules of the road to govern space territory. While our scientists have forged ahead with amazing achievements in outer space, our laws have failed to keep pace.

This is a problem which has concerned me for some time. For several years I have urged that the nations of the world get together to formulate laws regarding territorial rights and peaceful uses of outer space. In my view, this task can best be accomplished through the medium of the United Nations.

Mr. President, this is a job which cannot be delayed any longer. With each passing day, with each new space achievement, the need for international rules for outer space becomes more imperative.

It is particularly appropriate in this connection that the American Bar Association is today holding its annual meeting in Washington. As a lawyer, I am particularly pleased to welcome these distinguished leaders of the bar to the Nation's Capital.

The ABA has, of course, done tremendous work to insure that our laws and our lawyers live up to their important roles in our society. This fine organization has led the way in insuring that our laws are up to date, and it is especially appropriate, therefore, that the ABA has pioneered in studies on the need for drafting rules for outer space.

An impressive number of leaders in the ABA have devoted considerable time to the consideration of this problem, and I am confident these studies will contribute substantially to the formulation of the needed rules.

It is my hope that recent events, in concert with the impetus supplied by the ABA studies in this field, will prod action before long. In this connection, an excellent editorial in Newsday of August 22, emphasizes the legal problems posed by recent space conquests. It points out the pressing need for reaching international agreements on outer space without further delay. This message deserves wide attention, and I therefore ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objecion, the editorial was ordered to be printed in the RECORD, as follows:

THE FUTURE IN SPACE

Space achievements of the past few days are vivid proof that it will not be long before a human being will be shot into orbit and brought safely back to earth.

Both the United States and Russia are squarely on the verge of that momentous feat by virtue of their most recent successes. Twice in a row, the United States has recovered a capsule ejected from an orbiting satellite—the second capsule being picked off in mid-air. And now, the Russians have brought back to earth two dogs which had been orbiting for 24 hours. The space horizon thus grows ever more exciting.

That horizon, however, also grows ever more ominous for the simple reason that there are no international rules governing outer space and the conquests which surely will be made there during this generation. There is no guarantee that outer space will be used for peaceful purposes only. Nor has there been any determination made as to the territorial rights of the first nation to reach a celestial body.

These considerations—so important—have been put off far too long. Already it may be too late to come to any international agreement on these most difficult problems. Certainly the most vigorous measures toward that end must be taken now if we are to avoid what easily could be a chaotic mess in space. Scientifically, we are ready for what is ahead. Politically, we are woefully ill prepared.

STIRRING CENTENNIAL TRIBUTE TO IGNACE PADEREWSKI

Mr. KEATING. Mr. President, there are few great figures in history who have left their mark more indelibly in the hearts of their fellowmen than the world-famed Polish genius, Ignace Paderewski. In this year of 1960, the centennial of the birth of the gifted artist-statesman is observed. It was my high privilege to support strongly the proposal for the issuance of a special anniversary stamp commemorating this historic centennial.

Ignace Paderewski remains for us, and will always remain, a symbol of the close and enduring ties of friendship which continue to unite our Nation with the brave people of Poland. Despite the harsh captivity they now suffer at the hands of Communist tyranny, these proud and noble people still preserve in their heart of hearts the traditional spirit of friendship which for so many years has marked the relationship between the United States and Poland.

In view of the dedication of this year to the honored memory of Paderewski, I believe it wholly appropriate to cite an eloquent address delivered at the Arlington National Cemetery by the Honorable Arthur E. Summerfield, Postmaster General of the United States, on the occasion of the recent Paderewski Centennial ceremonies. I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE SPIRIT OF PADEREWSKI: CHALLENGE TO OUR TIMES

(Address by the Honorable Arthur E. Summerfield, Postmaster General of the United States)

This is a solemn moment for me—as I know it is for you.

I am deeply honored to join with you in paying tribute to Paderewski on this centennial commemoration of his birth.

I want to congratulate Mr. Witkowski, the Paderewski Foundation, and the Polish American Congress on organizing this moving tribute to a great statesman and a great musician.

My assignment today is not an easy one. It is difficult, if not impossible, to reflect, in words, the towering stature of this man who walked among us during my youth and early manhood.

It is, I believe, fitting that we commemorate this man in the Valhalla of American heroes. Here, with us, are his bodily remains. But today we note and rededicate ourselves to his spirit.

Only a handful of those whose home and citizenship was in other countries lie here. Yet, if there were only one from a foreign country, it would be appropriate that he be Paderewski.

Around him sleep scores of thousands of Americans who have given their lives to build, preserve, and strengthen our country.

They would understand the passion that ruled Paderewski throughout his life in his devotion to his native Poland.

He would understand those buried here, who gave their final measure of devotion to the principles of freedom and independence.

They rest together in good and honored company.

All Americans who feel a profound love for Poland, and recognize the great contributions of the Polish people to American freedom, understand her pride in claiming Paderewski as a son. But the Polish people would be the first to recognize that he belongs to more than Poland. Through his genius, he belongs also to America and to all mankind.

For Paderewski was a genius in the truest sense of the word, and he dedicated his genius to the highest ideals in the worlds of both art and statesmanship. Beyond that, Paderewski displayed a genuine nobility of person, and a truly Christian strength of character.

No one who has seen him can ever forget the majestic head and inspired face. Nor can we forget his dignity of carriage, which often seemed to make him grow twice as tall. It was his spirit, however, that shone through, and is remembered by all of us here today.

A longtime friend of Paderewski's once said of him:

"He had boundless vitality. When he came into a room, the lights seemed to go up."

It was this inner light—this inner fire—that sustained him through his 81 years of life, and won him the admiration and reverence of all who prize the ideals for which he stood.

Few now living can remember the blaze of glory with which he burst on the American musical scene, that night in Carnegie Hall 69 years ago.

But no free peoples will ever forget the courage and devotion to country which he displayed so remarkably at the Paris Peace Conference in 1919, and as the first Prime Minister of a reborn, independent Poland.

Paderewski knew war, revolution, and tyranny even as an infant. As the merest child of 3, he saw his father cruelly thrust

into prison by the Russian oppressors in revenge for his courage in aiding the Polish patriots who fought to throw off the yoke of their eastern conqueror.

One must believe that this horror-stricken little boy had burned in his heart a sight which laid the basis for his determination in the protection of his native land.

In this faith in his beloved Poland, he persevered to the last hours of his life—never faltering—just as he persevered in seeking perfection in his musical skills, his poetry, and his role as a composer.

But his guide throughout his life was love for man. If freedom and independence demanded war and revolution, he did not waver. But his genius was in building and creating, rather than in violence and destruction.

It was the mark of this great man that when he composed the War Hymn for the Polish soldiers in World War I, the battle song carried the phrase, "My errand is not of hatred, but of love."

Similarly, in the period after World War I it might have been the easy path to distract the Polish people from their problems at home by turning to war against the Russians.

Paderewski's hatred for the Bolsheviks was no less than that of his countrymen, but he nevertheless chose the harder path of recreating a new Poland—of rebuilding its economy and its society.

Always he was guided by what he knew was in the best interests of the cause of freedom and independence of Poland.

Once Paderewski was asked who was the greater—the statesman or the artist. Without hesitation, he replied "the statesman," and then gave a definition of the term which applies so accurately to himself:

"I speak of that man of state whose courage, morality and wisdom open for humanity a greater path of destiny; of those rare spirits which, voicing the innermost hopes and visions of the race, mold the future and hold up the torch for life."

Truly, he was a statesman.

I have talked of Paderewski, the man; of some of his achievements and his principles.

But what were the motivating forces that made this man's life an object of admiration and respect for his own people, and for free people throughout the world? Wherein lay the inner spiritual strength that sustained him?

Like so many men of genius who contribute so much to mankind, Paderewski was possessed of a wide range of noble qualities of character.

Yet, in reviewing his life, I am impressed by certain ones that stand out as an index to his success.

And I am struck also by the fact that these are characteristics that have marked the men of leadership throughout the ages.

Paderewski, early in life, developed to its fullest extent the stout moral pillar of self-discipline. Throughout his life this was reflected in a strength of character that was like a beacon light to others.

It supported him in the days of the Paris Peace Conference, when he sat in the councils of the victorious Allies, and worked without ceasing to secure justice and freedom for the Polish people.

Paderewski had unwavering determination in the face of adversity. He dedicated himself unhesitatingly to a cause, no matter how hopeless it might seem at the time, or what hardships it may have inflicted on him.

Paderewski was not concerned with superficial prestige, with bluster or flamboyance. He was a gentleman to the core, in appearance, in manner, and in deed. It is clear from his life that he did not believe that erratic appearance marked the great musician, any more than he believed erratic behavior was the mark of the statesman.

Paderewski had an abiding and vital religious faith. It was a real, living presence in all the actions of his life.

When he returned to the concert stage at the unprecedented age of 62, he was fearful of what the passage of time had done to his skills. Told by his sister that he had never played better, Paderewski replied, simply, "Yes, God was with me all the time."

His sincere, lifelong religious belief won him the friendship of many distinguished churchmen of his own Catholic faith. It also won him the admiration and respect of millions from other faiths, who saw in Paderewski the living example of the Christian statesman, the Christian artist, and the Christian human being.
